A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.---NO. 1.

NEW YORK, JULY 3, 1884. 133 WHOLE NO. 471.

Correspondence.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, July 1, 1884.

Six months of the year have now passed, and as soon as the June accounts are footed up the volume of business for the first half of the year can be more accurately stated. If one can believe the various statements—and I see no reason for doubting the assertions—trade has been even better than many had predicted early in the season. Many of the leading jobbers of stationers' supplies, as well as some of the manufacturers of specialties, claim to have had an increased amount of trade over the same period of last year. Collections, generally, have been good, though I do hear of some cases to the contrary.

For the holiday trade the Thorpe Manufacturing Company is presenting a line of albums and scrap-books which will not be excelled by any house in the country. The line is very extensive, and comprises many very effective designs. One series of scrap-books, called "Ideal Heads," is particularly attractive. The front cover of this book is in gold, or rather a gold background serves to bring out in strong relief the figure of a child's head. These heads are of various designs, and are lithographed in colors. The "Longfellow Album" is another beautiful work, its title-page being in fifteen colors. The lithographing is done by Armstrong, and the designing is by the most eminent artists. This album is replete with illustrations, which give pictorial presentations of many of Longfellow's most beautiful poems, while each page bears apt quotations from the great poet. Another album is the "Hour," in which appropriate selections from American poets of morning, noon, evening and midnight, are beautifully illustrated with pictorial presentations. Among the scrap-books is a line having for front covers some very artistic designs in bronze bass reliefs. This line is very rich in effect and is decidedly quite a novelty. For originality of conception, beauty of designs and artistic workmanship, these goods will not be surpassed by any house in America, and I doubt if foreign importations will equal them.

The special July number of THE AMERICAN STATIONER will give the trade some idea of what the Thorpe Manufacturing Company has to offer in albums and scrap-books, and the trade should be on the lookout for it.

Downes & Atwood are displaying some elegant samples of holiday goods. The line embraces hand-painted sachets very neatly boxed, some very pretty satin wall-pockets of unique design and an extensive stock of Christmas, New Year and souvenir cards. A very pretty card-receiver shown consists of a fringed crescent card mounted upon a satin background and designed for wall decoration. The "Kittie" sachet is a pretty little device, having a tiny envelope attached, upon which is inscribed "greetings," and makes a very attractive souvenir for children. Satin Christmas books, embellished with a number of choice coromoro cards are also among the holiday goods displayed. These novelties are all manufactured by this house exclusively for its own trade, and are really what may be styled novelties of the season.

Henry A. Young & Co., stationers and publishers, have removed from their old stand, 25 Arch street, to 55 Franklin street. An increasing business necessitated the change, as more spacious quarters and greater facilities were needed.

I. B. De Nike, representing Cameron & Amberg's Peerless Letter File, is now in this city, looking after the business interests of his house. Mr. De Nike expects to remain in Boston for some six or eight weeks. He claims that the Peerless Letter File is now in use in 569 cities and towns, with several counties yet to hear from.

G. W. Shepard, of G. W. Shepard & Co., manufacturer of the patent wooden back invoice-books, of Troy, N. Y., spent a few days of last week among the stationers of this city. Though only two years since Shepard's wooden-back invoice-books were patented and presenting to the trade, large numbers of them are in use, and the demand is steadily increasing. The trade here find them a salable article.

Mr. Downes, of Downes & Atwood, who for some weeks has been traveling in the West, presented to the trade samples of his holiday goods, is expected home in time to celebrate the Fourth of July. After a few days recreation he will take the road again.

On Wednesday night of last week a fire was discovered in the building 105 to 111 Summer street, in which were located a number of printers. Among those who suffer loss are: Geo. B. King, S. Woodberry & Co., Percival T. Bartlett, William J. Schofield, printers; the Bailey Combination Type and Printing Company, and Jones & Butterfield, publishers of the *Railroad Advertiser*. Geo. B. King suffers a loss of \$2,000—the loss of the others is not over a few hundred dollars each.

The office of Samuel Hand & Co., manufacturers of manifold copying books, which is located on the third floor of the building, was slightly damaged by water. A. L. D.

TORONTO GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, June 28, 1884.

I had to take a run up to Hamilton a few days ago, and while there had a look-in on a few friends. Mr. Duncan, of R. Duncan & Co., informed me that their spring trade had been first-class, and that it was then his "Charlie," manager of the Duncan lithograph establishment, said that they were full with orders, and, to impress me with the truth of the statement, showed me around the place. If I had had any doubts, they were all dispelled. The machines were running at full speed, and every employee seemed to have on hand all he or she could attend to. The above statement makes it unnecessary for me to say that good work is turned out. If it were not so, there would be much less to do.

My next point was John Eastwood & Co. Mr. Eastwood and wife are in England for the summer. Mr. Cloack said that their spring trade was good, and that it was all they looked for at this time of year. My impression is, and has been for some time, that these houses have the best retail business in the province, and they deserve it. Few men have devoted such unremitting attention to business as our friends R. Duncan and John Eastwood.

On Monday last I had to make another dash out, and this time my first point was St. Thomas. I had not been in this town for some three years. I noticed a number of changes, new buildings and others being erected, and that sort of thing. I was in McLachlin's, the oldest bookseller and stationer

in the place. Mr. Forbes, who now manages the business, said that they had had a good spring trade, but that it was dull just now. From this I went into London, which is only a few miles distant, and heard there very much the same story I hear here every day and have heard about the country for the last few weeks, that is, that trade is dull. But this is just what every one expects at this time of year; nevertheless, people must grumble. It has come to be a chronic complaint, and at certain times of the year if one didn't growl, he might be in danger of being arrested as a lunatic.

I saw Mr. Anderson, of J. Anderson & Co., and while he admitted that trade was quiet just now, yet the spring trade had been good and they had no reason to complain. Reid Brothers and others reiterated the above.

I remained over one train in Stratford. The party I wanted to see here was out of town. It was altogether too hot to saunter about the streets. The place looked very much as it did five or six years ago. The people I saw said business was dull, and I was glad after four hours to get out and away. My last point was Guelph. I found my old friend Day—as you will always find him—very much like a bee in a tar bucket. I use this old saw because it is understood to mean diligent and all that, but I have never been able to see the point. Is it because this industrious little insect doesn't find a tar bucket equal to a clover blossom? I would like some light. There is this about Mr. Day: he is a hard worker, and the best part of it is that he has not worked in vain, for if he has metaphorically buzzed about tar buckets, he has gathered up honey, and I hope he may live long to enjoy it. When I was there he was haunted by three or four commercials, but no one knows better how to meet these Gentiles than he.

It will be in order to say a word about weather and crops. As to the first, we have had remarkably hot weather, and for a week or more I was nearly melted, but fortunately there came a change last Wednesday and it is much more agreeable now. So far as I could see in this run of over three hundred miles, the crops of all kinds are most promising. I have the same statements from all parts of the country, and if things go well for the next five or six weeks we shall have an immense harvest.

During next week, commencing on Monday, we celebrate the semi-centennial of the founding of this city, and we expect to have a big time. Preparations are being made on a large scale, and we shall no doubt have such a crowd here as has never been seen before. I may say something about it when it is over.

In view of the above, everything has been very quiet in the city for the last few days. Upon the whole, I do not think we have much reason to grumble.

A last word. I have some recollection about an editor complaining about too much work, with its attendants, and have prescribed several times, without result. If you are bound to wear the machine out, I can't help it, but let me say, you cannot round up the full measure of your existence without taking in our beautiful city. You might feel ready to take your

flight to a better world after a short visit, from the realization of the fact that the world had nothing better to offer. Then there are the wilds of Muskoka, with its charming lakes and scenery, which I have told you about, where the most beautiful fish are just wild to be pulled out of their natural element. Why, sir, I have no doubt a visit here would add years to your life, open up visions of beauty that you never dreamt of, and give a tone to your system that would enable you to grasp your pen with such power that—on second thought, I came to the conclusion that it would be better not to finish that sentence. *Au revoir!* C. H.

Modern Antiquities from Persia.

The United States Consul-General at Teheran reports the springing up of a new industry in that capital, viz., "the manufacture of imitation of ancient Persian armor and coins to meet the extensive demands of European collectors," to which may be added American buyers. The ancient armor of Persia, especially of the palmy days of Shah Abbas, often displayed extraordinary beauty, costliness, and skill. But the museums of Europe long since absorbed most of the best examples of one of the most interesting of the industrial arts of the East. Specimens still exist, but are not easily obtained, and only at a high price and by those resident in the country and able to ferret out the old families who still possess fine bits of the magnificent metalwork for which Persia was once justly famous.

But if not as inventive as formerly, the Persian craftsmen are scarcely less skillful in handiwork to-day, while labor continues cheap. If there are no armies now to be clad with carved and inlaid helmets, breastplates and bucklers, there is an army of collectors, artists and virtuosi, studios or banqueting halls, and the artisans of Persia have taken up the business of manufacturing old arms, which may be purchased for reasonable prices. Ispahan is the centre of this industry. Nor let it be thought that these imitations are poorly made. The Persians can imitate admirably, and these modern antiques are often made in a costly manner, inlaid with silver and gold after exquisite designs of the most elaborate character. Sometimes these pseudo-antiques are sold with little attempt to conceal the fact that they are new, while in many cases much cunning has been exercised in giving them the appearance of antiquity.

Only an expert could detect the difference between some of these imitations and the genuine antique. Many of these imitations are now exported. Even the famous blades of Khorassan, whose wavy steel rivaled in temper that of Damascus, is cleverly imitated in appearance, if not in quality, by modern chemical devices.

The Jews of Hamadan, writes Mr. Benjamin, also carry on an extensive manufacture of spurious antique coins, against which the public should be warned. That city, the ancient Ecbatana, abounds above any other city in Persia, probably, in antiquities, and the soil seems to be full of gold and silver ornaments, coins and the like. Although pretty well dug over of late

years, the supply does not seem to be exhausted. Fine examples of the silver coins of Alexander the Great and the Sassanidae are common. But the greed with which these have been snatched up by travelers and collectors has led the Jews of that city to consider it easier to counterfeit them than to dig for them. A steady supply of spurious coins is therefore constantly furnished the market from this source. It is customary for those who carry them around for sale to have a few genuine coins mingled in with the spurious ones. To the eye the difference is often slight, and the cheat is only detected by the ring of the genuine metal and the dull thud of the baser coins. Even gold antiques are thus imitated, having a coating of real gold, and cleverly simulating all the appearance of age.

The manufacture of glazed ceramic ware in imitation of the antique is also extensively carried on at Ispahan, but with less success than the imitation of old armor. Some interesting tiles are indeed turned out with rich glazes, which are very creditable. But, with the exception of blue, the colors do not approach the superb character of the former ceramic art of Persia, while the art of making *reflets* or iridescent glazes seems to be entirely forgotten.

It is safe to assume that the *reflet* tiles or dishes which occasionally reach the market are really old, dating back 600 to 1,000 years. They are generally stolen from the interior of celebrated mosques or shrines at the risk of life. Consequently they are expensive.

The blue cashee works of or before the time of Shah Abbas and the Sefanian dynasty are also difficult, if not impossible, to imitate, and also the antique, milk-white, translucent porcelain, which is now rare and costly.

Other Persian ceramic wares assuming to be antique should be received with caution and their antiquity proved by experts before the purchaser allows his money to pass into the hands of the dealer. One test for proving the tiles lies in the difference of texture of the wares. The old ware was baked much harder than is the present custom of the Persians, and hardly yields to the scratch of a nail, while the latter can easily be ground or punctured.

The lovers of artistic binding will be most interested in a magnificent relic of Grolier's sumptuous collection lately added to the Astor Library. It is a Latin Bible, printed in Paris in 1558, in size a folio, measuring about sixteen by eleven inches, and its original calf binding is still in an excellent state of preservation. The edges are gilt and gauffered, and the sides and back are splendidly ornamented, the ground color being a dark brown, with painted compartments of black, green and red. The elaborate gilt tooling of the sides is very characteristic of the Grolier binding, and is bordered by an interlacing geometrical design. The centrepiece of the obverse is inscribed, "Quisque suos," in gilt letters, and the reverse ends the sentence, "patitur manes." At the bottom of the obverse is the famous inscription, "Io. Grolierii et amico-rum."

He that liveth wickedly can hardly die honestly.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market St., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Germond & Hayes, newsdealers, Utica, N. Y., have dissolved partnership.

E. J. Fuller, publisher of the *Gardner Record*, Gardner, Mass., has sold out.

Van Wagenen & McMillan, publishers, Rock Rapids, Ia., have sold out to J. F. Saylor.

Orndorff & Atkinson, stationers, Virginia City, Nev., have compromised with their creditors.

S. Kohn & Co., manufacturers of morocco cases, New York city, have dissolved partnership.

H. Z. Osborne, publisher of the *Free Press*, Bodie, Cal., has leased his paper to H. L. Childs.

Shaw & Swarts, booksellers and stationers, Providence, R. I., have sold out at auction to W. B. Swarts, agent.

Goodman & McEwen, publishers of the *San Franciscan*, San Francisco, Cal., have suspended the publication of that paper.

Charles J. Sands, stationer, Brooklyn, N. Y., has made an assignment to A. H. Van Buren. He has given preferences for \$300.

The assignees of the Western Paper Company, San Francisco, Cal., are Mrs. Potter, W. G. Richardson and ex-Judge Low, formerly of Oregon.

Edward Perry, stationer, Charleston, S. C., has admitted D. J. Touhey and W. F. Barragan to partnership, and the new firm will do business under the style of Edward Perry & Co.

W. E. Ferslew, dealer in wall paper, New Orleans, La., has obtained an extension of from three to six months on liabilities of \$6,324, most of which are in New York. The full amount of liabilities is \$8,077; assets, \$13,520.

Charles McConnell, dealer in paper stock, &c., Boston, Mass., recently reported in insolvency, has liabilities of \$27,100.49, of which \$9,400 is contingent indebtedness in the shape of indorsements. About \$2,030 is secured by a mortgage on the debtor's stock.

The house of Fairbanks, Palmer & Co., subscription book publishers, of Nos. 133 and 135 Wabash avenue, Chicago, was closed by the sheriff on Monday. Their failure is due to that of G. W. Borland & Co., which occurred on Saturday, whose paper Fairbanks, Palmer & Co. held to the extent of \$42,000. Early on Monday morning confessions of judgment were entered in the Superior Court in favor of W. J. Durham, acting for the Commercial National Bank, for \$21,200, and James T. Hoyne, acting for the Metropolitan National Bank, for \$10,100. Felsenthal, Gross & Miller got out an attachment to cover a note for \$684.40. The liabilities will reach \$40,000, and Mr. Fairbanks hopes the assets will reach this amount. There is \$10,000 to \$15,000 worth of merchandise on hand, and the same amount in valuable plates. If the creditors will agree, the firm will probably resume their business, as it is profitable. Borland & Co.'s paper was for royalties on "Gaskell's Compendium" and Gilbert's "History of the World."

Linton, MacFadden & Co., paper stock dealers, Philadelphia, Pa., have dissolved partnership. Josiah Linton continues the business alone.

Sigler & Stralton, dealers in picture frames, &c., Detroit, Mich., have dissolved partnership. Theodore Sigler continues the business.

The office of the *Democrat*, Charles F. Coleman, publisher, Grand Junction, Col., has been sold on a chattel mortgage of \$700.

The office of Marsh & Sullivan, publishers of the *Durango Herald*, Durango, Cal., has been taken under a chattel mortgage.

The estate of John W. Holmes, publisher of the *Arizona Miner*, Prescott, Ariz., has been burned out.

Ball & Clark, publishers and printers, Greenville, Ill., are reported to have sold out to V. Harold.

Orndorff & Adkinson, stationers, Virginia City, Nev., have compromised with their creditors.

Michael Doherty & Co., paper-stock dealers, Boston, Mass., have dissolved partnership.

Frost & Adams, dealers in artists' materials, Boston, Mass., have dissolved partnership.

William Bancroft & Co., stationers and printers, Wilmington, Del., have failed.

S. Woodberry & Co., printers, Boston, Mass., have been damaged by fire.

Teller & Wight, lithographers, New York city, have dissolved partnership.

McPhee & Todd have purchased the *Evans Journal*, Evans, Col.

A. Schroeter, dealer in wall-paper, &c., Buffalo, N. Y., has assigned.

Jesse Wood, publisher of the *Mercury*, Oroville, Cal., has sold out.

Frederick Jory, stationer, San Francisco, Cal., has sold out his business.

Billings & Morrison, paper manufacturers, Appleton, Wis., have assigned.

William F. Sweezy, publisher, Omaha, Neb., is about to sell his interest.

Robert Shaw, publisher of the *San Benito Advance*, Hollister, Cal., has sold out.

The printing establishment of the *Gazette*, Driftwood, Pa., was burned out on Tuesday last.

Landrum & McCants, booksellers, stationers, &c., Shreveport, La., have dissolved partnership.

Edw. A. Greene has been readmitted to the firm of S. H. Greene & Sons, printers, &c., Warwick, R. I.

W. E. Ferslew, dealer in wall-paper, &c., New Orleans, La., has obtained an extension from his creditors.

Allen & Hicks, publishers and stationers, Oshkosh, Wis., have dissolved partnership. J. Hicks succeeds to the business.

L. W. Allum, publisher of the *Vidette*, Oakland, Cal., has been incorporated under the style of the *Vidette* Publishing Company.

A receiver has been petitioned for in the case of the Wolverine Car Roofing and Paper Manufacturing Company, Detroit, Mich.

Packard & Mesemer, publishers of the *Bee*, Snohomish, W. T., have dissolved partnership. C. H. Packard continues the business.

Sullivan & Chancellor, booksellers and stationers, Dayton, Ohio, have dissolved partnership. J. M. Chancellor continues the business.

Lawrence Wex, paper-stock dealer, Buffalo, N. Y., has admitted George Irish to partnership, and the style of the firm has been changed to Wex & Irish.

The firm of Rodgers & O'Neill, dealers in paper stock, &c., Philadelphia, Pa., has been dissolved on account of the death of Luke J. Rodgers. The business is continued by Patrick O'Neill.

Rags caught fire from some unknown cause on Sunday morning in the paper-stock ware-

house of Patrick McNally, at No. 419 First avenue, New York. Damage to the extent of \$2,000 was done.

Robert Lee, publisher of the *Enterprise*, Healdsburg, Cal., has sold out.

J. G. Negley, newsdealer, &c., Evansville, Ind., has sold out to Alfred Lyon.

George E. Bowers, has bought out E. D. Barker, publisher, Hillsboro, Dak.

H. V. Hamilton, publisher, Tyler, Tex., has admitted a partner to his business.

T. B. Edwards, bookseller and stationer, Austin, Tex., has changed his style to Edwards & Co.

Dalton & Eylar, publishers of the *Corsicana Courier*, Corsicana, Tex., have dissolved partnership.

A dissolution has taken place in the firm of E. C. Hart & Co., publishers of the *Journal*, Willows, Cal.

Albert Strasburger has retired from the firm of Oscar Strasburger & Co., toy and fancy goods dealers, the co-partnership agreement existing between him and Oscar Strasburger having expired by limitation.

The Chicago Installment Book Company and George W. Borland, who was its president, have confessed judgments for \$40,600 and made an assignment. In April the company claimed assets of \$149,102 and liabilities of \$132,812, including capital stock of \$100,000. In the assets were notes for capital stock of \$51,500. Mr. Borland owned nearly all of the stock.

The announcement was made shortly before noon on Saturday that Butler & Miles, paper dealers, at 23 Beekman street, New York, had made an assignment to William Allan, attorney-at-law, No. 317 Broadway. In view of the recent statements made by the Mercantile Agencies of the condition of the firm, and the further facts that goods had been delivered to it after its failure, the intelligence was a surprise to a great many. The firm consisted of Edward Butler, Jr., and Walter V. Miles, and had only been in existence since March 1, 1883, and was supposed to have had a capital of \$30,000. The assignment makes a preference in favor of Rebecca C. Miles, said to be the mother Walter V. Miles, on two promissory notes, of \$1,600 and \$400 respectively. This is the only preference. The assignee expresses his inability to give any estimate of the liabilities of the firm, but says that its assets will go far toward paying its debts, and the members of the firm, in answer to the question put to them by a reporter of this paper, as to the amount of their liabilities and assets, said that they were unable to give any correct estimate of either, but hoped by next week that they would have a full statement of their affairs ready to be placed on record. As near as can be ascertained the firm owes about \$50,000. Among the principal creditors are Vernon Brothers & Co., and the American Wood Paper Company, about \$4,000 each; Smith Company \$1,500; McAlpine Brothers, Lee, Mass., \$500 to \$600; Wilder & Co., Boston, Mass., and Frank H. Wittlesey, Windsor Locks, Conn., and several concerns at Lam-

bertville, N. J., are also said to be interested as creditors. After the statement is prepared the assignee will call a meeting of the creditors. On March 1, 1883, the following statement was made to a city mercantile agency: "Edwin Butler, Jr., states that the firm of Butler & Miles was formed March 1, 1883. Mr. Coffin paid off in full with our check for his interest in stock, good-will, &c., and we took his receipt. We have assumed all the old firm's liabilities and paid off \$8,000 already and will pay \$6,000 to \$7,000 in a few days. On March 1, 1883, had capital of \$33,000 net, none borrowed. Mr. Miles was a bookseller and publisher, but has given up that line of business and will be actively engaged here. We propose to enlarge the trade and handling lines which the old firm did not. Mr. Butler was once employed in a city dry-goods house, and later was salesman with Coffin & Lyon, who failed in 1877, after which he purchased the store fixtures and a portion of the stock from assignee, giving notes for \$5,000 for a loan for Mrs. Coffin. He carried on business in his own name for a time pending a settlement of the affairs of Coffin & Lyon, after the consummation of which the firm of Coffin & Butler was formed, about January 1, 1880, succeeding E. Butler, Jr., Mr. Butler returning notes for about \$5,000 to Mrs. Coffin. This firm-name was continued until the formation of the present firm, 1st inst. Mr. Butler is a young man, estimated worth individually \$5,000, and is believed to be a hard worker, good salesman, rather cautious in credit and a close liver; is a brother of Frederick Butler, of

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

Butler & Johnson. His father is employed in a city bank. Mr. Miles is about thirty-eight years old, was formerly of Johnson & Miles, who dissolved partnership in 1878. He continued in the same line, in which he has been many years since the dissolution; has been alone; is a nephew of Robert Martin, of Westport, Conn., who is reported wealthy, and who, it is understood, loaned Miles \$15,000 cash, to be put into the business. It is believed he had about \$5,000 of his own means, all invested in a book publishing business, and is deemed honorable, capable and industrious, with a very fair business ability." On April 11, 1883, the following report was furnished the Mercantile Agency over the signature of the firm: "The \$15,000 referred to in your report as being loaned to our Mr. Miles by Mr. Robert Martin is an entirely personal matter, and not in any manner connected with or in any way a lien or obligation on our business. In addition, Mr. Miles is at present realizing from his old outstandings not less than \$1,000 or \$1,500 per month, and will continue to do so for a year or longer until it is wound up. Mr. Butler contributed an equal amount, and we estimate our capital at \$30,000." The Mercantile Agency made the following report of the firm on January 15 of the present year: "Formed March 1, 1883, with a capital of about \$30,000; have done a very fair trade, and it is believed have added a little to their means. Are both economical and hard workers; deemed honest, and were credited here, have met engagements as agreed."

D. & W. Pemble's strawboard mill at Stillwater, N. Y., was destroyed by fire on Sunday morning, and forty tons of strawboards were consumed, together with the house of Joseph Mulls. The loss on the mill is \$30,000, and on the house \$3,000. Insurance only on the latter.

Among the occupants of the building, numbered 1, 3 and 5 on Catharine street, and 1 and 3½ on Division St., which was burned out at an early hour on Monday morning, was A. S. Stein, printer, whose loss was \$800; insured for \$500.

The printing office of Dick & Stecker, at No. 252 Mercer street, New York, was damaged \$1,000 by fire Saturday night. The building was damaged \$300.

The *Star* Publishing Company, San Francisco, Cal., has suspended publication.

Trifling damage was done by fire on Friday night to Frank D. Hermann's printing office at No. 18 Jacob street, New York.

Billings & Morrison, manufacturers of straw boards and paper at Appleton, Wis., have made an assignment. Their liabilities are reported at \$50,000 and assets \$40,000. They have been in business ten years.

A fire broke out on June 27 in the building No. 12 Pennsylvania avenue, Baltimore, Md., occupied by Charles F. Miller as a paper-box factory. The fire is supposed to have been occasioned by the spontaneous combustion of a lot of glazed paper. Both the stock and machinery were partially destroyed, and the damage to each was about \$1,500. The insurance amounts to \$5,000.

A fire broke out on Sunday morning in Howard S. Ingersoll's rubber type manufactory, on the fourth floor of No. 155 Fulton street. It soon spread to the fourth floor of No. 153 Fulton street. In half an hour the flames were out, but the following damage had been done by fire, smoke and water: Howard S. Ingersoll, \$3,000; the Protection Ventilator Company, \$2,000; Austin & Magill, blank-books, \$1,000; E. D. Slater, printer, \$1,000; J. J. Whiteway, printer, \$500, and Stearns & Beale, stationers, \$2,500. The buildings were damaged \$2,500.

A fire broke out in the upper rag-room of the main building of the No. 1 Mill of J. B. Sheffield & Son, Saugerties, N. Y., at about 1:30 o'clock on Saturday morning last, causing a loss of about \$10,000. The watchman's clock showed a visit to the rag-room at 12:15, and, as he was about to start on his 1 o'clock round, he heard a sound like an explosion and a flash of light. Two men from the engine-room went with him to the rag-loft where the rags are first dusted and where about 150 bales of rags are kept for immediate use. They found that a bale of rags was burning furiously near one end of the loft. The fire attained such headway that the use of water-pails was insufficient. They immediately applied the hose and turned on the sprinklers connected with the main fire-pump, and completely submerged the floor, but the fire had gained headway into the peaked roof above the sprinklers. The fire department of the village was then on hand,

and with its help the fire was confined to the roof and attic alone. The rag duster and line of shafting was the only machinery destroyed, and about 160 bales of rags were more or less damaged by fire and water. The main building was 150 feet long by 42 feet wide and was built in 1872. The mills are all covered by insurance in the Mutual Insurance companies of Boston, Providence and Worcester. Work was resumed in the No. 2 Mill and the finishing department of the No. 1 Mill on Monday morning, and there is sufficient stock in the drainers to keep the mill in full operation till the rag-room is sufficiently repaired to resume work. The sprinkler system, as introduced by the Mutual Insurance Companies, proved to be of the greatest value. They were the original perforated pipes and not the automatic kind as used in the more recently built No. 2 Mill. It is believed that with a plank roof such as is now recommended and with automatic sprinklers such a fire would be confined to a very small space.

William A. Christian and James H. Christian, composing the firm of Christian & Brother, manufacturers of baby carriages at No. 38 Ainslie street, Brooklyn, filed an assignment on Monday to W. H. Hamilton, giving preferences for \$1,150. They had a capital of about \$20,000, which was left them by their father.

Restoration of Faded Photographs.

It is only to immerse the yellowed print in a dilute solution of bichloride of mercury until all the yellowness disappears. It is then well washed in water to remove the mercurial salt. If the print be a mounted one, it is by no means necessary to unmount it previously to treatment. All that is required in this case is to keep it in intimate contact for a time with blotting paper charged with the bichloride; indeed, this is the plan originally suggested by Mr. Barnes. By the bichloride treatment no lost detail is actually restored, as some have imagined. It is simply that the sickly yellow color which, as it were, buried the delicate half-tints, or what remains of them, is removed, and thus renders the picture bright and clear. Pictures which have been treated with the mercury always possess a much warmer tone than they did originally, as the purple or black tones give way to a reddish brown or reddish purple—more or less bright, according, probably, as gold or sulphur had been the principal toning agent. Here a question very naturally arises with regard to the future permanence of pictures which have been thus "restored," seeing that negatives intensified with mercury or transparencies toned with it are so prone to change. In answer to this we may mention that they appear to be permanent—at least that is our experience with some that have been done for many years. There appears to be no further loss of detail, and the whites retain their purity. Indeed, since undergoing the treatment with mercury, no alteration is yet perceptible.—*Br. Jour. of Photo.*

A meeting of the representative lithographic card men, and also the employees of T. Sinclair & Son, took place on June 28 at 212 North Fourth street. The object of this meeting was to express regret at the retirement of George M. Hayes from the management of the business of T. Sinclair & Son. Mr. Hayes, who is now the partner of Mr. Baker, has done a great deal to improve the card business, and the trade desired to make some recognition of this, and while regretting his departure from the firm of T. Sinclair & Son, hope that he will be successful in his new enterprise. Leon Myers, of Baltimore, made a very appropriate speech, in the course of which he presented Mr. Hayes with a handsome gold watch as a gift from some of the leading firms in the card trade in this country. Mr. Hayes was much moved, for the presentation was unexpected, and he returned thanks for the handsome present. C. M. Cooledge, well known under the pseudonym of "Kash," wrote a very funny letter, illustrated with humorous designs, and excusing himself for not attending the reception. W. W. Denslow, a well known artist of Philadelphia, presented the new firm of Baker & Hayes with the design of a set of cards which, when published, will be found to be very amusing, and which it is expected will be a success. The first order (and a large one) was given to the new firm of Baker & Hayes by a member of one of the largest firms in the trade, who was present at the meeting.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, JULY 3, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE Secretary of the American Paper Manufacturers' Association has sent out the call for the annual meeting of that body on July 30 at Saratoga. What the association may have to do and what it may do are uncertain quantities, although the notification suggests that important matters will be up for consideration. The paper-makers' organization, if effectively worked, ought to be able to do a good deal in stimulating an export trade in the line of its products. We have already referred to the gratifying increase of our trade in paper and stationery with Mexico, and we would like to see it further extended. But we do not advise that a hazard should be made of this business to the extent of forcing goods upon the market of the neighboring republic. While we ought to and can sell much more, business management and judgment are essential in prosecuting this trade.

THE act of Congress for "removing certain burdens from shipping" has gone into operation. This law affects vessels entering American ports, reducing the tonnage tax and abolishing hospital fees. The act provides that in lieu of the tax on tonnage of 30 cents a ton per annum heretofore imposed, a duty of 3 cents a ton—not to exceed in the aggregate 15 cents a ton in any one year—shall be imposed at each entry on all vessels which shall be entered in any port of the United States from any foreign port or place in North America, Central America, West Indies, Bahama, Bermuda, or Sandwich Islands or Newfoundland. A duty of 6 cents a ton, not to exceed 30 cents per ton per annum, is to be imposed at each entry upon all vessels which shall be entered in United States ports from any other foreign ports. What the operation of this change may prove to be remains to be seen. It is apparent that some benefit will accrue to the shipping interests. Will it be of commercial advantage otherwise?

WHAT with warm weather and the prospect of a broken week, there has been very little disposition for the past few days to push business. And it is just as well; the relaxation of a few days' respite from trade will not be disadvantageous. But it must not be supposed that this summer holiday time is indicative of the abandonment of enterprise or of loss of confidence in the future. There are too many preparations extant to permit this opinion. We have had surprise more than once lately to note the extension of business undertakings in lines connected with the stationery trade, and if the market seems to be dull, we are quite sure that there are many who do not expect it to continue long in that condition. When

we are through with the excitements and turmoil of political contest, what shall prevent the general rehabilitation of trade? Nothing that we can see. The earth promises her abundance, and if the valleys "laugh and sing" and the hill tops "drop down their fatness," what shall withstand the inevitable demand for more from all sources and from all kinds of people? It does not seem possible that there shall be any financial trouble which may affect general trade injuriously. There has probably been too much caution exercised for that.

Roundabouts.

BY THE TRADE LOUNGER.

"When in the course" of a man's travels about town he finds a general expression of warmth and fervid remarks upon the weather, it may reasonably be concluded that there is some occasion for heat. So there is just now. It is July, and the summer days are well upon us.

"All men are" not alike, however, and while to some the sunny days and parching atmosphere are particularly aggravating, it is not unusual to find some who enjoy the heated atmosphere.

"Endowed with certain" peculiarities of temperament and physical distinctions, the enviable few who do not call it warm and who protest that the weather is delicious, are just the kind who ought to celebrate the "Fourth of July."

The "Lounger" has got down to this point by easy degrees, for he didn't want to precipitate the announcement too suddenly. The "ever glorious" is close at hand and the pyrotechnical small boy has been making his customary racket ahead of time. I am sorry to observe a decadence of the celebration of the "Fourth" in New York and adjacent cities. Perhaps this is due to the fact that the large foreign population doesn't "enthuse" as it ought. We should not let the day go unhonored.

And the closing-up movement for Saturday has taken right hold of the business public. There will be very little trading done here for the next two or three days and recreation will be sought and enjoyed by all. The anticipation seems to have affected people somewhat, for nobody seems to be anxious to do much business, or to talk much about business. A few notes of interest have been secured, however, and I herewith present them.

Brass picture frames are going to be quite as popular this season as last. They are not entirely novel, of course, but some of this season's styles of decoration are new and very pretty. The finest goods of this sort are imported, it seems, and there has been a great reduction in price. Plush picture frames will also be in demand. They come in many new designs as well as odd shapes.

According to a statement in a daily paper, there is a demand for the coinage of half cents, which, it is said, would be useful in the toy, candy, and other small retail trades. Some persons may not see the wisdom of this demand, but they should remember that in France the smallest coin is one-fifth of a cent.

* * * *

A very neat and handy coin-holder for ladies' use has lately appeared on the market. It is of cylindrical form, and the coins are placed in either end and held securely by a spring which presses the coin against a small lip. Attached to the holder is a chain by means of which it may be fastened to the button-hole.

* * * *

Quite a display of campaign portraits is being made. One Broadway dealer in these goods has Blaine, Logan and Ben. Butler ranged in a row in his show-window, with the latter in the centre, underneath a placard bearing the inscription: "Some day, who knows?"

* * * *

A New York firm has brought out a very neat, simple pencil-holder, which consists of a ring which slides on the pencil, and a projecting hook by means of which the pencil is secured to the edge of the pocket. The article is made of German-silver.

* * * *

The latest thing out in toys is the mechanical crocodile and the steam engine, both of which are cheap tin toys having a mechanical movement.

* * * *

The Government has been giving out a few stationery contracts. Arnold's writing fluid is put in at \$3.93 per dozen quarts. Isn't this under cost price? Blotting, 120 lbs., is put in at \$13.21@14.32 per ream. Envelopes, too, seem to be going in at low prices. These are only two or three of the items. The list is too long and diversified to go over it completely. If anybody wants to know the prices paid by Government on any special line, per haps by asking THE STATIONER they can get the desired information. Life is too short and the Fourth of July too near for me to spread the news in full.

Obituary.

RICHARD B. VAN ALSTYNE.

Richard B. Van Alstyne, of the Troy Paper Company, died on June 25, after an illness of only a few days, and the announcement of his death created the greatest surprise among his friends, who were not even aware that he was ill. He was about 46 years old, and had for many years been engaged in business at Troy, N. Y., and was regarded with high esteem by the business community generally. During the late war he served with distinction in the 169th and 44th regiments, and at the time of his demise was an honored member of Post Griswold. His funeral took place on Friday afternoon, June 27, from his late residence, No. 7 Waverly place. The religious services were performed by the Rev. H. C. Farrar, assisted by the Rev. M. B. Mead, of Waterford, and the Rev. Willard Hitchcock,

of Chatham Centre. The members of Post Griswold attended in carriages, and a large number of personal friends were present. The floral offerings were profuse. A broken column, the gift of Post Griswold, stood at the foot of the casket, while other floral gifts were strewn about it. The bearers were: Shepard Tappen; H. S. Bingham, of Bennington, Vt.; Haines D. Cunningham, of the New York *Evening Post*; J. N. Smith, John C. Ide, E. W. Simpson, D. M. Ranken and P. M. Wales, the last two being members of Post Griswold. At the conclusion of the funeral service the remains were borne to Oakwood Cemetery, where interment was had. The deceased leaves a wife and one child.

C. A. Rodney, president of the Vulcanized Fibre Company, Wilmington, Del., is dead.

Charles E. Griswold, publisher, Dell Rapids, Dak., is dead.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, July 2, 1884. }

THE MONEY MARKET.—The money market has displayed more activity, owing partly to the July interest payments reaching, it is estimated, about sixty millions in this city, about ten millions in Boston, and a proportionate amount in Philadelphia. Added to this will be heavy Treasury disbursements on account of called bonds; so that the prospects are still toward abundant money, although the period is approaching when there is usually a more active inquiry for funds. The stock market was at prices frequently higher than last week, but at the close a decline set in, and the bulk of the advance was lost. Government bonds were strong. The railroad bond market was moderately active and irregular. The market for sterling was quiet but fully steady, posted rates having been advanced by certain leading drawers. Commercial bills were in rather better supply.

THE PAPER MARKET.—The leading manufacturers continue to report a steady and quiet trade. Some of them give a rather discouraging account of the present condition of their industry, but entertain the hope that, after the summer months have passed, the fall trade will develop more activity. Considering the general dullness existing in all lines of business at this time, there is really no great cause for complaint in the paper trade. The circulation of newspapers generally is increasing, and although the book-publishers are not as busy as they have been at this time in former years, the leading houses are said to be handling quite a good many manuscripts, while some of them assert that they are doing fully as much as at any corresponding time. Manufacturers of some kinds of paper assert that the prices offered are really below cost; overproduction is complained of, and the jobbing houses, they say, are selling on margins which, in some cases, do not justify a continuation of manufacturing; but it seems that there is no escape from this condition of things, because of the inability to get the trade to come together and restrict the production to within wise limits. Notwithstanding this, manufacturers are not, in a few instances, increasing their capacity, taking out old machinery and putting in new; building extensions and preparing to meet an improved demand, as if an improvement was doubly assured. Collections are said to be rather slow, and prudent people are only purchasing what they need for early requirements. Super-calendered paper is being sold at the mill at 7½c., print at 5½c., No. 1 manillas at 6¼c. and other grades in proportion. These prices even do not seem to offer much inducement to consumers to buy ahead, most of them appearing utterly indifferent, feeling safe in waiting and buying supplies as they are actually needed.

THE STATIONERY MARKET.—Trade has made little if any progress this week. The near approach of a national holiday has not improved matters much. This condition of affairs is expected to continue until after the 10th or 12th of the month, when, as usual at that period, there will probably be a brightening up in most lines of staple goods. Reports from the West and South indicate that the crops are in good condition, and this augurs well for a good fall trade. There continued to be a fair degree of activity in Fourth of July goods during the week, and prices remained firm. Many dealers complained of a scarcity of goods, but there was no attempt to bull the market, as all were glad to get rid of what goods they had; hence few if any will have any stock to carry over. The trade in campaign goods continues brisk. There is a greater variety of these goods on the market this season than in any previous year, and a proper assortment will not be likely to prove a bad investment to any dealer in stationery. There is quite a demand for fancy plush goods, but mostly for those of a staple character. A few orders for September delivery have been taken for plush novelties, but trade in these goods has not made any headway as yet.

The Science of Heraldry.

IV.

"Heraldry viewed from a peculiar point," said John W. Weston, with whom the readers of THE STATIONER became acquainted in the initial number of the article on this subject, "is often of vast importance, for while great estates and fortunes lie unclaimed, heraldry sometimes comes in, and like a magic wand restores lands, titles and fortunes to persons who may have a right to them by inheritance but who may be in poverty and obscurity. It is a common thing for a silver refiner to have brought to him a quantity of old plate—a relic, for instance, of some family of noble origin—say, for convenience' sake, a set of old spoons. These he weighs, and sees no other feature in them than their intrinsic value as so much silver. But let a connoisseur in heraldry come along—one gifted in heraldic lore, or a lawyer whose business it is to restore property in chancery, and the first thing he will notice in the battered spoons is the crest upon their handles. On seeing this he at once inquires, 'Whose crest is it?' and his mind is relieved at having found a name to a certain list of unclaimed estates, perhaps the name of the person to whom the spoons belonged and one of the names on his list of unclaimed estates or fortunes tallying. He thinks that he has obtained a key, seeks the owner of the old spoons, inquires into his pedigree, and it is not infrequently the case that a little incident like this will be the means of restoring property or fortunes to their rightful owners, especially in this country, inasmuch as persons of respectability or high family connections have immigrated to this country, where they have married, had families and died, without any hope or thought of ever possessing ancestral wealth or title; and thus the old piece of plate is stopped from going into the melting-pot, and the owner commences to retrace his pedigree and is able to prove that four or five generations back the same spoon belonged to a person of wealth and power and estate, whose vast worldly possessions and prestige had long lain unclaimed for want of proper proofs to establish their ownership. The spoon, it may be, becomes the subject of litigation, and perhaps the only family relic remaining is taken into court and there becomes a bona fide stepping-stone to wealth. Hence any old relic bearing the insignia of the family should be carefully preserved. There are a great many such relics in the country. They turn up all over. This morning I had a gentleman in my office claiming to be an immediate descendant of Sir Hugh Nicholas, an old English aristocrat. The aristocratic population of the old countries is so completely interwoven with the people of other countries, that in the long series of generations which have intervened since the time of the ancestors from whom the title of nobility has descended, all trace of nobility lineage is lost. In many cases, those of noble descent belong to the lowest walks of life, some are pursuing various kinds of business, some the trades and professions. Down in Wall street I know a broker who is a German count. Another ex-

ample is that of the late Professor Groschel, of Brooklyn, who founded the Conservatory of Music in this country. He was very much interested in heraldry and his ancestry rated high. Many persons of noble descent in this country are political refugees. They flee to this country, and in the course of time, their family failing to discover their whereabouts, they die in obscurity."

"Do you have much old plate brought to you for the purpose of tracing heraldic bearings?" the reporter asked.

"No; I sometimes receive parchments for examination. They sometimes bear the coat-of-arms emblazoned, that is, fully set forth in colors, and sometimes the coat-of-arms is described in writing."

"Do people have as great a desire to discover their coat-of-arms as they used to?"

"Oh yes; there seems to be an increasing tendency to use the family crest upon plate, carriages and articles of jewelry among those who inherit them, be they high or low."

R. H. Ingersoll has removed from 92 to 45 Fulton street, New York, where he will continue to keep in stock a full line of self-inking rubber pads, rubber type for marking linen, cards, books, &c.

HUGHES' NEW WALL MAPS

Prepared expressly for School use under the personal supervision of WILLIAM HUGHES, F.R.G.S. (late Professor of Geography in King's College, London), whose name is of itself a passport to the accuracy and merit of any work on Geography. The NAMES are introduced with great judgment, and free from the common fault of overcrowding. The physical features are boldly and distinctly delineated, and the political boundaries are carefully colored. They are adapted to any series of geographical, no keys being required.

Mounted on Strong Cloth, with Rollers, Colored and Varnished. Size uniformly 54x68 inches.

WHOLESALE DEALER IN

Stationery & Fancy Goods,

46 W. B'WAY, cor. THOMAS ST., NEW YORK.

Trade Items.

The semi-annual meeting of the Stationers' Board of Trade will be held on July 8.

It is reported that J. P. Herbert dealer in art goods, Troy, N. Y., who failed recently, has liabilities amounting to \$8,000; preferred debts, \$2,400.

Various parties have been inspecting the property of Myers Brothers, and the prospects are that the business will be sold in a few days.

C. B. Wannamaker, of the firm of Wannamaker & Carson, electrotype founders, Indianapolis, Ind., has made application for a receiver.

The New York News Company is gradually adding to its supply of first-class campaign goods. It is now showing a line of metal and tin badges, campaign fans, campaign cigars, portraits, &c.

Kohn & Rosenbaum, Philadelphia, have sent their travelers out with a very complete line of elegant novelties for the holidays. They manufacture moldings, frames and casels, and have a large assortment of velvet frames and photograph albums, for which they report a very good trade.

Lawrence & Baxter have added to their stock of "J. A. P." paper, a new pattern figured with stars and stripes. This paper is being largely used now for advertising purposes, its pretty appearance making it just the thing for those who want their advertisements to attract notice.

J. E. Linde is making up a fine line of New Year and Christmas cards, and programmes and folding cards, which will be ready in a short time. Mr. Linde, as will be seen by his advertisement in THE STATIONER, is offering a large line of chromo advertising cards, which he is closing out at a very low price in order to reduce his stock. Some of these cards have never been on the market, the designs being entirely new and attractive.

The Globe Files Company is now in its very busiest season and every available foot of manufacturing space in its commodious factory in Cincinnati is being utilized; and, notwithstanding that its new quarters give it more than double the capacity of the old, there is still need of more room. The present factory of the company now covers over 12,000 square feet of space. A new catalogue will soon be ready for the trade, and this will contain a great many new specialties.

Among the latest novelties out is a pocket lantern, with a nickle frame and Russia leather sides. It resembles very much a fancy match-box. Pressing a small spring in the side of the box causes it to assume the shape of a lantern with a wax candle ready for lighting. The interior of the lantern; besides a candle, contains a quantity of matches. Another novelty is a pocket picnic case, made of fancy leather, and containing a napkin, drinking cup, and folding fork, knife and spoon. Another style has a drinking glass attachment. Polished brass cigar ash trays are also among the novelties just introduced. They are decorated with raised figures, such as horses' heads, lizards,

turtles, &c. F. H. Loss, Jr., supplies the trade with these goods.

John G. Hill, formerly a newsdealer at Great Falls, N. H., and a prosperous business man worth \$20,000, killed his wife on Thursday of last week. He was insane at the time.

Corser, Runyan & Munz, proprietors of the bracket works, Rochester, N. Y., have been burnt out; insured. Matilda D. Hoare, bracket manufacturer, of the same place, has also been burnt out; insured.

John Gibson is now showing one of the most extensive lines of Christmas cards brought out this season, and he is still making additions to it. The line will be completed in a week or two, when it will be described in THE STATIONER.

The *Slate Trade Journal* is the name of a new eight-page monthly published at Easton, Pa. The journal is to be devoted to the slate industry, and will from time to time contain technical articles on slate-roofing, &c. It will also contain a monthly report of the slate market.

The Moss Engraving Company, New York city, has issued the first number of *The Illustrator*, a quarterly journal devoted to the interests of publishers and printers. Each issue will be filled with half and full-page illustrations and descriptive matter suitable for the use of publishers.

There has been no further reduction in the prices in playing-cards since the first of July last year, when the rates were cut down to \$8 per gross by the combination. This combination being composed of two of the oldest card manufacturers in this country, govern prices in this line. Two price lists are issued annu-

ally—one in January and one in July. Prices have got down so low now that there is scarcely any profit made in cheap playing cards, and consequently it is hardly probable that there will be a further reduction this year. One of the manufacturers outside of the combination, in conversation with a reporter of THE STATIONER, said that the cutting of rates by the combination had had no other effect than to cheapen a class of playing-cards. Those outside of the combination were still manufacturing and were likely to continue doing so for some time to come.

The Silicate Book Slate Company has on exhibition in its showrooms a mammoth blackboard 6½ by 12 feet. It will keep this size blackboard in stock hereafter. The board is intended more particularly for the use of exchanges. The company has recently been getting up some handsome advertising cards, one of which has the ivory surface and is ruled on one side, making it useful for memorandum purposes.

Marcus, Ward & Co.'s new line of Christmas and New Year cards is very large and complete. There is an unlimited variety of designs, sizes, &c., and the line embraces a number of novelties in folding and screen cards. No. 223 has four cards with beautiful winter landscape views. No. 1230 shows four landscape views enclosed in a circular bordering with flowers underneath. No. 240 has three cards very richly colored, showing "pussy in three acts," the most characteristic of which is the charming of a number of birds. The expression of pussy's countenance is very life-like, which overcomes the effect of the gaudy coloring of the picture. No. 282 is composed of four designs, consisting of sprays of flowers on a dark

background surrounded by a rich cream-colored bordering. Nos. 298 and 1298 are very pretty panel cards, colored in imitation of oak, with floral designs, and a small white card in the centre with Christmas greetings. Very neat cards are shown in Nos. 409 and 1209, which are large, oblong cards with flowers around the upper left-hand corner and a Christmas greeting in verse, by Francis Ridley Havergal, in the body of the card. The line includes a number of very attractive cards in imitation of water-color prints.

The Acme Stationery and Paper Company has a new price-list and catalogue, which it would be well for those desiring a supply of writing tablets, pads, &c., to send for. The new catalogue will contain prices of the new goods recently brought out by the company. Among these goods are the "Favorite" blotter tablets (ruled or plain), which are intended to supply a blotter tablet in all sizes, commercial note, packet, congress letter, legal cap, foolscap, bill cap, &c., at the uniform price of ten cents; also, remittance blanks or forms for sending money, with a perforated sheet attached, to be returned to the sender. By the use of this form vouchers are of uniform size, and much more easily filed and referred to. The blanks are made in pad and blotter tablet form, and printed in both black and copying ink. The new goods also embrace the student's note-book, which is made of good white paper, with neat card-board cover and stiff back, and from which a perforated sheet may be detached from any part without injury to the other leaves. These goods are up with the wants of the times, are finely and substantially made, and are bound to sell well.

SANBORN'S BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.

Saves gas, as it requires only a few moments to heat. Saves money, as a boy can form backs with this machine as well as a man.

Causes no inconvenience from working over hot fumes, as there are none.

Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.

Will pay for itself in a very short time.

We warrant the machine to do all that is claimed.

E. P. Coby & Co. are about putting to press their annual pad calendars for 1885, and expect to be ready to fill orders from the trade in about sixty days. Their new edition will be printed on extra fine paper, in two colors, and sold in large or small quantities.

WHITTEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE**,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

ESTABLISHED 1832.

Shakespearean Slang.

The power of Shakespeare over the public is shown by the extent to which his phrases, and even his slang, has become incorporated into our language. In this point he is unequalled. Among these is "bag and baggage," "dead as a door nail," "proud of one's humility," "tell the truth and shame the devil," "hit or miss," "love is blind," "selling for a song," "wide world," "cut copies," "fast and loose," "unconsidered trifles," "westward ho," "familiarity breeds contempt," "patching up excuses," "misery makes strange bed-fellows," "to boot" (in a trade), "short and long of it," "comb your head with a three-legged stool," "dancing attendance," "getting even" (revenge), "birds of a feather," "that's flat," "tag-rag," "Greek to me" (unintelligible), "send one packing," "as the day is long," "packing a jury," "mother wit," "kill kindness," "mum" (for silence), "ill wind that blows no good," "wild goose chase," "scare-crow," "luggage," "row of pins" (as a mark of value), "viva voce," "give and take," "sold" (in the way of a joke), "give the devil his due," "your cake is dough." These expressions have come under notice, and, of course, there must be many others of equal familiarity. The girl who playfully calls some youth "a milk-sop" is also unconsciously quoting Shakespeare, and even "loggerhead" is of the same origin. "Extempore" is first found in Shakespeare, and so are "Almanacs." The "elm and vine" (as a figure) may also be mentioned. Shakespeare is the first author that speaks of "the man in the moon," or mentions the potato, or uses the term "eyesore" for annoyance. Another often-quoted utterance may be here mentioned, simply because it is generally misunderstood: "One touch of nature makes the whole world kin," which is supposed to express the power of sympathy, whereas it solely referred to the widespread operation of selfishness.

Sound Vibrations Photographed.

Photography appears to be running a race with electricity in curious developments and novel applications. George G. Rockwood, the well-known photographer, has achieved the remarkable feat of photographing sound-waves instantaneously. The instrument by which the sound-wave was represented, or made visible in its effect, is a new telephone, the inventor of which has obtained from Mr. Rockwood a perfect ocular demonstration of its vocal repeating action. The vibrating diaphragm, upon which the voice is projected, has a fine metallic point mounted on the centre of its reverse side. This point meets the pointed end of a conducting wire so nearly that when at rest the interval between the two points can be discovered only through a strong lens. The thing to be done was to show in a picture of the instrument, or rather in a series of pictures, the alternate contact and separation of the points from the vibrations imparted to the diaphragm by the voice, involving the closing and opening of the electrical circuit

and the consequent reproduction of the same rate of vibration in the receiving instrument at the other end of the line. In considering this problem, Mr. Rockwood found himself indebted to his recollection of an experiment by Herschel in photographing (or daguerreotyping) with the electric spark. Herschel caused a four-sided prism of wood, around which a picture was pasted, to revolve at high speed as in a turning lathe. By illuminating this revolving picture with the electric spark (in total darkness otherwise) he obtained a photograph of it as standing still at that instant in its revolution when the spark flashed. In describing his experiment, Mr. Rockwood says:

"Wheatstone measured the duration of the electric spark as one-24,000th of a second. It would follow that any vibration not quicker than this might be arrested on the photographic plate at any point in its travel. Whereas, according to the investigations of Plateau, the duration of successive impressions on the human eye will average half a second, the electric spark might separate and distinguish photographically waves of which 12,000 impinge on the retina, while the first of them is still lingering there; in other words, 12,000 practically all at once. Now, the vibrations or waves of air that yield the respective tones or pitches of sound have been accurately measured and counted. Assuming the pitch of the ordinary masculine voice in conversation to be as low as middle C, the number of complete double vibrations imparted by such a voice to the telephonic diaphragm or tympanum would be 256 per second—that is, counting both ways, 512 movements of the diaphragm with its metallic point making or breaking the electrical circuit at each movement. To the eye, which retains every impression for half a second, 256 of these movements would make their impression as one, and would give a stationary, fictitious image, if they were of sufficient depth to produce any visible effect whatever, as they are not. The electric spark, however, would give its illumination and do its photographic work within a little more than one-50th of the time of one of the tympanum movements. A succession of such photographs, therefore, would present fortuitously any position of the vibrating point from that of contact to that of extreme retraction, with an indefinite number of intermediate positions."

To verify these calculations, Mr. Rockwood carefully focussed his photographic camera on the points of the telephone by daylight, and a battery of Leyden jars was so adjusted that when discharged it would throw the proper illumination on the points. Mr. Rockwood's instantaneous plates were now to be tested under action five hundred times quicker than a sensible instant, and also invisibly minute. Of course it was as yet a practical question whether they could effectively receive as quickly as the electric spark would give this infinitesimal action of light. Waiting until the darkest hour of the night, the plate was uncovered in total darkness, the telephonist began speaking into his instrument, and the illuminating spark was flashed upon the points. This operation was repeated with more than twenty plates in suc-

cession. The resulting negatives, on being developed, proved a triumph in two arts and a science. The photographs printed from them showed under the glass, in some, contact of the points, and in others a variety of infinitesimally differenced intervals between them. Not one of the impressions had more than the one-24,000th of a second in which to be begun and ended.—*Manufacturer and Builder.*

Wrong Use of Postal Cards.

"Postal card correspondents make a good many mistakes. If they knew what a pile of cards are thrown away, and why they are thrown away, they would be more careful," said a post-office clerk as he pitched a handful of postal cards into the waste-basket.

"What is the trouble with them?"

"Every one had something pasted on the correspondence side. It is allowable to paste on the mailing side the address of the person to whom the card is sent, but anything pasted on the message side renders the card unmailable. On the mailing side there must be nothing in the form of an advertisement."

"If pictures are drawn on the message side will the card be sent?"

"Yes, unless the picture is of a character which would send the artist to Sing Sing. However, there is a great deal of complaint about dunning and abusive messages. It is popularly believed that it is a violation of the law to send scurrilous epistles in this way, but it is not. The belief is founded on Judge Benedict's decision, where \$5,000 fine was imposed several years ago. The law is not now in force, and a man can abuse another to his heart's content."

"Can a postal card be returned?"

"Correspondents often try to do that, but it is against the rules of the office. To make sure, they often stick on a one-cent stamp. That won't work either. If a two-cent stamp is put on, it will pass inspection. By putting on a one-cent stamp, however, a postal card may be remailed to the person to whom it is addressed, if it does not find him in the first instance. One thing about postal cards ought to be known to poor people who have friends abroad. We have stacks of international postal cards unused that may be sent to almost any city in Great Britain or the Continent. Even in the few instances where they are used, they are apt to be sent to the country which issues them. This is not allowed. They can only be sent out of the country which issues them."

Liebenroth, Von Auw & Co. report a very active trade this week. They are crowded with orders and have as much as they can attend to in the different branches of their business. The firm has a very extensive line of albums, scrap-books, &c., besides a full line of blank-books, and the superior quality of their goods is beyond question.

Ignorance is a sorry jade which causes every one who mounts it to stumble, and each who leads it to be laughed at.

Diffidence is the right eye of prudence.

CELEBRATED "CLIMAX" BLOTTING PAPER,

The "CLIMAX" possesses the following advantages:

- 1st, *Full weight*, as marked in *figures* on bundle.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:

FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor : JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.

" 8 SNOW HILL, LONDON.

E. P. DONNELL & CO., Chicago, Ill.

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

- FIRST.**—It handles buckled paper as well as flat, and runs the work through straight.
- SECOND.**—It has the best system for rapid and perfect feed.
- THIRD.**—It has the best system for gauges, and can be more quickly adjusted.
- FOURTH.**—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.
- FIFTH.**—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.
- SIXTH.**—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.
- SEVENTH.**—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.
- EIGHTH.**—Each machine has a scoring cutter attached.
- NINTH.**—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Manufactured by CHARLES CARR, Granite St., South Boston, Mass., U. S. A.

Work-Boxes.

Alles & Conant are bringing out a line of ladies' work-boxes in plush and hard maple, of which the accompanying engraving is an illustration. These boxes are provided with all of the tools used by young ladies in doing fancy work. The engraving shows the style made of

hard maple. The grain of the wood is finely brought out, and this style of box is said to be very popular with the trade.

The first edition of John Eliot's Massachusetts Bible was printed at Cambridge, Mass., in 1663-64. But twenty-five copies are sup-

posed to have been sent to England with the English title and dedication, and so many of them have since disappeared that the acquisition of a perfect specimen like one just added to the Astor Library, is a rare event. It proceeds from the duplicates of the library of Trinity College, Dublin. This translation of the Scriptures is a sealed book to one not

versed in the language of the Massachusetts Indians, and only one man living is reputed to have mastered their rude tongue; but it is interesting as an example of early American enterprise and typography. It consists of two volumes in one small quarto, and is bound by Bedford in olive morocco, a fine specimen of his best workmanship.

ALLAIRE & CO., Sole Manufacturers,

12 Cortlandt St., New York.

Also Manufacturers of all sizes of PLAIN MANILLA ENVELOPES.

An Hour in a Base-Ball Factory.

"The base-ball manufacturing business has had a rapid but prosperous growth," said a manufacturer recently. "It is confined to a few men, and probably will not be encroached upon by speculators. There are in the United States to-day only eight factories of any importance, and yet these are entirely sufficient to supply all the base-balls that are wanted in this country. Recently there has been a sort of a 'boom' in the ball market. This is caused by the adoption by clothing houses throughout the country of the custom of giving to juvenile purchasers base-balls as presents. Wanamaker, of Philadelphia, ordered 25,000 for this purpose. The balls are of different grades and prices. The kind that are given away are, of course, cheap, but quite durable. Perhaps you would like to see how base-balls are made. Follow me, and I will show you the whole process." On the upper floor of the establishment sat several men, with baskets of dampened chamois and buckskin clippings at their sides. Before each workman stood a stout piece of joist, in the end of which was inserted a mold, hemispherical in shape, in which the balls are formed. Taking a handful of the cuttings from the basket, the workman pressed them together in his hands, and then wound about the mass a few yards of strong woolen yarn. Placing the embryo ball in the mold, he pounded it into shape with a heavy flat mallet, and then wound on more yarn and gave the ball another pounding. After testing its weight on a pair of scales and its diameter with a tape measure he threw the ball into a basket and began another. When the newly-made balls are thoroughly dried they are carried to the sewing room on the floor below, where they are to receive their covers. Forty young women sat at the tables sewing on the covers of horsehide. Grasping a ball firmly in her left hand, with her right hand one of the young women thrust a three-cornered needle through the thick pieces of the cover and drew them firmly together. In less than ten minutes her work was completed. A smart girl can cover two or three dozen of the best, and eight dozen of the cheaper grades of balls in a day. The wages earned weekly range from \$7 to \$9. The balls are afterward taken to the packing-room where the seams are smoothed down and the proper stamps are put on. The best balls are made entirely of yarn and india-rubber.

"My brother was one of the pioneers in this business," said the manufacturer. "He was the inventor of the two-piece cover now in general use throughout the country. If my brother had only patented his invention the members of our family would now be wearing diamonds instead of bits of white glass in our shirt fronts. Ball covers are made, almost without exception, of horsehide, which costs \$3 a side. We used to obtain our supply from John Carl, a leather dealer in the swamp for nearly thirty-five years. We are obliged to go to Philadelphia now, there being no merchant here who keeps horsehide leather. The capacity of our factory, when we get our new molding machines in working order, will be about 15,000 balls daily, each machine being expected to turn out 1,200 balls a day."—*Tribune*.

CARTER, DINSMORE & Co.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

JUL 12 1884

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.—NO. 2.

NEW YORK, JULY 10, 1884.

WHOLE NO. 472.

Correspondence.

WILMINGTON WAIFS.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., July 8, 1884.

Continued business depression affords your correspondent but few items of interest to chronicle.

The month of June closed with no marked improvement in trade circles, but, on the contrary, it was conceded by our stationers to have been the dulllest season since the panic of 1873.

Although our stationery people do not expect very brisk times during the hot summer months, from the present outlook they are not confident of even the usual light summer sales.

The usual exercises closing our public and private schools created some demand for handsome and valuable presents for the happy graduates, and our stationers and booksellers were enabled to dispose of a goodly number of choice articles.

The dullness of trade has induced some of our large manufacturers to reduce their working force in order to curtail expenses.

As in most manufacturing towns, this local state of affairs has added much to the already general depression with us, and helped to swell the list of complaints.

United to this, the falling off of deposits has created a scarcity of money with our banks; hence they are loaning but little outside of regular customers. Although this condition of finances causes some inconvenience, there is no apprehension of any serious trouble resulting from it.

It is confidently expected, however, that the payment of July bills, dividends, and interests on bonds, &c., &c., will bring relief to the restricted market.

In my last I mentioned the resumption of Bancroft & Co. It proved, however, but temporary, and the place was again closed by the sheriff.

As no satisfactory settlement could be arranged with the suspended firm, the entire plant was sold at sheriff's sale, July 2. Buyers got lots of bargains when the stock of stationery was reached.

The outfit of the printing-office brought

good prices, and the total amount realized from the sale was between \$2,000 and \$2,500.

The *Sunday Critic* recently published by the firm, has had quite a struggle for existence. Handicapped from its inception, by lack of capital, it gave no promise of a long life, and in April last it expired, aged five months. Revived in May, by the later management, its failure was inevitable from the same cause. At the present juncture William H. Zeller, of Reading, Pa., comes to the rescue, as editor and part proprietor, and assumes its management. With the well-established *Sunday Star* and the Philadelphia Sunday papers greeting us at the breakfast-table, there seems to be no room for the new paper, at least, as a paying investment. Time will prove the wisdom of its continuance.

Apropos of newspapers, I am reminded that a weekly journal, *The Wilmingtonian*, deserves mention. Two and a half years ago the proprietors began its publication, in spite of many predictions of failures. Being ably edited, a live, spicy paper, and independent in politics it rapidly won its way in public favor. It was soon enlarged to its present size, a 28-column, 24x38 inches in size. Its advertising list embraces some of the large and well known houses throughout the country. Its continued success is assured.

Many of our merchants, including some of the stationers, have announced the closing of their stores at 6:30 P.M. during the hot months of July and August. This action is much appreciated by their employees, and affords them an opportunity of seeking places of more comfort than our heated stores.

During the past few days Old Sol has sustained his well-earned reputation and controlled the thermometer until the mercury has serenely bobbed among the nineties to the extreme discomfort of humanity.

As a sequel the usual midsummer exodus of seaside sojourners has begun, and those who are able to meet the exorbitant demands of hotel proprietors, boarding-housekeepers, hackmen, and a host of others, are packing trunk and valise preparatory to joining the migratory throng.

During the heavy storm of June 26th the stock in the paper mill of T. S. Marshall & Sons, at Marshalltown, Pa., a few miles from here, was damaged to the extent of \$1,000.

The floor of the wareroom was flooded to the depth of three feet by the rapid rise of the adjacent stream.

Wilmington enjoys excellent facilities for reaching Cape May, Atlantic City, Asbury Park, Coney Island, and other popular places of summer resort, and many of our people yearly register at these places.

John Aikenhead, representing John Gibson, New York, called upon the trade last week with a large assortment of beautiful Christmas and New Year cards and novelties.

TRACY.

BOSTON BITS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, July 8, 1884.

The glorious "Fourth of July" is past and the pleasures incident to the occasion are over; but the day will be long remembered by the humble workers in the stationery trade of this city. Nor will the generosity of employers, who so kindly added "three days' grace" to frolic, be forgotten.

It is really to be regretted that our revolutionary fathers didn't work up some other schemes later in the season that we might glorify them by a few more holidays. They were undoubtedly anticipating a very active fall business that year, and so took advantage of the heated term to recruit their strength.

Inasmuch as legitimate holidays are over for the season, the prominent dealers have agreed to take a little recreation every day, and with that end in view will close their stores daily at 5 P. M. during July and August.

Concerning the fall trade it is a little too early to venture an opinion. In commenting upon the future dealers' opinions vary, judgments being given from individual standpoints. But even those who claim to see disaster ahead are doubtful of their own conviction, and are preparing for a good active fall trade. Most of the leading houses have their travelers on the road already, and reports from them are not such as to lessen confidence.

Carter, Rice & Co. are busily engaged in taking stock. Trade with their house for the last six months has wonderfully increased, and amounts to \$50,000 more than for any previous half year. Considering the fact that the margin of profits has been very much lessened

during the past six months, this large increase of profit shows that the house has secured an extra volume of business. This house is certainly one of the most enterprising in this section, and its trade extends from ocean to ocean. As is the custom with this house when taking its July inventory, all of the "odds and ends" are brought to light and special lists of job lots of papers are made. These lots are offered to the trade at such figures as to carry conviction, and dealers profit by these special bargains. In "bill-heads" and "letter-heads" a special list is now ready which would interest the trade generally. Why not send for it?

The Imperial and Royal antique cover papers which this house lately presented to the trade are having a very large sale, notwithstanding the apparent dullness of pamphlet printing.

Some of the special bargains which Carter, Rice & Co. intend to offer the trade this fall, will be set forth in the big July issue of THE AMERICAN STATIONER. So don't miss the announcement if you want to buy close.

The book trade generally is very quiet, considered from a retail standpoint. Publishers are presenting the trade with holiday works, and dealers are placing orders for supplies to a limited amount.

The Hub Card Company is anticipating a good fall trade for its specialties, and is stocking up with an extensive line of cards. The line embraces embossed cards for albums, New Year card novelties, Christmas and birthday souvenirs. Some of the goods are imported. The company's price-list shows that prices are away down, much less than former quotations.

Two of our leading stationers have discovered that they have been the victims of misplaced confidence, and would caution the trade against a certain party who is introducing a new line of pens. The pens prove to be all that is claimed for them, and no fault is found with the pens, but the party introducing them is somewhat unscrupulous.

Samuel Hobbs & Co. are one of the firms to make complaints. Mr. Hobbs claims that he was visited by the aforesaid pen man, and induced to lay in a stock of the pens, amounting to 100 gross, with the understanding that his house was to control the entire city trade. And it was also stated by the pen agent that all communications addressed to his home relative to these pens, from this section, would be forwarded to Samuel Hobbs & Co. for consideration. The transaction looked all right and the cash was paid for the first hundred gross, the seller claiming that he must have cash for the first order to pay traveling expenses, but that future orders would be accepted on time. The pen man went his way rejoicing, and Mr. Hobbs rejoiced likewise and prepared to introduce the "best pen in the market."

Imagine his surprise when some time later he receives from J. L. Hammett, 24 Cornhill, Boston, another stationer, a printed circular setting forth the value of these same pens, and that he (Hammett) was the exclusive agent for Boston and vicinity.

Upon investigation, Mr. Hobbs found that

the same propositions as made to himself were also made to J. L. Hammett, and that Mr. Hammett was persuaded that he would have a big thing in being the exclusive agent for the pens. Spot cash was also paid by Mr. Hammett for a hundred gross, as cash was wanted by the agent to pay more traveling expenses. The only difference in the transactions with both firms was that the pen man let one have a hundred gross for ten dollars less than he sold to the other. The difference in price, however, is not complained of—that's done every day in the week.

On June 4 Mr. Hobbs wrote to the pen man asking for an explanation, but up to the present time no explanation has been received.

In the mean time both Samuel Hobbs & Co. and J. L. Hammett are exclusive agents for these pens by special appointment, and they will so act until each has disposed of his hundred gross, then they will resign the agency. Whether or not, any other exclusive agencies have been established in this city I cannot state.

The party presenting the pens to the trade in this city, and who was always looking out for "traveling expenses," signed himself Alex. Isaacs, or Alex. L. Isaacs, 1746 War-nock street, Philadelphia. A. L. D.

PITTSBURG POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PITTSBURG, Pa., July 7, 1884.

Last week the thermometer stood at 95° in the shade, and a land-office business was done in selling light, weight coats, by the clothiers. To-day 70° indicates the temperature, and all complain of the cool weather. Thus runs the world; some run up in spirits and some run down. The average stationer is most like the thermometer. In the fall, when trade begins to brighten up, his countenance bears a clearer expression; when the Christmas orders begin to come in he is 100° in the shade, and he would have you believe the tube of prosperity was not long enough; when June comes around he is away down, but it is when the dull months of July and August reach him that all of his mercury is away down in the bulb. He doesn't need any tube. As misery loves company the stationer consoles himself with the thought that most of his fellowmen are in the same slow boat.

The failure of A. Jackson & Co. was rather a bad one, the liabilities amounting to nearly \$18,000. They dealt largely in all kinds of wrapping paper and paper sacks. The judgments confessed by Jackson were mostly to relations for money loaned, and the many outside creditors will have to wait some time for their money. Albert is a young man yet and may rise again.

Henry Meyer, successor to Henry Miner, has added an additional ten feet to the length of his store, and can make a much better display of his periodical and general stationery. He anticipates a good trade this fall.

H. Watt & Co., on Wood street, are still happy and say their venture has proven more satisfactory than expected. They certainly

keep a clean stock of books, pictures and stationery goods.

J. Eichbaum & Co. are kept right busy in their printing department. They also have had a fair trade in supplying young artists with materials for their summer sketches and work.

J. R. Welden & Co. and George W. Reed & Co. have places of business on Wood street and adjoining each other. They report trade quiet, but that they always expect it so at this time of the year. A number of Eastern jobbers have taken very good orders, through their traveling men, from these two sterling firms.

Last week the *Freiheits Freund*, our leading German daily, celebrated its semi-centennial. The owners, the Neeb Brothers, have made fortunes out of this paper, and deservedly so, too.

Two weeks ago, *The Penny Evening Press*, of this city, made its appearance. It is a neat and clear cut sheet, typographically, and is filled with choice selections; telegraphic messages and all the local news going. It is four paged and six-columned. John Ritnour, formerly city editor of the *Post*, and who is one of the brightest writers in our city, is the editor. The success of the venture is clearly stated by the fact that the circulation is already 10,000 and still coming up. Our city has now ten dailies, fifteen weeklies and several monthly trade journals.

I have lately been several hundred miles through this part of Pennsylvania and in Ohio and West Virginia, and found all of the crops looking most excellent. Wheat is being harvested and turning out well. Oats are very heavy and the corn is a good color and promises well. Fruit of all kinds will be abundant with the exception of peaches. Good crops add mightily to the general welfare of the land.

Quite a number of very fine gas wells have lately been struck in this immediate neighborhood. Four of our largest mills are now run by gas and at a saving of 60 per cent. in fuel. One iron merchant informed me that their coal bill usually ran from \$5,000 to \$6,000 a month, and by the using of gas they save over half that amount. Westinghouse, the inventor of the famous air brake, struck a gas well in his yard and within the city limits, that has a pressure of 200 pounds to the square inch. Several companies are laying pipes through the city, and hundreds of the private residences will use the natural gas for heating purposes.

I have wandered quite a long way from stationery and book news, but really there is not much to write about in that line. Hope there will be by the last of next month.

G. W. H.

AUGUSTA'S DOINGS.

[FROM OUR REGULAR CORRESPONDENT.]

AUGUSTA, Ga., July 3, 1884.

Everything is very quiet in the stationery and book business here at present, people not having enough energy to write, and very little money to buy anything to read, which would be by far the most pleasant way of

SANFORD'S Pneumatic Mucilage

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure, at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

New Fountain Pen.

A new fountain pen has been introduced. An advantage claimed for it is that it is not constructed on either the stylographic or non-stylographic principle, being without joints, springs, valves, air tubes, seams, screw sections, fissures, &c. The fountain is a simple hollow tube, and the pen, which is gold, is fed by a little slot running lengthwise on the top of a stopper, and two small air-holes on each side of the pen, the latter forcing the air through the slot first mentioned causing a constant and perfect flow of ink. The pen can be filled in a few seconds, and owing to its simplicity can never get out of order. It is made by the Yale Fountain Pen Company, 149 William street.

Novelties in Blotter Tablets.

Writing pads for commercial purposes since their introduction some years ago, have been improved upon from time to time, until at present, when they have become as perfect in form and appearance probably as it is possible to make them. The use of writing-pads for the various purposes of commercial and society stationery has been steadily widening from year to year, but the idea has never seemed to occur to any of the manufacturers, with one exception, to make fine writing-pads real works of art. The exception is W. H. Hasbrouck, who has rendered a service to society, which it cannot fail to appreciate when once his goods are brought into the market and their elegance, novelty and utility are shown to consumers. Mr. Hasbrouck has brought out at considerable expense a line of strictly fine writing-pads for society uses, without any other guaranty of their salability than his own business sagacity. He deserves not only credit for his pluck and enterprise in first entering the field with an untried article of merchandise, but for the perfection and superior quality of his line of goods, which comprises a variety of full plush and leather bound writing-pads, both plain and gilt edge, and also a number of other forms of writing-pads, designed to meet the wants of general consumers of fine stationery. One of the merits of the binding is that when the inside is used up it can be refilled with a new pad, the outside covers of which are made to fit in a set of pockets, thus holding the pad snugly in position and permitting of the substitution of a new pad when necessary. The bindings are made up in six different tints of silk plush; also imitation and real alligator, and genuine Russia leathers. They pack singly in a box and each cover contains a pad of superfine wedding or general society paper, the latter either plain or gilt edge. The pads are made in octavo, commercial, packet and letter sizes and a variety of other styles are being added to the line. The goods will retail for

from \$1 up to \$10. Mr. Hasbrouck has also a full line of superfine wedding papers put up in pads without the fancy bindings equal to any paper manufactured in this country in all of the leading tints and styles, and a full line of the same papers for folding. They are put up in elegant steel engraved covers in a variety of tasteful and pretty designs. He has also brought out an entire new line of cheap pencil tablets for school purposes. They come in all styles and sizes in handsome lithograph covers, the engravings being especially chosen on account of their interest and attractiveness to school-children. Moreover, in addition to the old standard line of the 100-sheet M. & H. blotter tablets, there is a new line embracing all of the numbers of the old and many new styles of 80-sheet tablets, making a total of about 400 varieties of blotter tablets, which he now manufactures.

NEW PATENTS.

No. 300,203. Revolving Book Stand.—David D. Bowman, Eureka, Cal.

In a revolving book stand or support, the combination, with a series of revolving spiders and means for revolving them, of a series of shelves journaled between the arms of the spiders, and adjustable weights attached to the back of the shelves.

No. 300,212. Tag or Ticket Fastener.—Solomon C. Campbell, Brooklyn, N. Y.

The combination of a tag or ticket with a metallic thread or wire having a hook for engaging with the tag at one end and the other end formed into a spiral, oblong in shape, whereby the tag may be secured to the goods by a simple inward and outward movement.

No. 300,218. Salesman's Check-Book Case.—Clarkson Clothier and Darwin E. Crosby, Philadelphia, Pa.

No. 300,224. Fountain-Pen.—Charles H. Court, Jersey City, N. J., and Albert J. Kletzker, New York, N. Y.; said Court assignor of one-half of his right to said Kletzker.

REISSUES.

No. 10,488. Combined Tag and Envelope.—Joseph T. Dunham, Brooklyn, N. Y. Original No. 277,245, dated May 8, 1883.

SALE OF A GUTENBERG BIBLE.—Among the lots disposed of at the sale of Lord Gosford's library was the first volume of the Mazarin or 42-line Gutenberg Bible, the first book ever printed from movable types. The contest lay mainly between Mr. Quaritch and Mr. Toovey, and in the end it was knocked down to the latter, after a spirited competition, for the sum of £500. Complete copies of this grand work are worth four or five times this sum. The present volume commenced with the Prologue of St. Jerome, and ended with the Psalms. The binding is of mid-fifteenth century date.

Dickens's "Old Curiosity Shop."

"I'm gettin' heartily sick on't!" exclaimed the lady of the house, a genial, pleasant soul, with humor in her eye, to our representative, when he called upon her to ask her permission to explore No. 14 Portsmouth street. And not without reason, indeed, for Dickens's "Old Curiosity Shop" and the street where it stands are constantly crowded with visitors and sightseers. "And one well-dressed person," said my hostess, with a sniff of contempt, "asked me if he might take a brick away with him as a relic! 'I will smooth it down, and it shall be a heirloom in my family forever.' A lunatic, I call him. And who knows but he beats his wife?" But this gentleman, brimming over with sentiment, walked off with a brick under his coat nevertheless.

Many artists have visited the spot lately, for it is to be torn down, and many sketches from every point of the compass have been taken. On Monday, in the short space of half an hour, a photographer blocked up Sheffield street with his camera, three reporters were busy taking notes, and two other gentlemen were hard at work sketching the ruins, much to the amusement of the odd fish who constitute the "neighborhood." Even during the few minutes I spent in the upper regions of No. 14, one lady came up the creaking steps, peered in, apologized for the intrusion, viewed the chaos, remarked that it was a pity, and descended. "I come from Boston," I heard her murmur. It may be said, *en parenthese*, that a roaring trade is being done in little pictures of the exterior, which may be had for "2d. plain," and "4d. colored." Miss Anderson is a constant visitor (so I was told), and insists upon drinking a dish of tea in the parlor when the parlor is once more cosy and rejuvenated. "A charming young lady, and so affable."

"The Old Curiosity Shop" stands in the southwest corner of Lincoln's-in-fields, and occupies an angle of Portsmouth street, one window looking northwest, the other two facing Sheffield street. The red tiles and the overhanging roof have a quaint, old-fashioned air about them, and afford a pleasant relief from the hideous yellow plaster on which is painted, in great vulgar letters, the name with which it has been endowed, "Immortalized by Dickens," and just below, in unholy contrast, "H. Roole, waste paper dealer," some rag collector who will get such an advertisement as many a pushing politician would give his eye for. Heavy joists give the house support now, and the yawning gap overhead shows the ruined mass of bricks and mortar.—*London Daily News*.

The latest thing in clocks comes from Russia. It is a little timepiece about eight inches high, on a base five inches in diameter and covered with a glass globe. All the works are plainly exposed. The pendulum is a solid brass wheel supported at the centre or hub, by a slender wire. It does not swing, but revolves from left to right and right to left. Being a 400-day clock, the winding of it is a small item. It will not vary five minutes in sunning 400 days. No temperature affects it.

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE

NATIONAL PUBLISHING CO.

724, 726 & 728 Cherry Street, Philadelphia.

We claim the following advantages for the "National Contrasted Editions":

(Continued from page 34.)

passing the time. I see that we are having more pleasant weather than you, for the *Herald* speaks of persons being overcome by the heat, which very seldom occurs here. The thermometer has not been over 85° in my office. It has been a delightful summer so far, only a little too much rain in some parts.

The rage now in our city is the game of base-ball, and our young men are almost wild about it, and in spite of broken fingers, &c., they stick at it. We have two good nines, composed of young gentlemen of good standing—the Browns and the Clinchs. The former are the general favorites, although both play good games. But a few weeks ago a club called the Stars, from Columbus, Ga., took the rounds and used up the local clubs of Macon, Savannah, Charleston and Augusta pretty badly. They say that the Stars had eight professional players out of the nine, which gave them so much advantage. The Dixie Club, of Savannah, came up a few days ago to play with the Browns, but was badly beaten. The season has just commenced. Richards and Pendleton both report large sales of bats and balls, the former saying that they have sold over one hundred dozen balls. Business is very dull, especially among the cotton men, during the summer months, so the boys are up to all sorts of amusements to pass away the time until the cotton begins to come in, and then they are done with play and knuckle down to business. The dry goods and shoe stores close up at 6 o'clock every evening until September, giving the clerks a chance for recreation. The public schools have closed for the summer, but would have kept open a month longer only that the funds gave out. The public think that they give too much already to help to educate negroes, as well as their own children. The rising generation of the colored population is getting ruined by it, becoming stuck up, and will not work, so the majority lie around and steal, and they are ruined for labor.

I have been intending to send you an account of the Bath paper mills, which are located four or five miles from here on the South Carolina Railroad, as the president of the paper company promised to let me have it; but it ended in promises, and the whole concern came nearly coming to an end by fire last Sunday morning at 9 o'clock. The fire occurred in the picking room, and is supposed to be of spontaneous combustion. A great portion was burnt. Loss about \$40,000; insured for \$47,000. The finishing part of the mill was not destroyed. The company has been unfortunate at various times, twice a fire, the dam broken several times, and litigation. It made very good book and printing paper, and had orders for more than it could make. If the insurance is paid promptly it can be ready to go to work again in fifty days. I hope that it will, for the loss will be felt.

The Presbyterians have just finished a superb library and Sunday-school building, on the same lot as the church, which is a square in size. It is very elegant, costing about \$35,000. The money was left them by an old lady, a Miss Telfair, of Savannah, for that

special purpose, and to be used for nothing else. The church is on Telfair street, which was named after her grandfather, when he was Governor of the State many years ago. It was dedicated last Sunday to a large audience; the place could not accommodate all. The ladies of the church paid for the furniture and the gentlemen for the carpets. It is only a few months since that a full length statue of the former pastor, Dr. Irvine, was unveiled, costing a great deal of money. It was executed by a young German here, and is remarkably well done, both for workmanship and as a likeness.

We are having rather too much rain for the cotton crop—the grass gets ahead, which injures it.

There has been a clever book lately published, written by a young gentleman by the name of W. Seabrook, entitled "Saved by a Woman," a tale of the late war, which is taking very well, and is said to be quite readable.

All who have leisure and plenty of money (the former have the majority) are getting ready for trips to the mountains and the sea-side for several months, where they will find plenty of enjoyment. I wish I could be of the number, but, as I belong to the first class, I have to remain at home, consoling myself that it is the most comfortable place after all.

MILL BANK.

Commercial Travelers' Convention.

A large representation of the members of the National Association of Commercial Travelers attended the annual meeting of that body, at the Merchants' Association rooms, Boston, on Wednesday. Delegates were present from all over the country, even California being represented. President M. B. Cole, of the firm of Burrage, Cole & Weeks, of New York, occupied the chair, and J. Will. Page, of Syracuse, acted as secretary.

An order of business having been agreed upon, the report of the Committee on Credentials, consisting of Messrs. Ball, of New England, Page, of Syracuse, N. Y., and Trask, of St. Louis, stated that thirty-nine delegates were present from New York, Indiana, Ohio, the Western Association and the New England Association. George C. Webster, of Indianapolis, chairman of the Executive Committee, reported for that body that it has endeavored to induce the Detroit and Northwestern associations to return to the National Association, and that it is working with strong hope of success for the passage of a national law which will protect in all the States the rights of commercial travelers. The annual address was made by President Cole.

Thomas A. Young, of New York, reported for the Committee on Railroads progress, and predicted within a few months a wholly satisfactory arrangement between the roads and the travelers. He stated that in New York the Traders and Travelers' Union, with a capital of \$200,000 and a membership of the most enterprising merchants of the metropolis, is co-operating with the Travelers' Association in

its endeavors to get more satisfactory arrangements with the railroad companies.

James T. Eaton offered the following resolutions:

Whereas, Certain cities and States in these United States have upon their statute books and are enforcing certain discriminating and excessive licenses and tax laws against commercial travelers from other States and cities; and

Whereas, It is clearly unconstitutional for any State or municipality to enforce said discriminating laws; therefore, be it

Resolved, That the National Association of Commercial Travelers of the United States do most earnestly protest against the passage or enforcement of any such laws.

Resolved, That so far as the exchange of produce, manufactured articles, or merchandise is concerned between the different locations of these United States, we are most emphatically for free trade.

Resolved, That we cannot see the wheels of commerce clogged by these license and tax laws without putting ourselves on record as opposed to the whole system, and in order to work systematically for the abrogation of these said laws, be it resolved that a committee of three (to be called the Legislative Committee) be appointed by the convention whose duty it shall be to communicate with the Senators and Representatives in Congress in reference to such legislation as the exigencies of the case require.

Resolved, That this committee be instructed to carry out such means for effecting legislation in the interests of commercial travelers as may seem to them best, and that the members of this association pledge themselves to assist and aid in all honorable measures which may be instituted by boards of trade, chambers of commerce, and similar bodies or associations looking to this end.

Resolved, That this association strongly favors the bill introduced by the Hon. Mr. Brewer in this interest, and also the amendment to the District of Columbia Police bill introduced by the Hon. C. R. Skinner, of New York, and so ably assisted by the Hon. S. S. Cox and Frank Hiscock, of New York, and the Hon. J. S. Robinson, of Ohio.

A Belgian inventor, Mr. Pirón, has invented a method of rendering cellulose tissues impermeable and very durable, without injuring their flexibility, and without much increasing their weight. By examining the bandages of the Egyptian mummies he inferred that the best preservatives would be found in the vegetable kingdom, and he has given preference to the green tar of birch bark, which furnishes the perfume of Russia leather. The tar forms with alcohol a solution of great fluidity; but when once dried it becomes resinous, and resists the solvent power of alcohol. It can be combined with the most brilliant colors. These qualities enable it to penetrate the capillary vessels of tissues, covering them with a varnish of great elasticity, which resists the corrosive action of acids, sea-water and changes of temperature. The density is very small, so that the tissues are made impermeable, with a slight increase of weight. The prepared stuffs can be folded without scaling. The aromatic odor drives away insects. Microscopic vegetation cannot grow, because neither air nor water can penetrate into the interior of the fibres. The invention can be applied to all vegetable tissues, such as sail-cloth, cordage, awnings and curtains.

Henry Levy & Son are stocking up with a large new line of goods for the fall trade. They have also an extensive line of their own manufactured goods, the styles and designs of which will surpass anything previously offered by the firm.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

William H. Smith, printer, Boston, Mass., is dead.

The *Our Continent* Publishing Company, New York city, has been attached.

Jones Brothers, dealers in wall paper, &c., Chicago, Ill., have been closed by the sheriff.

Henry Oaten, printer, Bracebridge, Ont., is asking an extension from some of his creditors.

M. Goldsmith, of the firm of M. Goldsmith & Son, paper dealers, &c., Charleston, S. C., is dead.

An execution for \$200 has been issued against *The Mail* Publishing Company, Allegheny, Pa.

S. C. Toof & Co.'s printing house at Memphis, Tenn., was damaged by fire on Tuesday evening, to the extent of \$15,000; fully insured.

G. W. Borland & Co., publishers and booksellers, Chicago, Ill., have been closed by the sheriff. The firm is said to have made an assignment.

Parker & De Lucca, publishers, Eagle, Idaho, have dissolved partnership. Parker retires from the firm and George W. De Lucca continues the business.

A new counterfeit \$10 silver certificate, series of 1880, has appeared in the West. It is a quarter of an inch shorter than the genuine, and on the back where it should read "and all public dues and when so received," the word "all" is entirely omitted and the words "when so" are tied together as one word.

Owing to the death of the late George D. Pitzipio, the copartnership heretofore existing under the firm name of Pitzipio & Co., paper-stock importers, has been dissolved and the business of the late firm will be settled up by the surviving partner, Hermann De Valliere. A new partnership has been formed between Mr. De Valliere and Paul P. Negroponte, under the style of De Valliere & Negroponte, who will continue the line of business formerly conducted by Pitzipio & Co., and at the same location, 56 Stone street, New York.

A disastrous fire occurred on July 3, in an extensive planing and molding mill, at Kent avenue near Hewes street, Brooklyn, causing a total loss of \$85,000. An alarm was sent out, but when an attempt was made to send a second alarm, it was found that the fire telegraph line had been broken. Before additional assistance could be summoned, the fire got beyond control, and the large mills, together with the valuable stock and machinery, were destroyed. The mills were in close proximity to D. Appleton & Co.'s large printing and publishing house at the corner of Hewes street and Kent avenue. The building had a large water tank on the roof, which held 4,500 gallons. The heat from the fire caused the tank to burst, and its contents went pouring down through the interior of the building over the valuable stock of books, prints and machinery, causing a loss of \$10,000.

The three-story paper-stock warehouse belonging to Koblitz Brothers, No. 351 Woodland avenue, Cleveland, Ohio, caught fire at nine o'clock Saturday night, and, owing to the extent of the building and its packed condition, a loss of from \$20,000 to \$25,000 was sustained. The warehouse was almost totally destroyed, and the store building was considerably damaged. Koblitz Brothers say a skyrocket caused the fire, but this theory is not generally credited. They are insured for from \$12,000 to \$15,000.

The Claremont Manufacturing Company, printer, stationer, binder, &c., Claremont, N. H., has failed. The business was incorporated about fifteen years ago, with a capital stock of \$100,000, but has not been successful for several years past. The property is heavily mortgaged.

Contracts for stationery supplies have been recently given out by the War, Post-office and Interior Departments of the Government, and the House of Representatives is now receiving proposals for supplies of this character.

The American Job Printing Rooms, Nashville, Tenn., have admitted Albert S. Ambrose into partnership, and the style of the concern is now Hasslock & Ambrose.

The paper mill owned by Windsor Brown, with contents, was totally destroyed by fire on July 3, at Ripley, N. Y. Loss, \$5,000; insurance, \$1,000.

D. L. Sullivan & Co., book agents, Kansas City, Mo., have made an assignment.

William Milton, paper-stock dealer, San Francisco, Cal., is dead.

W. R. Dunn, printer, Crookston, Minn., has sold out.

Edward E. Clark, stationer, Boston, Mass., has been damaged by fire.

P. P. Dodeen, publisher of *The Surprise*, Detroit, Minn., has been burned out.

H. C. Belger, printer, Herman, Minn., has been burned out. Loss said to be \$500.

W. P. Lucas & Co., stationers, &c., Minersville, Pa., have sold out to Burke & Dickinson.

William Edinger, wall-paper dealer, East Saginaw, Mich., is reported to have left town.

H. L. Kent & Co., paper manufacturers, Westfield, N. Y., have been burned out. Loss small.

B. C. Nye & Co., publishers of the *New Era*, Lake Valley, N. M., have dissolved partnership.

The estate of Wilson & Lamb, publishers, &c., Montreal, Quebec, is advertised to be sold at auction.

The book bindery of D. Appleton & Co., Williamsburg, N. Y., was damaged \$15,000 by water on July 3.

Thompson & Batchelder, booksellers and stationers, Exeter, N. H., have dissolved partnership. James H. Batchelder succeeds to the business.

Judgments amounting to \$1,221 have been secured against Davenport Brothers, dealers in picture frames, Scranton, Pa., and execution has been issued.

W. J. Caulkins, dealer in wall-paper, &c., Erie, Pa., has sold out to Sell & Gibson. The business was subsequently disposed of to W. J. Sell; Sell & Gibson having dissolved partnership.

August C. Speth, of the firm of Speth & Co., lithographers, New York city, was arrested on July 2 on the charge of manufacturing and issuing counterfeit elevated railroad tickets. He pleaded not guilty and was sent to prison in default of \$3,500 bail.

A large fire occurred at Port Perry, Ont., last week. The following named tradesmen were burned out: Baird & Parsons, publishers of the *Ontario Observer*; W. H. Leonard, photographer; H. McKenzie, photographer; E. Mundy, printer and publisher.

A fire was discovered, on June 29, in Amos Kemp's bookbindery, at Bloomington, Ill., in the third story of the block. The fire was headed off, though not until damage by fire and water to the amount of \$1,600 had been

W. H. HASBROUCK,
536 & 538 Pearl St., New York.

sustained, which is insured. The fire originated by mice nibbling at a box of matches.

The Coburn Publishing Company, Chicago, has been closed by the sheriff.

D. A. Jackson, publisher of the *Dispatch*, Oneida, N. Y., has admitted to partnership W. J. David.

J. P. George, publisher of the *Jeffersonian*, Brookville, Pa., has sold out to McMurray & Sampson.

Barney & Dellano, dealers in subscription books, Detroit, Mich., have dissolved partnership. J. C. Barney continues the business.

Morris Thanhauser, importer of fancy paper and boxes, Philadelphia, Pa., is now also a member of the firm of Strauss, Thanhauser & Co., wholesale and retail dealers in fancy goods, &c.

The Acme Stationery and Paper Company has issued a new revised price list. It is a neatly printed pamphlet of twenty-four pages, and contains the fullest possible information. The prices given are very reasonable.

Jesse Crandall, the well-known Brooklyn toy dealer, it is authoritatively stated, has obtained an extension from a majority of his largest creditors. Mr. Crandall was obliged to take this step on account of a depression in trade and the fact that recent heavy failures have thrown on the market a large amount of goods, which have been sold at a great sacrifice, and hence tended to depreciate regular prices. The trade has the fullest confidence in Mr. Crandall's ability to pay his obligations and the extension asked by him was cheerfully granted.

Several of the creditors of Clarence Levey have caused an examination to be made of the records of Monmouth County, in order to learn the status of the property owned by him at Deal Beach, near Long Branch. The result of this search shows that quite a number of transfers of this property have been made from Clarence Levey to various members of his family, and also to Edward W. Burke, who in turn retransferred the property to relatives of Clarence Levey. The property consisted of 15 or 20 acres of ground which Levey had used to raise stock on, and a house was also upon it. The whole is valued at about \$15,000, the consideration mentioned in the deeds. It is claimed that some of the transfers were made without any consideration, and are consequently void, and steps will be taken to have them set aside. The Stationers' Board of Trade has the claims of several of the creditors in its hands for collection. An intimate acquaintance of Levey, who has had close business relations with him, says that he has reason to believe that Mr. Levey is not in Europe, and that he is still in this country in seclusion.

J. McCarthy & Co., paper-hangers, &c., Middletown, Conn., have dissolved partnership. J. McCarthy continues the business.

Clayton Brothers, dealers in fancy goods, at Seattle, Wash. Ter., have failed. Liabilities, \$20,820; nominal assets, \$20,000.

The *Vidette* Publishing Company, Oakland, Cal., has suspended publication.

Joseph Marks, stationer, Oroville, Cal., has been attached for \$4,318.

The Coburn Publishing Company, Chicago, Ill., has been closed by the sheriff.

E. L. Van Derveer, proprietor of the Union Paper Company, San Francisco, Cal., has sold out.

John Marshall, dealer in picture frames, Bridgeport, Conn., is offering to compromise with his creditors.

Ackerman & Co., publisher of the *Criterion-Democrat*, Carbondale, Ill., have been closed under a chattel mortgage.

Miller & Umbdenstock, printers, Chicago, Ill., have been succeeded by the Globe Lithographing and Printing Company.

P. L. Mooney & Co., dealers in subscription books, Chicago, Ill., have dissolved partnership. P. L. Mooney has succeeded to the business.

Patrick O'Neill, paper-stock dealer, 408 and 410 South Sixth street, Philadelphia, will carry on the business of the late firm of Rogers & O'Neill, the partnership having been dissolved by the death of Luke J. Rodgers.

The New York News Co. forwards a sample of a silk campaign badge, which it is now offering to the trade. The badge shows life-like portraits of the Republican candidates, printed from a steel-plate on silk of a crimson shade. The portraits are finely executed, and the badge is one of the prettiest pieces of campaign goods thus far introduced.

Wright & Keiser, manufacturing stationers, Allentown, Pa., have dissolved partnership, because of the failing health of Mr. Keiser.

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

Wright & Co. have bought the latter's interest in the firm and continue the business.

The Middletown Publishing Company, Middletown, Conn., has been attached.

M. A. Ring, Jr., paper-stock broker, who has been on a visit to Europe for several weeks, returned home this week by the Cunard steamer Aurania, looking remarkably well.

William Allan, assignee of Butler & Miles, paper dealers, has sent out a call for a meeting of the creditors of that firm on June 11, at eleven o'clock, when a statement of the affairs of the firm will be presented for the consideration of the creditors, and some proposition submitted toward a settlement.

James H. Batchelder, who succeeds Thompson & Batchelder, stationers, &c., Exeter, N. H., has received flattering notices from the press of that city. Mr. Batchelder is said to be very popular and is held in high esteem, and his store is said to be noteworthy for its large and varied assortment of goods.

John H. Lyon & Co. have opened a branch of their paper-stock business at No. 8 Washington square, Worcester, Mass. This they call their New England Agency, John M. Barker & Co. acting as their selling agents. This branch is more particularly devoted to sales of woolen rags, shoddies, extracts, flocks, &c.

A fire broke out in the stationery store of Edward E. Clark, No. 41 West street, Boston, Mass., on Saturday. The fire started in a small room in the rear of the store, from some unknown cause, and quickly worked its way to the floor above. The damage to the building, which is owned by the Mason heirs, will amount to about \$1,000, and is fully covered by insurance. The loss on the stock of Edward E. Clark is quite heavy, as a dense smoke pervaded the store.

A conference of newsdealers from various cities of the United States has been a subject of agitation for a long while. At a meeting of the New England newsdealers, held June 27, a committee of five was appointed to confer with a similar committee from the New York newsdealers' council to take steps toward arranging the date of holding the convention, and the Philadelphia newsdealers have already signified their intention of representing their city.

Langfeld, Turner & Andrews are now showing a line of wire supporting gusset ladies' hand-bags. These goods are made only for this firm, and judging from their extensive sale already, will prove some of the most popular articles in the shape of fancy leather goods that have as yet been introduced. The firm, also, has a full line of bill-books, calf and sheep-skin wallets, card and letter-cases, purses and a great variety of fancy leather goods in general.

Thomas D. Hubbard, of the Central Ohio Paper Company, paper dealer, Columbus, Ohio, and for a number of years salesman for George P. Putnam & Sons, publishers, is now visiting the city making his headquarters with Boorum & Pease. It has been about nine years since Mr. Hubbard has been in New York, and the wonderful changes which have taken place within that time surprises him, but none more than the growth of *The Paper Trade Journal* and *AMERICAN STATIONER*.

The Mount Cube Fibre Company, manufacturer of wood pulp at Wentworth, N. H., and having an office at 55 Equitable Building, Boston, Mass., has failed. It was incorporated in July, 1883, with a capital stock of \$100,000, of which \$50,000 was paid in and invested in real estate, machinery and patents. Most of the stock was owned by the Brown Lumber Company. Its officers are A. L. Brown, president; A. P. Wilson, secretary and treasurer, and C. B. Carter, superintendent. Its product was eight to twelve tons of chemical wood fibre each twenty-four hours, and made under the Carter process.

The stock of M. Norton, dealer in paper stock, No. 496 Commercial street, Boston, has been attached at the instance of parties in New York city, and a keeper is in possession. Mr. Norton mortgaged his stock for \$3,090, and also, it is said, his real estate at Medford, on Saturday last, and sailed for Europe. His liabilities are reported at \$30,000.

C. C. Herald, the well-known New York agent for Train, Smith & Co., of Boston, has been taking a well-earned vacation from close attention to business. Philadelphia is a very attractive place for Mr. Herald, and his looks indicate that he has been enjoying himself there, and it is said that he was very loth to leave when his time was up.

Phil. Hake is now showing a very complete line of New Year calling cards. The designs are very novel and pretty and deserve the inspection by the trade.

Charles Godfrey Leland is said to be convinced that the "Algonquin Legends," which he is about to publish, are fragments of a great epic which is identical with the Eddas.

The semi-annual meeting of the Stationers, Board of Trade was held on Tuesday afternoon last. President Pease presided and read an informal report. No business of importance was transacted.

Beverly Ward, for many years publisher of the *Commercial Advertiser*, and a son-in-law of the late Hugh J. Hastings, was succeeded this week by Bryant Godwin, son of Parke Godwin, the principal owner of the paper. The press-room continues to remain in charge of the efficient superintendent, Mr. Sundersland.

Marcus Ward & Co., Limited, have just issued a new book for children, entitled "Nursery Numbers." It contains some of the more popular Mother Goose Melodies, with entirely new illustrations. Its end papers were designed by Thomas Crane, and are very novel, being made up of rhymes formed by a combination of numbers and words. The general style of the book is somewhat similar to "At Home and Abroad," with which the trade are familiar.

IVORINE COMPOSITION.

Poker Checks, Checkers (Tiger Brand), and Pool Balls
41 WHITE ST., NEW YORK.

Obituary.

ROBERT WHITE.

Robert White, the publisher of the *Sunday Democrat*, died on Saturday last of an affection of the heart and liver, at his home, 87 Hooper street, Williamsburg, 54 years old. He was born in Carrick-on-Suir, Tipperary, Ireland. Thirty years ago he came to this country with his wife, whom he married on the day he set sail.

He connected himself in business in New York with the late Richard Walters and made money. He finally abandoned commercial life, however, and took control of the publication of the *Sunday Democrat* on its establishment sixteen years ago.

While he was not an active member of any Irish organization, he was an earnest and warm friend of the cause they represent. He was a member of the Press Club and one of the founders of the Impecunious Club. Few persons in public life in this city were unacquainted with him. He leaves a wife, three sons and two daughters. His funeral will take place to-morrow from the Church of the Transfiguration in Hooper street, at nine o'clock, after the reading of a requiem mass.

The Novelty Card and Advertising Company, Chicago, is publishing a line of lithographed campaign portraits. Those already issued are good likenesses of the Republican candidates.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commands itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIRS: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. It CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market St., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, JULY 10, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE commercial travelers are holding a meeting of their National Association at Boston. This body, in conjunction with like organizations formed in different sections, is growing in numbers and authority. It has the power, judiciously exercised, to make itself respected and influential.

CONVENTIONS are largely in order. One of the latest is that of the newsdealers of the country, who have determined to meet in conference for the purpose of trying to regulate abuses which prevail in methods of distribution, and for establishing a uniform system of handling publications.

PRACTICAL Christianity has been shown by a manufacturer at Columbus, Ohio. There has been much opposition to baseball playing on Sunday in this city, and efforts have been made to break up the practice. The manufacturer referred to called his employees, some nine hundred in number, together and notified them that if they would agree to abstain from Sunday ball-playing he would close his works at three o'clock on Saturday afternoon without any reduction of wages. This proposition was joyfully acceded to by the workmen, and so a great reform is promised accomplishment by the thoughtful and intelligent action of one man. This is true reform.

CONGRESS has finally adjourned, and the country is rid of vexatious legislation and disturbing politics until December. The heat and excitement of the presidential election are not inimical to trade, except so far as they distract attention, and people can very well go on about their business without present alarm as to the outcome. We do not discuss politics, but one thing we believe that we have a right to suggest, and that is, that business men should make up their minds as to whom they shall vote for and what party they shall support according to their own judgment, uninfluenced by the exhortations and biased statements of partisan papers. The body of voters, it must be remembered, is a jury. Some of them are influenced by appeals to their imagination; some are willing to let others think for them; still others are of that mongrel type who always want to be on the winning side, indifferent to principle, and another class are venal. The best hope of the country depends upon the men who can think for themselves, and whose opinions are founded upon authenticated facts and fixed principles. It is related that of the two great opposing barristers in England, Lord Brougham and Sir James Scarlett, the first always

charmed the jury with his eloquence, but that the latter gained the verdicts. In one instance it is narrated that a countryman just discharged from a jury and who had been on the panel in several cases in which these opposing counsel appeared, expressed his admiration of Brougham and his efforts before the jury, but on being asked why he had in every instance given a verdict on the other side, remarked that Sir James was always right. So it should be with the voter, who, while able to understand and measure the depth of eloquence and of appeals to passion, should withstand prejudice and form his conclusions by logical inferences and on established facts.

Roundabouts.

BY THE TRADE LOUNGER.

Well, after the few days' rest accorded last week, people seem to have settled down nicely to business, and what is more, business seems to have only been waiting for the National holiday to pass in order to take a bit of a turn, starting up a little livelier for the rest.

As THE STATIONER predicted last week, there has been no farther reduction in the prices for playing-cards. The new schedule of the card combination prices has just been issued, and it shows no change whatever from that which has been in effect during the past six months. The card manufacturers contend that prices are as low now as they can be and afford a profit, while the character of the goods is rather better than it has been.

I saw in the San Francisco *Bulletin* of late date that quite a lively time has been going on in California over the school-book contracts. Charges of bribery are freely offered, and the representative of an Eastern house has been arrested for bribing officials to adopt the publications which he represents.

Not only has the agent aforesaid got into quod, but he didn't get the contract, a San Francisco firm scooping it.

But, then again, the "trouble" drifts over onto the other side. One of the Pacific coast houses is said to have been putting its money where it could do the most good, and one of the county officials is reported to have skipped. The reason why is, that he accepted \$400 in consideration of his aid in introducing the books of another firm, and the excitement in educational circles, at last accounts, was quite intense.

Somebody will say: "They all do it."

Well, if they do, it is about time that such doings were stopped.

Some genuine novelties in fancy leather goods have lately appeared on the market. They are made of the hide of still-born calves

which is tanned in imitation of sealskin, the hair being left on. This material is said to possess remarkable pliability and beauty of color. Why the hide of still-born calves is more adapted to the purpose than that of other calves is not explained.

Some more contracts for stationery have been given out at Washington. As the editor tells me that he is going to print the particulars, I shall not discuss them. Some low prices are made. How's blotting?

James Leach is enjoying himself on his farm at Park Ridge, N. J. Why don't all of the trade have farms and enjoy themselves?—making hay while the sun shines.

The trade in shelf papers is curiously inactive, notwithstanding that it is usually quiet at this season. Dealers are on the ragged edge of uncertainty, some having completely shut down for this month, while others are groping on scarcely knowing whether to proceed or come to a standstill. As a dealer expressed it, "there is practically no trade."

This is another week of political excitement. I have learned by this time to repress my curiosity, and am now awaiting Chicago results composedly. Oh, if Ben should get the nomination, what a racket he would make, wouldn't he? I really believe that he would just make things "hump." But he will probably be assigned to a seat in the rear.

Answers to Correspondents.

Subscriber asks if any decision has been made lately regarding the Carseley patent on check protectors.

Ans.—Not that we know of. We have heretofore set forth the merits of the Carseley claim in THE STATIONER. We regard the patent as bad and its claims untenable, and believe that a little vigorous contest against it would defeat it.

H. & J. ask: Who makes those patent pencil holders and the coin holders mentioned in the last number of THE STATIONER?

Ans.—Will. F. Park, 57 Maiden lane, New York, has the sole agency for them.

R. P. Co. want address of manufacturer of "druggists' pads for wrapping purposes."

Ans.—Richmond Paper Box Company, Richmond, Va.

Marcus Ward & Co., Limited, have brought out a line of illuminated papeteries. The boxes are made of paper board and their exteriors are handsomely decorated. These will be filled with two packages of their flax paper. Marcus Ward & Co. are also putting up their celebrated Irish linen writing paper in illuminated wrappers.

Cheap literature seems to have reached its lowest point in Liverpool, Eng., where Goldsmith's "Vicar of Wakefield" has been neatly printed on good paper, furnished with a portrait, and sold for a penny.

------------------------------------	-----

The German National Museum contains numerous specimens of marbled paper of the olden times. One of the most ancient is a genealogy of noble Austrian families from 1579 to 1617. Thirty-two out of the 277 sheets are partly marbled on both sides as illustrations. The marbling is done in various styles; most of the specimens resemble the Turkish and Greek marble of to-day. The colors are blue and red, and the white color of the paper on which the drawings were made comes in between. Others are like the modern leather-marble, and are partly in brownish-red and dark-gray colors. The other leaves of the book are in various colors, except in white; white flowers, leaves, &c., are so printed as to appear on both sides, in greenish yellow or blue tints, or in gold and silver. Marbled papers were scarce even in the beginning of the 17th century, and the process was at that time and for long after a mystery. A receipt for marbling appears in a book printed in Nuremberg in 1651.

J. H. Bufford's Sons have greatly improved their campaign badges by the addition of silk fringe and cord instead of plain edges. These badges are made of cotton and have a handsomely lithographed portrait of Blaine and Logan. They are trimmed with red silk cord at the top and blue silk fringe at the bottom,

forming the combination of colors, red, white and blue. They are equal in appearance to satin badges, but in price are far cheaper. The firm has also a line of other campaign goods, to which the attention of the readers of THE STATIONER has been called before.

Market Review.

OFFICE OF THE AMERICAN STATIONER, }
WEDNESDAY, July 9, 1884. }

THE MONEY MARKET.—The financial situation continues to show improvement both in respect to the stronger condition of the banks, the abundant supply of loanable funds, and the improved feeling which is being manifested in various ways. Call loans on stock security have been available at $1\frac{1}{2}\%$ to $2\frac{1}{2}\%$ per cent. Time loans, in which but little has been done, quoted $5\frac{1}{2}\%$ to $6\frac{1}{2}\%$ per cent., and on Government bonds money can be had at $4\frac{1}{2}\%$ per cent. Commercial paper has been in moderate request, with first-class names quoted at 6 per cent. discount. The sharp advance established last week in the stock market has been followed by reaction and the whole list is lower, but the changes appear to have been caused wholly by manipulation, and are not the result of any new developments or of any change in the situation. Railroad bonds are likewise lower than last week, but the trading has been moderate, with an absence of pressure to sell. Government bonds are higher. Foreign exchange has ruled higher, but inactive, the demand having been quite light, but at the advance rates has ruled steady.

THE PAPER MARKET.—Notwithstanding no improvement has developed in the volume of business, there are some favorable features of the situation which seem to be exerting an influence for good. Among these favorable features may be mentioned a more encouraging bank statement, the continued ease and cheapness of money, comparatively large importations of gold, and more liberal buying of cotton and other domestic produce on export account, the combined influence of which has imparted a more cheerful feeling in business circles, and much of the depression that prevailed a fortnight ago has been replaced by more hopeful views respecting the future outlook, so that there is only lacking the vitalizing force of perfect confidence for a renewal of commercial activity. Values in the paper trade continue very low, but rule steady, and very even temper is still a prevailing feature. The straw-board trade is beginning to experience a little better demand, but goods are being marketed very closely to cost. The straw-wrapping trade are hopeful of being benefited through the shutting down of a number of mills on account of the scarcity of straw and the drought. We hear of about twenty mills which closed down on about July 1, and will remain so for sixty days. This movement will go far toward putting the market in good shape and diminishing the large surplus supply. Lest our quotations, made last week, of $7\frac{1}{2}\%$ at the mills for super-sized and calendered book paper should be misunderstood, it may be stated that a low grade of this quality is to be obtained at the mills for $7\frac{1}{2}\%$, as there are grades of super-calendered which bring $8\frac{1}{2}\%$ to 9% , while an extra machine-finished at $7\frac{1}{2}\%$ would not be above the market.

THE STATIONERY MARKET.—There seems to be a quickening in many lines of trade this week, and while the market does not indicate the presence of a boom, business generally is quite fair. The trade in fine stationery is steady, with about the same amount of orders as at a similar period last year. There is quite a brisk demand for summer toys, while the trade in novelties for the holidays is showing a healthy condition by the large number of advance orders which are being received. The playing-card trade is opening up good, and promises well for the remainder of the season. In fancy leather goods business also shows considerable improvement over a few weeks ago. These goods have greatly improved this season, not only in respect to design, but material. They are very attractive, novelty being their chief feature. This is said to be the duller period that has been known in shelf papers at this season. Many manufacturers have entirely shut down, a thing which has never happened before. The ink, pen and kindred lines show no variation from the condition last reported.

Treasury Department Stationery.

Appended is a list of the bidders to whom the contracts for furnishing stationery for use in the Treasury during this year will be awarded as soon as an appropriation is made. The name of each bidder is given together with all of the items likely to be awarded to him, and the price bid on each in separate paragraphs:

C. W. Thorm.

300 reams foolscap, white, ruled, 14 lbs. to the ream, per ream, \$2.03.

100 reams manilla paper, strong, rope, 36x40 inches, 80 lbs. to the ream, per ream, \$1.87.

10 doz. shears, 9-inch, per doz., \$5.10.

40 doz. pints ink, crimson, Stafford's, per doz., \$9.75.

15 doz. knives, buck handles, large, four blades, per doz., \$9.75.

10 doz. shears, 11-inch, per doz., \$7.65.

100 doz. files, Shipman's patent, 9x11, cloth sides, 250 leaves, per doz., \$5.23.

1,000 lbs. pins, American & Howe Pin Company, best solid-headed, in one-half lb. boxes, viz.: 200 No. 1, 200 No. 2, 300 No. 3, 200 No. 4, 100 No. 5, average per lb. 53 4-10c.

3,000 doz. tape, red, No. 21, per doz., 7 1-10c.

10 copying-presses, R. Hoe & Co.'s, French pattern, No. 3, in boxes, each, \$27.

Valley Paper Company.

300 reams legal cap, white, ruled, 14 lbs. to the ream, per ream, \$1.87.

400 reams letter, white, folded, ruled, 12 lbs. to the ream, per ream, \$1.56.

500 reams note, white, commercial, flat, 7 lbs. to the ream, per ream, 90c.

Wm. A. Wheeler, Jr.

2,500 reams letter, white, flat, 10x16, 12 lbs. to the ream, per ream, \$1.55.

25 doz. ½ pints ink, Spencerian jet-black, in boxes of one doz. each, per doz., \$1.65.

24 doz. mucilage brushes, per doz., 8c.

25 doz. scissors, 6-inch, per doz., \$2.10.

100 doz. sponge-cups, glass, in boxes of ½ doz. each, per doz., 78 ½c.

50 doz. paper-folders, ivory, 10-inch, heavy, per doz., \$5.60.

25 doz. copying-brushes, 3½-inch, per doz., \$2.20.

5 doz. arm rests, polished mahogany, medium size, in boxes, per doz., \$4.08.

2 doz. call-bells, No. 8900, per doz., \$15.

10 gross thumb-tacks, German silver, steel points, screwed in and riveted, ¾ inch diameter, per gross, \$3.85.

50 gross pencils, American Lead Pencil Company's best round black, Nos. 2 and 3, per gross, \$2.88.

1 gross pencils, Eagle Pencil Company's blue, automatic, per gross, \$17.32.

1 gross pencils, Eagle Pencil Company's carmine, automatic, per gross, \$17.32.

50 gross pencils, Eagle Pencil Company's carmine and blue, hexagon, 9-inch, per gross, \$6.95.

6,000 lbs. twine, average per lb., 25c.

100 doz. quarts ink, Stafford's commercial, per doz., \$3.69.

40 doz. pints ink, crimson, Carter's, per doz., \$6.37.

100 gross pencils, A. W. Faber's best round black, Nos. 2, 3 and 4, per gross and M., \$4.10.

100 gross pencils, Dixon's American, best round black, S. M., per gross, \$3.34.

Wm. Ballantyne & Son.

200 reams card blotter, J. Parker, Son & Co.'s Treasury, No. 100, to weigh 90 lbs. to the ream, per ream, \$16.07.

10,000 tags, linen, eyeletted, 4½ x 2½, per M., \$3.45.

10,000 tags, manilla, eyeletted, 4½ x 2½, per M., 95c.

50 doz. quarts ink, David's black, per doz., \$2.04.

100 doz. pints ink, David's black, per doz., \$1.37.

25 doz. ½ pints ink, David's black, per doz., 83c.

40 doz. pints ink, crimson, Wm. A. Davis's, per doz., \$7.50.

150 doz. bottles ink, carmine, David's, No. 3, ground-glass stoppers, per doz., \$1.81½.

100 doz. inkstands, heavy, 2 inch, No. 308, glass stoppers, in boxes of ½ doz., per doz., \$1.04½.

100 doz. inkstands, heavy, 3-inch, No. 308, glass stoppers, in boxes of ½ doz. each, per doz., \$1.55.

500 inkstands, Brower's patent, each, \$1.35 1-3.
 25 inkstands, banker's double, cut-glass, each, \$2.80.
 50 doz. paper weights, metal, per doz., 90c.
 50 doz. pen-racks, single, per doz., 50c.
 50 doz. clips, board, letter size, per doz., \$2.57.
 5 doz. clips, board, cap size, per doz., \$2.83.
 50 doz. files, bill, upright, per doz., 53c.
 1,000 gross pens, steel, Spencerian, viz.: 800 No. 1, 100 No. 2, 100 No. 3, per gross, 67½c.
 10 gross pens, steel, Gillott's, No. 808, swan quill, per gross, \$3.89.
 3,000 lbs. sealing wax, red, best, per lb., 27¼c.
 2,000 lbs. sealing wax, brown, per lb., 14¼c.
 500 boxes cut quills, per box, 68c.
 100 boxes seals, notarial, No. 25, no gilt, per box, 11¼c.
 5,000 boxes seals, bond, thin, green paper, gummed, 10 in box, per box, 2 1-5c.
 50 tapes, metallic, 100 feet, in 10ths, in cases, each, \$2.74.
 10 copying presses, T. Schriver & Co.'s, French patterns, 10x15, in boxes, each, \$18.
 10 copying presses, T. Schriver & Co.'s, style E, best, 11x16, in boxes, each, \$9.

James R. Michael.

60 reams card blotter, "Climax," to weigh 90 lbs. to the ream, per ream, \$10.68.
 100 lbs. rubber, No. 20, A. W. Faber's "Improved Artist's," per lb., 84c.
 100 lbs. rubber, No. 20, Eagle Pencil Company's "Bevel," per lb., 70c.
 200 doz. erasers, steel, per doz., \$1.95.

E. D. Lockwood.

200 reams envelope paper, gold, 26 lbs. to the ream, per ream, \$2.63.
 500 reams manilla paper, thin, cap size, 480 sheets to the ream, per ream, 10c.
 100 M envelope, 10½x6, XX manilla, rope, per M, \$1.54.
 50 M. straw boards (white on one side), 7x3 (in wooden cases of 25,000 each), per M, \$1.34.
 10 doz. shears, 10 inch, per doz., \$6.94.
 100 gross pencils, Eagle Pencil Company's best round black, Nos. 2 and 3, per gross, \$2.75.
 4,600 gross pens, steel, average per gross, 43 1-5c.
 200 boxes paper fasteners, No. 1, tin or white metal, 100 in box, per box, 16 93-100c.
 2,000 boxes paper fasteners, No. 2, tin or white metal, 100 in box, per box, 16 93-100c.
 2,000 spools tape, red, No. 21, 72 yards per spool, per spool, 17c.
 1,000 spools tape, red, No. 31, 72 yards per spool, per spool, 26c.

Joe. H. Mann.

2,000 reams copying paper, thin, strong, 9¼x11 inches, 2 ream packages, per ream, 30c.
 1,200 copying books, 10x12, full 500 pp., half-bound, cloth sides, each, 68c.

Joseph G. Ditman.

20 reams manilla paper, strong, rope, 18x34½ inches, flat, 56 lbs. to the ream, per ream, \$4.68.
 200 reams manilla paper, strong, rope, 20x36 inches, 45 lbs. to the ream, per ream, \$3.60.
 1,000 reams manilla paper, strong, rope, 24x36 inches, 50 lbs. to the ream, per ream, \$4.

Niagara Envelope Company.

50 M. envelopes, 9½x5¼, XX manilla, rope, per M., \$2.28.

J. D. Free, Jr.

50 doz. quarts copying ink, Arnold's, genuine, per doz., \$7.10.
 50 doz. quarts copying ink, A. W. Faber's French, per doz., \$4.25.
 200 doz. quarts writing fluid, Arnold's, genuine, per dozen, \$4.08.
 100 doz. clips, metal, small size, in boxes of one doz., each, per doz., 42½c.
 50 doz. files, Shipman's patent, 9x13, cloth sides, 250 leaves, per doz., \$5.75.

Artistic Printing.

The artistic results of typography as now exemplified in so many forms and designs of varied beauty, even a quarter a century ago, would have been classed among the marvels. One is astonished at every new accomplishment by science for the use and comfort of man, but is there any less cause for surprise and wonder when it is considered that within the memory of comparatively young men she superlative excellence of typographic art was deemed impossible? A moment's reflection points the way to an interesting study in comparing what was done and what is being done by the engraver, printer and pressman. The rigid lines and cold accuracy of steel plate, often, without even a stroke of spirited execution, no matter how fruitful of thought and life the subject was, which delighted a past generation and the older people of the present, have given way to the warmth, soulfulness and beauty of the engraver's art. Slow, sure and costly, of necessity, was the working of steel in illustration and ornamentation used by the typographer, swift beyond the possibility of counting, except by devices for that purpose alone, impressions are turned off from woodcuts by the modern press amounting to many thousands an hour. The work is not only better mechanically, but attains an artistic perfection, which at once appeals to the sense of the beautiful. To many typographic designs of to-day can be applied the poet's thought, "A thing of beauty is a joy forever." One reads his handsomely printed newspaper, in which multi-form type is arranged to produce pleasing effect in news matter and advertisements, but does he ever think of the care, accuracy and thought required in placing the type so artistically from the time it leaves the case until in form it reaches the press? Does he ever think of what modern invention in adjusting intricate machinery to this purpose has done in producing a press that throws off anywhere from 16,000 to 30,000 impressions of his paper every hour?

Thirty years ago newspapers, now great, with hundreds of thousand daily readers, were produced by the slow work of man power, oftentimes with but a man and a dirty-faced urchin at the inking lever after each impression. Then a printer's outfit cost but little compared with the thirty, forty or fifty thousand dollars required to purchase a modern perfected press alone. Again the efforts at book and catalogue publishing, in the interests of any special topic, firm or trade, was confined to but a few. Now the printer is recognized as an absolute essential in bringing the people, merchant and manufacturer together. The two latter classes have, to a very large extent, become book and catalogue publishers, brought about by the cheapness with which this work can be done by the aid of machinery and the advancement of the art. It can be said that nearly every man in large and, in many cases, moderate operations of trade and manufacture is a publisher in his own interests, and he always takes his work to a place where it can be done artistically, accurately and cheaply. It

is not many years since the most progressive type-founders could supply their customers with styles that would answer the demands of the public for years. Now the founder who does not issue at least four times a year a catalogue of new and artistic styles of type and ornaments—is far behind the age. There are some, who, to keep pace with public taste and thought, supplement, during the year, their regular catalogues, and in each one finds numerous beauties and combinations where, but a short time ago, it was thought nothing more excellent could be done. It is the printer's customer to-day who is often teaching the craft as to new designs and beautiful arrangement and attractive effect. The printer in turn calls upon his type-founder who produces what is wanted to satisfy varied tastes. Typographical art is indeed progressive, and the establishment not equipped to meet, at a moment's notice, the wants that public taste in printing is constantly creating, can hold only a small place in the ranks of progressive craftsmen, and will obtain but little encouragement.—*Printers' Gazette.*

History of Thermometers.

At a recent meeting of the Royal Meteorological Society, the president, R. H. Scott, F. R. S., read a paper entitled "Brief Notes on the History of Thermometers," in which he said that the name of the actual inventor of the instrument is unknown. The earliest mention of it, as an instrument then fifty years old, was in a work by Dr. L. Flood, published in 1638. Bacon, who died in 1636, also mentions it. The earliest thermometers were really sympiesometers, as the end of the tube was open and plunged into water, which rose or fell in the tube as the air in the bulb was expanded or contracted. Such instruments were, of course, affected by pressure as well as temperature, as Pascal soon discovered. However, simultaneously with such instruments thermometers with closed tubes had been made in Florence, and some of these old instruments were shown at the loan collection of scientific apparatus at South Kensington in 1876. They are in the collection of the Florentine Academy, and in general principle of construction they are identical with modern thermometers.

Passing on to the instrument as we now have it, Mr. Scott said that most of the improvements in construction in the earliest days of the instrument were due to Englishmen. Robert Hooke suggested the use of the freezing point, Halley the use of the boiling point and the employment of mercury instead of spirit, and Newton was the first to mention blood-heat. Fahrenheit was a German by birth, but was a *protégé* of James I., and died in England. Reaumur's thermometer, in its final form, owes its origin to De Luc, while the centigrade thermometer, almost universally attributed to Celsius, was really invented by Linnæus. Celsius' instrument had its scale the reverse way, the boiling point being 0° and the freezing point 100°.

When we are alone we have our thoughts to watch—in our families our tempers, and in society our tongues.

Paper Bottles.

Paper bottles are now made on a large scale in Germany and Austria. The paper must be well sized. The following is said to be a good receipt for the paper: Ten parts of rags, forty of straw, fifty of brown wood pulp. The paper is impregnated or coated on both sides with sixty parts of defibrinated fresh

blood, thirty-five parts of lime powder, five parts sulphate of alumina. After drying, ten or twelve rolled leaves are coated again, placed over each other, and then placed in heated molds. The albumen in the blood forms a combination on pressure with the lime, which is perfectly proof against spirits, &c. The bottles are made in two pieces, which are joined afterward.

SANBORN'S BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

Fidelia Bridges, who is now at Jamestown, R. I., for the summer, has designed a series of cards representing bird and flower life, in the Japanese manner. Walter Satterlee has completed a humorous series of Gnome designs, which represent the merry men of the fairy ring busily engaged in painting the holly berries and polishing up the leaves in anticipation of Christmas jollity. Mme. Flory, whose flower studies are so extensively sought after, has furnished some designs for Prang which will be of use to more advanced students. L. B. Humphrey is at Hopedale, Mass., and has in course of preparation a series of studies from American child-life.

WHITTEMORE BROTHERS & CO.,

172, 174, 176 Lincoln Street, Boston, Mass.,

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the TRIUMPH MUCILAGE,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.
Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

Our Patent Laws, as related to Agriculture, Arts and Industries.

By JAMES A. WHITNEY, LL.D., COUNSELOR-AT-LAW.

PATENTS CAUSE INVENTIONS TO BE TRIED AND ADVERTISED TO THE PUBLIC.

But this is not all. After an invention has been completely elaborated in the brain of its originator; after it has been fully explained in his specification and drawings; and after his patent has been secured, the work of the inventor has only fairly begun. The improvement must be reduced to practice; the best form and proportions, the fittest materials, and the most efficient manner of using it, must all be arrived at through actual construction and careful experiment. All this costs money, and very frequently a good deal of it, and inventors, at the outset at least, are often poor. Without a patent, no money could be obtained from a new invention; for after the money was spent, neither the inventor nor his assistant would have any more right to the improvement than any one else. But armed with his patent, the originator of a valuable improvement can commonly find money and faith to assist him in perfecting the invention and demonstrating its utility to the public. Fulton would never have obtained the means to build the first successful steamboat, and thus to give to our country the glory of the great achievement, if his patent from the State of New York had not induced Chancellor Livingston to join in the enterprise. Professor Morse could never have proved the utility of his telegraph, if he had not had a patent to sell in shares to secure aid. The inventor of the most valuable portions of the Buckeye mower sold four-fifths of his right in order to secure the manufacture and sale of the machine on an extended scale; and if we choose to go further back and outside of the examples afforded by our own country, James Watt would never have wrought the modern steam-engine into useful shape, if he had not had a patent to share with Boulton, who furnished the means to carry on the manufacture, and to make the merits of the invention known. Nine times out of ten where an improvement is introduced to public use, the capital for manufacturing, advertising, and selling it is obtained from parties other than the inventor upon the credit of the patent, and could not possibly be obtained in any other way. Hence we see that the patent laws afford the sole inducement for the production of valuable improvements in the useful arts; that their direct result is to train a class of men especially for the work of making such improvements; and that they not only cause the improvements to be made, but provide, as a direct effect of their operation, the means by which they are practically developed, fitted for actual use, and introduced to the notice and consideration of the public. Is it not manifest, then, that, taking human nature as we know it to be, and society organized as it is, expediency, apart from all higher considerations, dictates the grant of letters-patent for inventions, the encouragement and fostering of inventors by means of patent laws? * * *

WHAT PATENTS HAVE DONE FOR AGRICULTURE.

There can be no improvement in any industry which does not benefit the agriculturist; for he buys the products of all manufacturing arts, while he sells those that result from tillage or the keeping of flocks and herds. With improvements such as we have just considered, the farmer gains, because the articles he purchases are reduced in price; but there are other inventions which redound more directly to his advantage, because they enable him to produce, at a smaller cost to himself, what he has to sell. This class of improvements embraces all agricultural machinery; and the influence of patent laws in bringing into existence the means that have revolutionized husbandry in all its branches within less than fifty years, is to the full as apparent as in every other class of invention. I need not refer to the history of Eli Whitney's cotton-gin or Jethro Wood's iron plow to show that it was the promise held out by the patent laws that led these men, through manifold trials, the one to open the way of this country to supremacy in the growth of the staple fibre of the world, the other to realize in sober fact the fairy tale of Scandinavian mythology, which told how a metal share added tenfold to the produce of the earth. But in agriculture, as in every other art, advancement has been due, not more to the celebrated inventions than to multitudes of smaller ones that, each in its place, have saved time, labor, or the necessity of skill; and the aggregate results of these are astounding. The citation of a few examples will show the correctness of my remark, that agriculture owes more than any other industry to the fostering spirit of the patent laws. And as the yield of the harvest begins with the turning of the furrow, perhaps the steel plow is the best illustration I can use in this connection. It was patented in 1864 by Francis F. Smith; and as the experience of this inventor is a fair type of that of inventors generally, I may speak of it at some length to illustrate the fact that no man would be justified, in view of his own interests, in devoting himself to producing new and useful improvements, if there were no patent laws to reward him for so doing.

Smith commenced business in Ohio, thirty-three years ago, as a blacksmith, and started his own shop in 1843. In 1854 he removed to Indiana, for the special purpose of making plows. Here he had frequent occasion to repair plows, and also carefully studied their operation in the field. He sought to make improvements as early as 1850, and made two steel plows of sheet steel, by hand, in 1856. At this time his business was worth eight dollars per day. He left this and his shop, and worked for a dollar and a half per day in a plow factory in Mokena, Illinois, to master the practice of plow-making, and stayed there a year. In 1859 he made numerous experiments in tempering sheet-steel plows, but could not save more than one in three. Mokena is on the Kankakee River. On the north the soil is free from sand, on the south sharply sandy and gritty; on the north side a plow would last six to eight years, but on the south a hole would often be cut through the share in plowing twenty-five acres, and frequently the

point and rear end of the land side would be cut away. In 1859 he was laid up by sickness, and learned by reading that steel could be cast to shape, but could get no satisfaction by inquiry, until brought, by correspondence, into relations with the Collins Steel Company of Connecticut. He went to Collinsville, and left his affairs in the hands of employees at a loss of one thousand dollars during the trip. The Company required that he should give up his business, attend to the making of the cast-steel plows, and assign one-half of the patents secured. He moved to Collinsville in autumn of 1860. He sold his shop, stock, and household goods at a loss of eleven hundred dollars, and the expenses of moving and of the former trip were six hundred more.

(To be continued.)

A New Varnish.

A new varnish has been invented in France, according to the *Oil and Colorman's Journal*, the principal ingredient of which is entirely distinct from the gums of ordinary varnish. The base consists of paper treated with nitro-sulphuric acid and camphor dissolved in alcohol. The varnish is composed of this ingredient, with acetic ether, sulphuric ether, castor-oil, Venetian turpentine, methylated alcohol, acetate of amyl and pure crystallizable acetic acid in definite proportions. The varnish is said to have the following properties: It is unaffected by water and humidity, and will also resist weak and concentrated acids, and likewise alkalies if contact be not too prolonged; it takes a fine polish. It can only be applied to surfaces warmed either by the sun, before the fire, or in an oven at the temperature of 35° to 45° centigrade. If applied to a cold surface it becomes white, and the coating is wanting in coherence, and possesses none of the qualities of the same varnish applied to a warm surface. Any kind of brush may be used for applying it. It dries in two minutes at the outside, so that twenty-five or thirty coats may be applied per hour. It may be rendered more flexible, and may then be applied to cold surfaces, by adding crystallizable acetic acid and acetate of amyl.

A Superior Marking Ink.

The following recipe affords a marking ink which flows freely from the pen without running or blotting, becomes perfectly black upon application of a moderate heat, and will not destroy the texture of the finest cambric: Nitrate of silver, one ounce; carbonate of soda, crystallized, half an ounce; tartaric acid, two and a half ounces; strong liquid ammonia, one-eighth ounce; archil, one-sixteenth ounce; white sugar, four ounces; powdered gum arabic, twelve ounces; distilled water, a quarter of an ounce. Dissolve the nitrate of silver and carbonate of soda separately in distilled water; mix the solutions; collect and wash the precipitate on a filter; introduce the precipitate, still moist, into a Wedgewood mortar, and add to it the tartaric acid, rubbing them together until effervescence has ceased; add liquor ammonia in sufficient quantity to dissolve the nitrate of silver; then mix in the archil, white sugar, and powdered gum arabic, and add as much distilled water, if required, as will make five measured ounces of the mixture.

Some New Cards.

W. H. Beard is the author of some exceedingly humorous designs for cards, which are accompanied with characteristic couplets. In these cards, owls, cats, and bears seem to be having it all their own way.

A very handsome large-sized design has been executed for Prang by Miss L. B. Humphrey in honor of Whittier. It does not bear the likeness of the veteran poet, but shows scenes from his works, "Snow Bound" being the subject of the front and "Maud Muller" and the "Barefoot Boy" figuring on the back. This is the second of a series of Poet cards to be issued at intervals, one of which (Long-fellow) was published last year.

Sepia and gold have been used with much effect in the reproduction of companion designs by L. W. Taylor. In one, a little child throws crumbs to the winter songsters; in the other the birds have taken refuge upon a sheltered wall and crowd and nestle together in a most natural way, while a young girl sings the Christmas carol; the combination of tones is something of an innovation.

Bleaching Sponges.

As is well known, chlorine and its com-
pounds cannot be used for bleaching sponges,
as they impart a yellow color to the latter,
which, in addition, become hard and lose their
fine texture. The method now generally em-
ployed is a water solution of sulphurous acid,
and requires from six to eight days, and con-
siderable manipulation. According to the
latest researches made in Germany, the bleach-
ing of sponges can be performed more con-
veniently and expeditiously by means of bro-
mine dissolved in water. As is well known,
one part of bromine requires thirty parts of
water to dissolve it, and thus a concentrated
solution can easily be obtained by dropping a
few drops of the former into a bottle of dis-
tilled water and shaking it.

The sponges are submerged in this solution,
and after the lapse of a few hours their brown
color changes to a lighter one, the dark-red
bromine solution, changing at the same time
to light yellow. By treating the sponges to a
second immersion of a fresh solution, they ac-
quire the desired light color in a short time.
They are improved still more if finally dipped
in dilute sulphuric acid and washed with cold
water. It seems strange that such closely
allied bodies as chlorine and bromine should
act so differently toward the coloring matter
in sponges. —Ex.

Among the rare works lately presented by
J. J. Astor to the Astor Library is a vellum
manuscript of John Wycliffe's English version
of the New Testament, that was written per-
haps about 1390. Of the 170 manuscripts bear-
ing Wycliffe's name, only seventeen had a
right to it, and this is the most perfect one of
the three that date from before 1400. Historic
interest attaches to this manuscript also, be-
cause it contains the autobiography of Hum-
phrey, Duke of Gloucester. The troublous times
of old England made it no small peril to pos-
sess such a manuscript treasure, and the owner
doubtless sought to assure his property by ob-
taining the signature and protection of the
"Good Duke." This particular codex was
consulted in the preparation of Forshall and
Madden's great editions of Wycliffe, and
comes from the library of the late Thomas
Barrister. It is bound in rough old calf, and
though not a marvel of paleographic beauty,
its age and perfect preservation make it unique.

The life of a man consists not in seeing vis-
ions and in dreaming dreams, but in active
charity and willing service.

WARRANTED BEST QUALITY

No. 20 MAIDEN LANE, N.Y. ESTABLISHED, 1848.

" 8 SNOW HILL, LONDON.

E. P. DONNELL & CO., Chicago, Ill.
Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Improved Imprinting Stamp.

Robert Snider, New York, has recently introduced an improved imprinting stamp (herewith illustrated) for stamping addresses on envelopes after they are folded. The improvement in the stamp is that it can be used with the hand, the same as a lever-power seal press, by which more power is obtained than by hand pressure. By unfastening the screw the stamp can be used to imprint the same as a pleyer. The die is of brass and the counter part of solid copper. It has been remodeled and is perfect in every respect.

Heretofore addresses have been stamped on envelopes before folding. With this machine

the smallest quantity of folded envelopes can be stamped at any time.

This stamp is intended for the use of stationers and printers. Mr. Snider states that a short time ago, when only a few had been manufactured, the pattern was destroyed by fire, and that since then many inquiries have been received from the trade for samples and prices. This led him to make new patterns, with improvements, which make it perfect in every respect.

Porcelain Headed Nails.

One of the familiar illustrations of the benefit of rapid machinery in producing articles of use combined with elegance is in the manufacture of the ornamentally-headed nails used for picture hanging and similar purposes. The heads of these nails are of porcelain or glass, held in a gilt brass setting, and the shanks are of iron wire. The heads are molded from opaque porcelain or transparent glass, and the settings are made from sheet brass in the dies of a press. A disk of brass is cut from a sheet, and a small hole made in its centre. The disk is drawn down through the centre of the die, forming a tube-like neck which is afterward tapped in a machine, thus forming a nut for the reception of the treaded head end of the wire shank.

The press forms the setting into a cup shape for the glass or porcelain head, and this, when inserted, is held in position by having its edges turned over into the head by a press. The wire shank is pointed in a rotary press which draws the wire down to a point in dies or scores that form the pointed portion four-sided. On two of these sides a film or spew is left that is removed by a trimming press.

The formation of the screw thread on the other end of the wire is somewhat interesting. The thread is not cut with dies—in fact, it is not cut at all. It is rolled up from the material of the shank, and the threaded portion becomes larger than the original wire. There is a fixed die in the press, the die having been milled on a slant to represent the V-threads of a certain pitch. The die is perfectly flat, and

these scores are simply cuts of a V-form running diagonally across it. Another die exactly like the fixed one is attached to a reciprocating arm, so as to traverse across the fixed die. Between these dies the shank is passed under pressure, and the result is a perfect thread at the rate of at least one hundred gross per day, the only attendant being a boy.—*Scientific American*.

The 1530 edition of William Tyndale's English version of the Pentateuch is excessively rare. But one perfect copy is known to exist, and that is in the Grenville Library; of the six imperfect copies, however, four are now in public libraries, the one donated by Mr. Astor to the Astor Library wanting only the Book of Genesis. It is a fine copy in the original boards, covered with leather, and is made up of four volumes bound in one small octavo. The Book of Numbers is printed in Gothic characters, while the other three books are in Roman letters. The work is exceedingly interesting as a specimen of quaint old English and as a bibliographical rarity of the first water.

Creditors have better memories than debtors.

CARTER, DINSMORE & Co.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.--NO. 3.

NEW YORK, JULY 17, 1884.

WHOLE NO. 473.

Correspondence.

ROCHESTER OCCASIONALS.

[CORRESPONDENCE OF THE STATIONER.]

ROCHESTER, N. Y., July 15, 1884.

Our semi-centennial came and went with all of its promised programme, the ringing of bells and firing of cannon, on the 9th and 10th of June, just fifty years after the formal election of our first mayor and the inauguration of our city government. Literary exercises, a long procession, reviewed by Governor Cleveland, with fireworks, brought together the largest crowd ever witnessed in our city, now numbering more than one hundred thousand souls.

Our book and stationery dealers report a summer quietness, with good prospects for a splendid fall trade. Crops are good and everybody is looking forward to an acceleration of business as a consequence, and notwithstanding the Presidential election our business men are confident.

No changes of importance have occurred in the trade. Scranton, Wetmore & Co. have published a history of Rochester, a story historical, by Jennie Marsh Parker, and E. Darrow & Co. publish a semi-centennial souvenir and chronological history of Rochester.

A fire occurred this morning at the Rochester Paper Company's mill, causing a loss of \$4,000 on building and \$4,000 on stock; insured.

GENESEE.

BOSTON BILLETS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire Street, BOSTON, July 15, 1884.

All branches of trade are experiencing dullness, and the stationery business is not excepted. What little trade is done during the day could easily be transacted before noon, if buyers would only club together and place their orders early.

All of the leading establishments in the several trades are closed at five o'clock in the afternoon, and at that hour the streets take on a holiday appearance.

For the middle of July the weather is delightful—cool and refreshing, with frequent showers. And yet there are people who

grumble because it is so. The grumblers are those doing business at the seaside and beach resorts, and they grumble because people find a promenade through the Common more pleasant than a sail down the harbor. Really the evenings are so cool that one doesn't dare to eat ice cream without an overcoat on.

William A. Davis, manufacturer of mucilage and inks, has received contracts for supplying the Post-Office, Treasury, War and Interior departments of the government with his U. S. Treasury mucilage and Treasury writing inks. As will be noticed in the schedule published in last week's issue of THE STATIONER, these articles were specially stipulated in the government bid for office supplies; 545 dozen quarts of mucilage of the U. S. Treasury brand is one of the items. The contract for his Treasury inks, crimson and black, calls for large quantities. The inks and mucilage prepared by William A. Davis have been used by the government for some years, and their continued use in the several departments shows that these preparations are of the very best quality.

Mr. Davis reports that trade in his line has been very good, and although a little dull at present with general orders, an active fall business is confidently looked for. Gum arabic still holds at advanced prices, and dealers should not delay their orders too long—mucilage might advance.

But, notwithstanding the scarcity of gum and its high price, Mr. Davis will keep the U. S. Treasury mucilage up to its recognized uniform standard of excellence, using only the best material in its manufacture.

The Heath Letter File and Index Company is making a specialty of advertising calendars, and for 1885 the company is showing some very pretty designs. Some of the designs are quite novel, and are prepared especially for this company; others are imported. Heath's "Forever" calendar, which the company presented last year, had a very large sale, it being without doubt one of the best advertising calendars ever published.

As a result of its advertising in THE STATIONER, the company has just consigned to a German house a number of its large cabinets and filing boxes. The German correspondent requested that his house might be appointed agent for the Heath Letter File. I might give

the name and address of this German house, but I don't dare "give it away."

H. H. Carter is presenting his line of holiday novelties, and judging from the orders taken for "Ye Antique Chrystmasse Card," this novelty is taking the lead. These cards are very unique. They are printed in a style common to our grandfathers' days, and the inscriptions are very quaint, while the engravings are copied from designs dating back to 1526. These cards are printed upon rough cardboard, and each card is inclosed in an envelope of ancient make and design. They are

Vended by one
Master H. H. CARTER,
at hys Greate Houfe,
No. 3, in Beacon Street, BOSTON, Mafs.

Over 30,000 of these antique cards were sold last season, and judging from the way orders are now being booked, the number will be doubled this year.

Pulsifer, Jordan & Wilson have experienced a severe loss in the death of Dennis F. McCarthy, who so successfully managed the card department of this house. Mr. McCarthy was only 24 years of age, and for eleven years had been connected with this firm. Entering its employ when but a boy he succeeded, by strict attention to duty, in winning the confidence of his employers, and was rewarded by frequent promotions to a more responsible position in the house. His death occurred on the 13th of this month, after ten days' illness, occasioned by inflammation of the heart. Mr. McCarthy was extensively known to the trade, and was highly esteemed by all who knew him for his many manly virtues. Although his death is deeply mourned by a host of friends, none will miss him more than Pulsifer, Jordan & Wilson, by whom his faithful services were so highly valued and appreciated. A. L. D.

CINCINNATI CLIPPINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, July 15, 1884.

Here is the torrid season—the time for seersuckers and for lemonade suckers—pardon the expression, but it fits—and for all sorts of subterfuges to get the better of the "horrid" season. Stationers have been preparing for it by printing advertisement fans, which are given away to the melting multitude.

It is well that stationers have something to do for all seasons. What condition or situation in life are they not linked to in some sort of a business way? Birthday, wedding-day and funeral-day cards come from the same press. In driving times bills of lading, ledgers and advertisements and the like hitch them to the rushing car of trade, and in times when trade is still, and the sheriff's hammer knocks down the property of some luckless debtor, the stationer's handiwork is in demand, and so on for all sorts of strongly contrasting situations.

One would readily suppose that in such weather as this, too hot to work, and with trade too dull to require much work, there would be a strong demand for books, but such is not the fact. The sale of books is as small as if people were too busy to read. Fancy stationery goes off well at retail, however. Pretty plain tints without designs are in favor in the city. Quite a variety of these are in request in the way of envelopes and writing paper. Brighter colors, along with decorated papers, go off in the country. Decorated fans, too, which have had their run in the city, are now taking their turn in the country. But to make a transition to the season—the hammock is in style everywhere out of the central crowded parts of the city. It swings in all suburban retreats, however humble. Stationers in Cincinnati deal in hammocks. Why not? Isn't it half-brother or half-sister or full cousin to croquet and lawn tennis? and don't stationers deal in appliances for these outdoor games? It doesn't do to be too nice these days about fixing the boundary line which divides one kind of business from another. There is a maxim among business men that "the trade belongs to whoever can get it." Moralists may controvert the doctrine inculcated by that maxim, but then you must remember that the moralist pure and simple seldom has any practical knowledge of business. How is that? Now, this isn't to be construed as saying that a moralist can't be a business man and a moralist at the same time. But let us postpone consideration of this topic and get on to another thread.

Underwriters are beginning to consider whether they have rated paper warehouses sufficiently hazardous in making out insurance policies on them. Dreman & Co.'s rag warehouse, which burned here a year ago, and Chatfield & Wood's paper warehouse, which burned partially only a month ago, have been causing them to open their eyes. Then paper is so easily damaged and turned to the value of rags by water, as to make a small fire the occasion of a great deal of loss and damage.

John Holland, the maker of the gold pens which have carried the name of Cincinnati on them all over the world, has received word that he has been awarded the contract for supplying the Interior Department at Washington for the coming year with his pens and penholders. The competition was very strong, all of the prominent New York manufacturers in this line furnishing samples and bids. Mr. Holland is devoting his time and his zeal to the manufacture of his pens.

The Globe Files Company is receiving fine orders from all parts of the country. Its

products may be found pretty much all over the globe.

J. R. Mills & Co. are full of orders for their reversible envelope for all the multifarious uses to which it is applicable.

Traveling men are lying low now. Very few of them are on the road, and such as are out move with great deliberation. A man in a stew is not in a situation favorable for being tackled by the peripatetic merchant.

Still, there are traveling men on the road, and here is a list of those who have been here most recently: E. Walter Giles, Esterbrook Steel Pen Company, Camden, N. J.; John B. Gunn, for E. Faber, New York; George Freeman, for American Pencil Company, New York; N. C. Reville, for J. G. Shaw Blank-Book Company, New York; Mr. Phillips, for B. Illfelder & Co., New York; Mr. Harding, Jr., for Harding Paper Company, Franklin, Ohio; B. A. Stone, for Langfield, Turner & Andrews, Philadelphia; W. H. Sears, for Acme Stationery Paper Company, New York; Frank L. Landon, for Tower Manufacturing Company, New York.

The health of A. E. Harding, of the Harding Paper Company, who was stricken with paralysis some weeks ago, improves slowly. He recognizes and knows all that transpires in his presence, but cannot yet speak.

The stationery stores of Cincinnati, with few exceptions, were closed on July 4 and 5. This should have been general.

A. Howard Hinkle, of the firm of Antwerp, Bragg & Co., is off on a summer vacation trip to the sea shore. PRINCE WILLIAM.

ST. PAUL SITUATIONS.

[FROM OUR REGULAR CORRESPONDENT.]

ST. PAUL, July 7, 1884.

The business men of St. Paul are gentlemen of enterprise in the fullest sense of the term.

During that portion of the year when slackness of trade is noticeable to all they wisely seek to improve by every means in their power the relations existing between their customers and themselves, assuming, very naturally, that by such action the friendly sentiments binding them may be the more firmly cemented, and their mutual interests proportionately advanced.

Although this policy has been pursued with marked success at various times in the past, I am safe in declaring that the happiest effort of our merchants was a visit recently made to the interesting tract of country lying in the southern portions of Minnesota and Dakota, a most productive locality, and one from which St. Paul derives an immense amount of valuable trade. The plan was promulgated by, and very successfully carried out under the auspices of, the "Jobbers' Union," an organization made up of representatives from each of our wholesale houses. The trip occupied four days, and was made in a special train furnished by the Chicago, St. Paul & Omaha Railroad Company.

Previous to the consummation of the enterprise, the officers of the "Union" forwarded to the principal merchants and parties of prominence along the proposed route a neat circular announcing the projected journey,

and inviting the recipients to meet the tourists at their respective depots. Three thousand of these invitations were issued, and the response thereto was highly gratifying. At every station an enthusiastic crowd greeted the approaching train, and in each instance a stop was made of sufficient length to allow a general "handshaking" and a brief exchange of friendly conversation. A more cordial welcome than that accorded to our excursionists could not be imagined, and the kindest possible feeling was everywhere prevalent. The travelers returned full of admiration for the magnificent country visited and gratitude in view of the generous co-operation which met them at every hand. A similar excursion is contemplated, to take place at an early date. I relate the story of this occurrence not because it bears particularly upon the line of business to whose interests THE STATIONER is devoted (although that line was well represented in the experience mentioned), but simply for the purpose of affording your readers an insight into the business methods of our tradesmen. The happening chronicled is only one of the many evidences of enterprise which will manifest themselves to the observer of our people. A pleasing feature connected with the event of which I speak is the encouraging report brought back regarding the business prospects throughout the region traversed. From all points the tidings of hopeful sentiment and general good cheer come to gladden the hearts of all interested in these things—and who is not? Circumstances have conspired to favor the condition of wheat and other crops. The weather has been in all respects most desirable, and unless some unforeseen accident befalls us, we can confidently anticipate a bountiful yield.

This fact imbues the people of the Northwest with a spirit of confidence, and though that confidence is tempered with caution, it is still sufficiently marked to cause a universal feeling of ease.

Regarding our city trade, there is not much to be said, beyond the statement of a steady demand of fairly satisfactory proportions. As a matter of course, this is the season when "quiet times" may be expected, and no person acquainted with the nature of the case could reasonably look for anything different. The farmers, occupied with the care of their lands, neglect, for the time, the country merchants, who, in turn, fail to send to the city jobbers such orders as the latter would be glad to receive.

Considering all things, however, the honest observer must admit that the general outlook is one that should inspire confidence.

D. D. Merrill, Jr., secretary of the St. Paul Book and Stationery Company, has just returned from an extended Eastern trip.

Minneapolis trade notes are practically the same as our own. The most encouraging testimony comes from the Bradner Smith Paper Company, whose representative declares business first-rate, with an "upward tendency."

Since my last writing we have been favored with calls from a number of the traveling fraternity. Prominent among them were Remsen Darling, J. B. Crowell, representing Pattberg Brothers, and the "ever-welcome" T. S. James, who guards the interests of Dan. Slote & Co. R. F.

OLD BERKSHIRE MILLS

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:
FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

William T. Baggett, printer, &c., San Francisco, Cal., has sold out.

C. H. Flewelling, engraver, St. John, N. B., has been damaged by fire.

Wm. F. Sweezy, publisher of the *Dispatch*, Omaha, Neb., has sold out.

E. J. Whitehead, dealer in periodicals, Bridgeport, Mass., has been attached.

The Coburn Publishing Company, Chicago, Ill., has been closed out by the sheriff.

H. J. Benner, publisher of the *Free Press*, Port Elgin, Ont., has sold out to J. H. Ross.

George F. Simonson, paper-box manufacturer, St. John, N. B., has been damaged by fire.

Charles K. Davis, paper-stock dealer, &c., Portland, Me., has been damaged by fire. Insured.

John Marshall, dealer in picture frames, Bridgeport, Conn., is offering his creditors thirty cents on the dollar.

Hoffman & Rannie, paper manufacturers, Pulaski, N. Y., are reported to have left town. Liabilities about \$2,500; no assets.

George W. Brandt's job printing establishment, Chattanooga, Tenn., was destroyed by fire on July 12. Loss, \$3,000; insurance, \$1,800.

Charles D. Yates, stationer, Greensboro', N. C., has been obliged, through illness, to retire from business, having sold out to Professor Daub.

Clague, Wegman, Schlicht & Field, manufacturing stationers, &c., Rochester, N. Y., have dissolved partnership. Clague, Schlicht & Field continue the business.

W. & J. Sempliner, dealers in fancy goods, at Bay City, Mich., are reported to have made an assignment. Ten days ago, they put chattel mortgages on their stock for \$15,500.

E. C. Palmer & Co., wholesale paper dealers, &c., New Orleans, La., have dissolved partnership. E. C. Palmer and Frank E. Gibbs continue the business under the same style.

Michael Norton, wholesale paper-stock dealer, Boston, Mass., has been attached, and a keeper is in possession of his property. He previously sold his real estate at Medford for \$3,000 and his stock for \$3,000. Liabilities reported at \$30,000. He has left for Ireland.

The style of the Riverside Company, manufacturer of stationery, Des Moines, Ia., has been changed to the Riverside Printing Company, with an authorized capital of \$50,000, of which \$15,000 has been paid in.

A dissolution has taken place in the firm of W. B. Stansbury & Co., printers, bookbinders, &c., New Orleans, La. W. E. Stansbury and Sue E. Burke continue under the same style.

A fire broke out in the mill of the Rochester Paper Company, Rochester, N. Y., causing a loss of \$4,000 on the building and of \$4,000 on stock. Insured.

Harvey & Brother, paper manufacturers, Wellsburg, W. Va., have dissolved partnership. The business is now carried on by Hamilton Harvey.

The stock of A. L. Ready, paper-stock dealer, Dutton street, Lowell, Mass., was damaged by fire to the amount of about \$2,500 on July 12.

The Claremont Manufacturing Company, printers, binders, stationers, &c., Claremont, N. H., denies the statement that it has failed.

Koblitz Brothers, paper-stock dealers, &c., Cleveland, Ohio, have been burned out. Loss estimated at \$20,000; insured for \$12,000.

The *Tribune* Printing and Publishing Company, Rawlins, W. T., has been incorporated with a capital stock of \$5,000.

George W. Jackson, publisher, Cleveland, Ohio, has assigned to Jay L. Athey. Assets about \$1,200.

W. C. Hathaway, dealer in toys, &c., Plymouth, Mass., is advertising to close out his business.

D. L. Sullivan & Co., book agents, Kansas City, Mo., have assigned; assets estimated at \$6,000.

J. H. Ames, bookseller, stationer, &c., Niles, Mich., has assigned to J. D. Greenamyre.

L. G. Joslin & Co., paper-stock dealers, Worcester, Mass., have gone into insolvency.

T. A. Anderson, publisher, Chatham, Ont., has been sold out under a chattel mortgage.

A. P. Mapel, dealer in wall-paper, Pueblo, Col., has sold out to J. C. Croft.

R. P. Parish, newsdealer, Kewanee, Ill., has assigned.

Israel H. Hamburger, dealer in cards and fancy stationery at No. 332 Broadway, made an assignment to George Tarler on Saturday last. His failure was a surprise even to his employees, those having the most confidential relations with him considering the house perfectly sound; and even Mr. Hamburger himself did not anticipate that he would have to suspend business up to three weeks ago, when he sent an agent abroad to buy goods. He attributes his failure to his inability to make collections and the tightness of the money market; also to the fact that his business was seriously crippled after the burning out of his establishment in March last, when he was prevented by the insurance companies from filling orders for a period of five weeks. Mr. Hamburger was formerly in business in Chicago, but was obliged to leave there at the time of the fire, and came to New York. Here he carried a very large stock, a considerable portion of which was imported. His trade was mostly in advertising novelties and scrap pictures, though he also carried an extensive line of plush and satin New Year and Christmas cards. He had made up a large quantity of the latter kind of goods during the early part of this year for the fall trade, and as he did a large business in these and his other lines of goods, the outlook was promising. His liabilities are reported to be about \$60,000. Among the preferences given are Max Hamburger, \$1,500, and nine notes, \$13,318; Jettel H. Hamburger, \$3,573.92; Oscar H. Shuttrick, one note, \$1,000; William Burns, three notes, \$1,655; German Exchange Bank, two notes, \$2,478; Jacob Ottman, two notes, \$1,192; Ward & Gay, three notes, \$1,337; Emil W. Henriksen, \$3,000, three notes, \$6,250; Frederick Schuleman, two notes, \$1,477; Louis Cohen & Son, six notes, \$3,271. All claims of the New York National Exchange and of the German Exchange Bank are preferred. The amount of all preferences is \$58,513.67. A meeting of the creditors was held on Monday afternoon. The assignee stated that not having examined the books he could make no statement and asked that a committee should be appointed to act with him in making out a complete schedule of liabilities and assets. His request was granted, and the meeting was adjourned to Friday, the 18th inst., when it is believed the assignee will be prepared to make a statement. In conversation with a reporter of THE STATIONER Mr. Tarler said that from a rough ex-

amination of the books he thought that Mr. Hamburger would be able to make a compromise with his creditors on terms which would be very satisfactory, and would very likely resume.

M. M. Beck, printer, Holton, Kan., has sold out to Scott & Hall.

Walton & Co., booksellers, &c., Cartersville, Ga., have assigned.

J. B. King, publisher of the *Gazette*, Henry, Col., has sold out to J. K. Burton.

W. M. Farrar, bookseller and stationer, Chicago, Ill., has been attached for \$738.

George R. Hallas, dealer in toys, &c., Waterbury, Conn., has made an assignment.

The *Morning Call* Company has been incorporated at East St. Louis, Ill., with a capital stock of \$100,000.

On the application of the firm of John B. Piet & Co., the well-known Catholic book publishing house of Baltimore, Md., a receiver was appointed on Tuesday to take charge of the concern. The assets and liabilities, which are said to be nearly equal, amount to about \$40,000.

The Milton Bradley Company, Springfield, Mass., is about to introduce some new games. One is called the "Fisherman's Luck;" another, "Æsop;" also, "Our Trip to Washington" and the "American Yacht." The new game "Kakeba" is also being improved. In addition to the games mentioned the company will soon introduce some low-price, common-sense blocks.

Hoffman & Rannie, paper manufacturers, Pulaski, N. Y., are reported as having failed and left town, owing about \$2,500, with no assets. This announcement causes no surprise among those who know the firm, and the only wonder being that they were able to obtain credit to that amount, as they are said to have leased the old Albion Mill six or seven months ago and have been endeavoring to run it without any capital. This mill was an abandoned pulp mill until they took hold of it and put in a machine to make tissue manillas. They are said to have bought their stock at Syracuse, and nearly all that they owe is due to parties at that place.

The *Globe* Printing and Publishing Company, Springfield, Ohio, has been changed to the *Globe-Republic* Printing and Publishing Company, the *Republic* Printing and Publishing Company having sold out to the former concern.

H. A. Crofts, publisher, Fort Collins, Col., has sold an interest in his paper to H. P. Crofts. The latter discontinues the publication of the *Leader* at Loveland and removes to Fort Collins to publish the *Express*.

J. W. Clarke has retired from the firm of Ingham, Clarke & Co., wholesale and retail dealers in books, stationery, &c., Cleveland, Ohio. The remaining partners continue the business under the same style.

Colin, McArthur & Co., manufacturers of wall-paper, Montreal, Que., have admitted James Worthington to partnership; the style of the firm is unchanged.

The Rhode Island *Democrat*, Providence R. I., has been sold to Schofield & Trumpler.

Hansmann, Volker & Co., manufacturers of picture frames, Kansas City, Mo., have dissolved partnership. William Volker & Co. succeed to the business.

Atterbury Brothers, paper-stock dealers, whose warehouse was burned out about three weeks ago, made a satisfactory settlement of their loss with the underwriters this week. The total loss by the fire was about \$14,000, which was offset by policies of insurance of \$12,000, and an equitable division of the salvage, amounting to between \$3,000 and \$4,000, from the sale of the damaged stock. The firm expects to be able to occupy its warehouse in a month hence, and in the meantime it will retain its temporary office with Miles O'Reilly's Sons, at 148 Front street, directly opposite its old location.

Baker & Hayes, Philadelphia, have had a great demand for their Blaine and Logan campaign cards, which they publish in two different sizes. In four days after they began to send out samples, they received orders amounting to three millions of cards, and orders are coming in fast every day. These cards are so admirably printed that they look like photographs. Thomas H. Sherman, Mr. Blaine's private secretary, wrote to Baker & Hayes a very flattering letter about these pictures. Mr. Sherman says: "The likeness of Mr. Blaine in your series of campaign cards is so good that I desire to have some copies of them for my own use." The Cleveland and Hendricks,

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

Butler and Vest campaign cards are just out, and samples will be sent out to-day.

J. W. Hunter, bookseller, &c., Columbia City, Ind., has sold out.

Moses Goldsmith & Son, paper-stock dealers, Charleston, S. C., are reported to have failed.

Crozier & Barclay, publishers *Record*, Elbert, Cal., have dissolved partnership. C. W. Crozier, Jr., continues the business.

M. E. (Mrs. R. W.) Thorner, stationery, &c., Hamilton, Ont., has sold her stock to J. Clappison at sixty cents on the dollar.

Charles J. Cohen, Philadelphia, forwards a copy of the No. 53 price-list of school novelties. It will be found very valuable to dealers making up an order for school supplies for the approaching season.

William B. Wilson, representing the National Publishing Company, Philadelphia, will not relax his efforts on the road, but will visit his many friends throughout the trade with a full line of samples, showing the various styles of family and pulpit Bibles, together with a large and fine assortment of photograph albums.

The *Journal and Courier*, New Haven, Conn., has made a change in the form of its business. All the newspaper property belonging to Carrington & Co. has been sold to the Carrington Publishing Company. The members of this company include all the members of the old company, and in addition William G. Pratt, editor, Jerome B. Lucke, city editor, and William H. Conklin, of the business department. The capital stock of the new company is \$75,000.

Edward S. Dodge, printer and stationer, doing business at 95 Chambers street and 77 Reade street, made an assignment on Wednesday for the benefit of creditors to George T. Van Doren, giving preferences for \$5,557, as follows: Edward W. Clark, \$500; Clarence H. Clark, \$500; C. Potter, Jr., & Co., \$1,000; J. V. N. Suydam, \$154.99; Conrow Brothers, \$205.39; Martha J. Dodge, \$2,128.50; Peter A. H. Jackson, \$333.33, and other small preferences, amounting to \$734.96. He has been in this business several years, and is reported to have failed before and compromised at 20 cents on the dollar. Chattel mortgages for \$11,317 have been placed on the plant.

A very annoying blunder occurred in the advertisement of Clague, Wegman, Schlicht & Field in *THE STATIONER* of July 10. The words, "Sent post-paid on receipt of \$2.00," were inserted. The mistake came about in this way: The firm had an advertisement of Field's Adding and Counting Register, running in several papers and had omitted to state the price; it directed its advertising clerk to notify all papers running that advertisement to insert the words, "Sent post-paid on receipt of \$2.00," and this notice came into the hands of *THE AMERICAN STATIONER*, and the words above mentioned were inserted as they appeared. The manufacturers of the Shannon File are horrified at the thought that *THE AMERICAN STATIONER*, which reaches the uttermost parts of the earth, should contain an erroneous price for the Shannon file. The regular retail price of the No. 4 A file, which is shown in the advertisement in *THE STATIONER* of July 10, page 39, is \$2.25, and the price of binding cases, such as are shown in the advertisement, is \$4.50 per dozen, with a very liberal discount to dealers, who can obtain full particulars by writing the firm.

The schedule of Butler & Miles show totals liabilities of \$38,221.02, and assets, \$35,261.19. Included in these assets are office and store fixtures, the cost of which is put down at \$2,129.10, but their actual value is estimated at \$1,300, and there are doubtful claims due the firm of \$2,024.72, so that the actual available assets of the firm with these deductions are \$32,456.81. Among the principal creditors are the American Wood Paper Company, \$4,577.52; Vernon Brothers & Co., \$3,913.04; Wilder & Co., of Boston, \$3,536.32; Chemical Paper Company, Stroudsburg, Pa., \$2,710.67; Weymouth Paper Mills, Weymouth, N. J., \$2,538.80; William Robertson & Sons, Putney, Vt., \$2,188.27; Rebecca E. Miles, \$2,000; Coy Paper Company, West Claremont, N. H.; \$1,270.35; Willard Russell & Co., Bellows Falls, Vt., \$1,223.22; Tanner & Faxon, Lee, Mass., \$1,076.65; Moore, Arms & Thompson, Bellows Falls, Vt., \$1,003.73; Thomas M. Bell, New York city, \$931.57; Excelsior Paper Company, Holyoke, Mass., \$907.86; W. H. H. Rogers, New York city, \$902.15; L. S. Lawrence & Co., bankers, New York city, \$901.19; E. B. Waite & Co., Little Falls, N. Y., \$801.34; Dickinson & Clark Paper Company, Holyoke, Mass., \$669.80; Fall

Mountain Paper Company, Bellows Falls, Vt., \$646.61; Watson & Chamberlin, Loudville, Mass., \$630.18; McAlpine Brothers & Co., Lee, Mass., \$532; Bradford Paper Manufacturing Company, Bradford, Vt., \$517.25; R. H. Forestal & Co., Philadelphia, Pa., \$472; Megargee Brothers, Philadelphia, \$429.96; D. & P. N. Fairchild & Co., Bridgeport, Pa., \$352.18. The creditors met on Friday of last week at the office of the assignee, William Allen, 317 Broadway, when a proposition was made that the firm should settle on the basis of 70 cents on the dollar, giving their notes payable in four, seven, ten and thirteen months, the last two notes to be indorsed. This proposition was favorably received by those present, but the meeting adjourned until the following morning, but as the firm desired more time in which to arrange for securing the endorsement of the last two notes—ten and thirteen months—the creditors adjourned until to-morrow at the same hour and place, when the matter will probably be disposed of on the basis proposed.

The straw board mill of H. C. & A. L. Howe, at Alderbrook, Madison County, N. Y., was destroyed by fire on Monday. The flames were first seen in a wing where a quantity of lime was kept, and it is thought the fire was caused by the rain falling upon the lime. The loss on the building is estimated at \$2,500; insurance, \$1,000. The Messrs. Howe will lose on machinery and stock about \$5,000. There were between forty and fifty tons of paper destroyed.

A fire occurred on Wednesday in the six-story brick building No. 198 William street, New York, the third floor of which is occupied by Charles A. Wolf, lithographer, who was damaged to the amount of \$1,000. The origin of the fire is unknown.

J. W. Birch & Co., dealers in carbon paper, New York city, have dissolved partnership; George C. Greene continues the business.

Wisdom & Harding, publishers, Fort Smith, Ark., have dissolved partnership. The business is continued by Wisdom & Garland.

J. Dewing & Co., publishers and booksellers, San Francisco, Cal., have admitted M. S. Dewing to partnership.

Mitchell & Co., publishers, Crab Orchard, Neb., have been succeeded by the *News Publishing Company*.

The Amateur Photographers.

Reference has heretofore been made to the Society of Amateurs Photographers of New York, whose object is the encouragement of photographic art.

On July 8 the society held a meeting, at which views were exhibited that were taken along the Hudson by members on a recent trip. The amateurs who made the excursion were F. C. Beach, the president of the society; H. J. Newton, James B. Metcalfe, Gilbert A. Robertson, Joseph S. M. Rich, Jacques M. Rich, C. W. Dean, Peter Grant, Samuel C. Grant, and William Chamberlain. They were the guests of Dr. P. H. Mason, of Peekskill, on the steam yacht Zephyr, and the trip was from that village to West Point. Up the river the artists sailed, popping away with their cameras at every yacht, rowboat or steamer that they met or passed, and obtaining, by the process of instantaneous photography, scores of beautiful pictures of river scenes, with the grand hills and Palisades for a background. One of the best of the photographs was a view of Dunderberg Mountain, opposite Peekskill. Mr. Beach had a scene from a Peekskill churchyard, with the old church where George Washington is alleged to have worshiped, and a few tombstones in the foreground. Several of the artists had caught views of the C. Vibbard, with a load of passengers, steaming up the river. There were good views of Iona Island and of a pretty yacht lying at anchor in the shadow of old Dunderberg. "Flirtation Walk" and other scenes at West Point were also exhibited, and ninety-four photographs in all were taken. Afterward some practical experiments in the development of gelatine plates were made. The society contemplates another trip up the Hudson very soon.

The following cut represents one of the three styles of

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. It CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,

New England Life Ins. Building, Boston

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,

Mfr. Mathematical Instruments,
18 Market at., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.

Sold by all first-class Stationers. Send for circulars.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, JULY 17, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

It is often wondered how some bankrupts become possessed of so much in the form of unavailable assets, when it was to be expected that their estates should "pan out" to better advantage. Perhaps the explanation may be found in a little advertisement which was to be found in one of the daily papers of late date. This advertisement read as follows: "For Sale—Defaulted Railway Bonds and Marine Bank Stock, *suitable for assets*, cheap. Address —." Now, we cannot characterize such a tender as the foregoing as anything else than the act of a scoundrel designed to engage other scoundrels in the business of defrauding their creditors. It may afford the clue to the method of obtaining a great many unavailable or doubtful assets in the case of many a defaulting debtor whose failure has the taint, if not the positive evidence, of fraud. There is scarcely a line of trade in which the scheme of presenting something "suitable for assets" but unavailable for realization cannot be carried out, and the bankrupt find a plausible defense for his insolvency while carrying off funds which ought to be paid over to defrauded creditors.

It is noteworthy that whatever may be the condition of trade in the different localities from which we have advices, there is no unsound feeling, and that assurance of good business to come seems to be the prevalent idea. Nor do the trade generally admit that they have done worse during the last six months than in preceding intervals. If buying has been closer, and if profits have been correspondingly reduced, it is patent, if we are to believe what we are told, that the volume of trade has been quite full—greater, indeed, than before in the quantity of goods disposed of. If, therefore, purchases have been light in detail, we must assume that they have made a large aggregate, and possibly, on the whole, returns have been as good as ever, even if it has taken "mony a mickle to mak a muckle." It is just as well that merchants should begin to divest themselves of the idea of large profits or exceptional gains. We are getting back to low prices, and consequently small profits, and the "nimble sixpence," should it be nimble, must be assiduously looked after and cared for. Our best hope in business stability is not in spasmodic rushes of trade, with high prices, but in that constant, steady and persistent demand which, even with low prices, buys safely, pays promptly, and insures solidity, strength and consequent success.

THE subject of taxing commercial travelers was the chief topic of discussion at the late meeting of the National

Association of Travelers. Steps were taken to secure legislation in the interest of the salesmen, and to secure the co-operation of other commercial organizations in the same direction. THE STATIONER has said before this that it believes it possible to secure the relief sought without the intervention of Congress. If, as we assume, local taxes on "drummers" are an infraction of that provision of the Constitution which gives the citizens of one State coincident rights with those of any other, the readiest and indeed most authoritative relief is the judgment of the highest court in the land, which can declare and determine whether the taxes imposed by different communities are legal. We do not know that a case properly made up and bringing the issue into form for broad definition has ever been prepared and carried through to the court of last resort. If it has not been, it would be well for the travelers to test the laws which they dispute.

Roundabouts.

BY THE TRADE LOUNGER.

Things are very cheap. I was more impressed by this fact the other day in watching the different street venders, who peddle their wares at almost every corner and fringe the curbstones of our principal streets. All lines of trade are represented by these itineraries, the paper, stationery, fancy-goods, hardware, dry-goods and I don't know how many others independent of the candy and fruit peddlers.

Is there an analogy to all this in the regular trade? In some respects there is, and the trade themselves are able to say how far it goes. I have seen things offered on the street which seemed ridiculously cheap, and yet the peripatetic vender makes his profit, and so presumably does the house from whom he buys. Are the economies of production more closely studied and more easily achieved than heretofore? What have the manufacturers to say? Perhaps not; but then how great must have been profits in the past.

One of the latest fountain pens appearing in the market is a simple tube, the pen being fed by a little slot running lengthwise on the top of a stopper (the same as that described in last week's STATIONER), and an air-hole running lengthwise through the stopper, the ink being air-driven through the slot before mentioned and the flow thus regulated. The principle is entirely the same, as will be seen, and yet the inventor (?) has applied for a patent.

A leading dealer, who has met with considerable bad luck in making his collections lately, is disposed to take a gloomy view of things. He said: "The tightness of the money market which exists at present is causing a great deal of uneasiness to be felt in most lines. This would not make matters so bad were it not for the fact that collections are

very slow. The custom is now for a firm owing a bill simply to respond not by inclosing a check for the amount when it becomes due, but to request the creditor to take up its (the debtor's) note. Thus the payment of bills is delayed from time to time, often from the usual period of ten or thirty days to six, twelve and eighteen months. It is not the custom for small houses to have the payment of bills deferred in this way, but for the oldest and most substantial houses in the trade. This state of things makes banks suspicious, and has a tendency to destroy confidence among dealers."

* * * *

A well-known merchant, who it seems did not take part in the general celebration of the Fourth of July, had a little Independence Day fun of his own one day this week, when he became so imbued with patriotism that he burned a whole cartload of fireworks. The celebration occurred in Park place, where there was such a sputter, fizzing and banging for the time being that the community became alarmed and at last firemen were summoned to put an end to the racket.

* * * *

There are no dealers in horse-hides in New York, and Manhattan's base-ball factories, some of which turn out 15,000 balls a day, have to go to Philadelphia for their covers.

* * * *

There seems to be no limit to the number of fountain pens that are now on the market and that are being introduced from time to time. The majority of these pens possess very few points of originality and, indeed, many of them are so near alike that it is hard to see any difference between them. At all events, the principle on which the fountain pen operates was exhausted long ago. There is really little left that has not been covered by some former patentee. This is why undoubtedly many of these pens still have patents pending, and the owners of others have not applied for patents.

* * * *

"Advertising in the cars of the elevated railways is very cheap," remarked a stationer a few days ago. "It costs a trifling amount to have a business card displayed in the cars of the company. How much? Well, only one dollar a month." "One dollar a month!" exclaimed a bystander. "My days! that is cheap, isn't it? Beats advertising in the trade journals all to pieces, so far as rates go." "Yes, one dollar a month," reiterated the stationer. "One dollar for each car. There are only about 1,000 cars, and what is \$1,000 a month to pay out in advertisements?" Not so cheap, after all!

The United Beckford and Hamilton libraries brought recently under the hammer the total sum of \$432,220, of which Mr. Bernard Quaritch, the London bookseller, alone was responsible for \$220,525. Of this latter amount, again, about one-half represented Mr. Quaritch's commissions on account of customers; the other half was added to his stock, and is now offered by him in a "rough catalogue" with prices affixed.

Answers to Correspondents.

R. and E. ask for address of Parker, Stearns & Co.

Ans.—85 Centre street, New York.

W. C. S. asks for address of the manufacturer of the imprinting stamp illustrated in *THE STATIONER* of July 10.

Ans.—Robert Snieder, 37 John street, New York.

Subscriber wants to know where Japan and India paper, used for engravings or proof for editions de luxe, can be had.

Ans.—Robert Mayer & Co., 27 Barclay street, New York, take orders. William P. Dane, 61 Beekman street, New York, has—we believe—some on hand. The American Palm Paper and Pulp Company, Valley Forge, Pa., did make a paper which was available for like use.

C. inquires: Who is the maker of green eye-shades suitable for bookkeeper's use?

Ans.—John Schneidig & Co., 43 Maiden lane, New York. W. B. White, Boston, Mass. French & Choate, Bond street, New York, are agents for such articles.

S. D. & Co. want to know where to buy or have made up in rolls paper such as is used by telegraph companies.

Ans.—The New York Cutting and Winding Company, 137 Baxter street, New York, cuts all sizes to order.

S. & R. want to know who makes a patent brass stencil, each letter separate, with the plates formed so as to unite the letters.

Ans.—S. W. Reese & Co., Chicago.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, July 16, 1884. }

THE MONEY MARKET.—The money market has developed no new feature. Notwithstanding the large surplus of ready money at the banks, complaint is still made as to the difficulty merchants experience in obtaining loans, and the extreme caution still exhibited in buying mercantile paper, and outside of this city the same difficulty is said to prevail. Rates at the banks for loans on call are 4@6 per cent. on stock collaterals. There has been very little demand for time loans which are quoted 5½@6 per cent. The dealings in commercial paper are still moderate, and there is scarcely any market for anything but first-class double named paper which is discounted at 5½@6 per cent. The stock market has experienced a period of dullness and irregular prices, closing tame and barely steady. Railroad bonds have been fairly active and generally higher. Governments firmer. Foreign exchange has ruled dull, with very little inquiry, and rates are unchanged.

THE PAPER MARKET.—Midsummer dullness continues the most prominent feature of the business situation throughout the country, and advices from almost every important locality East, South and West indicate that the condition of affairs in nearly every line of business is most aptly described by the well-known phrase, "between hay and grass." Although chronic grumblers exist at all times and in all places, there is really more complaint expressed by manufacturers at present of the very narrow margins than there is of the lack of orders. Most of our city houses have completed their semi-annual balance sheet, and it quite generally shows that the aggregate sales for the first six months of this year are considerably greater than those for the last half of 1883. The second half of the year begins under auspices not altogether unfavorable, and there is promise that the next six months may prove as conspicuous for prosperity as the first half of the year has been for financial distress. Favorable crop prospects continue to foreshadow an abundant yield of the products of the soil, which implies a continuance of cheap food at home, with a large surplus for export, resulting in increasing the purchasing capacity of all classes of people, and this in turn will help paper manufacturers and dealers, some of whom are almost in a slough of despond.

THE STATIONERY MARKET.—Trade is slowly picking up, although dealers in many lines evince a disposition to grumble at its dullness. Quite a number of orders have been received for August delivery and the manufacturing establishments, which have been running on half-time for several weeks past, are again running to their fullest capacity. Prices, however, are low, while labor is as high as it was when a profit of 20 per cent. was realized by the manufacturers. Hence, only those make a profit now who have the greatest facilities by which they are enabled to manufacture and sell their respective products at the lowest possible margin at which they can be handled and yield a living profit. Dealers are ordering quite largely just now, purely on account of the low prices, because they know that goods can never be any cheaper. Notwithstanding low prices and a stubbornly inactive trade, dealers are sanguine of a good fall business. A dealer whose views may be taken as the prevailing sentiment, expressed himself on this subject as follows: "With good crops assured, and political nominations well made, the general outlook is promising, although buyers are conservative and the market is close."

HEATH LETTER FILE & INDEX CO.

The attention of Stationers is called to our system of Letter and Postal Card Filing and Ledger Indexing. HEATH'S LETTER FILES enable one to file letters, bills, invoices, &c., in the most rapid and correct manner, and to **REFER TO THEM AFTER FILING WITHOUT ANY DELAY**, no matter how great the number of letters filed, as

the files are arranged for any amount of correspondence. They are also adapted to any kind of business. Cabinets in cherry, ash or walnut, or fireproof, as desired.

The cut on the left represents a 20 Box Library File ; that on the right a Single File. We are prepared to furnish the trade with any of our goods, and would especially recommend our **SINGLE FILES** as being adapted to the retail trade.

Our Ledger Indexes we guarantee to be the most perfect in use, there being no delay in referring to accounts, even in an index containing 40,000 names. All sizes furnished for from 1,500 names upward. Address,

Heath Letter File and Index Company,

147 HIGH STREET, BOSTON.

The Science of Heraldry.

V.

J. W. Weston, the John street engraver, having promised to tell the readers of THE STATIONER how to find out their coats-of-arms, a reporter called upon him again a few days ago to remind him of the fact. Mr. Weston greeted the reporter pleasantly, and good-naturedly allowed himself to be interviewed. "The first thing," he said, "necessary to do to find one's crest or coat-of-arms is to hunt up any armorial bearings belonging to one's family. If the party making the search has none, and does not know the locality of his ancestors, he must find it out, for the ancestral locality is all-important in looking up a crest, as there are many persons bearing the same family name with different pedigrees, whose ancestors may have inhabited different localities. Hence, without the name of the ancestral location, it is impossible to find the correct crest. Looking in an old work on heraldry, I find a list of twenty-one Jones, each of whose ancestors belonged to different localities, such as Berkshire, Wiltshire, Kent, &c. Hence, to find the crest of any one of them, it would be very confusing if we could not give the ancestral location. To find this, it is necessary to consult reliable works on heraldry, such as "Burke's Encyclopedia of Heraldry," "Berry's Encyclopedia Heraldica, or Dictionary of Heraldry," and any other works which may be at hand. In these works may be found a list of the various names, and, in many cases, the pedigree of the family of the person making the search. Another very important work on this subject is "The Baronetage of England; or, The History of the English Baronets," by Rev. Wm. Betham, of London. This work is especially valuable for its extensive collection of genealogical information, tabulated and otherwise arranged. It traces up ancestry very thoroughly. Thus, take the family name of Clayton, and see how it goes, step by step, back to the fountain head. Don't want the details? Well, perhaps, they would be superfluous.

"But, after the crest has been found, there is yet to find out its signification. This very often involves considerable research in heraldry. There are professional persons who make a business of studying up the signification of family crests, but it can be done by any one who has the proper authorities to consult. Some coats-of-arms are very elaborate, and require considerable research. Take, for example, that of the Right Honorable Lord Durnham, whose escutcheon is composed of twenty-four distinct coats-of-arms upon a shield supported by two lions, the whole surmounted by a coronet and three separate crests; while beneath are a ribbon and scroll with a motto. Each part of that coat-of-arms has a distinct meaning. Hence, some idea may be formed of the amount of labor necessary to arrive at the full meaning of the coat-of-arms."

Trade Items.

C. M. Ward made a visit to Philadelphia this week in the interest of the houses which he represents.

S. C. Toof & Co., printers, &c., Memphis, Tenn., have been damaged by fire \$15,000; fully insured.

Sutcliffe & Dwyer, printers, Pawtucket, R. I., have dissolved partnership; Adam Sutcliffe continues the business.

Samuel Raynor & Co. have issued a new and revised price-list of their goods, showing reductions from the list last previously issued.

Mr. Richards, manager of the stationery department of the American News Company, returned from Europe on Saturday, after a two months' absence.

Leon Isaacs & Co., Philadelphia, manufacturers of the Glucinum pens, caution the public against parties who claim to be connected with them. This firm has no representative travelingmen other than Leon Isaacs and Mr. Voorsanger.

Among the visiting out-of-town tradesmen in town during the past week, were Mr. Garcia, of Garcia & Fauche, New Orleans, La.; A. H. Shepard, Kansas City, Mo.; G. J. Lovell, of Hart & Co., Toronto, Ont.; T. M. Praigg, Gainesville, Tex.; W. G. White, Orlando, Fla.

Henry Levy & Son, 477 Broadway, have just received an elegant variety of artificial flowers, suitable for window and parlor decoration. They have also a large assortment of china and bisque figures, mounted on plush and other pedestals.

Thomas H. Sherman, private secretary to James G. Blaine, expresses approval of the excellent portrait of Mr. Blaine published by J. G. Bufford's Sons, saying: "I am directed by Mr. Blaine to acknowledge with many thanks the receipt of the handsomely-framed portrait sent with your compliments. It is regarded here as a most excellent likeness."

L. Prang & Co. are rapidly closing out the stock of the Palmer Art Company. There are a large number of fine art novelties yet to be disposed of, however, and these are offered to the trade at the cost of manufacture. The goods are made up in the most attractive style, and of the best material, and the designs are new. Mr. Oakley, manager for L. Prang & Co., will be pleased to show the line to anybody in the trade who may wish to inspect it.

A life of James G. Blaine will be issued in a few days by R. Worthington, 770 Broadway, New York. It is written by Charles Wolcott Balestier, author of "A Potent Philter," a novel which recently excited general interest as a serial in the columns of the New York Sunday Tribune. This volume, which has been read in proof by Mr. Blaine, has his sanction as to its accuracy. It is a full but succinct record of his life. It contains, in addition to the biography, important selections from his speeches, which of themselves are an admirable history of his public career. A sketch of the life of John A. Logan is appended. The volume is illustrated with por-

Y.; Conley & Francis, Columbus, O.; Remond, Backus & Co., Detroit, Mich.; D. W. Glass & Co., Baltimore, Md.; Scott Paper Co., Philadelphia, Pa.

traits of the candidates. A letter from Mr. Blaine, of which he has kindly permitted the use, gives the chief facts of his life in his own words. It is reproduced in facsimile.

E. Bell, representing L. Prang & Co., sailed for Bermuda on Thursday of last week by the steamship Oronoco.

The last of a series of games of base-ball between G. B. Hurd & Co.'s nine and J. D. Whitmore & Co.'s nine was played on the Paper Nine Grounds, Morrisania, on Saturday, July 12, resulting in a victory for the former, with a score of 23 to 21.

Andrew Lind, a lithographer, of 425 Atlantic avenue, Brooklyn, N. Y., who shot himself at the Willink entrance of Prospect Park on July 7, died on Monday of this week. Although he put two bullets into his brain, he lived a week. He had been out of employment.

The August number of that excellent, if cheap, periodical, Cassell's Family Magazine, has come to hand. The principal story is continued, with growing interest, and the contents generally of this number deserve perusal. The illustrations maintain their very meritorious standing.

Marcus Ward & Co. have brought out a new thing in the shape of lawn tennis invitation cards. The great popularity of this game at this season should create an active demand for these cards, and dealers should supply themselves. The cards come in one design, printed in two colors.

The Holyoke Card and Paper Company, Holyoke, Mass., expects to have its new building, at Brightwood, finished by August 1. The machinery will then be put in and will be in operation by September 1, by which time the works at Holyoke will be discontinued. From thirty to forty men will be hired at first.

The last number of the *Journal of the Society of Arts* (London), contains a lengthy article on Street Architecture in India by C. Purdon Clarke, C. I. E., which is illustrated by sixteen plate engravings of the styles of architecture in Lashkar, Gwalior, Jeypoor, Ahmedabad, Delhi and Ajmeer Rajpootana.

Edward Siegman is offering to the trade a line of poker chips, checkers and pool balls made of a composition called ivoryne. These goods are an excellent substitute for real ivory, but much cheaper. The poker chips and checkers are made in three sizes, and in red, white and blue colors. Owing to their close imitation to ivory and bone and non-liability to warp or crack they are said to be rapidly superseding goods made of the latter substances.

One of the most popular articles of stationery now in the market is the Stoakes automatic shading pen. This was introduced about three years ago and has had a very large sale. It is made in six sizes, varying with the breadth of the point. It is used for heading books, card writing, marking packages, writing placards, and for a great variety of fancy work. James D. Whitmore & Co. are the sole agents, and are now showing some very fine work executed with the pen.

Lawrence & Baxter are about introducing in the American market a line of imported lace papers for valentine makers. The papers come in large and small designs, and there are forty different patterns. They have also increased their line of imported pen-wipers with a large number of designs made in imitation of fruits and flowers. The material is plush, silk, and cloth.

James D. Whitmore & Co. have a very elegant line of holiday boxes, which they have just made up and placed on exhibition in their show-rooms. The boxes come in the richest and most attractive styles, and there is a wide range of prices. The firm has also a new line of menu and order of dance cards in all sorts of novel and striking designs.

John Glenn, traveling representative of Marcus Ward & Co., Limited, started this week on a trip through Canada.

A FIRST-CLASS OPPORTUNITY TO PURCHASE a Book and Stationery establishment in a college town; a railroad centre; a live Western business point.

SANBORN'S BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

WHOLESALE MANUFACTURERS OF
SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE**,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its never spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

ESTABLISHED 1832.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

The Rolling Hoop Trade.

"Children's playthings all have their season," said a toy merchant. "Most of the toy hoops used by the juvenile creation are made in Granville Corners, Mass., or in Philadelphia. Most of the plain ones come from Granville, and the more expensive from Philadelphia. In the case of the plain hoop, ash or beech wood is cut into straight strips, and steamed. The steam makes the wood curl up until both ends meet, and then the ends are simply fastened together with tacks. A piece is chipped off a round ash or beech rod for the trundle stick, and the toy is complete. These hoops sell for ten cents each, and Granville Corners turned out about eighty thousand of them last year. As made in Philadelphia, however, the hoop puts on more style. There, after steaming and nailing the wood, the workmen bevel the edges of the rim, paint the wood with bright colors, and fasten six tiny bells on the under-side at regular intervals. Thus accoutred, the hoop rolls along with a merry tingle that pleases the children and enables the dealer to get twenty-five cents for the toy, which is called a bell hoop. The chime hoop is even more ornamental. It is made of wood, prettily painted. Four spokes converge from the sides to the centre, where two sweet-toned bells are fastened. The hoop is rolled along by means of an ornamental handle furnished with a metal hammer. When the youngster pushes the handle as he walks, the hammer strikes the bells alternately. This is the finest and most expensive hoop of the lot, and sells for fifty cents. We buy our goods in this line in February, and our stock is sold by May. The chime hoops are selling best recently, but the trade is subject to a singular demand by reason of the peculiar whims of children. It is a well-known fact that if you ask the average boy or girl what kind of a hoop they want, the reply will be, 'I want a pair of roller skates.' Of course it is more profitable for the toyman to meet this sort of demand. He can make money on roller skates, while there is very little profit on hoops. The total trade in

this country will reach one million two hundred thousand hoops per annum."—*Ex.*

Field's Adding and Counting Register.

The instrument of which an illustration is given has been called "the greatest mind-relieving and labor-saving invention of the age," and the justice of this claim will be best determined by those who have occasion to test it. This instrument is known as Field's

FIELD'S ADDING AND COUNTING REGISTER.

Adding and Counting Register. It is a fine piece of mechanism, and is said to be infallible in its operation. It is made of brass and steel, handsomely nickel-plated. The figures shown in the first circular opening of the face-plate, near the finger-piece, indicate tens, in the next hundreds, and the next thousands. Each pressure of the finger-piece registers ten, and the figures in the openings indicate the result of any number of pressures.

The practical excellence of the Adding and Counting Register is due to the fact that it occupies itself with the tens, hundreds and thousands, while the mind is occupied with units only. Thus, in adding the longest column of figures, there is no more mental work required than in adding two figures. That the process is a natural one is proved by the fact that persons who could never master ordinary addition become experts in a short time; and after very

little practice, experts may learn to add twice as rapidly as they did before its use, and, what is still more important, are, it is claimed, certain of getting the correct result the first time. With very little practice it becomes possible by following the printed directions accompanying the Adding and Counting Register, to add two or more columns with great facility.

When it is remembered that Field's Adding and Counting Register accomplishes the twofold purpose of relieving the mind of unnecessary and injurious work, and makes a person

who has difficulty in addition an expert, and an expert capable of doing his work twice as fast, the usefulness of the register is self-evident. This instrument may be used for all kinds of counting and tallying, such as checking freight and the innumerable kinds of registering and tallying, common to almost every kind of business.

The register is controlled by Clague, Wegman, Schlicht & Field, Rochester, N. Y.

H. A. Tucker, traveling representative of R. R. Watson, will soon start out on the road with the intention of paying his respects to all of the jobbers between New York and Omaha. He will take with him several of the latest and best selling specialties in the market.

Any truth, faithfully faced, is strength in itself.

CINCINNATI, OHIO

E. P. DONNELL & CO., Chicago, Ill..
Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

- FIRST.**—It handles buckled paper as well as flat, and runs the work through straight.
- SECOND.**—It has the best system for rapid and perfect feed.
- THIRD.**—It has the best system for gauges, and can be more quickly adjusted.
- FOURTH.**—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.
- FIFTH.**—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.
- SIXTH.**—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.
- SEVENTH.**—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.
- EIGHTH.**—Each machine has a scoring cutter attached.
- NINTH.**—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 2\frac{3}{4}$ retail at 50 cents each.
 " $6\frac{1}{4} \times 3\frac{1}{4}$ " \$1.00 "

Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order. Samples forwarded on application, to be paid for if satisfactory.

PRICE LISTS ON APPLICATION FURNISHED TO THE TRADE.

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879,

and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. December 13, 1883.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet. ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

DAYTON DASHES.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, Ohio, July 14, 1884.

I do not think that the most sanguine man in the world could get up much enthusiasm over the state of trade. Not that it is worse than is usual at this season of the year, but it is dull, and no mistake.

A drive through the country, the past few days, shows the best wheat crop harvested in ten years. And the best part of it is, that the wheat is safe in the barn, or already thrashed out. Corn and tobacco are splendid in appearance; of course, they have to run the chances of the frost, &c.

A look among the stationers shows dull trade, but they don't expect anything better at this season. Mr. Thomas has withdrawn from the book business, and intends to devote his life to the ministry, in which calling his father was an eminent light for half a century.

Mr. Sullivan, of Sullivan & Chancellor, has disposed of his interest in his store to his partner, his continued ill health compelling him to take this step. He expects to devote his attention to farming in some milder climate.

Reynolds & Reynolds have their additional room almost ready, and think then that they can fill all orders without delay.

R. A. Rogers & Co. are busy with their general paper trade, and in addition are making a line of pads, with spiral wire pencil-holders attached. Their orders are ahead of their capacity so far. These are entirely new goods, and, no doubt, will find ready sale.

Among the mills trade seems good, but prices are very low; but they are all living in hopes of better times "after harvest" in the MIAMI VALLEY.

RICHMOND RACKETS.

[FROM OUR REGULAR CORRESPONDENT.]

RICHMOND, Va., July 16, 1884.

A careful search through the business houses engaged in the stationery trade reveals the fact that they are well stocked, have full forces to wait upon their customers, personally, by order or otherwise, but the chief ingre-

dient to enliven is lacking—the demand for goods—hence trade generally is dull.

J. W. Randolph & English have "all hands at work" in their bindery, while in the retail and jobbing department the clerks are kept busy chiefly in fighting flies and the hot weather. Just about 70,000 persons in this city are engaged in the latter occupation; the remainder are "gathering up the shells by the sea-shore," wading through the sand, sporting with Neptune's billows or foraging through the country in search of that great spring, without which man's cup of happiness in this life can never be said to be full, unless he possesses it, namely, good health. Randolph & English have just issued "Myra," a novel, by Mamie Lampkin Hatchett, of Virginia.

The Richmond Paper Manufacturing Company, since removing to its new quarters, has been doing a better retail trade than ever; but the heated term has somewhat suppressed its rush. Its paper mill is working to its usual capacity, mainly on lower grades of white paper.

Everet Waddy's fiscal year has just closed, and he reports that his business has exceeded expectations. Therefore, the dullness of the season does not worry him. Mr. Waddy will go North the last of this month on business intent.

Baughman Brothers & Co. are busy in the printing department of their establishment.

Among the exhibitors from Richmond to the New Orleans Cotton Exhibition will be the following-named houses which handle paper or stationery: Randolph Paper Box Company, Andrews, Baptist & Clemmitt, A. Hoen & Co. (lithographers), J. W. Randolph & English, Cussins, May, Sheppard & Co., Chas. H. Hasker, E. B. Marquies & Co., Richmond Paper Manufacturing Company and W. E. Simons & Co.

SENTINEL.

TORONTO TROTS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, July 19, 1884.

Our semi-centennial, which I mentioned in my last, is now an event of the past. It was anxiously looked for, and in every respect, so far as I know, came up to the most sanguine expectations of both promoters and participants. The city throughout put on its best dress, and certainly never presented a

gayer appearance and, perhaps, never entertained so many visitors as during the week of this celebration. The weather was all that could be desired, except on one day, Friday, which was a soaker, and caused the entertainments in the programme for that day to be scored out. I don't think there were many regrets because of it, though there is no doubt the turn-out would have been good, perhaps the best of all. But there is such a thing as getting tired of even a good thing—of gazing at long processions, with the attendant discomforts. One of my legs complains yet of the punishment I put it to for an hour on the top of an office stool in the door of one of our stores on the line of march. It was done in a good cause, I suppose, for I gave it up to a lady, who permitted me to steady myself by holding on to her, while my elevation was sustained by holding on to the stool with my toe nails. It will be quite apparent to the reflective mind, that nearly a week of this sort of thing had worn off much of the novelty, and one was glad to remain in-doors, the rain furnishing a tangible excuse. It was a fête champêtre on a large scale, and while everybody was pleased, I am safe in saying everybody was glad to hear it was over. A whole week given up to processions and show is too much for ordinary mortals. It would be far better to spread the enthusiasm out a little. However, it is done, and we are back again into the usual every-day trot, and it is not a very lively trot either. This is summer time, and it is understood with us at this season, that as a rule, there is not much to be done. During the oppressive heat, the inclination runs rather in the direction of taking it as easy as possible. Many of our people are away, and those who have been unable to accomplish that, are taking such relaxation and enjoyment as may be found close at hand. There is no doubt about it, "all work and no play," you know, becomes monotonous to the most industrious folk, and there is no doubt about another thing: these breaks in the toil and moil of life are good for both body and soul. What is life worth if it is to be a ceaseless grind from year to year? Not much—that is my estimate of such a condition, and I don't think I am altogether singular in entertaining it.

The excursion business is now in full swing.

Crowds are leaving and coming into the city every day. Of the arrivals in this way, the largest percentage are your people, and they come not only from the border States, but from the South, and we are glad not only to see them and give them a welcome, but that we have attractions to draw them this way. Then there are the Sunday-school picnics. One would fancy from the hundreds of children, &c., with lunch baskets, that pass down the streets morning after morning that the whole energies of the city were, for the present, concentrated in that worthy object.

As a matter of course, you will want to know something about what the leaders of our city trade are doing. Well, the Rev. W. Briggs, of the Methodist Book and Publishing House, with his wife and son, has gone to England. Mr. Ellis, of the Barber & Ellis Company, with his family, is rusticated in a summer cottage on our Coney Island, in front of the city. J. Y. Reid, of Buntin, Reid & Co., has been enjoying himself on his farm—a very fine one, I believe—at Brantford. Richard Brown, Hutchison, Gage, and others of your patrons have not up to this moment taken their flight, but such an event may be looked for in the very near future. Well, let them go; one and all deserve a holiday. I wish them a good one, and that they may come back rejuvenated and equal to the pressure of business which, from all appearances, is likely to meet them this fall. C. H.

WASHINGTON WAIFS.

[FROM OUR REGULAR CORRESPONDENT.]

WASHINGTON, D. C., July 22, 1884.

On Monday, the seventh day of July, 1884, the democratic congressman and his Republican brother folded up their little grip-sacks, and, unlike the poetical Arab, noisily stole away. What have they done? In the beginning they were as loving as a lot of Methodist brethren at a love feast; a little later on they got into a fight among themselves over the tariff question, and from that time on they did nothing but fret and fume while the golden opportunities glided by. Bills by the thousands were introduced in both houses, no less than eleven thousand having been sent on their way, while only about one hundred ever got safely through and became laws. During the entire seven months that the great minds were struggling over questions of state, they did not once touch upon the all-important silver question, and the trade-dollar bill in which the business men of the country were greatly interested was allowed to languish in the document room, where so many things have died of old age. The sinful senators passed the Mormon bill, but the virtuous gentlemen of the House refused to handle the vile problem, and this, along with the electoral count measure, which passed the Senate almost unanimously, failed to become a law, and these two vital questions quietly sleep on the Speaker's table. It being a Presidential year, the Union soldier was not forgotten, and the pension bills went flying through the two houses with the rapidity of a thoroughbred on a first-class race-course. Democrat and republican was deter-

mined that the dear old veteran should not get left, and on the 3d of November next he is expected once more at the front. The democrats ruled the House, and the republicans managed the Senate. Neither did anything worthy of note, and now that they have gone their way for a time, the country may be congratulated on the anticipated pleasure of a rest from intermeddling with business affairs by claimed-to-be reformers and amateur political economists.

Within the space allowed your correspondent to talk of business matters and gossip concerning events of the trade, it would not be permissible or polite to discuss the Presidential candidates and their outlook; but, begging pardon, I will venture the assertion that Washington is a Blaine city, and that, if allowed to vote on the choice as to whom shall serve us another four years as Chief Magistrate, the bold statesman from the Kennebec would have no cause to grumble at the scarcity of supporters in the capital of the nation. Mr. Blaine is well known here, and his handsome form and features are familiar to all residents and, as he has a beautiful home here, he may be truly called a citizen of Washington. The fine-looking bachelor of your State who carries the banner of Democracy, is not known here, save through the columns of the newspaper; he has certainly not visited us since he became known to the people of the United States. Notwithstanding this, some of his warmest friends are to be found among the business men of Washington. Especially is this true among the old-time merchants and inhabitants who lived here in ante-bellum days. So much for the candidates. May the best man win!

This city has not been afflicted with much heat thus far; in fact, the early mornings and nights for the past two or three weeks have been such as we are accustomed to get in the autumn, instead of the middle of summer, and for this we, who never sniff the salt sea air or catch a whiff of ozone from the mountain-tops, devoutly thank Divine Providence which makes no distinction between the millionaire and the poor, hard-worked clerk. Although the weather is good, people are not buying much; yet no one is complaining and nobody exhibits any surprise, as this dull season is always looked for in Washington during the summer months. The trade with the departments, of course, is not at all interrupted by any condition of things, and at this time of the year, the beginning of it, in fact, large supplies of goods are being called for and furnished by those who have contracts with the government. This makes trade lively in some sections of the city, while in the retail trade nothing is doing, and one finds it a very difficult matter to get a scrap of news interesting enough to write about.

Owing to the investigations which have been going on in the departments for some time past, particularly in the Navy Department, there is some feeling of uneasiness and uncertainty among the merchants of Washington as to the outcome, as quite a number of the business men of this city have had at times, in some way or other, transactions with the different bureaus of Uncle Sam. The inves-

tigation into the management of the Bureau of Medicine and Surgery in the Navy Department is still going on under the eye of a board of naval officers, and once in a while the name of some well-known business firm is brought into unpleasant notoriety, by having had something to do with a peculiar looking voucher which the old salts of the sea cannot exactly understand. Some citizens of Washington who have been doing business here all their lives, and who have always been respected by their fellow-men for their honesty in business and probity of character in all the walks of life, have been suddenly lifted into public notice by the aid of a bench warrant and a deputy sheriff. Five of the best known merchants on Pennsylvania avenue have, at different times during the recent trouble in the Navy Department, been indicted by the Grand Jury for fraudulent practices, and will have to stand a trial at the next term of the court. In talking with a merchant about these unfortunate affairs he said that he did not think it was just or fair to a man doing business with the departments to haul him up before the courts simply because they cannot understand the wording of a departmental voucher; especially was it cruel, he said, when that merchant was not allowed to offer a word of explanation before the board examining into the accounts of corrupt officials. He claimed that it was heartless to drag a man, who had all his life borne a good name, from his home or place of business and hold him up before the public with criminals, simply because he had, in compliance with certain rules of the department and instructions of the disbursing officer, delivered certain goods in a way not strictly in accordance with the laws of honesty and justice as interpreted by the higher officials of the departments. He still further contended that a merchant should have a chance to explain his dealings with the disbursing officer who paid him for the goods when the investigating board happens to find a bad-looking voucher, and that he should be allowed an opportunity to say a word in his own behalf before he is delivered over to the sheriff and published all over the country as a fraud and a swindler. 'Tis true, he said, that the courts will give one a chance to prove himself an honest man, but a verdict of acquittal will not remove the stigma which has already attached itself to his good name by the disgraceful notoriety which he received when the sheriff called on him with a warrant of arrest, and his neighbors saw his name in the public prints smirched with a scandal. How do merchants of good standing and honesty of purpose get into these scrapes, some may ask. Noble-hearted seeker after truth I will tell you how it is done here, and you can draw your own ideas as to the methods and motives and bring your unsophisticated legal mind to bear upon the case. 'Tis thus—some fine day an official of the Navy Department walks into a gentleman's place of business and says, "that's a handsome inkstand, I would like to have that for the Grand Mogul of the Horse Marines in our department." "All right," says the willing man of business; "Shall I

(Continued from page 98.)

send it up to the office?" "Yes," replies the official, "send it up with a dozen of those Russia leather memorandum books, and that hand-painted pair of cuspadors, ordered last week."

Enough said, 'tis done, the goods are delivered next day. At the end of the month the merchant presents his bill for inkstand, memorandum books and cuspadors; the official scans the bill and says, "Look here, we can't pay that in that shape; we have no appropriation for such things; please make out your bill for twelve copies of Dr. Johnson's work on hog cholera, which is a book much used in the hospitals." The merchant goes back and makes out his bill for Johnson on hog cholera, returns and gets his money. That is an end of the transaction till the members of the examining committee get around; they, on looking into this thing, find that on a certain day twelve copies of Johnson on hog cholera were bought of Mr. Thingumbob for the naval hospital and they cannot find the books anywhere. They at once say something has been paid for which the department has never received, or, in other words, somebody has stolen so much money. The truth of the thing is, the merchant has delivered books, inkstand and cuspadors for which he has no voucher on file in the departments, and the department holds a voucher for Johnson on hog cholera and no Johnson on hog cholera in sight. This is the way it has been done for a long time, and now the question of reform is once more before the people, the peculiarities of doing business with the government is being shown up.

Yesterday afternoon I made a call on several of our stationers and found things quite brisk in some quarters, where they were at work looking after the needs of the government. At Chapman's, on the Avenue, the genial proprietor and his corps of clerks were very busy with orders and contracts. Mr. Chapman stated that the retail trade was quite dull, but that he was heels over head in a lively trade, supplying the wants of the various departments with which he had contracts.

At Brentano's, Mr. Wood, the very polite manager of the stationery department of this well-known house, talked quite refreshingly of the business he was doing. He said there was no cause whatever for complaining in his neighborhood, as he had just as much as he could attend to, and that he was doing a very good business, receiving a great many out-of-town orders. At present he is furnishing the New Orleans Exposition Board of this city with stationery and other supplies in his line. Mr. Wood spoke complimentary of THE STATIONER, and said that he had always found it one of the best papers in the trade, and when he was on the hunt for anything in connection with the stationery business he never consulted the columns of THE STATIONER in vain.

At Whitaker's I found little doing in the stationery line, but there was a demand for light reading matter in the book trade. Mr. Whitaker, as well as the others, told me that commercial travelers were scarce and that but few had been around for the past month.

A. S. Solomons, an old bookseller of this

city and vice-president of the American Red Cross Association, has been appointed by the President a delegate to represent the United States at the Geneva Conference of the International Association, to be held in September. Mr. Solomons is well known here for his useful labors in works of charity. BEN.

CINCINNATI CHIPS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, July 22, 1884.

Now that the second half of the year has started in, and there are no alarming reverberations from financial crashes rolling Westward over the Alleghenies, there are brighter faces and more cheerful voices in shops and on 'Change. There is a feeling that the commercial situation in the West is sound enough, in spite of the prevailing dullness, and, in fact, there is a feeling that it is because of the soundness of the commercial situation in the West that the times are dull, and that but for this very soundness we should have had, in lieu of dullness, a general smash-up. Can an epoch be cited in the past commercial history of this country when the business of the country had the power, as it has now, to hold out against a situation of affairs which involved a million dollars shrinkage in stocks and bonds, as the present situation does, besides more than fifty millions of dollars losses by the failures of banking houses? Business men look on this spectacle with mingled emotions of patriotic astonishment and admiration.

Reports from the crops are almost generally favorable. Wheat promises extremely well, especially as to quality. It has matured admirably, and has been well saved in Ohio, Indiana, southern Illinois and in Kentucky. There is, with local exceptions, a fine outlook for corn in the corn-growing regions of these States. Hay crops are very fine indeed, and the pastures were never before so good. There has been just rain enough. Sometimes it was on the verge of too much, but it always stopped before passing the bounds. Corn is well advanced and is in fine condition. Vegetables are very abundant and very fine. Fruits of all kinds are coming in freely from the South. There is every evidence that the country will have means of subsistence in great abundance. All this was true until the Fourth of July. Since that time there have been local droughts in southern Ohio which endanger the corn crops. If rain does not fall copiously within a week corn in some of these localities will be completely scorched out and ruined.

The Harpers are putting up an immense building. On the northeast corner of Fourth and Plum streets, in this city. The building will be a fine modern structure and will be seven stories high, with a frontage of eighty feet on Fourth street, and a depth of one hundred and thirty feet along Plum street. It goes in the name of H. W. Derby, the manager of the Harper depository in this city, but it goes without saying that the cost of the building, which will be above \$100,000, will be paid for by the Harpers, and the property will be theirs.

"The Eclectic and Industrial System of

Drawing" is the title of a new school-book, printed by Van Antwerp, Bragg & Co., of this city. It was written by Christina Sullivan, one of the teachers of drawing in the public schools.

W. B. Carpenter & Co. report that their June sales this year exceeded in volume and in amount those of June last year.

J. R. Mills & Co. say that business is steady, considering the season, and that the popularity of their reversible envelope is unabated.

John Holland reports large and frequent orders for his gold pens, and a considerable extension of his field of trade.

The Globe Files Company is spreading itself over a great deal of space in its factory and warehouse, as well as in its field of trade.

A. H. Pounsford & Co. report the summer trade better than they anticipated, although not as brisk as they would like to see it.

Chatfield & Woods have their recently burned out warehouses restored to fairly good shape.

Snider & Hoole are pushing things. It is their practice to hunt up trade in dull times, and they always find it.

Charles Stewart & Co. are watching the corners and making things go.

Louis Snider's Sons exhibit signs of activity about their warehouses. From the bustle in that quarter one would not infer that the times were dull with them. PRINCE WILLIAM.

BOSTON BITS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire Street, BOSTON, July 22, 1884.

In all of the calendars and almanacs July is placed among the summer months, and for some sections of the country this "ruling," no doubt, holds good. Here, however, the thermometer belies the statement, and a New England July can very safely be placed either in the spring or fall.

With such cool weather as we are having right along it is to be regretted that business is not more active, as it requires some little activity to keep warm.

Knight, Adams & Co., taking advantage of the dullness in trade and the cool weather, have been taking stock. The whole interior of their spacious establishment is undergoing a summer cleaning and taking on some fresh paint. When these labors are finished, and the salesrooms are in order, the trade will be invited to inspect the stock of holiday novelties and fall goods, of which the house will make an extensive display. An advance shipment of goods, comprising Bohemian glass, Vienna and Berlin fancy wares, and photograph albums, is now on the water. These goods will be ready for the trade's inspection in August.

Friend McIntosh, with initials J. L., seems to have convinced the city trade that he is fully prepared to execute all kinds of work in numbering, paging and perforating, eyeletting, punching and cutting. Orders are increasing daily, and the quality of work turned out will compare favorably with any New York concern. Mac takes THE STATIONER, and he

reads it, too. In perusing its columns his attention was called to the advertisement of E. P. Donnell & Co., Chicago, manufacturers of bookbinders' machinery and tools. What especially interested Mac was the Peerless rotary perforator, which is so graphically described and aptly illustrated in a quarter-page announcement. The more Mac read that advertisement the more he wanted that Peerless perforator. Well, he sent for one; it is now set up in his factory, and a ten ton job is just now being worked up on it. Mac says that the perforator works "like a daisy," and gives satisfaction to his numerous customers. To do the best of work and to give patrons satisfaction is Mac's sole ambition, and herein lies his success. Nothing succeeds like success, and Mac knows it.

Making a pilgrimage to Holyoke, Mass., last week, I made a visit to the mammoth mills of the Whiting Paper Company. This company manufactures more fine paper than any other concern in the world. Three mills are constantly running, turning out twenty tons a day, and I don't suppose there is a stationer in the country but has the Whiting paper in stock.

"Whiting's Standard" is the trade-mark of a superior line of writing paper, envelopes and correspondence cards, and those goods represent the highest point of perfection to which the art of paper manufacture has been brought.

This line of paper comprises two tints, "Ancient Cream" and "Ancient Azure," and two surfaces, "mill rolled" and "double glazed," and every sheet bears the water-mark, "Whiting's Standard." The paper is put up in a very attractive manner in neat boxes with envelopes to match, and with handsome bands and labels. For library or office use, and for all purposes where good writing paper is wanted, "Whiting's Standard" will be found unsurpassed.

Another Holyoke manufactory visited was the American Pad Company, of which T. W. Holley is manager. The pads made by this company are not of the common order so generally found at most stationers. Only animal-sized and loft-dried papers are used by the American Pad Company in the manufacture of its fine grade pads. Manilla pads are also made by this company. These pads are made in all the regular sizes, or in special sizes to order, and they are ruled or plain as wanted. The company puts up its pads in a very neat manner, using marbled or fancy paper on the edges instead of "roller composition," as this style of binding keeps the leaves firmer and gives better satisfaction.

Although this company has been engaged in making pads and memorandum tablets only a short time, its business has already assumed large proportions, and its daily output has found a ready sale in New York and Boston. Its trade is constantly growing and in the fall increased facilities will be demanded for manufacturing. Consumers are becoming educated to a proper appreciation of a good article, and in consequence honest goods take well with the trade. Let it be one line or another; or even writing pads—there is always a demand for the best.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper not ice.

L. M. Holt, publisher, Riverside, Cal., has sold out.

B. F. Bates, publisher, Grand Island, Neb., has failed.

J. H. Wills, lithographer, San Francisco, Cal., has been attached.

J. H. Oppenheim, paper-stock dealer, Augusta, Ga., has assigned.

Charles Hazelrigg, printer, Frankfort, Ind., has sold out to B. F. Palmer.

E. Faber returned from Europe on Sunday last, by the steamship Oregon.

Stringham & Gomers, label cutters, New York city, have dissolved partnership.

Michael Norton, paper-stock dealer, Boston, Mass., has filed a petition in insolvency.

Wright & Keiser, wholesale stationers, Allentown, Pa., have dissolved partnership.

H. C. & A. L. Howe, paper manufacturers, West Eaton, N. Y., have been burned out.

F. T. L. Lane, manufacturer of glue, Newark, N. J., has been damaged by fire; insured.

A. D. Bell, proprietor of the Merchant Publishing Company, San Francisco, Cal., has assigned.

The Libby & Williams Paper Company, St. Louis, Mo., has been incorporated with a capital stock of \$50,000.

The Brown Folder Company, manufacturer of paper folders, Erie, Pa., has been succeeded by the Brown Folding Machine Company, Limited.

A. Maynard & Co., manufacturers of cords and tassels, Brooklyn, N. Y., have dissolved partnership. G. T. Taylor & Son continue the business.

Charles N. Graves, dealer in paper-hangings, Boston, Mass., has failed, and is offering his creditors fifty cents on the dollar. Liabilities about \$6,000.

B. F. Stevens & Co., booksellers and stationers, Astoria, Ore., have dissolved partnership. H. D. Newbury, and J. Stevens continue the business.

S. A. Rudolph's Sons, paper dealers and manufacturers, Philadelphia, allowed their paper to go to protest on Monday, and it is said that they are about to make an assignment. They are reported to owe about \$100,000, mainly to manufacturers in the East. J. A. Decker, of Lee, Mass., is said to be of the number. Among the Philadelphia creditors are the Jessup & Moore Paper Company and John Simmons, paper-stock dealer, neither of them for over \$2,000. The mill at Manayunk, it is said, is not involved by the failure, as it is owned by S. A. Rudolph, the father of the general partners of the concern, who, at the time of the reorganization of the firm about a year ago, upon the withdrawal of Samuel Kennedy, leased it to his sons. S. A. Rudolph is said to be a special partner to the extent of \$20,000 until December 31 next. The firm was supposed to have a capital of \$35,000 to \$50,000.

The proceedings of the National Bankruptcy Convention, held at Washington, D. C., last January, have just been published in pamphlet form. Copies of it, and also copies of the Lowell bill, may be had by applying to George Moore Smith, secretary of the convention, 55 Liberty street, New York.

One of the ablest papers devoted to maritime interests is the *Nautical Gazette*. B. S. Osborne, its managing editor, was for many years the nautical editor of a leading New York daily. The *Gazette* is published weekly, and each issue is full of shipping and navigation news.

W. H. Hasbrouck has just issued a new catalogue and price-list. The goods named in the catalogue are A 1, and every stationer should have a copy of the list. Mr. Hasbrouck reports a brisk trade in his line at present, having recently taken some large orders.

The Silicate Book Slate Company has in preparation some new designs in black-board slates. They will be ready for the trade in a short time and will be duly described in THE STATIONER.

W. O. Guilford, bookseller and stationer, Waterbury, Conn., has admitted A. A. Tyrrell to partnership, and the new firm will do business under the style of W. O. Guilford & Co.

H. S. Crocker, of H. S. Crocker & Co., San Francisco, returned from Europe by the steamship Arizona, on the 20th inst.

G. M. Bradt, printer, Chattanooga, Tenn., has been burned out. Loss, \$3,000; insured for \$2,000.

I. M. Merlin-Jones, publisher, Sonoma, Cal., has sold out his business.

E. J. Livernash, publisher of the *Sentinel*, Cloverdale, Cal., has sold out.

Charles Sounichsen, bookbinder, San Jose, Cal., has disposed of his business.

M. M. Glenn, publisher of the *Inyo Independence*, Independence, Cal., has sold out.

A receiver has been appointed for the Sanford Universal Fibre Company, New York city.

George A. Rich, of the firm of Rich & Tucker, printers and publishers, Mohawk, N. Y., is dead.

M. Goldsmith & Son, paper dealers, &c., Charleston, S. C., have failed, and are offering their creditors twenty-five cents on the dollar.

C. J. Paret has been admitted to partnership in the firm of J. Wolcott, paper-hanger, New Haven, Conn. The style of the new firm is J. Wolcott & Co.

The Carrington Publishing Company has bought out Carrington & Co., publishers of the *Journal and Courier*, New Haven, Conn. The former company has a paid-in capital stock of \$75,000.

The Stationers and Paper Manufacturers' Provident Society, of London, Eng., held its annual dinner on the evening of June 20. The secretary announced subscriptions to the amount of £270. The annual dinner of the Stationers' Company to distinguished members of the learned professions was given on June 10. The three principal toasts of the evening were "Science," "Literature" and "Art."

George B. Hogan, of Newton, Ia., and Lewis Smith, of Des Moines, same State, have formed a copartnership for the purpose of carrying on a wholesale and retail book, stationery and paper-hanging business, at 617 Walnut street, Des Moines. Mr. Hogan was for years in business at Newton, and Mr. Smith has been connected with the house of Redhead, Wellslager & Co. The new firm is very highly spoken of. It will open about August 15.

Rev. Andrew J. Chambers, of the Bethel African Methodist Church, was arrested at New Haven, Conn., on the 18th inst., at the instance of D. Appleton & Co., of New York for obtaining a set of Appleton's Encyclopedia, and, after refusing to pay for them on the ground that they did not suit him, selling them without accounting to the Appletons. Parson Chambers is a conspicuous figure in

357 VARIETIES. Finest Line in the country.

W. H. HASBROUCK,
536 & 538 Pearl St., New York.

New Haven, being the leader of a colored democratic club.

C. J. Pilgrim, publisher, Gonzales, Tex., has been succeeded by Pilgrim & Reese.

N. B. Johnson & Co., booksellers and stationers, Weatherford, Tex., have sold out.

J. M. Alvey, publisher of the *Pioneer*, Watrous, N. M., has sold out to W. H. Henderson.

The Unique Card and Stationery Company, Cincinnati, Ohio, has made an assignment to Robert Fulton.

Five judgments, amounting to \$50,998, have been secured against the *Graphic* Company, New York city.

Jenkins & Glick, booksellers and stationers, Oxford, Miss., have dissolved partnership. William Jenkins succeeds to the business.

John B. Piet & Co., publishers, booksellers and stationers, Baltimore, Md., have given bonds for \$80,000, and William J. O'Brien has been appointed a receiver for the firm.

Henry P. McGown, Jr., stationer, at No. 144 East 125th street, New York, made an assignment on Thursday, 17th inst., to N. Gano Dunn for \$1,241. He began business in the fall of 1881.

Liebenroth, Von Auw & Co. have just issued a new catalogue and price list of their blank-books, memorandums, files, pads, albums, &c. It is very conveniently arranged and indexed; the illustrations are full and the book is well printed. The catalogue is handsomely bound in cloth. The trade should send for it.

Among the out-of-town dealers in the city this week were: Robert Ansley, of the Western News Company, Chicago, Ill.; T. M. Praigg, Gainesville, Tex.; W. G. White, Orlando, Fla.; Joseph Garcia, of Garcia & Fauche, New Orleans, La.; Mr. Brown, of Brown Brothers & Daniel, Kansas City, Mo.; Mr. Thompson, of Thompson & Macay, Dubuque, Ia.; Allan Diemer, of the H. & D. Manufacturing Company, Cleveland, Ohio.

Ed. Wolf, of the firm of Wolf & Co., Philadelphia, has visited England, and is now in Germany. He has sold in both countries a great many American cards and novelties. He also bought on the Continent some of the best articles manufactured in that line, and paid low prices on account of the large quantities he was able to order.

Clayton C. Rhoads has been admitted to membership in the firm of Redhead, Wells-lager & Co., wholesale booksellers and stationers, Des Moines, Iowa. The style of the firm is unchanged.

Henry Stevens, paper box dealer, Chicago, has made an assignment. His attorney says that the assets approximate \$100,000, and the liabilities amount to half that sum.

The Mystic Twine Company L. Barber & Co., proprietors, Stonington, Conn., has dissolved. Leander Barber continues the business.

The *Herald* Publishing Company, Lawrence, Kan., has sold out to W. F. Chalfant.

Cannon Brothers, publishers of the *Democrat*, Ledan, Kan., have been burned out.

The liabilities of H. P. Parrish, newsdealer and stationer, Kewanee, Ill., are \$2,800.

S. D. Morgan, publisher, Chicago, Ill., has confessed judgment in the sum of \$71,000.

An assignment has been made by Davenport Brothers, dealers in picture-frames, Scranton, Pa.

The Anniston News Company, Anniston, Ala., wants publishers and manufacturers' trade-lists.

The liabilities of L. G. Joslin & Co., paper-stock dealers, Worcester, Mass., are \$7,000; assets, \$1,000.

S. A. Rudolph's Sons, paper dealers, Philadelphia, have suspended. Their liabilities are estimated at \$100,000.

An incendiary fire on Sunday, 20th inst., destroyed the building of the Beloit Paper Pail Company at Beloit, Wis. Loss, \$15,000; covered by insurance.

Henry Levy & Son, 477 Broadway, have just received an elegant line of photographic albums, cabinet and quarto size, with all latest improvements, padded sides, beveled interiors, expanding lock, &c. These books are covered in plush, etruscan embossed leather, morocco and calf, and are in every way of first-class finish and offered at prices to suit buyers.

Pomeroy & Sons, Newark, N. J., have been awarded a government contract for their mucilage to the extent of between \$2,000 and \$3,000. The price at which their mucilage was put in is fully 50 per cent. higher than that of some of the competing brands, but the

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

contract was taken on the quality of the goods—"first-quality Pomeroy brand of mucilage made solely from pure gum arabic."

W. P. Jones, paper dealer, Boston, has removed to 7 Bromfield street, in that city.

J. H. Rosenbaum, stationer, &c., Toronto, Ont., has sold out to Thomas McCormick.

Glick & Jenkins, booksellers and stationers, Fort Smith, Ark., have dissolved partnership. B. Glick continues the business.

W. W. Edgar, bookseller and stationer, Pittsburg, Pa., has asked an extension of seven months from his creditors. Liabilities, \$3,500; nominal assets, \$5,500.

Samuels, Selden & Co., stationers, &c., Chattanooga, Tenn., have been burned out. Loss, \$2,000; insured for \$2,500.

Rivers Brothers, booksellers and stationers, Salt Lake City, Utah, have sold their book and stationery interests to C. H. Parsons & Co.

C. N. Caspar, 437 East Water street, Milwaukee, is preparing a list of dealers in antiquarian and second-hand books in the United States.

The Cincinnati Paper Novelty Company has got out a new catalogue of its document and sample envelopes. It can be had by addressing the company, or C. M. Ward, New York agent, 28 Bond street.

The American Card Company, for which Selchow & Righter are selling agents, has a new line of playing-cards on the market. These cards come in assorted colors and patterns and at extremely low prices.

A. Boutin, wholesale and retail dealer in fancy goods, Burlington, Vt., has sold out to Miles & McMahon, who will continue the business. Mr. Boutin will open a department store at Kansas City, Mo., about October 1.

The *Southern Merchant and Journal of Trade and Commerce* is the title of a new trade journal published at Baltimore, Md. It is devoted to advancing the commercial interests of that city. It gives evidence of prosperity.

Erastus Darrow & Co., Rochester, have published "Martin's Interest and Average Tables," by George W. Martin. This is a work of great value to merchants, saving much time and labor. The same firm also publishes "Elwood's Grain Tables," which are invaluable for grain dealers and millers.

F. S. Church's picture of the "White Fawn" is in possession of L. Prang. The increasing number of art students throughout the country has created a great demand for studies of various kinds, a marked preference being shown for those by modern painters. For floral subjects French artists are still unrivaled, and studies by Victor Dagnon and Madame Flory are admirably adapted for more advanced students. Both of these artists are now preparing subjects for publication by Prang. The change that has come over public taste in art matters is very noticeable in the popular designs for congratulation cards. Those of foreign subjects and treatment meet with comparatively little recognition from the general public, while American subjects treated by American artists command increasing popularity. There is no doubt that in time a genre school of art will develop here as a direct result of the interest taken by the people in the actual every-day scenes of life. The growth of a genre school has invariably accompanied the art development of nations.

A line of embossed pictures has appeared in the market. It consists of landscapes, portraits, &c., with embossed figures, trees made of a species of fern or moss to imitate nature, and all the parts of the subjects represented, treated in a way to make the picture life-like and realistic. Some of the views represent men fishing in a stream from a small boat. The figures, boat, &c., are shapes fastened to the background in such a manner as to appear more natural than they would if simply embossed. These goods are said to be the production of a Paris house. J. H. Bufford's Sons have obtained the agency for their sale here, and are now showing some twenty different designs. The pictures are lithographs, and cannot fail to be popular.

William Delaney, Unionville, Conn., for many years connected with the Delaney & Munson Paper Company, died July 17 after a short illness of two weeks. Mr. Delaney had a large experience in the paper business, and was at one time connected with a large mill in Easthampton, Mass.

The *Publishers' Weekly* sends a "final notice" of the extension of time for copying for the "Publishers' Trade List Annual of 1884" to August 1. Publishers should be alert to forward their catalogues in season.

J. V. Johnson & Co., publisher of the *Democrat*, St. Louis, Mich., have sold out.

L. H. Rogers, 75 Maiden lane, is making a specialty of the manufacture of manifold and carbon papers, &c. He has a new price list ready.

The office of the assignees of E. Claxton and E. Claxton & Co., publishers, Philadelphia, has been removed to 729 Walnut street in that city.

Charles M. Green, printer, New York, made an assignment Wednesday to Edwin D. Simpson, giving preferences to George H. Morrill & Co. for \$3,150, and to the Charles M. Green Printing Company for \$11,879.95. Mr. Green had been engaged in the printing business under the style of S. W. Green's Son, and was compelled to ask an extension of three years from July 1, 1883, which was granted, and the business was merged into a stock company, under the style of the Charles M. Green Printing Company, he being made the treasurer. Subsequently, he opened an office at 69 Beekman street, on the opposite side of the street, as publisher, but both concerns were distinct, and it is said that his failure does not involve the company. The liabilities are not definitely known, but are thought to be about \$100,000. At Mr. Green's office it was stated that the failure was the result of bad times, but he expected to be able to make some arrangements with his creditors to continue.

A FIRST-CLASS OPPORTUNITY TO PURCHASE a Book and Stationery establishment in a college town; a railroad centre; a live Western business point.

Address Box 199, Galesburg, Ill.

WANTED.

A situation as Traveling Salesman in the Book and Stationery business; has had experience; can furnish good references; Western territory preferred.

Address B. T., Care of The American Stationer.

WANTED.

Traveling Salesman, by a Western manufacturer of Stationers' Specialties and Staple Goods, to sell to the city jobbing trade of the entire country, except the extreme East and West; liberal salary to the right man. Address "G. F.,"

Office of The American Stationer.

The Hamburger Settlement.

A meeting of the creditors of J. H. Hamburger was held at the rooms of the Stationers' Board of Trade on Friday afternoon of last week. After a short session the committee appointed to confer with the assignee, Mr. Tarler, drew up the following report:

The undersigned members of the committee chosen by you to examine into the affairs of J. H. Hamburger beg leave to say that they have met at three different times, and have made as careful an examination of the books, accounts and the stock on hand as the limited time allowed them would permit. Mr. Hamburger has furnished them with the schedule of the liabilities and assets, which is as follows: Liabilities, \$79,292; nominal assets, \$131,095; actual assets, \$71,405. Your committee would state that in addition to the above schedule they have obtained from Mr. Hamburger such information as they have desired, and believe that the statements and schedule received are fair statements of his present financial standing.

In conclusion, Mr. Hamburger, having cabled to his brother, Max Hamburger, of Berlin, and having received his favorable reply, agreeing to endorse his (J. H. Hamburger's) notes, makes the following proposition for the settlement of all his liabilities:

"That the preferred creditors in Class A be paid 75 cents on the dollar; Class B, 60 cents, and unprioritized creditors, 30 cents, all in notes at 6, 9, 12 and 18 months, endorsed and with interest. Also that all of the creditors be given Mr. Hamburger's own notes for 20 cents on the dollar, not endorsed, payable in 21 and 24 months with interest, making 95 cents, 80 cents and 50 cents to all three classes of creditors."

The committee would respectfully recommend the acceptance of the foregoing proposition.

A motion was made, and unanimously carried, to accept the report. This was subsequently submitted to the creditors, all of whom thus far communicated with have signed it.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.
Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

HAS the Stationers' Board of Trade "called off" for the summer? We have not heard much of it lately, perhaps because it has become somniferous with the season. Other trade organizations are scrutinizing matters of public policy and seem disposed to exert their influence. Why not this?

THE paper makers hold their conclave at Saratoga next week. Some curiosity is apparent as to what they may do. The usual formalities will, doubtless, be gone through with, and, perhaps, something of interest otherwise may develop. We don't see the use of getting together if some particular interest does not attach to the meetings.

It is a good time to begin to agitate for further cheap postage. We want to see letters carried for one cent. This would suit almost everybody and restrict the use of postal cards, which it would be better to get rid of, if possible. It must be remembered that, at the coming election, we shall be called on to vote for representatives in the next Congress. Wouldn't it be as well to imbue all aspirants for Congressional honors with the feeling that cheap postage, a general bankruptcy law and other desirable acts of legislation will be important factors in securing the support of business men? A few business ideas injected into politics will not be amiss.

WHY should wealth or the assumption of it be a higher gauge of business integrity than the straightforwardness of the poor man, which is overlooked, if not despised? The most glaring instances of default within the past six months have been those of men of so-called wealth and social position, and the greatest credence seems to have been given to people who have, as events proved, been least entitled to it. Such men have traded on their good name, and their associates have trusted them beyond the limits of even more than ordinary business prudence. Great promises, which common judgment ought to have convinced those to whom they have been given were founded in uncertainty, found ready acceptance, and yet the man without more than a few thousands capital would have been ridiculed and contemptuously dismissed had he ventured to present as glowing inducements. Business acumen does not consist in trusting to big names, reputed wealth and lofty reputations. An analytical view of the operations of finance and commerce will persuade any man of common judgment of this, and yet there are few who stop to take it at the right moment. Thus we have large defaults, un-

exampled failures, big swindles, and, as a consequence, loss of confidence, a panic-stricken public and impoverished trade. But there is great admiration for men who fleece their friends and neighbors of large sums. The petty swindler, starving, mayhap, is too cheap for appreciation. The bigger the rogue the bigger the enjoyment of his speculations. No one really wants to punish him and compromises are sought and readily effected. The business men of the country have themselves to thank for most of the evils which beset trade. Not the least of these evils is the undue bestowal of confidence and the failure to practise the same rules of commercial prudence, in all instances alike—big or little.

Roundabouts.

BY THE TRADE LOUNGER.

Quite a large number of buyers from all parts of the country in the different lines of trade are in the city. One remark, which is said to be common to those visiting in the dry-goods district, is to the effect that New York is the only place in the country where people seem to be in anywise "blue." Now, isn't this a little too hard on New Yorkers?

* * * *

Did anybody pay any particular attention to the last weekly bank statement? I believe that the banks reported \$28,000,000 in excess of legal requirements. Why is all this money lying idle? It is because people are very careful and because the banks are helping them to be cautious. Wall Street has overdone itself and has frolicked around too much to induce people to invest in shares even when prices of stocks are seemingly very, very low. It looks very much as if Wall Street has either killed its goose of the golden egg, or that the goose—alias the public—has got away without waiting to be drawn, and is likely to stay away. Experience has taught some people something. It would be a good thing if the Wall Street men could equally profit by experience. It is certain that they have overdone speculation and have spoilt their own trade.

* * * *

Some new and cheap lines of playing-cards are in the market. Not long ago, I remarked upon the prices at which these goods were being sold from peddlers' baskets. Now you can buy from the jobbers cards that can be retailed from ten cents up to forty cents. A very good, enameled card can be retailed for forty cents and gilt-edged can be had at \$48 the gross.

* * * *

Quite a large number of members of the trade are seeking rest and recuperation at the sea-shore, in the mountains and at the country resorts. J. H. Belding is sojourning at North Brookfield, Mass.; A. H. Krum, superintendent of the stationery department of Baker, Pratt & Co., is enjoying the invigorating air of Glens Falls, N. Y.; Mr. Chambers, of the same house has just returned from a pleasant sojourn at the sea-shore; Charles de Groot, salesman for the Tower Manufacturing

Company, has departed from the city to rusticate in the country. * * * *

Stationers and other small dealers should carefully scrutinize the coins that they receive in payment for goods, especially those of the twenty-five-cent denomination. There is said to be a considerable number of them in circulation. They bear the date of 1875. On genuine quarters only three claws can be seen on the eagle, while on the counterfeit the eagle has four claws on one foot, and three on the other. * * * *

An English firm has, it is said, been trying to play a smart trick on somebody. It sent advance sheets of a work to leading book-publishing firm in this city, for the purpose of giving it the first opportunity of publishing, and requested a remittance should it be accepted. It was accepted, and a check of \$250 was sent to the English house. As soon as the book was published, the American firm received a letter from the author demanding payment for producing his book. The English publishers, on being appealed to, denied their authority to sell the right of publication. Thus the case stands. * * * *

Very pretty dolls are now made of heavy card-board paper, out of which the figure is cut; it is then dressed in stylish apparel, which includes imitation of a real Gainsborough hat, fancy stockings and gaiters, imitation sealskin sacque, &c. The face is also lithographed, giving it as handsome and lifelike appearance as could be wished. These are just the things to make the little ones happy and have the additional merit of being cheap. The dolls are dressed in different styles, and each one is attached to a card and put up in a neat box. * * * *

A novelty is a combined pencil and shoe-and-glove buttoner, in the form of the ordinary gold-propelling pencil, the hook attachment being on the top. It is especially adapted to ladies' use in connection with their ball programmes, but may be used in a score of different ways. * * * *

A patent has been applied for a device for holding back the stubs in check, draft and other books. It consists of a clamp, one end of which is fastened on the inside of the left-hand cover of the book. By its use stubs are kept out of the way, at all times, and the book-keeper has the face of the check-book free for him to work on. * * * *

The latest things in photograph albums are those with flexible metal backs. It is claimed that this style of back makes what is usually the weakest part of the album the strongest. It will hold any number of leaves, owing to its flexibility, and it permits the removal of a torn or soiled leaf and the substitution of a new one. * * * *

A very amusing story is going the rounds of the trade in regard to a representative of a leading Toronto stationery house. The gentleman alluded to came here as much for pleasure as for business, it seems. After

enjoying himself for a week in searching for the elephant in the city, he concluded to continue the investigation in the suburbs, and accordingly paid a visit to America's Eden, Glen Island. It so happened that in returning he took a steamer for New Haven instead of this city. During the steamer's run to New Haven the Canadian remarked that the steamer was an infernally long while in getting in port, and when it did arrive he was struck with the strangeness of the surroundings. Fortunately his head was not muddled with anything excepting soda water and lemonade, and he soon righted himself, being none the worse for going astray. In fact, when he came to think of it soberly, he was rather pleased than otherwise.

Answers to Correspondents.

Subscriber asks for address of J. D. Free, Jr., one of the bidders for the Treasury Department contracts.
Ans.—Washington, D. C.

J. inquires: Who makes very cheap translucent slates such as retail at five and ten cents.

Ans.—C. C. Shepard, 216 West Houston street, New York.

H. H. K. wants address of firm manufacturing "Eureka Mills" manilla tissue.

Ans.—We do not know who makes it, but understand that it is a brand controlled and handled by Ross White, No. 1 Reade street, this city.

J. B. C. inquires: Who makes school-book covers with advertisements.

Ans.—We are not sure but all of the manufacturers of school-book covers do. We know that P. F. Van Everen, 116 Nassau street, New York, does.

Subscriber wants names of makers of cotton or Sea Island twines; Western manufacturers preferred.

Ans.—We do not know of any Western manufacturers and think that there are none. The twines are made by Travers Brothers, 107 Duane street, and Johnson & Co., 3 Lispenard street, New York. There are also other manufacturers here.

C. & C. want to know who handles second-hand machinery for cutting paper; such as a bundle cutter with about 44-inch knife.

Ans.—You can address any of the manufacturers of paper cutting machinery, some of whom advertise in this paper.

Decorative Use of Brass.

Brass, from its composition, says the *Builder*, can only be used in the interior of buildings, and should not be exposed to damp. Its natural pale-yellow color is very agreeable, and is due to the presence of zinc. It is not highly malleable, but may be cast and treated like bronze, or by a process of annealing rolled into thin rods and sheets and worked up in the same way as iron. It is difficult to give a decided preference to either method, though they are so totally opposed in principle and practice. The present tendency is in favor of wrought brass, welded, beaten, pierced, hammered and riveted as in iron, for this exhibits the individual skill of the handicraftsman, and possesses a sentimental value that cast-work, which can be produced *ad libitum*, cannot possess. The designs should be more severe and precise than if intended for forged iron, and

more pierced and embossed work should be introduced. It should be sparingly used, and the redundancy of polished brass in some of the newest restaurants in London, though affecting to be of the quiet and unpretending style painted by Hogarth, is vulgar. The works in ormolu of Louis XV. and Louis XVI., which are of cast and chased brass gilded, are too beautiful to afford any scope for adverse criticism, but objects designed to be cast in brass should either be of great delicacy or of great simplicity. Though the arts of working in at least what are called baser metals are not yet in the position their importance in the past and in the present entitles them to, the future is full of hope, and we may trust that a time is at hand when men of exceptional power, though engaged in what have been regarded as the humblest industries in which art can enter, will be able to impress the seal of genius on their work, and hand their names down to posterity.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, July 23, 1884. }

THE MONEY MARKET.—There has been more doing in commercial paper, but the banks still discriminate sharply and, outside of their own regular customers, are not disposed to buy single-named paper. Prime double-named paper negotiable at $5\frac{1}{2}\%$ @ 6 per cent. Call loans at the Stock Exchange have been done at $1\frac{1}{2}\%$ per cent., but the banks charge 4 @ 6 per cent. for this kind of accommodation. Time loans quiet but negotiable at $\frac{1}{2}\%$ @ 6 per cent. The stock market has been devoid of both feature or interest, trading having been light and the fluctuations without significance, closing steady, but dull. Railroad bonds have been traded in to a fair extent, but without important fluctuations. Governments a trifle higher. Foreign exchange has ruled dull and a shade easier.

THE PAPER MARKET.—Although there has been no increase of store trade among our city paper dealers during the past week, some of them talk more encouragingly of the prospect for the early future. This little better feeling is brought about by the number of inquiries from buyers for paper to be made up and delivered early in the fall, and some orders have been already placed by buyers who have become satisfied that prices are about as low as they will be, and that the probabilities are that they may have to pay more by delaying their purchases very much longer. These remarks apply more particularly to print papers, the demand for which is very large, and constantly increasing, and what with the higher cost of some articles of chemicals and the probability of manufacturers having to pay more for their rags on account of the cholera in Europe, probabilities not only favor present prices being sustained but a possible advance. Of manillas we cannot say the same, as jute stocks have declined slightly, and whether prices of goods can be sustained in view of this remains to be seen. Straw wrappings are sustained because of the scarcity of straw and many of the mills being closed down.

THE STATIONERY MARKET.—There is really very little to remark of the condition of trade. About the same activity prevails in the various lines as was noted last week. Fall business has not fairly opened up yet, and there seems to be a disposition on the part of buyers to hold back their orders. There have been quite a large number of dealers in town during the past few days, but they are said to have bought sparingly, and in many cases only sample lots. Moreover, few orders have been received by mail. Most dealers give as a reason for procrastinating that they are waiting for further developments in the market, and rather than take the risk of ordering more goods than they can sell, prefer to wait until they can properly judge of the demand, in order to supply themselves with only just such an amount of stock as they can dispose of. Everybody is apparently afraid of getting a surplus on their hands.

SELF-INKING PADS FOR RUBBER STAMPS.

It requires no inking, will last for several years. Impressions are clearer, the supply of ink being uniform at all times. As there is no necessity of re-inking, the soiling of hands or clothing is obviated. The Western Union Telegraph Co. says: "We have used the pads manufactured by Baumgarten for last two years without refilling, and they have given universal satisfaction." Beware of inferior pads; my pads bear my trademark, "Perfection," and are guaranteed to give satisfaction.

Size $4\frac{1}{2} \times 2\frac{3}{4}$ retail at 50 cents each.
6 $\frac{1}{4} \times 3\frac{1}{4}$ \$1.00

Wholesale, \$3 and \$5 per doz. Special figures in quantities. These pads are manufactured to stand any climate. The colors are red, purple and green. Special sizes to order. Samples forwarded on application, to be paid for if satisfactory.

H. N. BAUMGARTEN & CO.,

Sole Proprietors and Manufacturers,
60 WILLIAM STREET, NEW YORK CITY.

Stationery for First and Second Class Post-Offices.

Appended is the list of articles required for the use of the Post-Office Department during this year, together with the prices bid by the contractors to whom the awards were made:

A Home-Made Hecktograph.

An exchange gives a recipe for making hecktograph composition, adding that it is the French method, which for several reasons is superior to any other. The following is the recipe :

	Parts.
Good ordinary glue.....	100
Glycerine.....	50
Barium sulphate finely powdered.....	25
(Or the same amount of kaolin.)	
Water.....	375

Some use nothing but the glue, glycerine and water. A piece of tin turned up at the edges ½ inch will hold the mixture. First dissolve the glue in water, heat it, add then the glycerine. Use aniline ink.

SANBORNS' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

GEO. H. SANBORN & SONS, Book-Binders', Printers' and Paper-Box Makers' Machinery,
No. 69 BEEKMAN STREET, NEW YORK.

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready to use*, and is the *only* Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

Memorandum Calendars.

One of the most convenient, useful and novel memorandum calendars that have ever been introduced is the Daily Memorandum calendar, which is shown in the accompanying engraving and which, as will be seen, besides giving the year, the month, day of the month, day of the week, &c., permits of such memoranda being made upon it each day as may be desired. It consists of a detachable daily calendar pad with blank spaces for memorandums, combined with a stand so constructed

that it may be conveniently placed on a table or desk and serve as a calendar, as a memorandum pad, and as a paper weight or penrack, and also for receiving papers to be filed. Merchants, officers of corporations, lawyers, physicians, clergymen, teachers and business men of all classes find it necessary and convenient to make note of appointments and engagements on certain dates. To counteract the effects of forgetfulness, diaries are kept, but it too often happens that the events

men in figuring interest, on every date how many days of the year have passed and how many are to come. The back, or last leaf of the pad, is made of card-board, and has on its face the calendar of the current year, and on its back the calendar of the coming year.

At the end of each year the old pad, or its remaining stump, may be removed from the stand and the new pad for the ensuing year put in its place.

The stand is in the form of a pen-rack, and can also be used as such, and has a memorandum file attached. The pad is connected by a screw to a revolving rod so that it can be

which ought to be remembered are forgotten, together with diaries. With the daily memorandum calendar it is different, for the memorandum must come before the eye on the day it is due, together with the date, and cannot be overlooked. Every business man will see at a glance the advantages of this article, as to say nothing of things of great importance, there are many small matters which must be remembered on certain dates, for which this daily memorandum calendar will prove useful.

The calendar consists of three hundred and sixty-five leaves, which are made of thin writing paper, so that ink may be used. The upper part of each leaf is left blank for memoranda, and on the lower part is the day of the week, the month, and the date, in plain letters and large figures. The leaves are connected only at the top, so that they can be opened like a book and easily written on from January to December. They are perforated at the top, so that they can be torn off as each day passes. The pad shows the number of days in each month; and, for the convenience of business

brought into a convenient position for writing by placing a pencil or penholder under the pad on the projecting prongs, or so turned as to show the calendar of the ensuing year on the back. The file combined with this stand is for the purpose of filing up notices, &c., relating to memorandums made, such as life insurance notices, cards of appointments, &c.

The trade are supplied by Henry Bainbridge & Co., New York.

E. P. DONNELL & CO., Chicago, Ill.

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

PRICE LISTS ON APPLICATION FURNISHED TO THE TRADE.

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879,

and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. December 13, 1883.

HEATH LETTER FILE & INDEX CO.

The attention of Stationers is called to our system of Letter and Postal Card Filing and Ledger Indexing. HEATH'S LETTER FILES enable one to file letters, bills, invoices, &c., in the most rapid and correct manner, and to *REFER TO THEM AFTER FILING WITHOUT ANY DELAY*, no matter how great the number of letters filed, as the files are arranged for any amount of correspondence. They are also adapted to any kind of business. Cabinets in cherry, ash or walnut, or fireproof, as desired.

20 BOX LIBRARY FILE.

The cut on the left represents a 20 Box Library File ; that on the right a Single File. We are prepared to furnish the trade with any of our goods, and would especially recommend our SINGLE FILES as being adapted to the retail trade.

Our Ledger Indexes we guarantee to be the most perfect in use, there being no delay in referring to accounts, even in an index containing 40,000 names. All sizes furnished for from 1,500 names upward. Address,

Heath Letter File and Index Company,

CARTER, DINSMORE & Co.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Records, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet. ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.—NO. 5.

NEW YORK, JULY 31, 1884.

WHOLE NO. 475.

Correspondence.

PHILADELPHIA POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

OFFICE OF THE LOCKWOOD PRESS,
150 SOUTH FOURTH STREET,
PHILADELPHIA, Pa., July 29, 1884.

This is, unfortunately, not a very good time for correspondence for THE STATIONER. We have been passing through a difficult period, and we certainly look for improvement toward the end of the season; but there has been a drag upon business both with manufacturers and jobbers. This is generally the time for giving the most important orders for the holiday and winter seasons; but buyers have not shown up in numbers, and their orders are smaller than in preceding years. Here we find a reason for the numerous failures which have been reported to you almost every week. Philadelphia, which has justly borne the name of being one of the most solid places, more solid perhaps, comparatively, than other cities, has been very much tried of late, for we have had more than a dozen big failures in the trade here. It is easy to understand that a certain amount of discouragement exists; but, notwithstanding all that has come and gone, is it necessary to despair for the future if the present leaves much to be desired? Certainly not. If people will only consider the situation and compare it with the violent crises through which we have passed in previous years, they will see that in a financial point of view we are differently and infinitely better situated. At other times there has been a dearth of cash, which is now abundant, since our banks have a greater surplus than at any other time. All of the business now doing is upon the shortest terms of credit. The rule is not to increase the length of credits nor to push the buyer beyond the limits to which he wishes to restrict himself, and not to force credit, which just now is a difficult matter. Conforming to these rules of prudence we shall reach the fall elections without much shaking up, after which there will be undoubtedly a great revival of business.

Everything indicates that this will be so, for the trade are not burdened with goods; but on the contrary, your correspondent can say that stocks are generally very light. On the other

hand, as manufacturers are not producing as much as in prior seasons, there will probably be an advance in prices for goods in most lines of the stationery trade. We have only to wait with patience, for only a few weeks separate us from the fall, and above all, we must not despair, for there is no reason for it. These ideas coincide substantially with opinions of the most important houses in Philadelphia.

A. M. Collins, Son & Co. have suffered less than others from the stagnation in trade, because they have, so to speak, a monopoly in their line of manufacture of cards and novelties of all kinds, for which, despite everything, there has been a great demand. Without any restriction of credits, this house has not pushed business beyond the requirements of prudence.

J. B. Lippincott & Co. have their travelers out, who report that there is more business than they had expected.

Langfeld, Turner & Andrews are also doing a good deal, and to see the activity which prevails at their place of business it would be difficult to believe that there was any crisis. Their novelties for the coming season will be more elegant and in better taste than anything they have offered before.

Baker & Hayes, for a new house in the manufacture of cards and novelties, have found a veritable bonanza in their campaign cards, which are selling by millions.

Speaking of cards, I must mention an excellent idea developed by Wolf & Co., of this city. Ed. Wolf, of this firm, went to Europe two months ago, and he has sold there large quantities of cards manufactured in this country. The fact is, that we can manufacture cards for the best markets in Europe, where there is perhaps a new field open for our industry.

T. M. Simpson also reports a very satisfactory trade in his line. He makes a specialty of cardboards and cut cards for printers and stationers.

Kohn & Rosenbaum have put out this season an incomparable line of holiday novelties and cards. The goods are neither extreme in style nor price, but are specially adapted to the general wants of the jobbing trade. They embrace sixty-two distinct series. Their representatives are on their Western tour, William Klein taking the northern and Mr. Whiteside

the southern sections. If the trade do not see their line, the firm will be pleased to answer fullest inquiries and forward samples. Their general catalogue will be ready about August 20. Dealers will do well to send for it.

The Dreka Christmas oddities manufactured by L. Dreka will be the event of the next season. These novelties are in great demand by firms which keep the highest grades of goods.

J. VIENNOT.

LOUISVILLE LINKS.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., July 26, 1884.

Trade is dull and dormant. The situation is interesting, and various opinions are held as to the outlook for the remainder of the year. While failures have been uncommonly numerous over the whole country, the number of business troubles in this city of late has been rather less than usual, and makes a healthy and reassuring exhibit. Nevertheless, the moral effect of the vast number of trade embarrassments daily chronicled in the newspapers has been felt here, and has produced a clearly bearish feeling. Local banks, although well supplied with funds, are pursuing a most cautious policy, confining loans to their customers who have claims on them and scrutinizing indorsement and collateral severely. Outside applications for discount are sternly refused and regular patrons are warned to restrict their operations to means in hand, as renewals or extensions will be discouraged by bankers. Consequently the money market is close and rates stiff at 7 to 8 per cent. There have been no embarrassments among financial institutions here, and the well-known rigid and conservative course of Louisville bankers will doubtless prevent any trouble. The whisky trade is still depressed, but the export plan having been successfully adopted, payment of a large portion of revenue moneys has been thus postponed, and this branch is consequently not demanding much additional aid at present.

The leaf tobacco trade is in a firm and contented position and manifests exceptional ease and vitality; stocks in warehouses are light and demand good. In the general markets sellers are anxious, while buyers are indifferently keeping aloof, there being a painful lack of confidence in values. Over-production and

under-consumption are still potent factors of weakness in the commercial situation.

As to the crop situation there can be no complaint. The yield of wheat hereabouts is magnificent in quantity and quality. A drought was beginning to be feared, but general rains yesterday and to-day silenced the croakers; a successful tobacco crop is now assured and prospects for corn are emphatically good. With these great staple crops in satisfactory shape, there is an excellent basis for business in Kentucky, and no doubt our sister States will hold up their ends.

Perhaps, after the weather cools off, and the loafers return to work, the business temper will become hopeful instead of doubtful; then, November having been reached and it is found that Ben Butler has not been elected President, all apprehension will be silenced and the wheels of commerce will go merrily, swiftly and profitably 'round. We may be happy yet!

Louisville jobbers have sent salesmen into the Southern field early this season, and the first symptoms of fall business are at hand in encouraging volume. Retail trade is flat, but enduringly so. Labor is well employed for the season, a vast number of workmen being engaged in the construction of miles of new streets and sewers, and laying pipes of the new gas company.

Stationers speak of a moderate current of trade in staple stock and fair activity in printing and manufacturing departments. Publishers report the opening of the Southern school-book trade with reasonable animation.

Picnickers, mostly radiating from the late Chicago engagements, have passed through the city in great numbers lately. Among the latest visitors were: W. A. Welch, of Cassell, Petter & Galpin; John H. May, of Porter & Coates, and F. A. Hafely, of E. & J. B. Young & Co.

The Southern Exposition, which will open on August 16 and close on October 25, 1884, will present, in addition to the usual features, the largest and finest display of machinery in motion ever made; the choicest pictures in America, in fire-proof art-buildings; a splendid horticultural hall, filled with growing plants, flowers and fruits, and illustrating tropical vegetation; and an immense live stock exhibition, presenting at one time in line over \$1,000,000 worth of horses, comprising all the sires that have made Kentucky famous. The exhibit will surpass in extent the Royal Stock Show in London. Over one million admissions are confidently counted on for the season of sixty-five exhibition days.

BOURBON.

BOSTON BEANS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire Street, Boston, July 29, 1884.

Trade is still quiet, very, very quiet, and in this respect it is fully up to the most sanguine expectation. A few more weeks of "gentle passiveness" and then the channels of commerce will open to what gives promise of a heavy fall trade. A most welcome change!

Manufacturers are already presenting their novelties for the coming season, and jobbers

are busy, in a quiet way, prospecting for the future wants of trade. Encouraging signs!

From the great agricultural section of the country come encouraging reports concerning the varied crops, and to move them many millions of dollars will be required. Banks must then unload their hoarded wealth and money will circulate freely among the people. Then the needs of consumers begin to grow and dealers "fatten upon the people's wants." And that is business!

That large and influential class of tradesmen, whose goods find their way to the banker's office and to the merchant's counting-room, to the humble cottage and stately mansion, used alike in schools and factories, by designers and builders, by industrial workers and by those of leisure; needed also by the butcher and grocer, by the Presidential candidates and by the poor deluded voters; this favored class of tradesmen—the stationers—will soon be interesting themselves in the wants of their numerous patrons and stocking up with such staple goods and novelties as their local trade demands. What to get and where to get it "is the question."

At such a time the attention of the multitudinous stationers throughout the country is naturally diverted to Boston, with whose jobbers and manufacturers they have been commercially connected, and whose goods are so extensively and favorably known. In staple lines of stationers' supplies, and in those fancy goods and holiday novelties which are being so largely handled by stationers, Boston is controlling a very fair proportion of the trade, and the business increases as industries multiply and as enterprising manufacturers make their products known to the trade of the country. And right here comes in the value of THE AMERICAN STATIONER.

It has been often remarked that the prosperity of New York was largely due to the amount of "new blood" which was yearly infused into the commercial arteries of Gotham. The same influence is at work in Boston, and one will find the most progressive houses in the control of men whose business education has been acquired since "ante-bellum" days. Now, do not let it be inferred that all the prosperous firms of this city are new concerns, or that the old solid commercial houses have passed away. Far from it. These old business concerns still exist, and their trade relations are even more extensive; but men, schooled in the progress of the times, and cognizant of the sharp competition incident thereto, are controlling affairs, while the old, solid, "conservative heads" are controlling them. Hence, fewer failures in Boston.

To enumerate the many manufacturing concerns of this city whose products are handled by the leading stationers of the country, or to name the number of importers and jobbers whose names are already familiar to the trade, would require an octavo volume. I will mention only a few. For life is short.

Paper and envelopes being items which occupy considerable space in every stationer's store, both for writing purposes and for printing, I will open with Carter, Rice & Co. This is the house that lately introduced to the trade

the Imperial and Royal Antique cover paper for which the demand is steadily increasing. As jobbers and dealers of stationers' staple goods, Carter, Rice & Co. are second to none in the Eastern States. The house is ably represented on the road by a score or more travelers, who have made the firm-name a recognized "trade-mark" throughout the entire country. This house has just got through stock-taking, preparatory to the fall trade, and a lot of "odds and ends" brought to light which the firm is offering as special bargains. It takes two pages, four columns each, to enumerate the many job lots, with others yet to hear from. Some of the bargains offered will be found on a "colored insert" of this issue. Look it up. It's good reading.

Another article for which the stationer has frequent calls is blotting-paper. Of this, consumers always want the best, and dealers are generally content to humor such eccentricities, so they stock up with "Russell's Superior Blotting," manufactured by the Russell Paper Company. This blotting has been subjected to all the tests known, including the severest test—close competition; but it holds its own with the trade, being recognized as unsurpassed in all the requirements of a superior blotting-paper. Well, it takes the ink!

When rubber goods are wanted, stationers look to Boston for supplies, and the Davidson Rubber Company fills the orders. It is to this enterprising company that the trade are indebted for the many valuable improvements in rubber goods. Take the rubber bands and rings made by this company. Is there a better quality on the market? Do not the trade appreciate the neat manner in which these bands are presented, put up as they are in cartons containing one pound, and each pound subdivided into eight two-ounce boxes? And all sizes are sold at one uniform price. The rubber copying sheets is another line which is fast coming into general use, as they outwear any other material designed for such purposes, and give universal satisfaction. Pencil cases and penholders made of hard rubber are other specialties of this company. When it comes to erasive rubber, Davidson's patent "velvet" eraser just "cleans out everything in the line." So popular did it become with the trade, and so large were its sales, that other manufacturers sought to divide the profits and started in on their own account to make and sell this same kind of erasive rubber. Of course, it was very gratifying to the Davidson Company to see its goods so highly appreciated by the trade in general and by other manufacturers in particular. The company liked the one, but could not stand the other, and a line must be drawn somewhere. Well, the courts were appealed to, legal talent elucidated all of the points, pro and con, and the court's decision sustained the claims of the Davidson Rubber Company. Elsewhere will be found the company's announcement on this special point in which the trade are personally interested. Forewarned is forearmed!

When it comes to manifold letter books, Boston again looms up before the minds of dealers, for Samuel Hano & Co., of this city,

(Continued on page 132.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (4) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

This Trade-Mark on every Box.

Trade-Mark on our "DISTAFF" Brand.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 130.)

are the largest manufacturers of manifold books and carbon papers in the world. In every commercial city of this country there is a growing demand for this class of goods, and in order to meet the wants of the trade the factory is run to its fullest capacity. Samuel Hano & Co. hold the trade because, with new and improved machinery, coupled with every facility for manufacturing, they are able to produce a superior line of manifold books and at prices which justify the trade in handling them. So send in your orders.

Then there is Ward & Gay, manufacturing stationers and jobbers of stationers' supplies. For the coming holiday season this house is presenting an elegant line of Christmas novelties, which embraces in the card line the choicest productions of all the well-known card publishers of America and Europe, besides a line of their own original novelties. Among their own productions are holiday souvenirs which it will pay the trade to closely examine. The goods are very rich in appearance, artistically made, up and show no little originality in design. Representatives of the house will soon take the road with samples. Look out for them if you want something real nice!

Another Yankee concern is the Union Cabinet and Paper Company, with headquarters in Boston, Moulton & Goodwin being the general agents. The trade are perfectly familiar with W. C. paper; it comes in all shapes and kinds. Different devices have been presented for the economic use of the paper, and though some are very good in their way, others are better yet; the best is the "Union" cabinets made by the Union Cabinet and Paper Company. These cabinets are patented; they are handsomely finished in bronze, ware or nickel, with cherry or other natural wood ends to match the closet in which they may be placed. The "Perfection" paper made by the company is in long continuous rolls, which, used with the "Union" cabinets, can be readily and quickly cut off any desired length, preventing waste and litter. Since the introduction of the "Union" cabinets and "Perfection" paper, hardly a year ago, sales have been steadily increasing. Nearly all of the hotels and public resorts of this city and neighboring towns have adopted them, and they are proving most satisfactory. From the publicity thus given, they have found their way into thousands of private residences. Designed as these cabinets were to prevent the waste of paper, the idea has been carried further, and they are now made in sizes ranging from ten inches to thirty inches wide for wrapping paper. Using wrapping paper in this way would prevent waste, and at the same time secure neatness. Storekeepers will find the wrapping cabinets very convenient, useful and ornamental. And stationers likewise.

While on specialties, Jenne's patent interest indicator should be mentioned. It is a very ingenious device, and those of the trade who have already secured one no doubt find it of much value. Its sales are increasing among the trade here. For calculating interest or discounts, and for ascertaining the number of days between any two given dates, the Jenne

interest indicator is just what is wanted. Simple in construction, though mathematically correct, it is easily understood and cannot get out of order. Still they get out—"by order!"

The Boston School Supply Company is presenting something new in the globe line. It is called Betts' Portable Globe, and is taking very well with public teachers, who find it so handy. It weighs but ten ounces, and is of large size. It opens and closes upon the umbrella principle, and when not in use can be placed away in a small box. The map outlines and geographical locations are correctly given, while the coloring is well set. For library use this portable globe will be found very convenient. Being very cheap (in price, not quality), it is within the means of every one. They will certainly have a large sale. Don't everybody want the world? Here it is.

A. L. D.

CINCINNATI CLIPPINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, July 29, 1884.

What news is there to be told about the trade in Cincinnati? There have been no mutations in the trade. Everything is as quiet and apparently as lifeless as the Dead Sea. A rain fell yesterday and to-day after a four weeks' drought—(less one day). From July 1 to July 28 the Ohio Valley in northern Kentucky and in southern Ohio and Indiana was parched by a hot sun in a rainless sky. Pastures withered, streams dried up, dust lay deep in the roads and in the fields, corn came into tassel not over breast high to a man, root crops wilted and drooped, apples all but shriveled on the trees and garden vegetables nearly perished. Farmers and country merchants began to feel alarmed, and the trade centres began to feel the effect of the danger. But the rain came at last and drenched the ground. Had its coming been delayed a week longer no after season could have saved the corn crop. In many instances it would have been a total failure. Fully a million of acres of corn have been affected injuriously by this drought, and that in one of the greatest corn-producing regions on this continent. This rain has changed the prospect from danger of total failure to a fair chance of nearly an average crop—from danger of blasting the entire corn crop to chances for a yield of forty million bushels. If a good season follows from now on, this rain may be valued as the starter of a benefit of from ten to twelve millions of dollars to the farmer in the yield of corn alone, to say nothing of tobacco, fruits, vegetables and the pastures. Before it came men began to look blue and to feel blue. It affected trade very perceptibly in Cincinnati. A great drought in 1882 cut off the corn crop of southern Illinois almost entirely, and the effect of that was felt very seriously in Cincinnati. The benefit of this rain is incalculable.

Business is dreadfully dull. Nobody is doing anything. Some improvement is expected in fall trade, but not much. There has been a lively movement in new wheat which has amounted to sales of about \$25,000 worth daily for above two weeks. That helps a little, but

the spurt will soon be over. A brief revival of trade in the fall is all that is expected now.

Merchants are now explaining how this dullness was brought about by their own greed—how they forced their goods on the country and overstocked by selling away ahead, and dating bills ahead and then making haste to deliver the goods on these future bills so as to cut off the opportunity for countermanding orders. Now the reaction is here, and while the commercial condition of the country is sound—or shows all signs of soundness—business is generally stagnant.

Money is close. Lenders prefer to hold for the present or to invest in real estate or in government stocks rather than lend. Banks have greatly reduced their loans and greatly increased their reserves. They are fully prepared for a siege. If cholera does not cross the water, there is a feeling that a change for the better will take place next spring. But the appearance of that spectre across the water is another menace to trade. Aside from the danger from pestilence, there is a feeling here that a rest will do the country good, and that business, when it does revive, will be the more vigorous for this repose.

It is now disbelieved here that the Harpers, of New York, have any interest in the costly new building which H. W. Derby is putting up at the northeast corner of Fourth and Plum streets. The Harpers have just discontinued their depository here which was in charge of H. W. Derby. They do not regard Cincinnati as a desirable distributing point for the present.

The following is a list of the trade visitors who have recently given Cincinnati a call: Mr. Clogston, of the Powers Paper Company, Springfield, Mass.; Wm. H. Sears, of the Acme Stationery and Paper Company, New York; W. A. Hall, of the Worthington Paper Company, Holyoke; A. Hausheer, of John Kraus, New York; a representative of the Merriam Manufacturing Company, Durham, Conn.; M. Vernon, of S. E. & M. Vernon, New York; Mr. Closson, of the Plimpton Manufacturing Company, Hartford; Oscar Weingarten, of Boorum & Pease, New York; E. E. Baker, of Clague, Schlicht & Field, Rochester, N. Y.; R. C. Chapin, of the Judd Manufacturing Company, Holyoke, Mass.; A. A. Goldschmidt, New York; and Mr. Ireland, of Milton Bradley & Co., Springfield, Mass.

Ed. D. Nute, of Nute & Blaine, booksellers, in Peoria, Ill., was taking in the hilltops and base ball last week, guided by his unsophisticated stationery friend, Carpenter. Mr. Nute had never been on any hill, and Mr. Carpenter hadn't been elevated for more than two years.

PRINCE WILLIAM.

A fan attachment is made which may be suspended over a dining table, in a parlor, bedroom or any other place where it may be desirable. It is worked by a treadle attached to a lever, and the fans are violently agitated with the very least effort. It is an excellent addition to a summer house.

Bear, and blame not what you cannot change.

GEORGE B. HURD & CO., MANUFACTURERS OF AND DEALERS IN FINE STATIONERY,

79 BEEKMAN STREET, NEW YORK.

We carry a complete line of Z. Crane, Jr., & Bro.'s Unrivalled Papers, in both SUPERFINE and EXTRA-SUPERFINE Qualities. GRECIAN, ANTIQUE DISTAFF, PARCHMENT VELLUM, Etc. DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

THE above constitutes the LARGEST VARIETY of Goods in our line made by any single establishment in the country. They are well adapted for all classes of trade, embracing, as they do, not only the cheapest grades, but all grades up to the very finest.

Our Fall Styles include a wonderful assortment of Novelties, suitable for either the Jobbing Trade or the Retail Dealer, and the attention of all dealers is respectfully invited to them.

The Lockwood Press.

Herewith THE STATIONER presents its readers with an engraving of the building which contains its office and which is known as the habitat of the Lockwood Press.

The location is at the southwest corner of Duane and Church streets in the city of New

York, the third or lower floor, the composing-room on the fourth floor and the press-room and the bindery on the fifth floor. All of the floors are well lighted, roomy and laid out in a manner best calculated to contribute to the comfort and convenience of the large corps of clerks, bookkeepers, reporters, printers and editors employed in connection with the Lockwood

Press. The business and editorial departments are handsomely furnished and provided with all of the conveniences of a first-class publishing house. Howard Lockwood, the proprietor, is the chief business manager, and watches over the different publications he controls with jealous care.

The printing department comprises well-equipped newspaper, book and jobbing departments, each under a special foreman and all under the management of one general super-

York, known as Nos. 126 and 128 Duane street. The building is 50 feet front by 117 feet deep, and has two entrances, the principal entrance being shown on the Duane street front, at the right of the picture. At present only the three upper floors are devoted to the uses of the Lockwood Press, but after February 1 next the lower floor immediately over the store-front, for which date its possession has been secured, will be occupied as well.

The business offices and editorial departments of the Lockwood Press are located on

Press. The business and editorial departments are handsomely furnished and provided with all of the conveniences of a first-class publishing house. Howard Lockwood, the proprietor, is the chief business manager, and watches over the different publications he controls with jealous care.

The publication department engages the attention of about fifteen persons, of whom three have charge of branch offices at Boston, Chicago and Philadelphia, and in addition there are about ninety agents and representa-

intendent. The composing-room employs on an average sixty hands, the press-room engages the services of about twenty-five and the bindery twenty hands. The press-room contains seven large steam presses of the latest improved construction, to which two others are shortly to be added and several small jobbing presses. These presses are run by a forty horse-power, high-pressure engine. The bindery is provided with all of the newest machinery in paper cutters, smashers, presses, &c.

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE
NATIONAL PUBLISHING CO.
 724, 726 & 728 Cherry Street, Philadelphia.

NATIONAL PUBLISHING CO.,
 724, 726 & 728 CHERRY ST., PHILADELPHIA, PA.

We claim the following advantages for the "National Contrasted Editions":
First.—The ONLY Quarto Bible containing the Contrasted Testaments, in which the Old King James and the Revised Versions are placed in parallel columns.
Second.—Larger, better spaced, and more readable type in all cheap and medium grades.
Third.—Latest and most attractive variety of side stamps.
Fourth.—More Illuminated Plates and Illustrated and Descriptive features.
BINDINGS GUARANTEED EQUAL TO THE BEST. PRINTING SUPERIOR TO ANY. PRICES AS LOW OR LESS THAN OTHERS.

Luther's Illustrated German Bible,

Containing BIBLE DICTIONARY, History of the Books, Maps, Illuminated Plates and other beautiful features, making the most complete and best illustrated German Bible in the country at lower prices than any other edition.

Haydock's Approved Catholic Bible,

Containing a complete Catholic Dictionary, and embellished with hundreds of magnificent engravings and illuminated plates.

Illustrated Catalogue, containing full description, prices, &c., mailed on application.

For Sale in Chicago by **JANSEN, McCLURG & CO.**

LIFE OF

JAMES G. BLAINE.

By CHARLES WOLCOTT BALESTIER.

TO WHICH IS APPENDED A SKETCH OF THE LIFE OF

GENERAL JOHN A. LOGAN.

Illustrated with Portraits of the Candidates. 1 Vol., 12mo, cloth, \$1.00.

 Mr. BALESTIER, one of the Editors of the *New York Tribune*, in a simple, and, at the same time, charmingly written narrative, tells us the leading facts in the life of this great American statesman, JAMES G. BLAINE.

 This volume gives a full record of his life from the cradle to the recent nomination. It also contains a number of Mr. BLAINE's best speeches, which of themselves are an admirable history of his public career.

NELSON'S SELECT BOYS' BOOKS.

THE "DARING ADVENTURE SERIES."

IN THE ROCKY MOUNTAINS. By W. H. G. Kingston. With 41 Illustrations. A narrative of adventure in the Far West.
IN THE WILDS OF AFRICA. By W. H. G. Kingston. With upwards of 70 Illustrations. A tale for the young.
LOST IN THE BACKWOODS. By Mrs. Traill. With 32 Engravings. A tale of the Canadian Crusades.
MY FIRST VOYAGE TO SOUTHERN SEAS. By W. H. G. Kingston. With 52 Engravings.
OLD JACK. By W. H. G. Kingston. With 66 Engravings. An old sailor's account of his own adventures during times of peace and of war.

A FAR IN THE FOREST. By W. H. G. Kingston. With 41 Full-page Illustrations. A tale of settler life in North America, full of stirring adventure.
BEYOND THE HIMALAYAS. By Joan Geopie, F.R.G.S. With 9 Engravings. A story of travel and adventure in the wilds of Tibet.
FRANK REDCLIFFE. By Achilles Dainty. With 26 Illustrations. A tale of romantic adventure in the wild districts traversed by the Orinoco.
IN THE EASTERN SEAS; or, The Regions of the Bird of Paradise. By W. H. G. Kingston. With 111 Illustrations.
IN NEW GRANADA; or, Heroes and Patriots. By W. H. G. Kingston. With 36 Illustrations. A narrative of New Granada before its independence of Spain.

WITH NUMEROUS ILLUSTRATIONS

SPECIMEN OF FRONT COVER.

ON THE BANKS OF THE AMAZON. By W. H. G. Kingston. With 120 Illustrations. A boy's adventures in the tropical wilds of South America.
SAVED FROM THE SEA. By W. H. G. Kingston. With 30 Illustrations. A sailor's account of his own adventures with three shipwrecked comrades.
THE SOUTH SEA WHALER. By W. H. G. Kingston. With 30 Illustrations. A tale of mutiny and shipwreck in the South Seas.
THE THREE TRAPPERS. By Achilles Dainty. With 11 Engravings. A story of adventure in the wilds of Canada.
TWICE LOST. By W. H. G. Kingston. With 36 Illustrations. A young sailor's story of shipwreck, and perilous adventures in the wilds of Australia.

A VOYAGE AROUND THE WORLD. By W. H. G. Kingston. With 42 Engravings. A young sailor's account of his own adventures by sea and land.
THE WANDERERS. By W. H. G. Kingston. With 30 Illustrations. Adventures by sea and land of a family who set out to live in South America.
WRECKED ON A REEF; or, Twenty Months in the Auckland Isles. With 40 Illustrations. A true story of shipwreck, adventure and suffering.
THE YOUNG LIANERO. By W. H. G. Kingston. With 44 Illustrations. A thrilling and fascinating narrative of adventures in South America.
THE YOUNG RAJAH. By W. H. G. Kingston. With 40 Illustrations. A story of the Indian Prince, the hero a young Indian prince.

THOMAS NELSON & SONS beg to call the attention of the Trade generally to the above series of Boys' Books, in 12mo size, which they have now issued, and would ask intending purchasers before placing their orders for the coming season, to inspect the above Series, which will be found surpassing all others in artistic neatness of design and beautiful illustrations. Sold separately or in sets to suit purchasers.

THOMAS NELSON & SONS, 42 Bleecker Street, New York.

Some Venetian Visiting Cards.

In the Museo Civico at Venice there is a collection of visiting cards belonging to various periods. The earliest are assigned to the end of the sixteenth century, but the majority date from the close of the Republic and the

every one; and so they either designed their cards for themselves, bestowing much labor and ingenuity on the work, or they employed some distinguished artist to furnish them with a design. Even Canova did not refuse to put his genius to this service for his friend Capello; and one of the most beautiful of these Venetian visiting cards is that drawn and printed in London for Alvise Pisani, by Henry Tresham, the English painter.

The collection of printed cards begins with a series of eight which clearly belong to the same period. It is, perhaps, doubtful whether they are especially Venetian; their character is rather German than Italian. Under any circumstances, they were not designed for any particular individual, but for sale to the general public. In each case the scroll for the name is a blank, and the coat-of-arms is left

troops manœuvering. The others of the series are very similar in design and in manner of execution. They are carefully engraved and elaborately wrought; much pains have been spent on the embroidery of the dresses, the fringes and the furs. It is probable that they all issued from one firm; but there is nothing to indicate the exact date or the ownership. And although they appear in the museum catalogue as visiting cards, they would have served equally well for book plates, and as such they may have been used.

The cards in the next series are undoubtedly Venetian. The series numbers nine specimens. They were thrown off for sale to the general public, and each one shows us some view of Venice—the Rialto, the Piazza, the Pont della Paglia, or the point of the Dogana. Beneath the picture a space is left for the name of the visitor. Of these nine I quote two—one is engraved on steel, and the other etched. The first is a view of the Rialto, looking down the Grand Canal, with the beautiful palace of the Camerlenghi on the right-hand side, where all the fruit and vegetables from Mazzorbo, Torcello, Malamocco and Pelestrina is brought each morning to be sold. Near the bridge are two gondolas, whose full equipment of *ferro*, *felse* and *batticopo*, or pall of black cloth behind, determines the date of the card as not earlier than the middle of the last century. The etching has been reproduced (VI.) for this article. It represents the great national festival of the Venetians, the function of Ascension Day, when the Doge went out beyond the Lido port to wed the Adriatic, and

VENETIAN VISITING CARDS.—I. MILITARY.

opening of the present century. The collection was made by Teodoro Correr, the indefatigable founder of the museum, and is interesting not merely for the designs upon the cards, but also for the historical names which several of them bear. I have not been able to discover the date at which visiting cards were first introduced in Venice; but the custom of using figured calling cards is certainly older than the earliest of these printed specimens; for in the same museum there are a few cards of an earlier date designed and painted by hand. These, however, from their very scarcity, could have been used upon great and ceremonial occasions only; and the visiting cards here reproduced are all printed.

The etiquette of visiting was always a serious duty in the social life of the Venetian nobility. On every conceivable occasion, on departure from the city, on return, on birthdays, saints' days, New Year's days, a family was expected to leave cards on all its acquaintances, and these visits had to be returned. And as the vigor of the Venetians slowly dwindled away and lost its force in the inanities, the luxury and effeminacy of an enervated and corrupt society, more and more time and thought were bestowed upon the petty formalities of life; it became a matter of pride to invent a design, and the dandies of Venice piqued themselves on the elegance of the cards they left upon their friends. And hence arose a trade in card-making to meet the demand. Those who were careless in such matters would go to their stationer and buy the design that happened to be in fashion. At one time it was a picture of the Rialto, at another the favorite pattern was a sketch of some of the statues round the Pradelle Valle at Padua; but the more modish and æsthetic were not content with cards cast off by the hundred and used by any one and

bare to be filled up at the owner's pleasure. One is the visiting card of a courtier. It represents the gentleman in a slashed doublet and hose of the Sixteenth Century, holding a flaming heart in his hand. Over his head is a shield with its mantling surmounted by the helmet of a nobleman, and a space left for a crest. Another, which we engrave (II.), was evidently designed for a shipping merchant. It figures the trader in round hat and fur cloak, holding his moneybags in one hand, while the other rests on a bale of goods which lies near him, as though to say, "This is mine." The

bale has a shield upon it left blank for the owner's coat. On one side of the wharf are warehouses, and on the other, out to sea, rides the merchant's galley. A third specimen, also engraved (I.), was designed for a general officer. His arms are to appear on the shield which his esquire bears before him. In the background is a range of low hills, a walled village or castello, the camp of an army, and

VENETIAN VISITING CARDS.—II. MERCANTILE.

thus proclaimed the indissoluble union of Venice and the sea on which she lies. In the far distance is the Campanile of Sant' Elizabetta del Lido, and nearer, in the middle of the picture, the island of San Giorgio Maggiore. The great galley is the Bucentaur, the state barge of the republic, decorated in crimson velvet and gilded carving. The Bucentaur is followed by the gondolas of the Venetian no-

bles and people; and the smaller boat with the flag, which is tied to the barge's stern, carries the chief of the faction of the Nicolotti, who was head and representative of the whole Venetian *popolo* on Ascension Day. The flag

had become so reduced in circumstances that they formed the poorest part of the population of Venice. The instinct of their caste brought these broken nobles together in one quarter of the city, near the church of San Barnabà,

whence they took their name of Barnabotti. As nobles they refused to work, and claimed support from the State. This was given them by means of small offices and sinecures bearing a salary, and, when these were exhausted, by direct largess from the exchequer. The daughters of the Barnabotti also enjoyed special privileges of begging, and held a virtual monopoly of that trade in certain quarters. The Bar-

reformer. He began by inveighing openly in the council against the ancient constitution, while outside he caught the popular ear by delusive promises of equality, and secured all the poverty-stricken nobles by hopes of a division of wealth. The government took no notice of his speeches or action until, in 1780, they were startled by the election of Pisani to the office of Procurator of St. Mark, one of the highest offices of State and in the direct road to the ducal throne. It was usual for the newly-elected procurator to entertain his supporters at a banquet in the Procuratorial Palace on the day of his installment. Pisani was elected in March, and the banquet took place on the 29th May, after the customary procession through the Merceria. The feast was a revolutionary one, even down to the confectionery, which bore anti-aristocratic sentiments and rhymes; the walls were hung with pictures symbolizing reform, and cards, such as the one before us, were distributed among the guests. But the government had at length determined to arrest the man who openly proposed to overthrow the constitution, and hints of this resolve were found scattered about the banquet-hall on little scraps of paper bearing these verses: "To-day on the spree and to-morrow in jail"—"Ancuo ingresso, doman processo" ("To-day procession, to-morrow prosecution"). These warnings were justified by the event. On the 31st Pisani was arrested and committed to prison in Verona, where he remained for eighteen years, till the fall of the Republic restored to him his liberty.

The next number on my list is chiefly inter-

Isabella Teotochi — Marin

VENETIAN VISITING CARDS.—III. ARTISTIC.

at his masthead is the standard of San Nicolo, given into his charge on the day of his election as head of the faction.

My other specimens possess an interest beyond that of their subject and workmanship, for they were designed for private individuals, not for sale to the general public, and several of them bear names which have played a prominent part in the last years of the Republic. But I must quote two cards of Venetian ambassadors. The one (V.) presents a Cupid with a flaming torch sitting near a rock, on which is engraved "L'Amasciator di Venezia;" the other shows us a handsome young Mercury, lying on some masonry, which bears the same inscription. There is nothing to indicate who the ambassadors were, but from the style of their cards it is probable that they were among the very last of the Republic.

My next selection (IV.) has a much higher interest. It is a design in pen and ink and sepia, the work of the man whose name it bears, Giorgio Pisani, a revolutionary noble, demagogue and tribune of the people, who played no small part in the last years of the Republic. Pisani himself explains the allegory which he depicts upon his card. "It represents," he says, "myself showing my children the fall of the late barbaric government, which is here properly symbolized by a ruinous piece of Gothic architecture. Near this you see another piece of architecture, square in form, symbolizing solidity, and above it are planted the ensigns of Liberty and Equality." Among the many difficulties which overwhelmed the Venetian Government during the eighteenth century, not the lightest was the question of the impoverished nobility. Thanks to profuse expenditure and reckless commercial gambling, many noble families

nabotti, in fact, became a caste of beggars within the noble caste; their numbers increased, and the dangers of the situation soon made themselves felt. For the nobles, though ruined in all else, were nobles still, and possessed their votes in the Great Council, the fountain of all offices in the State. They occupied a certain place in the Council Hall, and soon reduced obstruction to a paying trade.

VENETIAN VISITING CARDS.—IV. POLITICAL.

They suffered no measures to be passed, nor any magistrates to be elected, unless their votes were bought, and by the sale of these they eked out their miserable livelihood. This was just the class of men made to the hand of a demagogue; and it was through them that Giorgio Pisani attempted his career of political

esting as being the work of Canova, designed by him for his friend Capello. The Cavaliere Capello belonged to the very last of the Procurators of St. Mark. During his term of office the Republic was suppressed, and Capello, though he continued to use this visiting card, was obliged to paste a piece of paper over the

title of Procurator. Another, perhaps the most interesting card of all, belonged to the last of the Doges, Ludovico Manin. It represents an Adonis asleep at the foot of a tree; on a rock are two doves. It is anything but an heroic design; and it fitly represents the feeble and irresolute temper of its owner. Manin was the scion of a Friulan family ennobled in the middle of the seventeenth century. His great wealth marked him out for succession to the dukedom on the death of Paolo Renier. When Pietro Gradenigo, his rival for the office and head of one of the noblest Venetian houses, heard the decision of the electors, he exclaimed, "I ga fato doxe un furlan! La repubblica xè morta!" ("They've chosen a doge from Friuli! The Republic is lost!") The prophecy was fulfilled. Manin accepted office reluctantly, filled it timorously, and abandoned it miserably. As an argument against the assumption of the dogeship he pleaded his wife's aversion to becoming Dogressa, and when the supreme moment arrived, and Napoleon threatened to extinguish the Republic, he shut himself up in the palace, surrounded with cannon and guards, afraid of the French, in terror at the Venetians, and only too glad to lay aside the ensigns of his office. He handed the white linen cap, which the Doges wore, to his servant, with these words, "Tolè questa, no la doperò più" ("Take this away, I shall not use it again"). Finally, on the 3d June, 1797, at the demand of the French, Manin surrendered the ducal bonnet, mantle and robes, all the insignia of his dignity, which were burned along with the Libro d'Oro at the foot of the tree of Liberty on the Piazza. But he paid a terrible price for his poverty of spirit. The sight of him became odious to the Venetian people; he was openly cursed and insulted in the streets. Finally he shut himself up in his house, hardly ever venturing to cross the threshold, and, dying, left a large part of his fortune to pious purposes by a will that is full of tears and sighs over a life which had been cast miserably among circumstances with which it was quite unable to cope. To have saved the Republic was in all probability an impossible task; but Manin was not the statesman to attempt it, nor even to maintain the dignity of Venice at the moment of its dissolution.

The two last cards of which I shall speak belonged to two people who were famous in Venetian society at the close of the last century and the opening of the present. The first

(VII.) is the visiting card of the Baron Vivant-Denon. It is an etching designed by Denon himself, and represents the steps of a palace on a canal, with the baron's gondolier announcing his master's name to a servant, "El Cavalier Denon, sa la" ("the Chevalier Denon, you know"). And the servant answers, "Ho capito tutto" ("I understand"). Denon had filled the post of Gentleman of the Bedchamber to Louis XV. and XVI.; the Revolution drove him from France, and he took up his abode in Venice, where he became one of the devoted and regular attendants on the salon of the famous Mme. Albrizzi. Denon was an artist and friend of artists, and for him Mme. Vigée-Lebrun painted the charming portrait of

devoted to her fair-haired rival, Maria Benzon, heroine of the most famous of Venetian barcaroles, "La biondina in Gondolella." He refused to allow his portrait to appear among those of Mme. Albrizzi's slaves; and he calls her—certainly with less than the admiration which she expected and probably with intent to sting—"an accomplished mother," "the De Staël of Venice."—HORATIO FORBES BROWN, in *Magazine of Art*.

The Thorp Manufacturing Company.

The only firm in New England making the manufacture of autograph albums and

scrap-books special features is the Thorp Manufacturing Company, of Boston.

Judging from the rich and elegant samples displayed for the coming holiday trade, this house may well rank among the leading establishments of the kind in America, and it is somewhat doubtful if any house in the country can show a line more extensive and varied or of better grade and quality.

Mr. Thorp, the energetic manager of the company, recognizing the fact that there was room for improvement in the autograph album and scrap-book line, and recognizing also that the tastes of the peo-

ple were being educated to a standard which would demand something more artistic than the old-time publication so common to the trade, determined to show that American enterprise could produce a line of goods far superior to anything of the kind heretofore placed on the market.

With that end in view, the services of first-class artists and designers were secured to illustrate pictorially some of the familiar lines of American poets.

These illustrations, with appropriate quotations, serve to embellish the new line of autograph albums which the company is now offering to the trade. This line, which embraces many designs and styles, shows originality of conception, while the subjects illustrated are most artistically treated. The albums are decidedly novel and unique, and have already attracted considerable attention from prominent jobbers, who pronounce them the best selling goods in the autograph album line ever handled.

In scrap-books the Thorp Manufacturing Company display a line which can hardly be equaled. "Ideal Heads," which the company presented late in the season last fall, and

VENETIAN VISITING CARDS.—IV. AMBASSADORIAL.

the Albrizzi which is now in the possession of that family. It was for Mme. Albrizzi—while she was still Mme. Marin—that Denon etched the only one (III.) which remains for me to notice; a very spirited design of two seahorses with a clam-shell behind them in allusion to the sea name of her husband. Isabella Teotochi was born at Corfu in 1760. She was extremely beautiful and accomplished, and married when quite young Carlo Marin, an officer high in the Venetian naval service. From him she separated and married the Count Albrizzi, in whose house she presided over the most brilliant and intellectual society that Venice had to show. Mme. Albrizzi was in Venice during the fall of the Republic and the subsequent occupation by the French and then by the Austrians; but these thrilling events seem hardly to have fluttered the elegant repose of her salon and casino, where *mot* and *repartee* reigned supreme. Mme. Albrizzi gathered around her many distinguished people, Lally-Tollendal and d'Hancarville, from France; Byron, Canova, Ugo Foscolo and Pindemonte. She has left us a vivid picture of some of these men in her volume of portraits. Byron, however, was no friend of hers; he was altogether

which met with such ready sale that many orders were left unfilled, is a line to which several new designs have been added. Some of the heads are taken from life, and the happy expressions of childhood are most aptly depicted,

from the great poet, and each quotation being aptly illustrated. The illustrations are by C. W. Sanderson and Lewis K. Harlow, Boston artists.

The title-pages are beautifully illustrated in

as they do the poetic thought of choice selections.

"Around the brown meadow, adown the hill slope,
The voices of morning were whispering hope."

Do not these beautiful lines from "Lucile" call to mind some sylvan retreat? Can one not picture the rippling stream and the early rising sun? Such scenes has the artist depicted, emblematic of early morning.

As illustrative of Noon, the artist has selected those familiar lines from Wordsworth:

"That moss-covered vessel I hail as a treasure,
For often at noon when returned from the field,
I found it the source of an exquisite pleasure,
The purest and sweetest that nature can yield."

Here is the old-fashioned farm-house, the well and the almost forgotten well sweep; the farmer-boy returning from the field with rake over his shoulder, while a marine view gives an air of calmness and quiet rest to the scene.

From Gray's "Elegy" come the lines which are so prettily illustrative of Evening, and which the artist has pictorially presented. In the far distant is "the ivy-mantled" church tower; in the foreground stands a maiden gazing pensively upon the western sky and watching the fading light upon the distant hills, where

"The lowing herd winds slowly o'er the lea,
The plowman homeward plods his weary way,
And leaves the world to darkness and to me."

The closing theme is Midnight. How suggestive are the quiet scenes presented! The "dark church tower" rising so majestically from the sombre shadows below to catch the first rays of Night's silvery light; and the heavy-looking bridge, deserted save by one lone watcher who from the distant darkened

thirteen colors, one presenting the "Belfry of Bruges" with

"Evangeline peering out in the darkness;"

the other title-page is illustrated with the portraits of "Paul Revere," "Excelsior," "Evangeline" and "Alden;" to the left is a pretty marine view, while the noble Priscilla is seen knocking at a door, illustrative of the quotation from "Miles Standish,"

"I saw her going and coming,
Now to the grave of the dead,
and
Now to the bed of the dying."

The covers are very artistic and neatly gotten up; one giving an outline view of Longfellow's house at Cambridge, and the other presenting a stream crossed by a massive bridge, illustrating his lines—

"I stood on the bridge at midnight," &c.

Each of the covers is ornamented with a medallion portrait of the poet. The cover ornamentations are in silver and gold. These albums are in various binding to suit individual tastes.

In "The Hour" are eight illustrations, representing Morning, Noon, Evening and Midnight in summer and winter. The designs are well executed by Lewis K. Harlow, and they are graphic sketches in color, depicting

horizon sees fair Luna mount the skies. From out the blackened clouds shines forth the goddess of night, who upon Æolian chords adds a chorus to the "music of the spheres" as the

VENETIAN VISITING CARDS.—VI. GENERAL AND FESTAL.

giving to the covers upon which they are embossed very pleasing effects. Some of the heads are framed with a rich border in silver and gold, representing neat floral designs; others are embossed upon a richly chased gold background, and other designs are in push.

"Fox Glove" is another series, having upon the covers beautiful reproductions of floral designs representing fox gloves, daisies and ferns.

Another line of scrap-books in the floral order is the "Acorn" series. The designs are faithful presentations, somewhat subdued in tone and coloring, modest in decoration, and designed especially to meet the wants of a refined and cultivated taste.

"The Bronzes" is the name of another line in scrap-books, so-called because the covers present metallized scenes in full relief. These "bas-reliefs" are genuine metal, and are in different colors, representing bronze, brass, silver and gold. A full plush border heightens the effect, giving to the covers a very chaste and rich appearance.

These are only a few of the designs displayed by this company in the scrap-book line. There are many others equally worthy of special mention, and it will pay the trade to carefully examine them. Finer goods cannot be found elsewhere.

In autograph albums the line is very extensive, embracing a hundred different styles all of which are elegant samples of the publisher's art. Two publications in this line, the "Longfellow Album" and "The Hour," are certainly some of the most beautiful works of the kind ever introduced to the trade, and they are having an unlimited sale, which such artistic productions so richly deserve.

Of the Longfellow albums there are two, each having six different familiar quotations

VENETIAN VISITING CARDS.—VII. INDIVIDUAL AND HUMOROUS.

winds take up "a song of the night," How charmingly do these scenes picture Longfellow's lines:

"I stood on the bridge at midnight,
As the clocks were striking the hour,
And the moon rose o'er the city,
Behind the dark church tower!"

These descriptive illustrations give but a faint idea of the beauty and artistic merits of this line of autograph albums, and the attention of the trade is called to the handsomely illustrated "four-page" inset which appears in this issue of THE AMERICAN STATIONER.

Toy Whips.

The manufacture of toy whips has developed into quite an important industry in this country. There are a number of factories located in the large cities and several hundred operatives, mostly boys and girls, are regularly employed in them. A small proportion of whips are made entirely by hand, but the majority are made partly or wholly by machinery. The covering of the whip is done by machinery. The machines used by one factory are the same as those used by another. They are simply braiding or weaving machines, having from 16 to 24 bobbins each. The machines are operated by steam, and have girl attendants. A factory in Williamsburg, whose output alone is 450,000 a year, claims to have the only machine used to taper the reeds. This is very simple in construction, and is not patented. Great care, however, is exercised to keep the machine covered so that it may be concealed from the view of visitors.

There are some twenty-five different kinds and styles of toy whips made. The outside of whips consists of different colored threads woven into various fanciful designs. Another variety has a covering of strips of leather of different colors, braided by hand. This style comes with plain whistle mounting; also nickel and celluloid mountings. Whips retail for one cent up to fifty cents, according to material, style of finish, and whether hand or machine-made. They are used largely for whipping tops, equestrian purposes, and recently it has been the fashion for young ladies attending picnics and other social gatherings to carry a nobby toy whip. Hence, the origin of what is known as the "flirting whip."

Phosphorizing Brass.

J. Whiting places bronze or brass wire in a solution of from $\frac{1}{8}$ to 5 per cent. of phosphorus in ether, bisulphide of carbon, or olive oil; 5 to 10 per cent. of sulphuric acid; and 85 to 95 per cent. of water, until the metal begins to take up the phosphorus. The wire is then drawn to one number finer and placed in a closed retort, with a thin layer of phosphorus, so that the phosphorus vapor may spread over the surface of the wire. The wire is then packed in charcoal, which is kindled, and after proper annealing the wire can again be drawn to a finer number. This process is repeated until the desired fineness is obtained. Wire thus phosphorized is very tough, takes a high polish, and is not easily corroded.—*Dingler's Journal*, February 27, 1884.

GEO. ROUTLEDGE & SONS'

New and Forthcoming Publications.

Bulwer's Novels and Tales.—A NEW, POPULAR EDITION, in 12 vols. 16mo, cloth, \$15.00; half American Russia, \$24.00.

Shakespeare.—Edited by CHARLES KNIGHT. New large type edition, in 3 vols. Handsomely illustrated. Per set, cloth, \$3.75; half calf, gilt edges, \$7.50; half imitation seal, \$7.50; full imitation seal, flexible, \$9.00.

Shakespeare.—HANDY VOLUME EDITION. Complete in 13 vols., with Glossary. Cloth (in box), per set, \$7.50; parchment, gilt top (leatherette case), \$13.00; French Morocco, limp, round corners, gilt edges, \$20.00.

Shakespeare Birthday Book.—72 illustrations. Cloth, colored edges, \$1.00; also bound in calf, seal, castor beaver, and plush.

CARTER, RICE & CO.,

(INCORPORATED).

Having just taken our semi-annual inventory, for the purpose of closing out some of our Job Lots we offer the following bargains subject to being unsold on receipt of order. The prices advertised for the Book Papers are to close the lots. If less quantities are wanted, send for special prices. Prices quoted for Printing Papers, either flat or folded, are for lots, or where lots exceed a case, will sell a case at lot price. Will furnish samples on application.

Prices in first column are for 100 sheets in less than case lots, and those in second column are for case lots to close out.

Lot 650—100 lb. Job Stamford Bristol, Engine Sized, Cherry, Blue and Green, 10,000 sheets each color, \$1.75 \$1.63	
Lot 651—100 lb. Cr'm Bristol, tub-sized, loft-dried, superfine, mill No. 11, perfect, 5000 sheets, 2.60 2.40

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

HALL INDICATOR.

A convenient device for use in business offices is illustrated in the engraving. It consists of a card with a movable disk, which is printed so as to indicate where or in what the occupant of the office may be engaged. Another disk contains the days of the week. Apertures cut in the card leave space for the memorandum which it is desired to display. A clock face with hands is used to designate the hour when the owner of the office may be seen. This device is made in three styles with spaces for one, two and three names. Chas. A. Burkhardt is the inventor, and George W. Hyatt, 114 Nassau street, is the sole agent.

DOCUMENT BOXES AND ENVELOPES.

The Globe Files Company, Cincinnati (New York branch, 28 Bond street), is offering to the trade an entirely new line of pressboard document envelopes, with inner sliding cases, which are claimed to be superior in strength and durability as well as appearance to the old style metal end boxes. The front and rear ends are supported with heavy tarboard and protected by cloth. One of the advantages claimed is that the front being covered with fine paper can be written upon with ink. They are kept in stock in eight different sizes, varying from one to four inches in thickness, and are claimed to be lower in retail price than any similar goods in the markets. The Globe File Company also presents to the trade an entirely new line of manilla document tie envelopes, both flat and crushed, in different sizes. The crushed envelopes, having capacity of two inches in thickness, are adjustable to any size and can be handled and packed in a very small space, as compared with the old style box-envelopes.

NEW PATENTS.

No. 34,452. Type-Rubbing Machine.—George S. Eaton and James W. Lyon, Brooklyn, N. Y., assignors to said Eaton. Patented in England May 15, 1883, No. 2,439; in Belgium June 15, 1883, No. 61,487; in Austria-Hungary August 17, 1883, No. 33 and No. 1,573; in France September 15, 1883, No. 155,646, and in Germany January 23, 1884, No. 25,584.

The types to be operated upon are advanced from an inclined table onto the shoulder of a vibrating blade, which carries them one by one between two stationary cheeks of the rubbing device, to grind two of their opposite faces. At the end of the sweep of said blade each type is dropped into a notch in a carrier supported by a hub attached to a vibrating arm. As this hub vibrates, the carrier is by suitable mechanism turned a quarter-rotation,

the type being thereafter ejected from the notch onto the shoulder of another blade vibrating in a direction opposite to the first. This blade, on its return sweep, carries the types between two other stationary cheeks, to grind the two remaining sides, and deposits them into a galley provided for the purpose,

HALL INDICATOR.

the type being advanced in this galley by a reciprocating pusher. Instead of the vibrating carrier, a curved channel leading from between the first two cheeks to the second pair of cheeks may be employed.

No. 300,534. Game Board for Producing Magic Squares,

MANILLA DOCUMENT TIE ENVELOPES.

Playing Checkers, &c.—Jas. D. Van Bibber, Springfield, Mo.

No. 300,546. File-Holder.—Alexander R. Williams, Washington, D. C.

No. 300,569. Coupon-Bearing Bond.—James Lowell Carter, Brookline, Mass.

PRESSBOARD DOCUMENT ENVELOPES.

1. A coupon bond having its parts arranged, printed and folded so that the coupons will be arranged in series in the subdivisions formed by folding the bond, detachable in the order of their becoming due, and without the bond being unfolded. 2. A coupon bond having its parts provided with a cut or opening between the bond and coupon sheet, the bond and coupon sheet being folded independent, where-

by the coupons may be detached in the order they become due and without unfolding the bond, and the bond may be unfolded without disturbing the coupon.

No. 300,594. Letter-File.—Willard H. Gilman, Boston, Mass., assignor to the Challenge Letter-File Company, Concord, N. H.

A letter-file composed of a base extending across the pockets, and superposed leaves of substantially uniform width secured at their inner edges to said base at points successively farther from a given side thereof, so as to form a series of overlapping pockets. 2. A letter-file composed of a flat base and a series of single leaves or sheets of substantially uniform width, each having a portion, pasted at its under side to the base, and bent over to form a pocket. 3. The combination of a box or case, one or more files constructed, inclosed in said box, a cover adapted to enter the box, and bear on the files therein, means for pivoting the inner edge of said cover at different heights from the bottom of the box, and means for securing the swinging edge of the cover to the box at different heights from the bottom hereof.

No. 300,606. Paper-Folding Machine.—Frederick C. Hellmuth, Brooklyn, N. Y.

The combination of a guide-block having central vertical transverse and longitudinal guide-slits, and a horizontal and a vertical guide-slit at one side of the central vertical transverse guide-slit, a vertically-reciprocating folder, a laterally-reciprocating folder, a horizontally-reciprocating folder, a second smaller reciprocating folder, a reciprocating plunger adapted to press the folded sheet together, and mechanism, substantially as described, operated from a driving-shaft, whereby the folders and plunger are successively actuated, so as to fold one sheet at each rotation of the driving-shaft.

No. 300,634. Toy Mortar.—Alfred W. Partrick, Washington, D. C., assignor to William C. Eaton, Newark, N. J.

No. 300,638. Toy Mortar.—Samuel B. Pratt, Boston, Mass., assignor to Eaton & Parker, Newark, N. J.

No. 300,662.—Temporary Binder.—William Trautwine, Philadelphia, Pa.

No. 300,693. Extension Case for Pencils.—Richard M. Collard, New York, N. Y.

An extension case for pencils and similar implements, consisting of two tubes arranged to slide one within the other, with a spring arranged to operate upon the tubes, whereby the case is automatically extended whenever it is withdrawn from its sheath.

No. 300,709. Pen or Pencil Case.—Hazen Prescott Hutton, Boston, Mass.

No. 300,724. Check and Bill File.—George V. Nauerth, Cincinnati, Ohio, assignor to the Globe Files Company, same place.

No. 300,731. Device for Securing Stereotype Plates in the Form.—Edwin E. Pratt, Chicago, Ill., assignor to the A. N. Kellogg Newspaper Company, same place.

No. 300,732. Stereotype Block.—Edwin E. Pratt, Chicago, assignor to the A. N. Kellogg Newspaper Company, same place.

No. 300,740. Pencil Holder.—Morris S. Shipley, Cincinnati, Ohio.

No. 300,799. Mechanical Toy.—Reuben H. Ricker, Boston, Mass.

No. 300,897. Oscillating Printing-Press.—Francis H.

Richards, Springfield, Mass., assignor to the Gilman Vertical Press Company, of New Hampshire.

No. 300,966. Time-Stamp.—Wm. H. Gillette, Hartford, Conn.

No. 300,967. Mold for Casting Ornamental Plaques, &c.—John H. Harding, Milwaukee, Wis.

No. 300,979. Package and Book Holder.—Chas. Huff, St. Louis, Mo.

No. 301,047. Delivery Mechanism for Web-Printing Presses.—Luther C. Crowell, Brooklyn, assignor to R. Hoe & Co., New York, N. Y.

The combination, with means for advancing two webs or sections side by side, of means for transferring laterally one of the webs or sections to associate it with the other, and means for automatically conducting the leading end of said transferred web through the transferring mechanism.

No. 301,052. Ticket-Punch.—William Cowan Fisk, Toledo, Ohio.

No. 301,056. Pencil-Case.—John C. Haring, Jersey City, N. J.

No. 301,066. Pantograph Engraving-Machine.—John Mowat, Barrhead, County of Renfrew, Scotland. Patented in England, September 14, 1883, No. 4,399.

No. 301,084. Tubing and Printing Paper Bags.—Andrew J. Boynton, Malden, Mass.

No. 301,102. Map-Exhibitor.—Alexander Dom, Mount Healthy, Ohio.

No. 301,133. Combined Pencil, Eyeglass, Ticket, and

of saturated glue, glycerine, Canada balsam, oil of cloves, syrup, and chloride of zinc or of magnesium.

DESIGNS.

No. 15,087. Ornamentation of Paper.—Bowie Dash, New York, N. Y. Term of patent, 14 years.

No. 15,093. Wall-Paper.—Augustin Le Prince, New York, N. Y. Term of patent, 3½ years.

Pencil Charms and Novelties.

Of the ornaments which play an important part in the dress of a lady or gentle-

man cannot get out of order. It is made in gold, sterling silver, and rolled gold plate, in different designs. Another cut shows a thrill, fog-horn, bicycle and nautical whistle. This is made in various designs and in various styles of finish, to suit buyers. The remaining engravings show a number of forms of charms in pencils, whistles, button-hooks, &c. It is needless to say that the line of goods illustrated has no superior in the market, either in respect to novelty, number and variety of designs, fine workmanship and salability. The collection of samples, which Mr. Fairchild's commercial travelers will show the trade this season will be far in advance of anything that has yet been introduced in this line, and buyers should defer placing their orders until they inspect it.

Combined Ink Bottle and Filler for Fountain Pens.

The accompanying cut represents an ink bottle, with a new patent device for filling fountain and lithographic pens.

The object of this invention is to do away with the frail glass filler which has been an objectionable feature to all reservoir pens.

Bouquet Holder.—Wilkins Lilley and Winfield S. Chedister, Newark, N. J.

No. 301,137. Process of Making Crayons.—Jacob S. Lowe, Geneva, Ohio, assignor of one-half to William B. Thompson, Detroit, Mich.

A mode of manufacturing crayons, consisting in forcing the composition of which the crayons are made while in a plastic state into a die having smooth sides, allowing the same

man the numerous productions in jewelry, properly belonging to the stationery line, are not least. These have been multiplying of late years, and their increasing popularity has led to the introduction of many designs, remarkable not only for novelty of form, but for the ingenious mechanical devices contained in them. Many of the products of the jeweler have for years comprised a part of the staple line of goods carried by stationers, booksellers, newsdealers and others. Among these may be mentioned gold pens, pencils, &c., but of late years the line of stationery jewelry, so to speak, has greatly extended, and very much to the credit of the manufacturers, be it said, no articles of personal adornment have reached a higher degree of perfection. Some of the latest novelties in charms, for instance, are not only very novel and beautiful in design, but show a great deal of fine handiwork.

The old established house of Leroy W. Fairchild, in addition to its regular line of goods, which has attained such a deservedly excellent reputation among dealers, has brought out a great number of novelties in charms for the fall trade. These consist of cigar cutters, thrill, fog-horn, bicycle and nautical whistles, cigarette holders, button hooks, &c.; also, pen and pencil, toothpick, and an endless variety of other charms. The designs of these novelties are not only new, but their mechanical principle is of recent invention, and has been patented, thus giving to Mr. Fairchild the exclusive right to their manufacture. The magic, automatic cigar-cutter is something more than an ornament. It has the merit of utility, and is said to be the best thing of the kind in the market. It makes a clean V-shaped cut, and

The filler in this case is attached to the ink bottle and is always ready for use, while at the same time it acts as a permanent cork or stopper to the bottle. The ink used is Caw's Black Fluid, which is specially filtered for this purpose. Each bottle is placed in a strong

pasteboard box and can be carried with safety in a trunk or valise. It is handled by the Fountain Ink Company, 62 Cliff street, New York.

Flower-pot covers for hand-painting are novelties in the English trade. They are hexagon shaped, made of beveled gilt edged cardboard. They may be decorated according to taste.

to partially harden or set, and then expelling the crayon from the die by pressure.

No. 301,158. Game or Toy Block.—Walter S. Ravenscroft, Parkersburg, W. Va.

Game or toy blocks made from paper or wood pulp, as set forth.

No. 301,176. Adhesive Wafer.—Alfred Spitzli, West Troy, N. Y.

An adhesive wafer or compound, consisting

The Writing-Pad Industry.

The manufacture of writing pads is comparatively a new industry. It had its origin only a few years ago, and although the number of establishments engaged in the business is small compared with many other older industries, the consumption of pads is enormous and is continually increasing, and even now the production can hardly keep pace with the demand.

The Acme Stationery and Paper Company is a representative concern in the manufacture of writing-pads and tablets. It started with the inception of the business, and perhaps as much credit is due to it for the impetus given to the pad business within the last few years as to any other one concern. Indeed, it fairly represents the growth of the pad industry in this country. In 1878 Samuel I. Knight started in business at No. 75 Fulton street, New York, under this style. Prior thereto there was no concern engaged exclusively in the manufacture of writing pads, but Mr. Knight conceived the idea of making a distinct business of it. He began, however, in a small, experimental way, trusting to his sagacity, enterprise and industry, to make the business profitable. He started with the manufacture of manilla writing papers for educational and manuscript purposes. One great difficulty with which Mr. Knight had to contend in the introduction of his goods was the absence of any demand for them. Dealers in stationery looked upon writing pads with something akin to distrust, and it was impossible to induce them to touch this now largely-handled article of merchandise. In order to create a demand for pads Mr. Knight had to go direct to the consumer, which was, to say the least, a herculean task. The attention of consumers having been at length drawn to the goods the business of supplying the trade grew rapidly. In May, 1880, owing to its increase, Mr. Knight was compelled to remove to No. 117 Fulton street, where his facilities for the manufacture of pads were largely increased. Owing to a still further increase in business Mr. Knight was compelled to make another removal in May of this year. The illustration accompanying this article shows the large, handsome building at the corner of Walker and Centre streets, in which the factory and business offices of the Acme Stationery and Paper Company are now located. The fourth floor of this building, which has a frontage of seventy-five feet and a depth of seventy feet, is devoted to the office, storeroom for manufactured goods and shipping department. At least one million pads, made of different sizes and grades of paper, are stored on this floor at one time.

In the factory, on the next floor, the company has all of the latest improved machinery, with a capacity of producing 50,000 pads a day. It uses almost all grades of paper, from cheap news to the finest quality of bond, velum linen and French quadrille. The paper comes direct from the mills, where it is made

expressly for the company in such grades, qualities, weights and sizes as it requires. It then goes through the different departments of counting the sheets, ruling, cutting, binding, &c., until it becomes the perfect pad ready for the market.

The number and variety of writing pads, tablets, &c., now made by the company is very large. Its goods are made up in a neat, handsome form, and the line embraces pads used for almost every purpose.

Characteristics of Early English Carvings.

John B. Seddon, in a lecture on the above subject, says: "When we turn to the ornamental carving of the thirteenth century,

capitals, with elegant crocket forms, budding into foliage, carry heavy square abaci and poor unmolded arches; while in the sculptured bas-relief, among other exquisite compositions, is that of St. Michael and the dragon, which M. Viollet-le-Duc says 'possesses all the best qualities of sculpture, viz., excellent composition of lines, arrangement of the masses, movement felt and expressed, sobriety of means, and nobleness of style, rivaling the best works of antiquity.'

"These English carvers took the early spring budding vegetation for their type, as it pushes out of the ground with all the vigor of its youth; they saw its suitability for the material and purpose; but the Greeks were already hankering for the developed leaves, and soon began twining wreaths of them, as if plucked and bound round, and not growing out of the stone capitals. Now, the English foliage is in accord with the stems, and forms graceful horns, not so obtrusive as, but more consistent than, the stiff French one, at the end of which a few leaves are stuck, so that one wonders how they got or can remain there.

"There is a fine and unique collection of Venetian sculpture and carvings presented by Mr. Ruskin. The work of Italy during the Middle Ages were so distinct from other mediæval, north of the Alps, that it seemed better not to interrupt the description of the successive phases of those by reference to the contemporary Cis-Alpine work. The Italians were so surrounded by the remains of ancient classic that they never could escape that influence. They seem to have been busy all the time with preparation of what should follow when the northern Gothic should have run its course, and in fact to have held a brief to usher in a classic Renaissance on the first opportunity. In painting and in sculpture they were not idle, but tentatively engaged in pre-

paring for the restoration of those higher arts. But they quite failed even to aim at such a combination of architecture and artistic decoration as we have seen to have been realized in France and England. Venice, however, was an exception to the general rule, and in that cosmopolitan city all diverse artistic elements, Oriental and Occidental, met and produced a unique result, which has been admirably and eloquently analyzed by Mr. Ruskin."

A committee of scientific gentlemen in Ohio has issued an appeal to persons in that State having knowledge of prehistoric earthworks, fortifications, mounds or burial places in their neighborhoods, to send information to them, that the places may be visited and explored by employees of the Ethnological Bureau. All articles found in such exploration, they say, will be deposited in the museum of the Smithsonian Institution, and become the property of the United States, and be accessible, without expense, to all students of American ethnology. Fac-simile casts of all specially interesting finds will be deposited in some central museum in Ohio.

ACME STATIONERY AND PAPER COMPANY'S BUILDING.

I think we may claim the palm for this country. There is no hesitation in English work of this date as to what type it should follow, while that of France seems yet embarrassed by the multitude of types to choose from, and to be retarded by its own restless energy and want of concentration. We may have learned from our neighbors to go to nature for study; but we have studied its essence to better purpose, and not lost ourselves in its details. Here, at any rate, all the old traditional types were discarded and no further help sought in Oriental sources; whereas in France square abaci, and Byzantine and Corinthian elements still appear, even while wreathed with foliage so closely imitated as to have lost its true stone character. In the arcades from the choir of the Cathedral of Paris, which are on the ground floor of the museum, may be seen all this tentative energetic striving after novelty, together with the incongruity of the mixture of types, and the lack of harmony in style, as compared with the calm and complete rhythm of the contemporary English work. Their slender shafts and delicate bell-shaped

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

J. Reading, wall-paper dealer, Akron, Ohio, has assigned.

O. H. Williams, publisher, Murray, Ky., has been burnt out.

The *Morning Call*, St. Louis, Mo., has suspended publication.

The *Republican Publishing Company*, Maysville, Ky., has assigned.

The *Belleville Publishing Company*, Belleville, Ill., has been incorporated.

French & Betts, dealers in wall-paper, Chicago, Ill., have dissolved partnership.

Luther Hayden, paper-stock dealer, Gloucester, Mass., has been damaged by fire.

Entwistle & Son, paper hangers, &c., Chester, Pa., have been closed by the sheriff.

H. F. Oestings, paper-stock dealer, Richmond, Ind., has been burnt out. Loss, \$6,000; partly insured.

S. R. Huss & Brother, publishers of the *Democrat*, Waynesburg, Pa., have sold out to F. M. Spragg.

Perry, Barnes & Co., publishers of the *Attleboro Chronicle*, Attleboro, Mass., have been sued for libel.

The assignee's sale of the stock of Frederick C. Pfeiffer, stationer, Philadelphia, Pa., is advertised for August 3.

The Newcomb Brothers Wall-Paper Company, St. Louis, Mo., has been incorporated, with a capital stock of \$48,000.

J. J. Littleton, of the firm of Powell & Littleton, publishers, Chattanooga, Tenn., has sold his interest to—Sautell, of Cuthbert, Ga.

John C. Rankin, Jr., will give his third annual excursion to his employees on Saturday. The boat will leave Cortlandt street (Pier 18, N. R.) at 3 P. M.

Irving L. Bassett, card dealer, New Haven, Mass., has sold out to Lewis Fowler. Mr. Bassett will engage in the manufacture of paper boxes at Hudson, N. Y. The company will be known as the Hudson Paper Box Company.

The schedules of Edward S. Dodge, printer, 95 Chambers street, New York city, filed in the Court of Common Pleas, shows liabilities of \$23,644.18, also a contingent liability of \$219.97 on two notes made by Leslie & Co. and John Phin for work done, which notes were discounted and the proceeds thereof received by the insolvent. Among the principal creditors are F. A. Ringler & Co., \$958.55; Conrow Brothers, \$4,258.96; C. E. Johnson & Co., \$1,169.35; Farmer, Little & Co., \$697.88; William P. Dane, \$264.55; Peter A. H. Jackson, agent, \$333.33; Samuel Raynor & Co., \$154.58; Martha J. Dodge, \$2,128.50; Campbell Press Works, \$109.43, and sundry others for lesser amounts. The unsecured debts are \$13,825.17. The debts secured by chattel mortgages are to Harry E. Dodge, \$3,500 and \$2,500; C. Potter, Jr., \$2,500; R. Hoe & Co., \$1,319.50, making a total of incumbrances upon type, presses and fixtures of \$9,819.50. The nominal value of the assets is \$54,763.84; actual value of assets, \$15,745.79, less mortgages of \$9,819.50, leaving a balance of \$5,926.29 of available assets with which to pay the preferred claims under the assignment, amounting to \$5,549.35.

Butler & Kelley, engravers and printers, 125 Fulton street, New York city, brought an action in the United States Circuit Court a few months ago against C. T. Bainbridge Sons for an alleged infringement of their patent for embossed wedding cards. Considerable testimony has already been taken in the case, and the matter will come up again at the October term of the court. James A. Whitney, the well-known patent lawyer, 140 Nassau street, represents the complainants.

F. S. Dresskell & Co. succeed the firm of Moore & Dresskell, wholesale paper dealers and manufacturers' agents, Cleveland, Ohio. Mr. Moore retires on account of other business matters requiring his entire attention. Mr. Dresskell will manage the new business, and the new firm assumes all of the liabilities and assets of the old.

Crane & Co., Dalton, Mass., have sued the Homer Lee Bank Note Company, of New York city, to recover \$7,000 for paper furnished it for the manufacture of United States Postal Notes during the year 1883.

Mr. Loughhead, of Dreka, Philadelphia, has just returned from an extended trip through the West.

The Bailey Toy Piano Company, Chicago, Ill., has been closed by the sheriff.

Theodore Sigler, picture-frame dealer, Detroit, Mich., has assigned.

Mill A of the Forest Fibre Company, Berlin, N. H., has been attached.

The *Golden Era* newspaper, White Oaks, N. M., has removed to Lincoln.

Farnham & Skinner, job printers, Dallas, Tex., have dissolved partnership.

A. Simmons, bookseller, &c., Kingston, Ont., has been burned out. Partly insured.

Rice & Co., booksellers and stationers, Lima, Ohio, have sold out to William Rice.

Marsh & Bixler, publishers of the *Call*, Hartford, Kan., have been succeeded by Marsh & Lamphear.

The *Indicator Publishing Company*, Kansas City, Mo., has been damaged by the fall of a building, \$2,000 to \$2,500.

The Wimbush-Powell Printing and Lithographing Company, Kansas City, Mo., has been damaged by the fall of their building. Loss estimated at \$10,000 to \$12,000. The accident was due to excavations on adjoining premises.

R. R. Watson has undoubtedly one of the most complete lines of stationers' specialties in the market. It comprises a combination of new and very salable goods from a library basket, letter tray, &c., to paper fasteners, wire filing hooks, towel holders, paper weights, clips, pocket-book stamp holders, letter openers and folders, self-locking door indicators, glass dampeners, &c.

A despatch to the *Portland Oregonian*, dated Olympia, W. T., July 21, says: "The contest which has taken place here during the past week before the territorial board of education for the adoption of school-books in the territory has furnished a crop of lively items for the papers, and terminated in a spirited personal encounter between rival agents. After Bancroft & Co. had secured the adoption of their readers, an attempt was made to intimidate the Board of Education and prevent the consummation of the contract. Rumors were freely circulated that improper influences had been employed, and various doubts thrown upon the legality of the transaction by opposing agents. A collision occurred between one of Bancroft's men and an opposition agent which resulted in the severe punishment of the latter. Bancroft's man was arrested for assault and battery and tried by a jury before Justice Keady. The assault was admitted, but justification pleaded, which resulted in the ac-

quittal of the defendant. The affair has created great excitement, but the public generally approve the verdict of the jury."

H. B. Burrows, of Burrows, Brothers & Co., Cleveland, Ohio, is in town.

John A. Decker, of Lee, Mass., says that S. A. Rudolph's Sons do not owe him a dollar.

Clark & Lovett, dealers in wall-paper, &c., Cairo, Ill., are reported about to dissolve partnership.

The *Northwestern Live Stock Journal*, Cheyenne, Wy. T., has been suspended and is under attachment.

Miller and Raiguel are considered two of the best salesmen in Philadelphia. Both are with J. G. Ditman & Co.

J. E. Linde has a new and extensive line of folding cards of attractive design. Nos. 230, 231 and 234 represent the head of a Roman soldier printed in antique bronze and silver; Nos. 190, 192, 194 and 195 are cards with embossed designs, plain and in colors. Some of the other more striking designs are Nos. 235, 232, 162, 161, 222, 221, 224 and 225.

The Silicate Book Slate Company is busily engaged in the preparation of a line of fall goods, which will embrace as usual a great variety of blackboard slates, book slates, &c. It reports a large sale of the silicate silent slate, which is said to be one of the best noiseless slates in the market. The company's goods are esteemed because of the quality of the material of which they are made and their perfect adaptability to the purposes for which they are intended.

The Tower Manufacturing Company has brought out a line of 5, 10 and 15 cent writing books, with handsomely illustrated covers. These books are having a large sale and are giving satisfaction. The company has also a very fine line of photograph and autograph albums, fancy leather and plush toilet sets and collar and cuff boxes, imported inkstands and writing desks, the latter in a variety of fancy woods. It has also a line of writing desks of its own manufacture. In addition to these goods, which are just from the manufacturer's hands and of the finest workmanship, the Tower Manufacturing Company has a new line of paper clips in three sizes made both of brass and nickel; also a new pencil clip, which is said to be the best thing of its kind that has appeared on the market, and a full line of plain and fancy papeterie boxes in many different designs. The company is having a very busy trade and it shows it. Its establishment reminds one very much of a beehive. Its clerks and proprietors are at work filling orders from early in the morning till late in the evening.

Dunham's "Combination Tag and Envelope" has tripled its sales since last year and orders for it have come in from all parts of the country. The tag can be used also for mailing merchandise samples. It is available for every line of business, and stationers will find a ready selling article. The trade are cautioned against infringements, as the manufacturers intend to maintain their right. Joseph T. Dunham & Co., 12 Cortlandt street, New York, are the manufacturers.

J. H. Duffus, proprietor of the Capital Publishing Company, Des Moines, Iowa, has been attached.

The style of Billings, Harbourn & Co., booksellers and stationers, San Francisco, Cal., has been changed to Billings, Harbourn & Pierson, Arthur B. Pierson having been admitted to the firm.

The August number of "Our Little Ones and the Nursery" (Russell Publishing Company, Boston) has been received. It has a very pretty frontispiece and the other illustrations, with the reading contents, are as pleasing for the children as usual.

Alles & Conant are manufacturing a line of plush goods, consisting of furnished work-boxes, handkerchief cases, odor stands, &c., for jobbers. The firm manufactures a great number of portable writing-desks and fancy work-boxes—in fact, its line of this class of goods is claimed to be equal in variety and extent to that of any other manufacturing concern in the country. An illustrated price list will be forwarded on application.

Lawrence & Baxter are continually adding to their line of imported goods. Almost every week they receive novelties from Europe, and the goods which they introduce are handled exclusively by them. Among the numerous specialties already imported by the firm are the "J. A. P." paper, which comes in two designs, the "Perfection" white glaze copying paper, a full line of Christmas and New Year cards; also lace papers, valentines, pen wipers; a fine line of cheap but very pretty

THE BEST BLOTTING

— AND —

STANDARD * DOUBLE * MANILLA.

Regular Sizes in Sheets or Rolls.
Thickness of 24 x 36, 90 to 300 Lbs. per Ream, always on hand.

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

scrap albums with illuminated cloth covers; a line of photographic views, &c. These goods are all first-class, and are offered at low prices.

R. A. Musgraves, printer, Sweet Water, Tex., has sold out.

The Mexican National News Company, Laredo, Tex., has been attached.

Kirgan & Clay, printers, Mineral Wells, Tex., have dissolved partnership.

F. W. Brown, lithographer, &c., Sherbrooke, Que., has assigned in trust.

Frederick C. Pfeiffer, dealer in stationery, picture-frames, &c., Philadelphia, Pa., has assigned to Henry Trumbone.

O. L. Fox (& Co.), publisher, Chicago, Ill., offers his creditors thirty cents on the dollar, in twelve, eighteen and twenty-four months. Liabilities, \$5,100.

M. Goldsmith & Son, paper-stock dealers, Charleston, S. C., have failed, and offer their creditors twenty-five cents on the dollar. Liabilities about \$78,000, of which \$30,000 is secured; nominal assets \$40,000.

On application of Mr. Howison, of the firm of Howison & Dubois, manufacturers of bookbinders' machinery, New York city, Abram King has been appointed receiver of the firm. Mr. Howison alleges that Mr. Dubois has left the city with \$500, and has assigned some of the firm's claims.

The immense edition of catalogues issued by the National Publishing Company, Philadelphia, showing a full line of family and pulpit Bibles, having been exhausted, a second edition is now off the press. The publishers show good taste in the arrangement of their catalogue. The bindings are elegant and rich; the prices are among the lowest. Parties having failed to receive a copy of the first edition may now be accommodated by notifying the publishers. See advertisement elsewhere.

The North Carolina State Exposition, which is to be held at Raleigh, N. C., is the subject of a neatly-printed pamphlet, published by the North Carolina State Exposition Company. The pamphlet contains plans of buildings, rules and regulations governing exhibitors, also premium lists of the North Carolina Agricultural Society and the North Carolina Industrial Association. It can be had by addressing W. S. Primrose, president, or H. E. Fries, secretary of the exposition, at Raleigh, N. C.

The Dreka Christmas Oddities produced this season by Dreka, of Philadelphia, are as usual, as their name indicates, odd, artistic and beautiful. The line of goods handled by this house cannot be obtained elsewhere as they are those elegant and useful articles which are made specially for the fine stationery trade. Among the specialties of this house this season are elegant French and German seals. The Herbin's French wax which Dreka has introduced in this country is of a soft, elastic nature; it does not easily break, and it comes in many beautiful colors. It is claimed to be the best wax made for ladies' use. Many new styles of "Dictionary Blotters" have been introduced for the fall season, together with a line of writing cases which are called "Handy."

The new publishing firm of Baker & Hayes, 125 and 127 North Fourth street, Philadelphia, whose August issues were announced a month ago, are now ready and being placed on the market. As the announcement was for an "entirely new" line, a description of some of the series of cards and folders may be of some interest to the trade. A series of four cards, about 3x5, presents an entirely new combination of flowers entwined in a horseshoe. The flowers are large and bold and the colors very brilliant, and the drawing above the average. A second series of floral designs shows an imitation of a split-cornered card with the corner rolled over in a way to unfold the stem of a handsome spray of roses, &c.; these are smaller than the first, but very attractive. An entirely new idea by C. M. Coolidge, "Kash!" in six designs, called "Hobbies," presents well-known men in caricature, each astride of his own particular hobby. The portraits of faces are excellent, and would be immediately recognized without the name which adorns the hatbands and collars. "Kittens in a Cigar Box" is a very unique series for tobaccoists and cigar manufacturers. How to make a palette without punching out the ugly thumb-hole has been realized in a beautiful series of hand palettes with marine views on each. These are entirely different from anything heretofore presented, and have a good space for printing business cards. A long-felt want has been supplied in a series of folders for firemen, and a series for the Grand Army. These are in lively and appropriate colors and are suitable for orders of dance or menus, or the same can be obtained in card form. There are four original paintings, made especially for Baker & Hayes by W. W. Denslow, of Philadelphia, whose excellent reputation for this class of work is unquestioned. Baker & Hayes have just purchased a large two-revolution cylinder Campbell press especially adapted for their advertising toy and other advertising books. Advertisers and dealers can look out for something great in this line, as their original books, more particularly suited to grown people, are now in the hands of the authors, artists and engravers and will be finished in a few weeks. Mr. Hayes is now on a trip West, introducing his new goods to the trade. Those who are not seen personally should send for samples of these goods, which are, it is claimed, bound to go to the head during the coming season. Their campaign cards are very popular, and in addition to the letter of endorsement from Thos. H. Sherman, Mr. Blaine's private secretary, Baker & Hayes are in receipt of a still stronger endorsement from Mr. Blaine in the shape of an order and check for a quantity of these portraits, which Mr. Blaine will use for his own autographs and present as his own portrait to his friends. New novelties from week to week will be the order of the new firm and a firm stand will be made for better work, better material, and reasonable prices.

J. H. Oppenheim, paper-stock dealer, Augusta, Ga., did not assign, as previously reported. He sold out.

William M. Farrar, publisher, Chicago, Ill., has been attached.

Ira A. Davenport, dealer in toys, Clover Depot, Va., is reported failed.

The popularity of the "Climax" blotting, made by the Richmond Paper Manufacturing Company, and the increasing demand for it among consumers, stationers and dealers, is shown by the rapidly increasing sales during the past season and from the Departments at Washington. Notably the Post-Office and War Departments, the Signal Office and also the Treasury Department, the latter having accorded it the distinction of placing it upon the schedule for stationery for the use of the Department during the coming year. In addition to the home trade, an export demand has been steadily growing for the past few months. A special example is an order recently received from Sweden for a large quantity, giving a significant demonstration of the excellence of the paper.

At the last regular meeting of the trustees of the Booksellers and Stationers' Provident Association, the following-named members were elected: E. H. Mackay, Geo. W. Ryerson, Henry Sherwood, Frederick Myers, Walter W. Banta, Samuel Ward, of Ward & Gay, Henry D. Harrower, J. S. O'Gorman, Geo. Alces, Chas. F. Redek, Alfred T. Baxter, Randolph R. Beam, John Watt, Wm. J. Wiley, Michael R. Gately, Marian M. Monachesi, Joseph P. Howatt, D. C. Bryan, Jules F. Valois, Augusta H. Leyboldt, Legrand B. Smith, Geo. B. Smith, Jr., Chas. U. Wing, Joshua Davenport, Jr., Albert J. Holden, Felix Myers, Otto R. Ebel, Jr., August Beck, Wm. B. Harrison, Chas. H. Childs, Fredk. A. Brautigam.

Milton Bradley Company, Springfield, Mass., have introduced a novelty in the shape of a knock-down transparency for political processions. A large frame with four sides, each three feet square, is covered with cloth, on which is printed portraits, emblems, mottoes, &c., and the whole is attached to a jointed pole in such a manner that the whole may, by the removal of one screw on the end of the pole, be knocked down and folded in a compact form, to be easily taken into a railway car or club-room, occupying very little space until wanted again for use, when it may be set up as quickly as it was knocked down. Some transparencies are made with all sides decorated, some with a part and some all plain for the reception of local or special inscriptions or emblems. Very large and bold portraits of the four candidates are already prepared; also emblems and inscriptions. For the Republican banner there is a finely drawn plumed helmet and a vigorous black eagle side by side, with "Plumed Knight" at the top and "Black Eagle" at the bottom. For the Democratic banner there is an anchor surmounted by a spread eagle, with the inscription, "Honest Government," at the top, and below, "Historic Justice." The anchor and eagle are derived from the floral anchor surmounted by an eagle, which was presented and greeted by cheers when Cleveland was nominated at Chicago. A complete circular of each style is issued, and will be mailed to any one interested. Their convenience, lightness and

strength will give these transparencies a favorable reception with all who are acquainted with the labor in getting up such things, and they meet with the expressions, "That is the best thing yet!" "That is boss!" &c.

The assignee of Butler & Miles has not yet been able to secure the consent of all of the creditors to a compromise on the basis of sixty cents on the dollar, unsecured, one of the principal creditors, Vernon Brothers & Co., declining to accede to it.

At the preliminary meeting of the creditors of M. Norton, paper-stock dealer, Boston, which was held a few days ago for the purpose of electing an assignee, no action was taken further than an adjournment until August 21, when it is probable that an assignee will be chosen. It is said that each of the sons of the insolvent claim \$1,000 as due them for past services, the payment of which the creditors will contest.

Marcus Ward & Co., Limited, have just issued a new line of Sunday school cards. No. 10, a small square card with a deep border of a very tasteful design comes with two mottoes, "Words of Christ" and "Redemption," there being twelve cards in a pack for each motto. They have scriptural quotations printed in script and ordinary text. The company has also a cheaper line of Sunday school cards in sheets. They come in packs containing 48 and 120 cards. The company has also cards containing stories of parables on one side with a colored illustration on the other side.

Robert Sneider is manufacturing this season a large number of novelties, and a specially selected stock of New Year and Christmas cards. He has also made an additional improvement to his scrap book, which he claims is the most perfect thing of the kind in the market. They are intended for invoice and file books as well, and are made in all sizes and styles to order. He has, moreover, a line of prescription books for the use of druggists. A new list of reduced prices will be sent on application. Mr. Sneider has one of the most complete and attractive lines of seals in the market. They come in a variety of styles, and may be had blank or engraved. The line includes fancy wooden handle seals, bronze and plated seals, ivory seals, &c. Monograms, crests, and coats-of-arms are engraved to order.

The Henry Bill Publishing Company, of Norwich, Conn., has a suit against Robert B. Clarke & Co., the Cincinnati (O.) book-sellers, for selling the first volume of Blaine's history, which will be decided in December. The court denied the petition for a preliminary injunction restraining Clarke & Co. from selling the book, Judge Sage saying that the court could not assume that a firm of such good standing had been guilty of fraud without proof. The Bill company says that it sold the right to sell the book in Hamilton and other counties in Ohio to its agents, and that Clarke & Co. bought their copies through collusion with the agents. Clarke & Co. deny this, and say that they bought of regular dealers, and that the custom of the trade upholds them in selling subscription books. The real question at issue is whether the Bill company had any rights in the books after it delivered the copies to sit agents.

James Jackson, assignee of Henry V. Butler individually, and also of the firm of H. V. Butler, Jr., & Co., has given notice to the creditors of these respective parties that they must exhibit their claims against the two estates to him at his office in the Second National Bank at Paterson, N. J., under oath or affirmation, on or before August 29, and further that a list of the claims against the respective estates will be filed in the Surrogate's office of Passaic County, N. J., on August 29, when exceptions thereto may be filed by any person interested.

Charles H. Wright, traveling representative of Phil. Hake, will be pleased to see his friends among the trade at the salesrooms of Mr. Hake, in this city, where he may be found during the summer. The large number of friends of Mr. Wright who may visit the city during the next few months will be cordially welcomed.

Levi C. Lothrop, the receiver of the New York Paper and Felt Mills Company, this week paid the creditors of that concern a dividend of 10 per cent., which is probably all that they will expect. It will be recollected that this company owned a mill at South Orange, N. J., and another at Nos. 7 and 9 Elm street, New York city, and operated another under a lease at Stanley, N. J., and being in debt upward of \$50,000 and unable to meet its engagements, its affairs were, last February, placed in the hands of a receiver.

Phil. Hake has an elegant and complete line of stamped papeteries. It is superior to anything of the kind hitherto brought out by Mr. Hake.

Charles Ernst, traveling representative of Marcus Ward & Co., Limited, started this week on a trip to Pennsylvania and Ohio, in which States he expects to take a large number of orders for his firm.

Frederick H. Levey & Co. have issued a very handsomely printed folding-card showing specimens of their printing-inks. The design is very pretty and tasteful, being the work of A. V. Haight, of Poughkeepsie. Space is reserved for the business address of parties dealing in the firm's inks. Its compactness and beauty of design are admired by all, and it will be quite a "card" for any dealer in printing inks who is fortunate enough to secure a supply for distribution among the trade. The card is useful as well as ornamental, as the back contains a complete price-list of brilliant black and colored inks manufactured by F. H. Levey & Co.

Hand & Ellsworth, paper dealers, 51 Beekman street, New York, and paper manufacturers, Peekskill, N. Y., made an assignment on Thursday of last week, for the benefit of creditors, to Joseph A. Pierson, who has been their chief bookkeeper for many years, giving preferences for \$38,000.78, as follows: Edward S. Hand, \$10,524.86; Elizabeth T. Hand, \$1,882.70; Catharine B. Ellsworth, \$12,243.28; Cyrus B. Ellsworth, \$3,385.40; Julia D. Ellsworth, \$1,999; the estate of William Ellsworth, \$7,974.54. The preferences are said to be for trust funds or money loaned to the business of the firm. Among those reported as among the creditors are Tileston & Hollingsworth, Dickinson & Clark, Excelsior Paper Company, Chemical Paper Company, Smith Paper Company, M. Plummer, for accommodation paper, \$5,000 to \$7,000; Smith Paper Company, Charles Harley, about \$900; Molleson Brothers, about \$5,750; D. & P. N. Fairchild & Co., Bridgeport, Conn., and John H. Lyon & Co., New York city. S. W. Green's Son claims to be an endorser on the paper of the firm for about \$30,000, an amount sufficient to offset what he owes to Hand & Ellsworth. The mill property at Peekskill is said to be unencumbered, but, it is said, will not realize much more than \$15,000.

RICE & CO.

(CORPORATION.)

at a forced sale. The assignee can say nothing definite as to calling a meeting of creditors.

Whiting's "Standard" writing paper, envelopes and cards are made by the Whiting Paper Company, Holyoke, Mass. The manufacturer offers these goods as unsurpassed in quality of stock and in finish. The line comprises two tints—"ancient cream" and "ancient azure"—and two surfaces—"mill-rolled" and "double glazed." Every sheet bears the water-mark, "Whiting's Standard." The trade are invited to test these goods.

Henry Levy & Son have brought out an exceptionally fine line of holiday goods this season. It is composed of all the latest novelties both of European and home manufacture. The collection is so extensive that it is difficult to decide where to begin in mentioning it in detail. Some very attractive goods, but by no means the most conspicuous, consist of a line of inkstands, paper-cutters, smoker-stands, &c., made of ivory wood. The line of gilt goods, which the firm is showing, is very attractive. It embraces vases, card receivers, made of hammered silver, &c. In addition to the goods mentioned, the firm has a large number of novelties in armor clocks, in the form of shields or breast-plates, made of steel and decorated with battle axes, spears, and other weapons of warfare; also, a large number of rare goods, consisting of Silesian figures, a new line of household ornaments, which are superior to bisque, both in the close imitation of nature and the quality of artistic execution.

J. H. Bufford's Sons' line of Christmas and New Year cards is now ready for the inspection of the trade. It has been prepared with the utmost good taste, and the designs are bright and attractive. The line, moreover, is complete, embracing an extensive variety of satin cards of the Messrs. Bufford's own manufacture and a carefully selected stock of the cards of other leading manufacturers. The firm is prepared to sell at the lowest jobbing prices, and even with importers it is prepared to compete both in respect to prices and quality of goods. Having always on hand a full line of the best and newest cards in the market, and offering them at the lowest discounts,

THE DEMAND

— FOR —

LOCKWOOD'S DIRECTORY

FOR 1884

Has so far exceeded all calculations that the regular edition is already nearly exhausted. It is the most comprehensive, complete and accurate work of the kind issued.

THE ONLY STANDARD WORK.

Sent, post-paid, on receipt of TWO DOLLARS.

OVER 20,000 ADDRESSES REVISED TO DATE.

HOWARD LOCKWOOD,

126 & 128 Duane Street, cor. Church,

NEW YORK.

its goods can be bought to the best possible advantage. Buyers who visit the Messrs. Bufford's establishment can select a full line of cards, remarkable both for variety of design and artistic merit, and at as low discounts as are offered elsewhere for the same class of goods. Messrs. Bufford's Sons' line of satin cards is handled only by themselves, although its popularity has led others to copy it extensively, with the result, however, of putting on the market some very inferior and imperfect counterfeits.

New Publications.

Several publishers' announcements will be found in this issue of THE STATIONER. Among the new and forthcoming publications to which the attention of the trade is called are some particularly worthy of remark.

THOMAS NELSON & SON have the "Golden Corn Series" of books for the young, which is intended to supply a want much felt in Sunday schools for a class of books that will interest the young minds and at the same time not leave an unhealthy impression. The series consists of nineteen volumes on various subjects, in story form, as "School Life," "Henry Clay," "Temperance," "Patience," &c., which are non-sectarian in character. Thomas Nelson & Son have many other books of a similar character on their list, as well as publications for presentation, suitable for gifts, wedding presents, &c. Among these last may be named the "Oxford Bibles," so well known to the public, and which can be had in a great variety of styles of binding. Their line of "Prayers" and "Hymnals" is also very large, many of these being in fine bindings of unique and attractive appearance.

A line suited to youthful tastes is the "Daring Adventure Series" for boys. This series is finely illustrated and is full of adventurous incident.

GEO. ROUTLEDGE & SONS

present a list which bears many attractive titles. A new edition of Bulwer's novels heads the list and is a popular edition in twelve volumes. The "Young Folks' Historical Library," in words of one syllable, designed to impress an early knowledge of historical fact on young minds, is an excellent suggestion; it consists of four volumes copiously illustrated. "Routledges' Illustrated Quartos" are books of songs, pastimes and fairy tales.

Two new volumes, "Florence" and its companion "Venice," by Aug. J. C. Hare, with maps and illustrations, will also attract attention. Several late additions to "Morley's Universal Library" are noted. "The Language of the Hand" is a work which will secure the attention of many readers as well as the students of palmistry, and Mrs. Sherwood's "Etiquette of American Society," as a guide to customs and manners, will be a ready-selling publication.

Among Routledge & Sons' new "juveniles" are two works—"Wild Animals" and "Domestic Animals"—with colored and full-page illustrations, which will serve as works of instruction as well as amusement.

Attention is also invited to other new vol-

umes: "Robin Hood" (Routledges' \$1.25 series), "Farragut and Other Great Commanders" (Routledges' \$1 classics), and "Things Out Doors" (Routledges' sixty cent classics).

Another very attractive "juvenile" is "Little Sunbeam's Picture Book," which is replete with pictures, as it contains 130 colored illustrations.

R. WORTHINGTON

surpasses all of his previous efforts with his holiday juveniles, both in variety and beauty. Two dainty volumes, in elegantly illuminated covers with heavy silk fringes, are probably the prettiest volumes in this style that have yet been seen. These are "Seven Little Maids," by Miss Lathbury; and "Jack in the Pulpit," by John G. Whittier. The latter has an autograph letter from the poet. Both volumes are also printed in cheaper form, with board covers.

"Worthington's Annual" this year is handsomer than the previous issues, and this is high praise, for the "Annual" last year was one of the most attractive books of the season. This volume contains more than three hundred elegant engravings, all made expressly for the book, and all of the matter is new.

"Twilight Tales" is the happy title of a volume of stories for children, profusely illustrated with full-page colored plates, and plain engravings of all sizes. The pictures are attractive in themselves, and the stories make them doubly so. The volume is a large quarto.

"Chatterbox, Junior," for the season of 1884-5 will delight the children. It contains new pictures and new stories and sketches, selected with taste and care. This book is also an improvement over the issues of previous years.

Another new book deserving special mention is "Clover Nook," with two hundred and fifty engravings of a character most likely to interest little folks. The child that will not find pleasure in its pages will be difficult to please.

A new quarto edition of "Andersen's Fairy Tales" will commend itself at sight to all who admire the imaginative creations of the Danish story-teller. No edition has ever before been published so profusely illustrated. Many of these illustrations are full-page, while each of the other pages are embellished with one or more small engravings, as quaint in their character as though drawn by a hand prompted by the author's own imagination.

A volume of "Æsop's Fables" is also made in the same style, with a greater profusion of engravings than have ever illustrated them before.

These are only a few of the many new juveniles which R. Worthington offers. One of the notable features of all of his books of this class for the present season is the bindings. For the board designs, the best artists to be found have been employed, and the tastefulness and artistic beauty of their work can only be appreciated after examination.

Miniature cathedrals, in fancy wood, with clock in the tower or steeple, are mantle novelties.

The Standard Noiseless Slate.

The "Standard" slate has been before the trade only a short time, but the demand for it has increased so largely since its introduction that the manufacturers are enabled to offer it at a considerable reduction from former list prices, thereby bringing it in successful competition with any so-called noiseless slate in the market.

This slate has been adopted by the Boards of Education of New York, Philadelphia and other leading cities, and has met with the indorsement of the trade in general. In addition to being a slate which is practically noiseless it has the important advantage, not heretofore mentioned, of being odorless and a non-absorbent of contagion, a characteristic due to the use of a metal frame. The manufacturers claim that the "Standard" is the only noiseless slate, for the reason that a slate surrounded by and in direct contact with wood or other hard material cannot be noiseless. The metal frame of this slate is made in two sections coming together at the top and bottom of the slate, and counter-sunk and riveted, making an imperceptible joint, thus effectually preventing the frame from coming apart. The metal frame is covered with tubular braid necessarily secured to it in such a way that it cannot rattle or become loose. The braid covering the frame is in bright, plain and mixed colors, making a very attractive article. The slate is made of first-class material, is neat, durable, light and convenient to carry. It is made by the Standard Slate Company.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commands itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must necessarily give accurate results. Truly yours,
THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, JULY 31, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

WE lately printed a paragraph giving an account of the outcome of a contest over school-books in a county in California. In that instance, bribery was charged, and the agent of one house was locked up, a county official getting out of reach in time to escape a like experience. Now we have the story of a fight in Washington Territory, where the representative of one house, forgetful of trade amenities, indulged in exercises which brought him into contact with the police court. Surely the Pacific Coast is severely debatable ground when a resort to bribery or fisticuffs is the only way to impress people with the value of education and the greater value of the educational helps which are urged upon the public. The school-book publishers had, we thought, contracted between themselves to avoid undue competition, and to conduct their business on a more respectable line than usual. If the men at the further side of the continent did not enter into this agreement, they only are to be blamed for reprehensible practices like those noted. We trust, for the sake of the school-book publishing trade and its respectability that these are isolated and unusual incidents of competition.

FURTHER instances of loose business methods have been brought to public view during the past week. There has been much astonishment at the laxity of moral judgment and the weakness of business management which have come to light within the past few months, and now the public has been again brought to the exclamation point and is wondering why and how such things can be. THE STATIONER has strongly condemned the looseness with which business has been conducted, and it has been justified again by one of the most surprising incidents of this terribly irregular and unbusiness-like season. The case of a so-called poor law clerk, who has been known to live in extravagant style for a man earning about thirty dollars a week, yet who has bought and sold real estate, built houses, and speculated in stocks to the extent of thousands of dollars, without the first suggestion that his proceedings were questionable, may well excite the inquiry: "What are we coming to?" The lawyers for whom this clerk worked are reputedly keen and stand high in their profession, and yet they do not seem to have thought it incongruous that one of their clerks should spend money at the rate of eight or ten times the amount of his salary. The brokers through whom this clerk operated excuse themselves by saying that they thought that he was operating for his employer. This is a poor and silly ex-

cuse. It was their business to have inquired how and for whom their customer was speculating. It would have been wiser for them to have said that they didn't stop to think. We believe that this is the true version of their carelessness. This case is another incident of the reckless business methods of the day. Theft and forgery have been conducted boldly and, only for a turn in the stock market adverse to the operator, might have been continued indefinitely. Will people learn anything from this?

Roundabouts.

BY THE TRADE LOUNGER.

Skipping around in among the large paper stores this week, I found that many people had gone to Saratoga. This means that they have gone up to the paper makers' meeting, taking in the Democratic committee, Hendricks, and Congress Water all in at the same time.

The last remark rather leads up to politics, but I don't propose to talk any. Should I do so, it might change the entire course of the canvass, and be instrumental in electing —. But what I did want to remark is, that one of the trade has got up a nice, convenient apparatus for political processions. When you can get transparencies, banners, &c., ready made, it marks a great advance in political foresight. The hindsight will be found on the banner. Another feature is, that the banner can be condensed, collapsed, knocked down, and restored to form in a "jiffy," so to speak. Great idea!

It is said than an uptown representative of the trade is suffering from too much holiday. Last Saturday he took a long-contemplated fishing excursion, going out to that lonesome and unfrequented place, Canarsie. While battling with the surf and icebergs he despised a mermaid or other marine animal, and with the unswerving pluck of a native tackled it. He now lies in bed with a swelled foot, being under a doctor's care.

Scrap albums are way down in price this year. Albums that formerly sold for \$36 a dozen can now be had for less than half that figure. One of the great drawbacks which home manufacturers have to contend with is the introduction of foreign goods. Some of these productions are marvels of cheapness.

An importing firm is showing a line of scrap albums with illuminated cloth covers, very handsomely and substantially gotten up, which it offers in quarto sizes as low as fifteen cents wholesale and larger sizes at \$1.08. "They can't beat these figures," remarked the importer, when showing these goods. "We are going to sell some of them to a leading house in New York which makes a specialty of manufacturing an extensive line of fine albums."

A new form of file and clip has recently appeared. It is made of japanned tin. Underneath the clamp is a slit running the full breadth of the file. This is useful in fastening or binding legal papers, as it enables the fastening to be done while the paper is under the clip. Another advantage is a side and top piece so that paper may be placed under the clip straight and true, quickly and easily. The article is said to have met with the approval of a great many lawyers.

* * * *

Here is an advertisement which, it is said, appeared recently in a French newspaper; "FOUND—On Sunday last, a lace mitten, embroidered with pearls. If the person who lost it will be kind enough to leave the other one at the office of this paper she will greatly oblige the person who found the first."

* * * *

It is surprising how many wants there are in the trade and how many people who can supply those wants, if they try, fail to make their location and business known. I have had one or two inquiries made to me lately for things which ought to be advertised in THE STATIONER. Every week you are answering like inquiries. I should think that some people, like potatoes in a dark and damp cellar, would sprout.

Answers to Correspondents.

G. C. H. wants the names of some firms who do lithographing for the trade.

Ans.—Almost all lithographers accept outside jobs. You can refer to our advertising columns where J. H. Bufford's Sons, L. Prang, Forbes Lithographic Publishing Company, John Gibson, Baker & Hayes, and Chas. Beck have their cards. If regular job lithographers are wanted, try Stahl & Jaeger, 136 Mulberry street; H. Bencke, 123 South Fifth avenue, both in New York.

J. P. M. wants to know who makes the "Victor" slate.

Ans.—T. Kane & Co., Chicago, Ill.

Subscriber asks if there is or can be any patent on ruled (copying) sales books?

Ans.—We should say not. There may be a ruling in some novel and hitherto unused pattern, in which case a patent could be had for the design; but generally speaking, there is and can be no patent.

[The correspondent who sends the last foregoing inquiry states that telegraph roll paper (lately asked for) is kept in stock by L. G. Tilton, 7 Dey street, New York.]

Obituary.

SIDNEY BABCOCK.

Sidney Babcock, the publisher, died at New Haven, on Tuesday, aged 87. He was born in Hartford, Conn., and succeeded his father in the publishing trade carrying on business in New Haven for the most part of an active life. He had for forty years a branch publishing house in Charleston, S. C., one in New Orleans for some years, and one in the West, furnishing school-books to all the States of the South and West.

Office Mucilage.

Lehner recommends the following in *Pol. Notizblatt*:

Place five pounds of potato starch in six pints of water, and add one-quarter pound of pure nitric acid. Keep it in a warm place, stirring frequently for forty-eight hours; then boil the mixture until it forms a thick and translucent substance. Dilute with water if necessary, and filter through a thick cloth.

At the same time another paste is made from sugar and gum-arabic. Dissolve five pounds gum-arabic and one pound sugar in five pints of water, and add one ounce of nitric acid and heat to boiling; then mix the above with the starch paste. The resultant paste is liquid, does not mold, and dries on paper with a gloss.

It is useful for labels, wrappers and fine bookbinder's work.

Some extremely handsome cabinets, inlaid with brass and mother-of-pearl, are in the market, the shelves and interior furnishing being of maple and satin, amaranth and tulip. At this time the full beauty of rare woods is being brought to the front. Elaborate carved

borders in mahogany are given to central bronze panels of raised work. A favorite combination is a secretaire with cabinet. We find reproduced choice articles of furniture of Louis Quinze and Seize, which adorned the Tuileries and other French palaces, and were scattered to the winds during the French revolution. These include tables in rosewood and other choice lignites, with antique carved borders, and supports mounted by winged griffins. Many examples have a ground of white enamel, lined off and picked out with gold, the upholstery being in cut velour or blue satin. Among novelties to be noted are wide oaken borders of hall mirrors, covered with flat ornamental tracery in cut steel. The contrast between the sheen of the steel and the grain of the oak is very effective. Backs of antique chairs and settees show some very fine carving.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, July 30, 1884. }

THE MONEY MARKET.—Money is in abundant supply and the banks have been more liberal in granting accommodation, as shown by a slight expansion of loans. They are still, however, cautious, scrutinize closely, and will not look at single-named paper. Money on call at the Stock Exchange has been available at $1\frac{1}{2}$ @2 per cent. interest, the banks still asking $4\frac{1}{2}$ @6 per cent. for the same accommodation. Time loans quoted $5\frac{1}{2}$ @6 per cent., and commercial paper firm but quiet at $5\frac{1}{2}$ @6 per cent. discount for good two-named notes. The upward movement which was so conspicuous a feature of the stock market last week has been followed by reaction, and an easier tendency has prevailed. The market left off unsettled and tame. Railroad bonds are a trifle lower. Governments unchanged. Foreign exchange has ruled dull and steady in consequence of there being no pressure to sell.

THE PAPER MARKET.—So far as the demand for paper and values are concerned, nothing of moment has occurred this week to indicate any improvement in either, and the outlook is practically much the same as outlined a week ago. The failures in the trade, both here and elsewhere during the past week, are a feature which has added to the general distrust and depression which appears to pervade almost every line of business. These failures, while they clearly show some of the weak spots of the trade and the weeding out and liquidation of concerns which have been in a condition for some time past where their solvency has been open to question, are not indicative of the unsoundness of the trade, but are evidences of the expansion of credits, close competition, and an endeavor to pursue business on a too limited capital. We hear of several manufacturers who have notified the trade that in view of the restrictions placed on the importation of stock, their goods would be subject to quotation. There is a growing disposition not to accept orders for paper for future delivery.

THE STATIONERY MARKET.—The stationery trade presents very few features indicative of a change. There have been fewer tradesmen in town during the past week, but there is an increase in orders received by mail. The practice of visiting the city to buy goods has been gradually dying out for several years past. Out-of-town tradesmen seem to find that they can do just as well in making their purchases from traveling salesmen as they can from the dealer. Not only have the small tradesmen to a great extent adopted the former method of buying goods, but many of the leading jobbing houses in the West no longer send representatives here to place their orders. This practice has two advantages—it saves expense, and makes much less work for both buyer and seller. The trade in staple goods is about the same. The quietude noticeable for some time still prevails, although dealers continue hopeful of a good fall trade. There is some demand for albums, scrap-books, &c., but mostly for the cheaper grades, while the trade in toys, fancy goods and similar lines is noticeably quiet.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:
'FELLOWS'

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Seals.

John F. Weston, the stone seal engraver, was engaged in engraving a pretty floral design on the under side of a transparent stone when a reporter of THE STATIONER visited his office in John street for the purpose of inflicting upon him another interview. "Come to talk with me about seals?" said Mr. Weston, hardly stopping in his work. "Sit down. Yes, that would make an interesting subject. There is a great deal to be said about seals, and, although it is an old thing to me, I feel interested in talking about it to others. The sealing of important documents was one of the most ancient practices. In looking over certain relics from the time of the ill-fated Pompei, we find a great many seals engraved, and in consulting ancient history we find the signet-ring continually spoken of. It was customary for men of note to wear a signet-ring and sign their important documents with it. It has always been the custom of kings, heads of governments and other officials to make use of seals when signing documents, and it was considered one of the highest honors for a king or other man in great power to intrust one of his subordinates with his signet-ring.

"The kind of engraving mostly done by the ancients was what is called intaglio or sunken engraving—that is, the subject was cut in the material, and among ancient intaglios was a very valuable one, consisting of our Saviour's head cut in an emerald, and this was supposed to be a perfect likeness of the original.

"What was the exact *modus operandi* used in seal and other forms of engraving in ancient times it is difficult to tell, but it is supposed that most of the engraving, whether intaglio or cameo, was done by hand with diamond-pointed tools, a practice more or less in vogue at the present day. Nowadays, however, machinery is used extensively in most all kinds of engraving. The machinery consists of little wheels, fastened on a turning lathe; fed with diamond powder, and propelled at the rate of 4,000 or 5,000 revolutions per minute by steam or foot-power. Comparing specimens of ancient engraving with engraving done at the present time, it is surprising to see what little advance there has been in the art in modern times. Here is an ancient slab, supposed to have been done in Sweden, where I don't believe they know anything about the use of the lathe."

The stone referred to closely resembled cornelian. The figure of a boar was cut in relief on one side, and that of a pointer-dog in intaglio on the reverse side. It was a curious and interesting relic, and the reporter was not surprised when Mr. Weston told him that he valued it highly. While somewhat crude the engraving evinced considerable artistic skill and taste.

"Seal engraving was a very honorable calling in ancient times," continued Mr. Weston. "Those following this pursuit were held in great esteem, and it was customary for them to wear robes and wigs after the fashion of the judiciary.

"For many years the use of seals in this

country was discouraged by popular prejudice. It reminded the native born of the thralldom their ancestors suffered under monarchical forms of government. But habits and tastes have very much changed, and it is now the fashion to wear intaglios in the signet-ring, the charm, and oftentimes in pins and sleeve buttons. In fact, the custom is growing. People nowadays ape the customs of the nobility. The use of seals for sealing letters has been coming into fashion for the past two or three years. One drawback is the extreme heat in cases where wax is used. The heat melts the wax, and besides destroying the seal causes the letter to stick to others in the post-bag, which has led the postmaster to complain. To avoid this only good wax should be used. Poor wax is made chiefly of rosin, tallow, &c., and the best wax chiefly of shellac and vermilion, which renders it hard and durable. A good way is to have the seal cut in a steel die, which may be put in a press by means of which stationery may be stamped with the seal." There is an increasing demand for seals. The busy season is during or just previous to the college and school commencements. Some colleges and high schools make use of several hundred of them every year.

Composite Metals.

Corinthian brass was said to be a mixture of gold, silver and copper, formed by the running together of statues melted in the flames of the city of Corinth when it was burned by its Roman captors. It brought a very high price for generations afterward. The name "brass" was commonly applied among the ancients to what is now known as bell or gun metal, a mixture of copper and tin. The alloy of copper and zinc was known and used ages before the mixture of the latter metal was discovered; and it is even said that the use of brass was discovered before that of iron. A mass of zinc ore, mingled with charcoal and plunged into melted copper, will yield the metal, which will be at once dissolved by the copper. This was the ancient process, the only one till 1781, and is still in use. Modern modes consist in melting the zinc and adding copper in thin strips, or in a fused state; or in melting copper and plunging into it lumps of zinc, held below the surface with iron tongs. At the temperature of melted copper, zinc is very apt to evaporate, and, despite layers of fine charcoal or glass on top of the fluid metal, so much zinc passes off that chemical analysis alone can determine the proportion of each metal in the product. The usual proportion is a pound of copper to eight ounces of zinc. "Prince's metal," a beautiful yellow combination, contains equal weights of each ingredient. "Muntz's patent sheeting, or yellow metal," is made of about two pounds zinc to three pounds copper. Bath metal, pinchbeck, or Mannheim metal, is made of three or four ounces zinc to a pound of copper. The addition of zinc hardens and whitens the copper. Oricide is also a combination of copper and zinc in the ratio of 100 to 17. Brass can be precipitated from a solution of sulphurets of the two ingredients mixed with cyanide of potassium, by using a galvanic battery with a brass plate attached to the negative pole.

The National Blank-Book Company.

The manufacture of blank books at Holyoke was begun in 1845, when the business now carried on by the National Blank-Book Company was founded. The present company assumed control of it in 1877, and immediately set to work to largely increase the facilities for the manufacture of blank books possessed by its predecessor. The business under its management, although taken from the hands of a bankrupt, prospered from the start.

Three years ago, the company removed its factory into the mammoth building shown in the accompanying engraving. This building is 350 feet long by 50 feet deep, and three stories in height. The factory occupies the second and third floors. It is equipped with all of the newest machinery and employs 200 hands. As each floor is not cut up into compartments, it is well lighted by large windows on all sides of the building. The capacity of the factory is almost beyond comprehension, and the company lays claim to having the largest blank-book factory in the world.

For the quality of material used by it, excellence of workman-

ship and unvarying uniformity of its line of goods, no company engaged in the manufacture of blank-books is said to have a better or wider reputation than the National Blank-Book Company. Some of its books have been on the market for the past twenty-five years, and it has customers who have regularly handled its goods for upward of thirty years. Its blank-books, as before stated, are always of uniform quality—one feature alone which has been appreciated by the trade. One reason for the company's ability to preserve the uniformity of its blank-books has been largely due to its keeping in its employ, during the long series of years since its foundation, skilled workmen, who have grown up with its business, so to speak, and who have not failed to keep the quality of its productions up to the highest standard.

The company manufactures some 5,000 different varieties of blank-books, ranging from all grades, sizes, &c., among which may be mentioned vest-pocket memorandums, oblong renewable memorandums, buyers' books (indexed), butchers' books, pass books, indexes, printed receipt books, full-bound books, letter-copying books, bill books, scratch books, note, receipt and draft books, scrap books, trial balance books, &c. It has lately brought out for the fall trade a line of pencil memorandum

books in a great variety of fancy bindings and sizes. The best material is used, and this, with the best workmanship, has given the company's productions a reputation which it prides itself upon sustaining. All of its work is guaranteed to be perfect. The large stock always on hand is available to supply the wants of every section of the country, and insures prompt shipment. Many new, attractive and salable goods are now ready for the fall trade.

The New York office and salesrooms of the company are at Nos. 66 and 68 Duane street, and are in charge of H. S. Dewey, who is the agent of the company and manager of its business in this city. All orders addressed to him will receive prompt and careful attention,

WORKS OF THE NATIONAL BLANK-BOOK COMPANY.

and out-of-town buyers who may visit the city are cordially invited to call and inspect the large and varied stock of blank-books, which may at all times be found at the New York agency.

The Trade in Seaside Toys.

The sale of toy pails, rakes, shovels, hoes, &c., forms a by no means small part of the toy trade, although it began a few years ago. A leading toy dealer of this city, who claims the credit for the introduction of these goods, in conversation with a reporter of THE STATIONER, a few days ago, said: "Yes, I did it, and I will tell you how. Toy pails a few years ago were only in demand during the holidays, and were not kept in stock by dealers in the summer time for the reason that there was no sale for them. Moreover, there was usually such a limited amount manufactured that jobbers at the close of the holiday season rarely had any left on their hands to carry over. It so happened one year that I had more pails than I could dispose of, and not wanting the bother of carrying them over, I set to work thinking how I could rid myself of the surplus. I conceived the idea of selling them at the seashores and, if possible, opening up a new market for toys of this description. I was so confident of succeeding in the under-

taking that I had a quantity of toy hoes, rakes and shovels made for introduction in connection with pails at the seashore. Early the following summer season I went down to Coney Island, taking my wife and children with me. The little ones were supplied with pails and shovels, and amused themselves for hours digging in the sand, constructing forts, mounds, wells, &c., greatly to the envy of the crowds of other little children, who had nothing to amuse themselves with but sticks or shovels whittled out of pine boards after a crude fashion. I next put the goods in the hands of peddlers, and we sold that season about 3,000 wooden pails and shovels. The next season the quantity sold was more than doubled, and we introduced the goods at Rockaway Beach, Long Branch, Atlantic City and other seaside resorts. The sales increased the next year to 20,000 or 30,000. Up to that time only wooden toys of this description were sold, but eventually a line of tin pails and shovels were introduced.

"Before Manhattan Beach was washed away we sold the best grade of goods there. Brighton Beach took a small quantity of the best goods, some of the medium grades and about the same quantity of the cheapest grades. The demand at West Brighton Beach was mostly for the poorest goods, so that there were three distinct grades of toys sold within a radius of two miles. Grades varied according to the style of finish, material, &c. The tin goods were, and still are, the cheapest. Some toy shovels are now made of iron, but they break easily."

Paper mats are pretty, inexpensive, and not molested by moths. Take two sheets of tissue paper of contrasting color, cut each sheet across where it is folded; cut each of these pieces in two, making eight pieces in all. Fold each piece across the longest way four times, making it eight double and an inch or more in width, according to the size of the paper. Place four of the pieces, alternate colors, and weave the other four across them, the woven part to be in the centre of the strips. Fasten the braid, or woven part, with a needle and thread; then cut the ends into fine strips, the finer the strips the prettier the fringe. After cutting the fringe, lay the mat on a table, take a damp cloth (merely damp) over your hand and rub the fringe round and round, and then rub it round between your hands. This makes it crinkle up. Paste a stiff paper under the mat. Dust may be removed by shaking them without damaging the mat.—*Decorator*.

THE NEW YORK BLANK BOOK CO.,

29 & 31 Beekman Street, New York,

— MANUFACTURERS OF —

BLANK BOOKS,

Pass, Memorandum, Letter Copying Books, Etc.

PRICE LISTS ON APPLICATION FURNISHED TO THE TRADE.

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. December 13, 1883.

THE FOURTH ANNUAL INDUSTRIAL FAIR

— OF THE —

New England Manufacturers *and* Mechanics' Institute

*Will Open at 3 o'clock, Wednesday Afternoon, September 3, 1884, and will
Close at 10 o'clock, Saturday Evening, November 1, 1884.*

THIS Exposition will present in valuable and interesting detail, the progress of Mechanism, Science and Art; the various processes of Manufacture in full operation, demonstrating the value of Yankee skill and ingenuity; the Agricultural and Mineral Wealth of the South and West; the remarkable resources of Mexico; the Handiwork of Women, and the Achievements of Master Mechanics and Workmen. Applications for space in which to exhibit will be received until **JULY 1**, and if accepted by the Committee will be classed and grouped in proper departments, and space assigned in rotation, in the order in which applications are received. Blanks, with full instructions, furnished by

JOHN F. WOOD, Treasurer, No. 38 Hawley Street, Boston,
AND AT THE INSTITUTE FAIR BUILDING, END OF HUNTINGTON AVENUE.

Playing Cards.

The playing-cards manufactured by the American Card Company are likely to cause a flutter in the playing-card market that it has not yet experienced, although a few months ago there was some excitement caused by the reduction of prices made by the card combination. The American Card Company is a new company recently formed. Its line of cards is said to be the cheapest in the market, while the quality of the goods is very satisfactory. The line includes the following numbers: 1. "American," square corners, indexed with figures in corners, ace card of new design and new style joker card in each pack; also assorted plaid and star backs. 2. "Star," round corners, with plaid and star backs of new pattern and design, indexed corners, &c. 3. "Peerless," round corners, fancy backs, indexed corners, &c. 4. "Acme," round corners, fancy backs, indexed corners, the same as No. 3. 5. "Eclipse," round corners, fancy set-pattern backs of new style and design. 7. "Favorite," round corners, fine fancy and sporting design backs; linen stock, very attractive. 8. "Elite," gilt edges, same style as the "Favorite." The "Tom Thumb" is a toy-size playing card, with square corners. The selling agents for the American Card Company's goods are Selchow & Righter, who are prepared to furnish cards at low prices. Their list shows a reduction of 12½ per cent. from prices at present asked by leading playing-card manufacturers. Samples and price-list will be sent on application.

Indian Ink.

Perhaps it would be difficult to name an article in familiar use concerning which less information is to be found in works of reference than the so-called Indian or China ink. The latter term—generally employed on the Continent—more correctly denotes the source of the ink used for artistic purposes; although writing inks of various composition are, and from time immemorial have been, made in India in the shape of cakes. It is to Chinese authorities, therefore, one must look for particulars of the history and manufacture of Indian ink.

Dr. S. W. Williams, in his "Chinese Commercial Dictionary," published in 1863, tells us: "Indian ink is composed of lamp-black and glue obtained from different substances and combined and purified according to the quality of the ink. The lamp-black is collected by burning the twigs and leaves of pine under a movable thatch so arranged as to intercept the smoke. The finest ink is manufactured from the product of oil slowly burned in earthen jars, the soot being collected in the upper one. Lamp-black is brought to Canton from Kwangsi in hampers, and manufactured into both writing and printing inks. Boiling glue is poured upon it, and the whole is stirred together until properly mixed; after it has cooled a little it is poured into carved wooden molds, into which a stopper fits tightly; the cakes are soon taken from the molds and dried. The musk or other perfume is mixed with the glue. The finest In-

dian ink comes from Hwei-chow-fu in Ngan-whi (province); its fracture is shiny and no grittiness can be perceived when it is rubbed on the finger-nail; inferior sorts are the most ornamented. The ink is made into oblong prisms weighing from 5 to 80 to the catty (the catty = $\frac{1}{16}$ lb. avoirdupois). The finest is priced as high as \$5 per catty; common sorts range from 40 cents to \$1.50. The boxes usually contain 100 catties. The export is to Europe. The lamp-black for printing ink is mixed with strained cungee (rice-water), and when the paste is sufficiently dry it is kneaded on a slab and cut into strips. The printers dilute it with oil as they use it, laying it on the wooden printing blocks with a brush made from the bark of the coir-palm."

No estimate is given by Dr. Williams of the average annual export of ink from China, and Rowney & Sons, of Rathbone place, the artists' colormen, have informed the writer of this paper that they are unable to furnish any information on the point, although they import large quantities of the ink, confining themselves, as they do, to certain brands. They add that the finest kinds come to them from Nankin, and the commoner sorts from Canton. This seems to be all that can be learned from authentic sources of the modern history of Indian or China ink. The date of its introduction into Europe is uncertain.

But some very curious particulars of its earlier history have recently been collected from Chinese works by a French writer, Maurice Jametel, to whose interesting little volume* we are indebted for the following details.

The historians of the Celestial Empire, M. Jametel informs us, refer the invention of ink to Tien-Tchin, who lived in the reign of Hwang-ti, about 2600 B. C. But, according to Chinese authorities, the ink then used was a sort of lacquer which was applied on silk with the tip of a bamboo-cane. This lacquer was replaced by a black stone dissolving in water; and at last in the days of Wei, 260 to 220 B. C., the practice commenced of manufacturing ink-balls from lamp-black obtained by burning lac and pine-wood charcoal. The facility with which the latter ink could be used soon gained it the preference over the old-fashioned ink-stone; the process of manufacture was rapidly perfected; and a contemporary poet, lauding the precious boon to literature, tells us that in his day the best ink was made from the wood of the pine-trees clothing the hillsides of Louchan, in the province of Kiang-si. This province appears to have long been the seat of ink manufacture, as there is official record that in the time of the Tang dynasty, A. D. 618 to 905, a functionary was sent thither charged with the inspection of the ink manufactories and the transmission to the Imperial Court of a certain number of cakes of ink in annual tribute.

For particulars of some of the characters or trade-marks on these ancient inks, particularly on those of a certain Li-tchao and his son Li-ting-hwei, who founded an ink-factory in the province of Nangwhi, and became famous for the quality of their inks, the secret of

which died with them, the reader must refer to M. Jametel's pages.

As regards the processes of manufacture, researches in Chinese literature show that methods the most diverse were pursued in practice with equal success. Thus, in the preparation of the lamp-black, fuel of nearly every description has been used. One of the emperors of the Tsong dynasty had the lamp-black for his ink made from perfumed rice flour wetted with a decoction of *Hibiscus mutabilis*. At Yennan, in the province of Chiang-si, the inhabitants burn petroleum in their lamps and use the lamp-black thus obtained in the manufacture of an ink black and shining and very superior to that made with pine-wood black. Tang-wang-kin used pomegranate bark soaked in vinegar, and, according to some writers, Li-ting-hwei employed rhinoceros horn. But all these have been exceptional cases; the usual practice has been to employ the soot of pine wood or of some sort of oil. A famous maker, Tchen-ting, produced excellent black from the timber of old pine trees; and Ta-che-mo-ching tells us that the only part of a pine tree fit for this purpose is the trunk from the base to the fifth branch—all above furnishes a coarse and gritty black. Equally important with the black is the glue, which causes the molecules of black to cohere. The kinds now employed are fish-glue and glue from hides and horns; but other kinds have been used, including glue from rhinoceros-horns and from stag-horns, the latter practice, it is said, having been introduced in remote times from Corea.

Besides the details of the manufacture, the best methods of keeping the ink after it is made have greatly exercised the ingenuity of Chinese writers. The question is the more important, as good inks improve with age if properly kept, and should not be used for some years after they have been made. Wang-fang-pao-che recommends wrapping the cakes in leopard-skins as a safeguard against damp; Li-ting-hwei recommended hanging in gauze bags in some airy place during the fourth, fifth and sixth months of the year;* Ko-kou-yao-lwen would keep them wrapped in artemisia-leaves during the same season, and in winter enclose them in the same leaves and bury them in lime or ashes.

These notes of M. Jametel are by way of

* The Chinese year commences in our February—sometimes at the beginning, sometimes toward the end of the month.

preface to a translation of an essay on the manufacture of China ink by a certain Chin-ki-souen, a maker of note, who flourished A. D. 1398, and left behind him a monograph, which is almost unique among Chinese writings in its freedom from discursive puerilities, and the practical, if sometimes contradictory, character of its details.—*Printing Times and Lithographer*.

In conversation with a jeweler the other day I learned that the fashion in wedding presents among the truly tony is changing, and the demand is now for rare novelties in beaten brass and copper, parlor ornaments and clocks, and antique silverware modeled after ancient patterns and oxidized. Of course it takes a good deal of modern silver (or paper) to buy this, as witness the price of \$27 for a dozen after-dinner Japanese coffee spoons, no two alike, but the purchaser is pretty sure there will be no duplicate of this choice gift. These table wares are called Delhi, Cluny, Fontainebleau, Medici and Hamburg in relevancy to antiquities they imitate. One of these wares is so heavy with ornate raised work that the repeated lifting of a spoon to the mouth would become quite a gymnastic practice. Mirrors with frames of finely wrought Norway iron and parlor ornaments of the same, as well as trays of embossed copper, are among other novelties. "We frequently sell over \$1,000 worth of goods on the occasion of a fashionable wedding," said the dealer, "and have sold over \$300 worth to one purchaser."—*Homestead*.

Mechanical Toys.

"You may take my word for it that this is going to be a good year for the trade in mechanical toys," said a leading Broadway dealer to a reporter of THE STATIONER as he gazed admiringly on a number of new devices for interesting the little ones. "We look for an increase every year, and are seldom disappointed. Large numbers of American toys now go abroad and the export trade shows an increase every season. Toys made of iron are growing in great favor nowadays. They are neatly and well made, not easily broken and seem to give very general satisfaction, lasting much longer than those made of wood and tin. Most of the toys of a mechanical character are made in Massachusetts and Connecticut. Of the two States, Connecticut takes the lead. Connecticut, you see, is a great clock-producing State, and all mechanical toys owe their principle of action to clockwork. There are more clock factories in Connecticut, although it is next to the smallest State in the Union, than in any other State. This being the case, it contains a greater number of fine workmen than in any other State, and, as a general rule, it is the only State where the kind of artisans best adapted for our work are to be found to any great extent. Another reason why toys are mostly manufactured East is because labor is cheaper there than in many other localities, especially the large cities in the Middle, Western and Southern States.

"Probably the greatest number of mechanical toys manufactured are devised by the workmen in the toy factories, but a great many toys of this character are invented and patented by persons in all sections of the country, who have a mechanical bent of mind, but who do not gain a livelihood from any mechanical pursuit. We buy such inventions from these parties as we think will pay to manufacture. We have paid out many thousands of dollars in this way. In many cases we pay royalties, and you would be surprised to see how the income of many inventors of even the simplest toys mounts up. The inventor of the 'Climbing Monkey,' which was put on the market a year or two ago, realized something like \$4,000 in royalties. The toy consisted of a simple wooden figure, which, by a natural law of mechanics, was made to climb up a string. Its retail price was a few cents. The inventor of what was known as the return ball—a wooden ball attached to a rubber string, by means of which the ball, when thrown out, would return to the hand of the thrower—made a fortune from its sale; and the royalties derived from the sale of the miniature lamp, which was put on the market some five or six years ago, aggregated some \$40,000. The only thing about the toy was its resemblance to a real lamp. But it sold immensely. Everybody bought it, because everybody else bought it, and the demand for it has scarcely ever been paralleled by any other toy.

"There are few new toys in the market this season as yet, but a number of novelties will be introduced in a short time. Among those in the market may be mentioned the negro target, which is an old toy in a slightly different

form. Formerly the target folded up, showing the back of a negro's head. By hitting it with a ball, attached to a rubber string, it quickly unfolded, showing the face of a negro, with the mouth extended. In the new toy the eyes and mouth are detachable, and the trick is to knock them from their positions with the ball. Another new toy is the truck with the galloping horse. Pulling a string attached to the horse causes it to gallop in a very life-like manner. A simple little toy is the Donnybrook game, which consists of the figure of a jolly-looking Irishman standing underneath an arch. The head of the figure is detachable, while the figure itself is not secured to the base or platform of the toy. The trick is to manipulate a wooden ball, which is suspended from the arch by a rubber string in such a manner as to decapitate the Irishman without disturbing the rest of the figure. The walking bear may also be called a new toy, as it was introduced late last season, and a large portion of the trade has never seen it. So is the mechanical steam fire-engine, the mechanical freight-train, the 'Dancing Clown,' which represents a clown dancing, circus fashion, on the back of a galloping horse. 'Home Guards' is a new toy, consisting of a detachment of soldiers fastened to an extension base. The soldiers may be ranged in single or double files, front face and many other positions assumed by a military company in going through a drill. A very popular toy on the Fourth of July, and one that will undoubtedly sell well another season, was a toy mortar. It has already made a fortune for its inventor. The mortar is only about two inches long, and about the same number of inches in diameter. It is loaded with a blank cartridge, and a wooden ball fits in its mouth. The cartridge is inserted in a side chamber, which connects with an air chamber under the ball. Upon the discharge of the cartridge the ball is thrown high in the air."

Some Curious Printers' Errors in English Bibles.

Great as have been the pains bestowed upon printing the Bible in order to insure the correctness of the text, there are not a few editions extant which are greatly disfigured by typographic errors. Especially noteworthy in this connection are some of the Bibles printed by John Field in the seventeenth century, which abound with errors of the press, whole words and even sentences being omitted. Among the typographical blunders in some of the copies is the following reading of 1 Cor. vi. 9: "Know ye not that the unrighteous shall inherit the Kingdom of God." A mistake somewhat similar is, by the bye, to be found in other Bibles of about the same period, where Ps. xxxvii. 29, reads: "The righteous shall be punished." In more recent editions errors almost as glaring have been found, such, for instance, as: "Him that taketh away thy cloke, forbid *to* (for *not*) to take away thy coat also," and again, "For us *three* (instead of *there*) is but one God." In other editions such words have been substituted as "heart" for "hart," "son" for "sun,"

"forth" for "four," &c. Many of the Bibles of this character are now collected chiefly for their errors; the more numerous and gross they are, the higher the price they realize. One of the most curious readings is the following rendering of Ps. cxix. 161: "Printers have persecuted me without a cause." All we know of this edition is stated by Henry Stevens in the catalogue of the Caxton Exhibition of Bibles, where he says that these words were put into the mouth of the Rev. Cotton Mather by a blundering typographer in a Bible printed before the year 1702.

Some other curious typographical blunders have been brought together by the Rev. W. Wright, D.D., in the *Leisure Hour*, and one or two of these are worth reproducing.

THE EARS TO EAR BIBLE.

"Who hath ears to ear, let him hear."—Matt. xiii. 43.

This adaptation to Cockney usage is found in an 8vo Bible published by the Oxford Press in 1810. The same book contains a more serious blunder in Hebrews ix. 14. "How much more shall the blood of Christ, who through the Eternal Spirit offered himself without spot to God, purge your conscience from *good* works to serve the living God."

THE STANDING FISHES BIBLE.

"And it shall come to pass that the *fishes* shall stand upon it," &c.—Ezek. xlvii. 10.

The word *fishes* is used for *fishers* in a 4to. Bible printed by the King's printer in London in 1806, and reprinted in a 4to edition of 1813, and in an 8vo edition of 1823.

THE IDLE SHEPHERD BIBLE.

"Woe to the *idle* shepherd that leaveth the flock."—Zech. xi. 17.

The word *idle* shepherd is used instead of *idol* shepherd in a very faulty 8vo Bible issued by the Oxford Press in 1801. The printers, no doubt, intended to correct what seemed to them a mistake, and which is undoubtedly an unfortunate rendering. The exact meaning is *vain*, empty, and therefore foolish. Jerome and Pusey consider this idol shepherd as an Antichrist of the future, and Bishop Wordsworth sees in him the Pope of Rome, as adored in the church of St. Peter by the cardinals after his election.

THE WIFE-HATER BIBLE.

"If any man come to me, and hate not his father . . . yea, and his own *wife* also," &c.—Luke xiv. 26.

This reading is found in an 8vo Bible printed by the Oxford University Press in 1810.

REBEKAH'S CAMELS BIBLE.

"And Rebekah arose, and her *camels*."—Gen. xxiv. 61.

The word *camels* instead of *damsels* occurs in an 8vo Bible published in 1823 by the King's printers in London.

TO REMAIN BIBLE.

"Persecuted him that was born after the spirit *to remain*, even so it is now."—Gal. iv. 29.

This typographical error, which was perpetuated in the first 8vo Bible printed for the Bible Society, takes its chief importance from the curious circumstances under which it arose. A 12mo Bible was being printed at Cambridge in 1805, and the proof-reader, being in doubt as to whether or not he should remove a com-

ma, applied to his superior, and the reply penciled on the margin, "*to remain*," was transferred to the body of the text and repeated in the Bible Society's 8vo edition, 1805-1806, and also in another 12mo edition of 1819.—*Printing Times and Lithographer*.

In a paper lately read before the Philadelphia Academy of Natural Sciences, Mr. Joseph Wilcox stated that shell mounds are very numerous on the west coast of Florida, marking the former favorite camping-grounds of Indians. A portion of the town of Cedar Keys, where the largest accumulation is found, is built on a great mass of oyster shells. Human bones, stone implements and fragments of pottery, are frequently discovered among the shells. The site of an ancient manufactory of arrow heads or other implements may be seen on John's Island, at the mouth of the Cheesowiska River. Several bushels of chips are here scattered about, all made of chert rock, the only material in Florida suitable for the purposes of the Indians.

Dr. Webster, American Consul at Sheffield, England, speaking of the cutlery industry, says that the United States furnishes Great Britain annually with about \$100,000 worth of bones, horns and hoofs, a portion of which is returned in scales for the American cutlers, and the remainder in the finished cutlery from Sheffield. The shank bones of oxen are almost exclusively used for this purpose, 2,000,000 being required annually by the cutlery trade. The best qualities are so good as to be mistaken for ivory by the inexperienced eye. Of the whole importation of bones into Great Britain in 1880, 78,138 tons were made into fertilizers, and 11,311 tons were used for manufacturing purposes, chiefly by Sheffield cutlers.

A discussion of what is called telepathy is opened by the *Nineteenth Century*. The word means, feeling at a distance the impulse of another mind through channels as yet unrecognized. There are two forms which telepathic phenomena are held to assume. One is that of simple thought transference, or mind reading under the control of scientific experiment. In a mesmeric or phynotic condition, and, indeed, without it, experiments are held to have shown that impressions or ideas can easily be transferred from one mind to another by an act of will. The second form is that of a sudden, unexpected impression passing from one mind to another, as a sort of presentiment or apparition. The writers treat not at all of apparitions of the dead, but only of the living.

Any man can pick up courage enough to be heroic for an hour; to be patiently heroic daily is the test of character.

WANTED.

Agency of Specialties, by a gentleman familiar with the book and stationery trade, in a leading Western city.

Address "MILLS,"
Care of The American Stationer.

SANBORN'S' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen hands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.

Among our specialties is the

TRIUMPH MUCILAGE,

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.
Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

Wall-Papers.

A conspicuous object of interest just now in a large wall-paper establishment in this city is an elaborate piece of scroll work. The pattern is cut out of hard wood and the execution is very bold and free. "Scroll work in wall-papers is one of the latest things out," said one of the oldest clerks in the establishment, in conversation with a reporter of THE STATIONER. "Colors? Oh, they will be, as a usual thing, rather quiet, yet for those who admire bright colors there are many new and very tasteful designs."

There have been very great changes in wall-papers within the past twenty years. It would be surprising, indeed, if there had not been. The first wall-papers used in this country were very crude in design and their colors were wretchedly inharmonious. They were manufactured more for show than according to any well-defined principles of art. The earlier papers mostly ran in floral and a few geometrical designs, and up to a few years ago there were imitations of marbles, stone and some hard woods, such as mahogany and oak. The colors were high and principally in green and gold shades. They were, to say the least, harsh and unartistic. After

this style of papers the leading patterns were made up in more delicate tints. The demand was for finer papers, and manufacturers began to pay more attention to art. Delicate shades were used in frescoes, panelings and borders. The Japanese are the founders of art, so far

as wall-papers are concerned, and it was not long before we began to copy from them. In fact, wall-papers at this stage of their progress in this country were imported in large quantities from Japan. They came in squares

delicate shades running in blue, pink, yellow, old-gold, &c., the brighter tints in gilt and silver. Only one or two shades were used generally, but they harmonized very prettily. Next came what is called the Eastlake patterns.

These were principally on the geometrical order and decidedly English in character. They were stiff, however, lacking the freedom and boldness of the Japanese papers.

The Japanese and Eastlake papers, however, became very popular and were so very artistic in design that they remained in fashion year after year, each season showing some improvement not brought out before. The same general characteristics were adhered to, but there was a variation in shades, the combination of colors being rather prettier and more artistic with each season. Thus we have Eastlake and Japanese designs still, but they show a vast improvement over that character of papers as first introduced. They now come in elegantly embossed patterns and in imitation leathers.

The very newest things in wall-papers are of the renaissance character, partaking of the style of decoration, which prevailed in the time of Louis XIV., and the moresque papers, which are of the Indian order of decoration.

The former are designed from old tapestries and

or panels and were joined together on the walls to make the pattern complete. These papers consisted of both bright and delicate shades with all sorts of grotesque figures, such as dragons, snakes and other reptiles as well as animals. The coloring was harmonious, the

scroll work showing delicate floral designs, hunting scenes, &c. The moresque patterns are mostly scroll work, executed in a very free and bold manner with a portion of the design finished with flock raised in imitation of velvet. The scroll work in some patterns is also metal-

WALL-PAPERS.

lized instead of flocked giving the paper a decidedly metal and often iridescent appearance when silver is used. The coloring of these papers will be quiet, as a general rule, but in some cases it will be very rich.

The paper used varies with the quality of the paper which it is used for. Most of the fine papers are printed on rag stock. The cheaper grades are made principally from ordinary straw paper. The paper first goes through the "grounding" machine, which puts on the first color. The finer papers require two coats. The different colors in the pattern are put on by a machine which has a roller for every color. After the paper has received all the colors of the pattern it goes through the embossing machine. If gilt is used in the design it is put on by the use of varnish, which is applied by hand. The paper then goes through a long trough, the bottom of which is covered with bronze. As the paper passes through the box it is agitated by a number of beaters striking on the bottom of the box. This applies the bronze properly. This method is also used for flocking paper. If a thick coat of flocking or metal is required the paper is put through this operation again and again until the object is attained.

Pigments are bought in large quantities. They mostly consist of mineral colors with a few exceptions. Expert chemists are employed to mix the colors and to guard in every possible way against the introduction of arsenic or other poisons in the preparation of the colors used in the manufacture.

The prices of wall-papers now, as compared with those of twenty years ago, have not changed. This may, no doubt, be a matter of surprise. Competition on the part of manufacturers and dealers, it would seem, should have lessened the price of wall-paper, as it has had a tendency to do in respect to other lines of goods. The fact is the papers of twenty-five years ago were so crude and poor in quality, as compared with those of to-day, that the cost of production is about the same, and hence, while prices have remained in *statu quo*, the general quality of wall-papers has improved.

The accompanying engraving shows an English design in wall-papers, with frieze and dado. While not the very latest style of paper it belongs to a class which is still very fashionable. In coloring it is rather softer than some of the more striking designs in scroll patterns, which have appeared this season. The ground-work is drab, blue or yellow, the effect of which is relieved by the outlines of the pattern, which are in gilt. This style of paper is in great demand for decorating the walls of halls or bedrooms, but is also very modest and pretty for sitting and dining rooms.

Experiments have for some time been made in Belgium for preserving wood by exhausting the air from the pores, and filling them with liquid gutta percha. The gutta percha is liquefied by mixing it with paraffine and subjecting to heat. After it is introduced into the pores it hardens as it becomes cold.

He who seeketh trouble never misseth it.

CARTER, DINSMORE & Co.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rulea up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.---NO. 6.

NEW YORK, AUGUST 7, 1884.

WHOLE NO. 476.

Correspondence.

BOSTON BITS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire Street, BOSTON, August 5, 1884.

"That last issue of THE AMERICAN STATIONER is a beauty," said a member of the trade to me yesterday. And this opinion is entertained by the entire trade, who seem to think that I am in part responsible for its brilliant appearance. On behalf of the Lockwood Press I acknowledge the many compliments and doff my hat. *Vive le STATIONER!*

But then Boston did loom up in that issue and no mistake. Wasn't that a charming "chromo display" of the Thorp Manufacturing Company? Don't that show enterprise? Isn't that the way for a house to present its claims to the trade? Well, New York is a big town, but it hasn't a Thorp Manufacturing Company. No, sir! this is a Boston concern, and is one of the firms whose enterprise is bringing to this city the attention of the trade of the country. And you can wager your spare change that the Thorp Manufacturing Company is *selling* autograph albums and scrap-books, too. With what pride the travelers of this house take the road, knowing that they carry the finest line of samples in the country; and knowing also that the house has so prominently announced "their coming." They will find themselves truly welcomed by the trade.

Another concern, whose trade extends farther than the shadow of Bunker Hill monument at sunset, and whose name ornamented a colored insert, was Carter, Rice & Co. Was not that "bill of items" interesting? There were some cold facts there, and the figures were convincing. Now, when anything is wanted in the paper line, just refer to that business statement and compare figures; then send your order to Carter, Rice & Co. You will save money on the transaction.

While on a pleasure tour last week I spent a day in Springfield, an enterprising manufacturing town in the Western part of the State. Here is the mammoth establishment of the Milton Bradley Company, whose endless variety of goods and holiday novelties is so well known to the trade.

Springfield is also the headquarters of the Birnie Paper Company. This is the house which puts up Crane's all-linen writing papers for the trade, for which there is such a growing demand. The Birnie Paper Company puts these papers up very neatly, and in attractive and convenient packages. Crane's linen writing papers have been on the market for years, and are favorably known both to the trade and to consumers, but the putting up of these papers in the present commercial styles is a new departure, dating back only a few years. These papers are in five different weights, and in octavo, commercial, letter and legal sizes; in one-quarter ream and one-eighth thousand envelopes boxes, besides one, two and four quires in regular folding boxes. The surface of the Crane linen paper is perfect, and the trade-mark—a crane—is water-marked upon every sheet of note. The boxes in which these papers come are rich and elegantly finished. Envelopes to match the paper are in the same box. For Christmas and New Year the Birnie Paper Company is manufacturing an extensive line of satin-mounted cards and novelties, which will be offered to the trade at very low prices. The line embraces some very pretty designs, some of which are quite unique. This house reports that trade has been very good, although at present it is sharing in the summer quietude. For the fall trade, signs are encouraging.

The Elsey School Furniture Company, another enterprising house of Springfield, was visited, and reports concerning school supplies are decidedly encouraging. Everything needed in the school-room can be found here. Elsey's domestic blackboards, which were presented two years ago, have had a large sale. Many improvements have been lately made on these blackboards, making them all the more valuable for the school and drawing-room at home. The "Common Sense" book-stand, designed by George Elsey, is meeting with a steady increasing demand. It is just the thing for a dictionary rest, and is a nicely finished piece of furniture, suitable for parlor, library or office. The top is revolving, and so adjusted that it will remain in a horizontal position or at any convenient angle desired. It is made of different ornamental woods, with cheap or artistic finish as wanted, and is mounted upon a pedestal or upon a high stool. It weighs

about fifteen pounds. For a neat, convenient book-stand, the "Common Sense" might be recommended were it not for the fact that it so ably recommends itself. A. L. D.

WILMINGTON WRINKLES.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., August 5, 1884.

Four failures, with the liabilities aggregating \$172,000 and total assets of \$36,000, are recorded against our city for July. Depression in trade circles, and small margins on goods are the causes assigned for these misfortunes.

With one or two exceptions, the suspension has been only temporary, and amicable arrangements prevented the closing of doors.

It is proper to state that none of our stationers or printers were among the unfortunate firms.

Inquiry among the trade indicates no improvement, but, on the contrary, a slight falling off in July sales, as compared with last season.

It is generally agreed that the Presidential year adds largely to present stagnation.

This theory is so generally accepted, that our stationers, at least, early in spring, observed some prudence in placing orders for goods, preferring to "run under bare poles" until a revival in business warrants large additions to stock.

They have another grievance to enter. Prominent among the troubles which embarrasses trade is the difficulty of making collections. Your correspondent was informed by a leading merchant that he never knew it as difficult in his business experience of fifteen years. Though the situation has been discouraging, there are certainly some encouraging indications, and we are hopeful of a good fall trade.

What a splendid specimen of typography you have given the trade in the last issue of THE STATIONER! As an evidence of their appreciation of it, I know of several who have carefully filed it as a guide to fall purchases.

Our Board of Education is inviting proposals for furnishing the public schools with the usual supplies, and indications point to lively competition.

Frank P. Turner, who has been actively

canvassing our city with "The Pictorial History of the World's Great Nations," by Charlotte M. Yonge, is meeting with signal success. This work needs no other recommendation than the connection of Miss Yonge's name with it.

Recently I was shown a neat pamphlet from the press of the James & Webb Company. While admiring the delicate tint of the cover, my interest was increased when reminded that it was the product of one of our State mills, the Nonantum, at Newark, Del., owned and operated by Curtis & Brother. This firm makes colored papers only, such as pamphlet and magazine cover, card and envelope. It gives employment to about twenty-two hands and produces daily 3,000 pounds. At the Nonantum are three engines of 400 pounds capacity each and a Fourdrinier machine, 62 inches wide. Curtis & Brother use both water and steam power.

The story in your Boston correspondent's letter, of July 10, of two stationery firms being the victims of misplaced confidence, recalls a similar occurrence here. In this case, as the others, the dealer who was solicited to handle the pens was promised the *exclusive* agency, and all mail orders from this city would be transferred to him. Fifty gross was the stipulated quantity for the initial order. Due notice was given the public by circular and press, of the established agency, and at the expense of the dealer. Subsequently, a *purported* representative of the manufacturer, called upon the firm, expecting to duplicate the previous order, but none was then given. Latterly the agent was much surprised when informed by a prominent bank official that the same pen was frequently offered at the bank, and by a person, when described, who corresponded exactly with the person who called as a representative, and gave as his residence 1746 Warnock street, Philadelphia.

Wilmington is to have an exposition and fair, from September 1 to 5, inclusive. Special rates have been secured on all lines of railroads touching here, and will doubtless ensure a large attendance. With Wilmington as a centre of skilled labor in many branches of industry, and surrounded by a large, fertile agricultural district, there is no reason why an exhibit of her products should be a tame affair. Prompt co-operation on the part of our citizens, with the energetic managers of this enterprise, will make it a decided success.

Mrs. S. S. Butler, wife of E. S. R. Butler, stationer, died August 2, with a complication of diseases. Mrs. Butler was an estimable lady, and closely identified with church and Sabbath-school work of our city. Mr. Butler has the sympathy of the trade.

Quite a number of commercial men have recently visited the trade; but few orders have been taken, as dealers are in no mood for buying, for present or future delivery. I append their names: Homer Phelps Beach, Eagle Pencil Company, D. Saarback, Union Playing-Card Company, and R. W. Weissenborn, American Lead Pencil Company, New York; John B. Gildea, Central News Company, E. P. Whitney, John McCord, wood type, C. E. Robinson & Brother, ink, Charles W. R. Smith,

Hampshire Paper Company, C. H. Stoevers, and J. G. Ditman & Co., Philadelphia, Pa.

TRACY.

CINCINNATI CLIPS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, August 5, 1884.

"I have been in business here twenty years and I never before knew times to be so dull as they have been this summer," was the remark made by a Cincinnati stationer and bookseller only yesterday. But the same story is to be heard in all quarters. Of course, as is always the case in times of business stagnation, luxuries suffer most. In the present situation there exists the peculiarity that prices of wares are not tending downward and that the consumers are not calling for inferior goods for the sake of their lower prices. On the contrary, the demand for goods of the best quality in staple articles continues unabated. There is great economy in the consumption of staples, which, with the overproduction of the past two years and the overstocking of country merchants, makes orders light and sales slow. But manufacturers of most lines of staple goods hold up the prices. That is to say, that the dullness of the last six months, and, for that matter, of the last twelve months has not had the effect to depress the prices of manufactured products generally. The price of leather, for instance, and of shoes and harness, into which leather enters as a material, has not fallen. Indeed, only a few weeks ago leather took a leap upward, and now that it has settled back, it did not get quite down to the point from which it made the upward bound. In products of the nature of luxuries, the case is different. Prices may have dropped in some of them, and sales have fallen off very greatly. These remarks apply to business in the aggregate, viewed from a Cincinnati standpoint.

Coming to the stationery and kindred business, and surveying it from the same point of view, I find it affected in the same general way as business at large has been. Fancy stationery has slow sale and brings poor pay. Every-day necessities sell reasonably well and at fairly good prices. Outfits for the counting-room ordered to-day are quite as expensive as they were two or three years ago. The demand is not for meaner paper or poorer binding, for the sake of getting the articles at a lower price. To be sure fewer of these articles are sold, but such as find a market are not inferior in quality or lower in price than in better times when sales were double and treble the volume of the sales of the present time. Business experts look for a little brightening up during the fall, and much more next spring. Yet even they differ according to temperament, the more sanguine looking for a restoration of trade earlier than those of a gloomy turn.

There is nothing personal worth mentioning about the stationers of Cincinnati this week. Very few of them have taken the usual summer vacation. Some of them have more orders on hand than others, but this goes by turns, and

in the course of the year gets all around and sizes up the average, so as to bring it out pretty even.

Trade in agricultural implements is good and in seeds and farm supplies it is also good. All mechanics in trades that are concerned directly or indirectly in house building have constant employment at good wages. In fact, when it comes to that, there has been very little reduction of the price of labor in the last twelve months, though it is a fact that there are far more laborers and mechanics in the aggregate out of employment than there were a year ago. Taking it altogether, the feeling in business is good, and on the whole hopeful. The gloomy man is the exception. The failures here in general business have been few and light. There have, indeed, been fewer of them this year than there were a year ago. Bating the effect of the drought on the corn and other late crops, the outlook for the farmers is good. The only rain of consequence during July fell on Monday and Tuesday of last week, and there was not quite enough of that. More is badly needed, and that soon, to make good fall crops.

PRINCE WILLIAM.

The Number Nine.

The number 9 possesses some remarkable properties. If the nine digits, 1, 2, 3, 4, 5, 6, 7, 8, 9, be added together, the sum will be 45, which is equal to five times nine, and the sum of the digits of their sum, 4 and 5, is 9. If any number is subtracted from another having the same digits in a different order, the remainder will be divisible by 9, and the sum of the digits of the remainder will also be divisible by 9. Subtracting 2,967,634 from 7,364,629, there remains 4,396,995. The sum of the digits, 4, 3, 9, 6, 9, 9, 5, is 45, which is divisible by 9. If any number be multiplied by 9, the sum of the digits or figures of the product will be divisible by 9. Nine times 43,780,135 is 394,021,215; the sum of the digits of this product is 27, a multiple of 9. If a number be subtracted from another having the same digits in a different order, and one of the digits of the remainder erased, it can be found in the following manner: Add together the figures of the remainder that are left, divide the sum by 9, subtract the figure that remains after dividing by 9, from 9, and the last remainder will be the digit or figure sought. If there was no remainder, 0 or 9 was erased.

Ask someone to write down a number and subtract from it another composed of the same digits in a different order, without letting you see either of them. Tell him you want all the figures of the remainder but one. By the above rule you can soon find the figure you have not seen. The feat will appear quite mysterious to the uninitiated. Here is an example: Subtracting 156,324 from 231,456, the remainder is 75,132. The sum of the figures 7, 5, 1, 3 is 16. Divide 16 by 9, we have a remainder of 7. Seven from 9 leaves 2, the other figure.—*Ex.*

We judge ourselves by what we feel capable of doing, while others judge us by what we have already done.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

SANFORD'S Pneumatic Mucilage.

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure, at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

TRADE SUPPLIED BY
SANFORD MFG. CO.,
CHICAGO.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

"Fluted" Erasive Rubber.

A glance at the cuts suggests surprise that the idea of this simple invention has not been brought out before. Its use is apparent to every one who ever made use of an erasive rubber, and who has experienced the inevitable smut resulting from an effort to erase a lead-mark. The flutings in the rubber are file-like in effect, by which erasures may be made very rapidly, while the channels furnish

an escape for the lead-dust, so that it is not rolled and rubbed into the paper as it is with solid rubber, and the paper is therefore kept clean and smooth.

Owing to its many edges and superior cutting qualities, the "Fluted Rubber," as it is called, is said to outwear solid rubber and to do absolutely perfect work. It is designed for and is adapted particularly for artists' use.

New Patents.

No. 300,300. Mechanical Toy.—Reuben H. Ricker, Boston, Mass.

No. 300,305. Adding-Machine.—William C. Smalstig, Springfield, Mo.

No. 300,312. Printing-Machine.—John Brooks, Plainfield, N. J.

The combination, with the impression cylinder, type-bed, rack, driving-shaft, pinion and pinion-shaft, of side supports below the type-bed, a longitudinal girder beneath the type-bed and supporting the same, the side-frames, the cross-girt, and end frames to which the girder is fastened, said girder having a vertical slot through which the pinion-shaft passes, and in which the bearing-box of the same slides.

No. 300,875. Toy Scale.—J. Franklin Lawrence, Philadelphia, Pa., assignor to John Lawrence, same place.

A toy scale, consisting of a beam, weight-plate, scoop-support, and pivot cast together, a base cast in one piece, and a scoop.

No. 301,178. Paper-Trimming Machine.—John H. Stonemetz, Erie, Pa.

In a paper-folding machine the combination of a folding-roller, carrying an adjustable annular sleeve, provided with circumferential grooves, with an adjustable circular cutter coacting with the adjustable sleeve, whereby

both the line of trimming and the cutting-edge can be changed.

No. 301,202. Copying-Pad.—Leonard Bailey, Hartford, Conn.

No. 301,204. Paper or Letter File.—William B. Berry, Napa City, Cal.

A file or holder for papers, letters, cards, &c., consisting of a suitable board or frame adapted to be suspended in an upright position, and a series of spaced spring-wires forming brackets or frames secured to the board and bent upward at an angle therewith.

No. 301,205. Reservoir Penholder.—Leopold Beral Bertram, Bayswater, County of Middlesex, England. Patented in England, July 2, 1883, No. 3,268; in France, December 29, 1883, No. 159,462; in Germany, January 9, 1884, and in Italy, March 31, 1884, No. 282.

No. 301,241. Pin-Ticket.—Alonzo Kimball, New York, N. Y.

A pin-ticket composed of two layers of paper or other suitable material, and a wire or metal fastener, having a pointed straight shank, adapted to be driven by a hammer or mallet into the article to which the ticket is attached without passing through the same, the shank being integral with and set at about right angles to the head and passed through the lower layer of the ticket, and the head being inserted between the layers which compose the ticket.

No. 301,249. Perforating Attachment for Printing-Presses.—Hugo Lœwenbach, Milwaukee, Wis.

No. 301,255. Wood Binding for Books.—John D. Mets, Dubuque, Ia.

The book has its back and its side cover-piece made of wood, which wood portions are united by a flexible hinge-connection, fastened to the concave side of the back, and inserted along with the fly-leaf strip, straps, or bands of the book proper into recesses in the inner surfaces of the wood cover-pieces, and all confined together between the inner and outer faces of the wood cover-pieces by detachable portions of the same.

No. 301,295. Holder for Papers.—Chas. A. Spiegel, Philadelphia, Pa.

A holder for papers, &c., consisting of a swinging arm, a supporting-plate, and a spring, the latter bearing against the arm in an opening therein, so as to hold the same in operative and inoperative positions.

No. 301,310. Dotted-Pen.—Louis T. Weiss, Brooklyn, assignor of one-half to Charles Kruse, New York, N. Y.

No. 301,318. Advertising-Rack.—John N. Akarman, Somerville, Mass.

No. 301,335. Machine for Trimming Books and Papers.—Geo. L. Cady, Lowell, Mass., assignor to Mary H. Semple, same place.

No. 301,345. Support for Books.—Joseph W. Dupin and Thomas D. Morris, Seward, Neb.

The combination, in a book-support, of an annular base-plate provided with a transverse plate having a central pivot-pin, a horizontal rotary plate journaled upon this pin, parallel vertical strips pivoted centrally to the rotary plate, leaf-supports extending on each side of these vertical strips, and rollers attached to the leaf-supports, whereby they will travel upon the annular base-plate.

No. 301,352. Paper-File.—William H. Fox, St. Louis, Mo., assignor of five-eighths to Philip E. Green and Robert W. Green, both of same place.

A paper-file having a slotted hollow or

grooved post, the slot or groove extending the entire length of the post.

No. 301,368. Bill or Letter File.—Michael B. Hurley, Quebec, Canada.

No. 301,392. Reversible Blackboard.—Justus H. Rudolph, New York, N. Y., assignor to the Specialty Manufacturing Company, same place.

No. 301,418. Copying-Press.—Geo. W. Williams, Chicago, Ill.

In a copying-press, the combination, with a platen provided with a vertical standard formed integral therewith, of a spring adapted to have a downward pressure bearing on the standard, whereby the required pressure is automatically applied to the platen.

No. 301,439. Pounce-Box.—Frederick G. Ely, Chicago, Ill.

No. 301,452. File-Box.—Alpheus G. Lyne, Washington, D. C.

No. 301,455. Safety-Paper for Checks and Other Documents of Value.—Francis Nowlan, London, England.

An improved safety-paper for checks and other documents of value, composed as follows: First, of an upper sheet of ordinary chemical paper, bearing on the required portion of its under side thickly-charged lines or other devices of unalterable pigment in a soluble vehicle; and, secondly, in combination therewith, a backing of thin waterproof paper, so cemented as to leave free from cement the parts thereof corresponding with the pigment-lines, the object and effect of such partial cementing being to provide a series of collecting-ducts for the liquid used for removing writing from the face of the document.

DESIGNS.

No. 15,108. Type. Charles H. Beeler, Jr., Philadelphia, Pa., assignor to McKellar, Smiths & Jordan, same place. Term of patent seven years.

Satin Paper.

The newly-invented Belgian satin paper, which has the appearance of silk or satin, has a common paper as a foundation layer—what is known as calendered and sized book paper. The paper is printed with zinc-white ground in No. 3 varnish, in the regular way with aniline-colored asbestos dusted on it, in the same way as the bronzing is done in printing establishments; and when dry the sheets should be calendered. Of course, it would be best to run them through a calendering machine, but as these cannot be had everywhere, we may take a lithographic stone, polished as smoothly as possible, and with oxalic acid and water make this to a paper paste (the oxalic acid must be powdered before the water is poured onto it), and rub this mixture over the stone until it has the appearance of a looking-glass. This can be done best by using a large piece of cork, smooth on the bottom, and a piece of woolen cloth or flannel over it. With this dabbler rub the oxalic acid on the stone with the heaviest pressure one can give with the hands, in the same manner as in stone-grinding. When the printed and asbestos-dusted sheets are pulled through the press, the printed side, of course, to the polished surface of the stone, the asbestos will be by this pressure fastened to the sheet by its lengthy fibres, and receive thereby the satin-like appearance of which we have spoken.—*Lithographer and Printer.*

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE

NATIONAL PUBLISHING CO.

724, 726 & 728 Cherry Street, Philadelphia.

We claim the following advantages for the "National Contrasted Editions":

First.—The ONLY Quarto Bible containing the Contrasted Testaments, in which the Old King James and the Revised Versions are placed in parallel columns.*Second.*—Larger, better spaced, and more readable type in all cheap and medium grades.*Third.*—Latest and most attractive variety of side stamps.*Fourth.*—More Illuminated Plates and Illustrated and Descriptive features.

BINDINGS GUARANTEED EQUAL TO THE BEST. PRINTING SUPERIOR TO ANY. PRICES AS LOW OR LESS THAN OTHERS.

Luther's Illustrated German Bible,

Containing BIBLE DICTIONARY, History of the Books, Maps, Illuminated Plates and other beautiful features, making the most complete and best illustrated German Bible in the country at lower prices than any other edition.

Haydock's Approved Catholic Bible,

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

S. Ellsworth, publisher, Macon, Ga., is dead.

George L. Bean, stationer, &c., Omaha, Neb., has sold out.

Kate Coyle, dealer in stationery, &c., Baltimore, Md., is dead.

The *Tribune* Publishing Company, Denver, Col., has been attached for \$2,200.

Joshua Bills, newsdealer, stationer, &c., Southington, Conn., has assigned.

A. Boutin, fancy-goods dealer, Burlington, Vt., has sold out to Miles & McMahon.

Lewis & Bonner, publishers of the *Dispatch*, Lampasas, Tex., have been burned out.

Rohrabacher, James & Shearn, booksellers and stationers, Houston, Tex., have dissolved partnership.

E. D. Davies & Co., fancy-goods dealers, Milwaukee, Wis., have been closed by the sheriff on execution for \$15,000.

Edward Cook has retired from the firm of Jansen, McClurg & Co., wholesale booksellers and stationers, Chicago, Ill. The style of the firm is unchanged.

Richard H. Forestal & Co., paper dealers, Philadelphia, Pa., have effected a compromise with their creditors at 60 per cent., payable in 6, 12, 18 and 24 months.

Newcomb Brothers, dealers in paper-hangings, &c., St. Louis, Mo., have dissolved partnership. The Newcomb Brothers Wall-Paper Company has succeeded to the business.

M. B. Perine & Co., manufacturers of twines, &c., Doon, Ont., have dissolved partnership. Anthony Forster and R. T. Perine have retired from the business, and J. Pedder has been admitted. Style unchanged.

In the review of the career of the National Blank-Book Company, in last week's *STATIONER*, the omission of three words made a material change in the reading of the first sentence. The words "at present conducted," which were left out after the word "blank-books," should be inserted, and the sentence would then read: "The manufacture of blank-books at present conducted at Holyoke," &c.

A fire on Monday morning, at San Francisco, Cal., destroyed with its contents, the building occupied by the Schmidt Label and Lithographic Company and by Tatum & Bowen. The losses are as follows: The Schmidt Label and Lithographing Company, the largest lithographing company on the coast, \$200,000; insurance, \$120,000. Tatum & Bowen, dealers in machinery, type, presses, &c., \$15,000; fully insured. Wheelan & Tracy, bookbinders, \$1,000; fully insured. The total insurance is divided among forty companies. One hundred and fifty persons are thrown out of employment.

The body of Warner D. Hatch, of the Hatch Lithographing Company, No. 34 Vesey street, New York, was found floating in the ocean off Sandy Hook lightship on Thursday of last week. Mr. Hatch left his place of business on July 15, leaving letters saying that he intended to commit suicide by jumping from the steamboat St. John on her noon trip to Long Branch. His friends say that he had no cause to commit suicide.

Harvey & Co., ivory and wood turners, Philadelphia, Pa., have dissolved partnership. William Harvey has associated with him John Watts, Edward Osborn and Joseph Watts, and the new firm will continue under the style of William Harvey & Co.

Jacob Listman, paper-box manufacturer, Syracuse, N. Y., has sold out to Friedel & Soule, who will continue the manufacture of paper boxes and sample cases at 74 Clinton street, that city.

Sullivan & Schaefer, printers and publishers, New York city, have dissolved partnership. Joseph Schaefer continues the business under the same style.

William M. Prince, of the firm of Hamilton & Prince, dealers in wall-paper, Lincoln, Ill., has confessed judgment in the sum of \$812.

Ostrander, Muller & Huke, dealers in printers' machinery, Chicago, Ill., have been succeeded by Ostrander & Huke.

J. W. Davidson, bookseller and stationer, Ironton, Ohio, has sold out to B. W. (Mrs. J. W.) Davidson.

The liabilities of Frederick C. Pfeiffer, stationer, Philadelphia, Pa., are \$2,500; nominal assets, \$500.

Hunter & Bennett, booksellers and stationers, Devil's Lake, Dak., have been burned out.

I. F. Kimball, stationer, Hot Springs, Ark., has been burned out. Partly insured.

C. F. Clendenin, bookseller, &c., Galesburg, Ill., has failed.

The Bailey Toy Piano Company, Chicago, Ill., which was closed by the sheriff recently, is reported, had a capital stock of \$10,000.

The paper mill of Moorehouse Brothers, Philadelphia (Bridesburg), Pa., was burned on the first inst. Loss, \$20,000; insurance, \$33,000.

Thomas W. Price, of Thomas W. Price Company, Philadelphia, has sold his interest in that firm to John R. Senior, Harry V. Jones, Austin W. Bennett and Thomas R. Fort, Jr., who will continue the paper, envelope and card business as heretofore carried on at 505 Minor street, and who will settle all accounts of the late firm. The new firm will be known as the Thomas W. Price Company, and the ability of its members to administer to the wants of the trade has been already assured. John R. Senior is well known and the firm will doubtless show a progressive spirit in response to the demands of the times.

Frank B. Koues and George E. Koues, composing the firm of Koues Brothers, formerly Koues & Tobey, stationers and fancy-goods dealers, 110 Broadway, underneath the Metropolitan National Bank and No. 3 Cortlandt street, New York city, made an assignment for the benefit of their creditors on Friday of last week to Charles C. Bull, attorney-at-law, 8 Pine street, making the following preferences: Richard H. Bull, \$300; Edward P. Carpenter, John N. Carpenter, Mechanics' National Bank, E. G. Tinker, J. Burke Wolfe, H. E. Jacob, J. K. Wells, F. H. Weeks, Fred. H. Hamilton, E. W. Foster, H. A. Hurlbut, O. M. Bogart & Co., Donnell, Lawson & Simpson, J. & W. Seligman & Co., W. C. Burkinshaw, Metropolitan National Bank, \$11,500. The amount of the preferences are only given in the assignment in two cases, viz.: the first and last on the list, but they are said to aggregate about \$20,000. Both the assignee and a member the firm were called on by a *STATIONER* reporter, but nothing whatever could be learned of the affairs of the firm, except that the schedules would be filed in about two weeks. Neither of these parties could give any estimate of the amount of the liabilities, amount of preferences, when a meeting of creditors would be held or of any offer of compromise. The liabilities are said to amount to between \$60,000 and \$75,000. Among the merchandise creditors are Henry Bainbridge & Co., \$565. The insolvents' store has been

in possession of the sheriff under one or two small executions, which have been satisfied.

H. M. Creel, publisher, Devil's Lake, Dak., has been burned out.

J. D. Park, dealer in wall-paper, &c., Fort Worth, Tex., is dead.

George A. Cool, paper manufacturer, Syracuse, N. Y., has assigned.

J. S. Clower, newsdealer and stationer, Gatesville, Tex., has assigned.

M. A. Kopperl, bookseller and stationer, Lampasas, Tex., has been burned out.

H. C. Hansborough, publisher of the *Inter-Ocean*, Devil's Lake, Dak., has been burned out.

Thomas Gibson, the store man of Henry Bainbridge & Co., is taking a well-earned vacation this week.

The Homer Lee Bank Note Company states that it refuses to pay Crane & Co. for the postal note paper now in suit, because it was not according to contract and was rejected by the Government.

John W. Burke, of J. W. Burke & Co., and wife, of Macon, Ga., were guests of Alexander Agar this week. Mr. Agar took his visitors to Coney Island, and showed them the Elephant Bazaar, took a ride on the Switchback Railway and "merry-go-round," visited Bunnell's Museum, heard Levy in his cornet solos, "took in" the race-course, Manhattan and Brighton Beach, Gilmore's Orchestra, and, in short, saw all the sights worth seeing down there. The visitors returned to their Southern home on Sunday.

John B. Bangs, of the firm of John P. Morton & Co., publishers, booksellers and stationers, Louisville, Ky., and president of the Louisville Lithographing Company, died at New Albany, Ind., on August 2. Mr. Bangs was the eldest son of the late Nathan Bangs, Jr., of New York, and was forty-seven years old at the time of his death.

Henry Levy & Son, 477 Broadway, have on exhibit a large and superior line of gilt, bronze and plush novelties, adapted for table or wall ornaments. They are opening a large variety of new goods, suited for the fall and holiday trade to which they invite the attention of their friends.

M. M. Larabee, bookseller, stationer, &c., Emporium, Pa., was burned out on August 2. Loss, \$2,500; partly insured. Mr. Larabee reports: "I am yet in good shape, and will continue business."

H. L. Crocker and family, who arrived here about two weeks ago, are making a visit among their friends in the East, being at Springfield at latest accounts.

Hopper & Pettis, dealers in artists' materials, St. Louis, Mo., have dissolved partnership. W. W. Hopper continues the business.

Nelson & Kaup, printers, St. Louis, Mo., have changed their style to A. F. Nelson & Co.

Michael Bang, fancy goods dealer, Lawrence, Mass., has been attached for \$1,000.

Albert Beh, of Corlies, Macy & Co., is off for a short rest from labor.

Martin Seifarth, printer, St. Louis, Mo., is dead.

Singer Brothers, printers, Peoria, Ill., have sold out to Charles Garrels.

C. M. Hammond, dealer in wall-paper, Wilber, Neb., has sold out.

Wm. B. Magby & Co., newsdealers, &c., Denver, Col., have assigned.

Etris & Adair, paper-hangers, Philadelphia, has assigned to Albert B. Williams.

W. E. Hayden, bookseller, &c., Bardstown, Ky., has assigned to W. J. Dalmazzo.

G. P. Putnam's Sons, publishers, &c., have dissolved partnership, and have formed a limited copartnership, with special capital of \$25,000 to July 31, 1887.

The paper-stock store of Patrick Russell, No. 72 North Sixth street, Brooklyn, E. D., was damaged by fire to the extent of \$600, on Wednesday night of last week.

Leroy W. Fairchild is still engaged in getting out novelties in the line of whistles, fancy match-boxes, &c., which will be illustrated in later issues of *THE STATIONER*. He reports trade as quite active, and orders coming in fully up to previous seasons, if not somewhat in excess.

The assignment for the benefit of creditors was filed on Monday, in the County Clerk's office, by John J. H. Cokeley and William P. A. Cokeley, comprising the firm of Cokeley Brothers, dealers in paper bags, at No. 582 Hudson street, New York city, and John J.

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

H. Cokeley individually to Thomas M. Carr. Their preferences amount to \$32,655.17.

Chas. E. Rankin, blank-book manufacturer, San Francisco, Cal., is dead.

Large Japanese fans are now mounted as screens, with lacquered stands.

Mr. Tucker, secretary of the School-Book Syndicate, has gone out of town to get a little fresh air.

R. F. Seaman, of Van Antwerp, Bragg & Co., Cincinnati, sailed on the Servia last week for Europe.

E. M. Chumard, of Pittston, Pa., and R. M. Fulton, of Cincinnati, Ohio, have been in town during the past week.

The Tower Manufacturing Company has a new and revised price-list and catalogue, which is very complete in details and illustration.

Improvements and alterations are going on at William Mann's, 88 Maiden lane, which are of great advantage for the transaction of business.

Wayne's bookstore, Brooklyn, exhibits in its show-window a large frame, containing an infinite variety of monograms, well designed, and illustrating some fine color work.

In recognition of faithful services John C. Rankin, Jr., has been in the habit, for several years, of giving his small army of employees an afternoon and evening excursion. His third annual excursion of this character came off last Saturday, when promptly at 3 o'clock the steamer John Lenox left Pier 18, North River, foot of Cortlandt street, with a merry party numbering about 300 persons in all. Soon after the boat left the wharf the music and dancing commenced and was kept up until the boat reached Excelsior Grove, directly opposite Yonkers, about 5 o'clock. Music and dancing was resumed at the grove after the merry party had partaken of the refreshments provided for them in such a liberal manner by their genial host. A party of specially invited guests sat at a table loaded down with all of the delicacies of the season, and appeased their appetites with the good things placed before them, which were washed down with Mumm's Extra Dry just off the ice. Toasts were proposed and responded to by several present, including the number Mr. Rankin. Several songs were sung by a quartet, and the usual number of stories

were related. Among the invited guests were J. B. Swin, chief clerk of auditor's department, New York, Ontario and Western Railway; Louis Bender, cashier, New York, West Shore and Buffalo Railway, and H. L. Vanderburg, Stanfordsville, Dutchess Co., N. Y. Others present were Walter Sharks, H. H. Morgan, C. A. Prindle, E. D. Taylor, A. B. Neilson, Frank L. Evans, A. B. Bryant, J. O. Kurtzman, William Hoades (boom-a-la) and E. H. Kent. Representatives of THE STATIONER and *Paper Trade Journal* were also present. An account of this very enjoyable affair would be incomplete without mentioning that E. D. Taylor enjoyed the dancing to such a degree as to literally dance his collar off, but THE STATIONER man was equal to the emergency and provided him with a newly "biled" one. Mr. Sparks deserves thanks for his many attentions to the general comfort of all. The party reached the city about 11:30 o'clock at night and were unanimous that they had enjoyed a very pleasant excursion.

Liquid Cement for Coating Articles.

A liquid cement for giving a cheap and durable metal coating to papier-maché, plaster-of-paris, clay, slate, hardened cement, metal, &c., is prepared by two combined processes which complete one another. The first consists of the following ingredients, which are mixed in substantially the following proportions, viz.: No. 1, sixty parts powdered colophony; fifteen parts alcohol, spirit of wine, or pyroxylic spirit, ten parts turpentine, ten parts petroleum spirit, five parts silicate of soda—total, one hundred parts. The liquid thus prepared is then spread upon the object to be treated after the manner of applying a sizing, and is applicable to papier-maché, plaster-of-paris, clay, slate, cement, metals, &c., and renders them more firm and waterproof. When it is desired to give a metallic finish in imitation of metal to the object treated with the above composition, apply to its surface, before the composition has hardened, a dust of any desired metal—e.g., silver or copper, &c.—by means of a fine camel's-hair brush, after which the metallized object is dried in warm air or in the sun. In order that not only the metal dust may adhere, but

that also the metallic color may be retained and not oxidize on exposure to the air, the second composition or varnish is laid quite lightly on the metallized surface after the lapse of a few days. To prepare this composition No. 2, dissolve, first of all, one part of bichromate of potash in five parts of water, and mix then, say, eighty parts of distilled water, fifteen parts of Russian glue, five parts of the above solution, or five parts of chromate of alum and water (1.5)—total, one hundred parts. After the object thus treated has been dried for some days in warm air or in the sun it will be found that this layer or metallic surface will become so hard and firm that it will not be injured by exposure to the heat of the sun or to frost or moisture, being, in fact, weather-proof.

Porous and water-absorbing materials are rendered impervious by coating with the liquid cement No. 1.

To be more explicit, the entire metallizing methods herein described may be said to consist, first, of a coating of the composition first herein above described laid on the object to be treated; then in the spreading of a metal dust upon it (when it is desired to give a metallic finish to imitate metal) before the liquid is quite dry; and, lastly, in the laying on of the composition or varnish above described and designated as No. 2, for the protection of the color of the metal dust applied to the surface of the object.

Process of Making Crayons.

The objection to crayons as now made is that they soil the fingers and clothes of the users unless coated with paper or some other clean substance.

By a new mode of manufacturing crayons the outer surface is made so smooth and polished as to be free from this objection. To do this a metal block is taken as thick as the length of the crayon to be made, through which is made one or more dies with smooth surfaces of the size and shape of the crayon to be made. This block is laid on a bed-plate to close one end of the dies; and the composition of which the crayons are made is forced in a plastic state and under pressure into the dies, so as to completely fill the same. The composition is now allowed to set or harden until it becomes stiff enough to be handled without breaking, the time necessary for this varying somewhat with the composition used, and the crayon or crayons are then expelled from the die or dies by a plunger or plungers and dried in a kiln, or any suitable manner.

The operations of forcing the plastic composition into a smooth die and then forcing the crayon out of the die after it has partially set or hardened, render the surface of the crayon so hard and give it such a brilliant polish that the finished crayon can be used without danger of soiling the fingers.

The dies can be made of any metal; but Babbitt metal is preferred, as being the least liable to rust.

It is evident that the dies can be made of any size or shape, and that they can be made in any of the known ways instead of being cut through a solid metal block.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, AUGUST 7, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make *THE STATIONER* a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum, 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to *THE STATIONER* can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THIS is a phenomenal year—phenomenal in our experience of climate, trade and politics. The country generally is conceded to be prosperous, and yet everybody feels poor. All of our markets are overstocked, and buyers develop cautiously and with minimum requirements. Crops promise well; in some lines labor is actively employed, while in others it finds little to do. Everybody feels dull, and says that the times are dull, and yet no one despairs. What does it all mean? The fact is that people haven't yet got old enough to get over the scare of ten years ago and all of the subsequent incidents. The younger generation hasn't grown up so fully that it can tear the reins from the hands of their elders and ride recklessly where the latter are fain to dismount and pick their way. Speculative enterprises may excite longings, but they don't draw dollars as they used to and merchants are chary of hazarding their credits on tempting offers of large lines of goods without an equally large line of customers in view. These are good signs for the immediate future of trade. They indicate a valuable prudence and much as we would like to remark the hurry and bustle of commerce which puts everybody driving to keep up, we confess that we prefer to see that safety which is the outcome of prudence rather than to note hazards which depend for success on the outcome of things unseen, and which may result in ruin unforeseen. Small sales and plenty of them are better than a boom; small purchases and quick returns are preferable to large lines of goods and no cash. Don't you agree with us?

THE increase in speculation brought about largely by the increase in the so-called "Exchanges," where "futures" are bought and sold, has induced thought as to the desirability of perpetuating these institutions. A leading financial journal suggests the question: "Should the Exchanges be abolished?" And to this inquiry much serious thought is and should be given. It cannot be denied that marts of commerce where trading can be carried on and where buyers and others can meet frequently, or at their convenience, and do business which would otherwise be transacted at greater expense and inconvenience, have their advantages. They serve a very useful purpose, but whether the advantages compensate for the evils which follow in their train is doubtful. These evils are growing in extent and intensity, yet the same rule prevails here which is dominant in all of the transactions of life, and that is that excess follows success, or is indulged in by the weak, incompetent, reckless or vicious. It is the old story of intemperance in

another form, and if no restriction can be placed upon the wild and hazardous methods of speculation which prevail, there will be a culmination in the form of prohibition. This suggestion has its moral as well as its business phase. From the higher standpoint, we can well decry speculation on the exchanges, and all of its evil effects on the moral sense of the community; and in its more practical relation to the business transactions of life, we can see what injury has been, and can be produced, and what difficulties we are all brought to encounter, even when our desires and our practice are most remote from the operations of the Exchanges. It is a question of the hour; one which the public may be called on to confront later, if not now: "Should the Exchanges be abolished?"

Roundabouts.

BY THE TRADE LOUNGER.

There is quite a cheerful feeling after the rain. People greet the sunlight as if it was the forerunner of lively times. Well, the hope may be justified. There is a growing belief that it ought to be, and the "Lounge" is glad to observe that confidence seems to be quite general, although nobody, so far as he can learn, is disposed to do any "plunging."

The editor of this paper asks me if I know anything about the "Kazoo." Not, if I know myself. I don't want to display my ignorance; but if I was to imagine what it is, I should say it was one of those fellows who is running for President of these United States. Guess who!

Modestly suggesting the aforesaid, the editor says that he hasn't "heard anything so vile in sixty years." I thought that the editor was a younger man, but—as has been remarked—"looks is deceiving."

Getting down to things more serious, I want to say that there are a great many attractions for buyers to be found in the emporiums of the trade. Whether business is slow or active, there is always something new, and if time and space allowed, one could fill a small volume with memoranda of what is to be seen.

A great variety of ornaments are now made of ivory wood, a species of wood which takes different shades of coloring, and is susceptible of a polish equal to real ivory, being very hard. It comes in paper-knives, folders, inkstands, &c., the designs being very novel.

Plush goods will be largely in demand the coming season, notwithstanding the prediction of a leading manufacturer, a few months ago, that fancy leathers would take the place of plush in the manufacture of the general line of fancy goods handled by the stationery and kindred trades. But there is no disguising the fact that plush has grown a little stale, and that

the majority of goods of this kind have lost their novelty and have become somewhat staple in character. The newest designs in plush goods are very expensive—in fact, are made up and finished on a scale especially intended to gratify the tastes of those with plethoric purses.

* * * *

Bronze and brass clocks, though still very much in demand, are gradually losing popularity. They have been on the market several years, and have undergone many changes in design, until, it seems, manufacturers have puzzled their brains in vain to get up something new. The very latest things in brass clocks are those made in the form of a plaque, intended more for wall than mantel ornaments. But these have already been on the market a year. So it is quite evident that manufacturers have stretched their ingenuity in the matter of furnishing new designs, and this character of goods is getting played out.

* * * *

The newest things in clocks are now made of polished steel. The clock is set in a Roman shield or breast-plate, and decorated with implements of war used by the ancients, such as the battle-axe, spear, sword, &c. They form very picturesque wall ornaments.

* * * *

There is another thing to remark about fancy clocks. Mantel clocks also seem to be declining in popularity. Clocks covered with glass, which constituted a very common form of mantel decoration, are no longer novel—in fact, are quite out of style. But they will undoubtedly be more or less in demand for a long time yet; and, in spite of the fact that they have been in the market for years, they make very tasteful and pretty ornaments for the parlor or sitting-room.

* * * *

What a "daisy" the last issue of THE STATIONER was! Here comes in the editor again and says that is "slang;" that I am "dreadfully addicted to slang." He suggests that if I must use the expression, I must do it in a more refined way and say "Bellis." I have studied this up and can say that it isn't a "bellis perennis," anyhow! You should see that editor grin over that last suggestion, boys! Just look in Webster for "daisy," and you'll find it. I can't, for the life of me, however, see the difference between saying a thing in Latin or in good straightforward American.

* * * *

The paper makers met at Saratoga last week. They did the usual amount of talking, chose officers, and then adjourned to meet in New York in January. I am afraid that this means a "hoodoo." The new president is a New Yorker. I hope that he will start the machine up lively.

* * * *

A. Q. M. G. Ludington, U. S. A., 1139 Girard street, Philadelphia, is calling for sealed proposals to supply blank-books; bids to be opened September 1. He wants 1,250 company books of different kinds, 125 regimental books and 678 post books. Samples can be seen at the place named. Who will gather this in?

Answers to Correspondents.

S. C. W. wants to know who manufactures "Kazoo" and what jobber carries it.

Ans.—George D. Smith, 53 State street, Rochester, N. Y., is the manufacturer; Chas. E. Spier, 128 Chambers street, N. Y., is the New York agent.

S. Brothers want to know: 1. What manufacturers of paper-hangings are "not in the pool?" 2. What paper or magazine treats on the manufacture, &c., of wall-papers?

Ans.—1. There are two in Brooklyn, N. Y., and two in New Brunswick, N. J., but we do not know which is which there being three that we know of in each place. We give their names: Brooklyn; Bulmer & Watson, Robert S. Hobbs & Co., and W. H. Mairs & Co.; New Brunswick; Janeway & Carpenter, Janeway & Co., and David Hickman. 2. There is no publication devoted specially to this subject. The *Decorator and Furnisher* has a great deal to say about it.

---------------------------------------	-----

For decorative purposes modern prints are the best where there is plenty of wall space,

and ancient, being smaller, where there is little. As prints do not suffer by being exposed to the light, but are injured by being rubbed together in portfolios, it seems strange that engravings are not more often seen hung upon the walls. A *Melancholia* by Dürer, or a *Burgomaster six* by Rembrandt, is eminently decorative. It gives a room an air which some of the best modern pictures would fail to impart.

Among the visiting members of the trade in the city during the past week were: Albert L. O'Neale, of the O'Neale & Stevens Company, Little Rock, Ark.; H. S. Crocker, of H. S. Crocker & Co., San Francisco, Cal.; S. A. Maxwell, of S. A. Maxwell & Co., Chicago; George Courts, of Clarke & Courts, Galveston, Texas; M. H. Dickinson, of Kansas City; Mr. Wright, of Clarke & Co., Vicksburg, Miss.; C. N. Ayres, of Richmond, Backus & Co.; H. H. Sheperd, of Kansas City; James Youngs, Bridgeport, Conn.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, August 6, 1884. }

THE MONEY MARKET.—The condition of the money market has undergone no special change since the close of last week. Loanable funds continue in abundant supply at low rates of interest, and good borrowers have experienced no difficulty in supplying their wants. Commercial paper has been salable at lower rates, and first-class paper are reported to have been done as low as 5 per cent. discount. The stock market has ruled quiet and about steady. The fluctuations indicate that a strong undertone prevails. Government bonds are a shade lower. Railroad bonds generally steady. Sterling exchange has ruled quiet and about steady. Continental bills have sold lower.

THE PAPER MARKET.—Considering the unrestricted production, prices continue to hold their own very well—in fact, the tendency of the market is toward a little firmer scale of prices for print papers. Manufacturers have not visited the market to any extent this week, looking for orders. Stocks throughout the country in dealers' hands are not regarded as very large, and notwithstanding the very low prices at which paper of all grades has been selling, both dealers and consumers have been very conservative buyers for several months past, and it would not be surprising if there is not considerable restocking when the fall trade opens up. Prices show little or no variation at all during the week, and may be quoted generally steady.

THE STATIONERY MARKET.—The general condition of the market for staple goods, noted in detail last week, remains about the same. A number of our largest houses, which in former years were in the midst of an active fall trade, report business as several weeks behind the usual time. An instance of this kind will suffice to illustrate. One house during the first week in August last year booked an average of daily orders, covering twenty to twenty-two folios, while the average this week has been only about two folios. On the other hand, there are houses which report the aggregate of sales since July 1 greater than for the corresponding period of last year. The envelope manufacturers are said to be suffering greater depression now than at any other period of their history. They are said to be selling an envelope for seventy-five cents per thousand, the paper to make which costs nine cents per pound. The same quality of envelope has sold in more prosperous times at \$1.20 per thousand, showing that while the cost of the paper has only declined ten per cent, the price of envelopes has been lowered one-third. A prominent manufacturer says that the outcome of the present condition of the trade will be the survival of the fittest, or that the one who holds the largest bank account will hold out longest. In the line of fancy goods almost every branch is noticeably quiet, with the exception of gold pens and watch charms and cheap scrap albums.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

PAPER TRADE REVIEW.

Consists of Sixteen pages, size of this Newspaper.
EVERY THURSDAY, Post Free, \$3 a Year

Remit Greenbacks or Post-Office Order. EDITOR
AND PROPRIETOR **W. JOHN STONHILL.**

PAPER MARKETS:—Mill News—Trade Gossip—Samples of Paper—Technical Articles—Record and Illustrations of New Patents—Descriptions of Factories—Letters every week from Paris, Berlin, Vienna and other countries—Market Prices—Gazette.

STATIONERY:—Novelties Illustrated and Described—Technical Articles—Stationery in the Provinces—American Notes—Colonial Reports—Industries of the Trade—Reviews—Gazette.

PRINTING:—Doings of the Craft—Printing in the Provinces—Colonial Intelligence—Foreign News—Criticisms on Specimens—New Machinery—Type Specimens—Original Trade Technical Articles—Descriptions and Illustrations of British Establishments—Letters from our Correspondents, and every item of news concerning the trade during the preceding seven days.

The B. and C. P. and S. has corresponding representatives in North and South America, Canada, East and West Indies, Australia, New Zealand, Tasmania, India, China, Japan, Constantinople, Turkey in Europe and Asia, Russia, Austria, Germany, Italy, Spain, Holland, Belgium, and France; letters from whom appear periodically.

"The amazing industry and excellent tact of the conductor, Mr. Stonhill, is apparent even on a superficial glance over its pages."—*Muckellar, Smiths & Jordan (Phila.).*

"The recognized organ of the Paper and Printing Trades."—*Belfast News-Letter.*

"It has features of enterprise unusual to European Trade journalism."—*American Stationer.*

"The notes upon Trade cover the entire country and the Colonies."—*London Figaro.*

"There is an American touch about the paper."—*Leigh Chronicle (Eng.).*

"In the matter of printing it is PERFECT."—*W. and A. K. Johnston (Edinburgh).*

"The very best journal of its class that finds its way to our table."—*James D. Whitmore & Co. (N.Y.).*

Advertisers will see that it is better for them pay fair charges to a Journal which covers the whole of the commercial world, than to pay less sums for advertisements in journals whose circulation is limited to one country, one town, or possibly one parish.

The American Paper Manufacturers' Association.

The seventh annual meeting of the American Paper Manufacturers' Association was held at the Grand Union Hotel, Saratoga, on Wednesday, July 30. Little else was done than to elect officers. There was considerable discussion of the position of the different mills in their relations to the association, and it was decided to provide for twelve subdivisions, one in the West and one in the East for each of the classifications under the organization, a vice-president being chosen for each subdivision.

The officers for the ensuing year are:

PRESIDENT.

William H. Parsons, New York.

VICE-PRESIDENTS.

Adjournment was then made until the last Wednesday of January, 1885, the place of meeting to be in the city of New York.

Mann's Envelope Machine.

The machine known as Mann's Envelope Machine differs from others in all of its features. Its principle is entirely rotary, while others are on the plunger and folding-box principles. Another feature is the fact that the machine receives in the elevator several thousand envelopes, and they are fed up one at a time until all are run out of the machine, perfectly-made envelopes. In other machines the elevator is capable of holding only a limited number of envelopes, and frequent stops are made in order to replenish the supply. Three sizes of these machines make all sizes of envelopes, from the smallest to the largest, also all special sizes, anything square being made in them.

No pains or expense have been spared to make this machine as nearly perfect as possible, and although it was patented nearly a year ago, and was then in excellent working order, Mr. Mann has continued to make improvements upon it, and has now produced what is thought to be a perfect machine. Four sizes—from No. 4 to No. 7½—can be made on one machine, and the alterations from one size to the next can be made in about half an hour. The machine runs with almost noiseless motion, even at the high rate of one hundred and ten envelopes per minute, and the rapid speed does not seem to retard a single motion of any of its parts. It occupies

less room than any machine previously made, from the fact that the dryer into which the envelopes are delivered is elevated, and not placed beneath, as in other machines. All of its working parts are under the eye of the operator, and the least flaw in the motion of the envelope, from the time it leaves the elevator until it is delivered complete from the dryer, is instantly detected, and can be as quickly remedied.

Lamp wicks soaked in vinegar will not smoke.

Lithographic Crayons.

The important part that crayons take in lithographic printing is now generally admitted, but very few operatives know how crayons for drawing on stone are manufactured.

A very good authority supplies us with the following information: They are composed essentially of soap, wax, fat and lampblack, and are cast in the form of little cylindrical sticks. These are fastened in a porte-crayon or quill in the ordinary way. The above constituents, with various additions of shellac, mastic, &c., are fused together, and finally set on fire. The longer the mixture burns, the harder the product becomes. Three or four grades are usually made.

A grained lithographic stone is always required for a crayon drawing; that is, a stone to which an evenly roughened surface has been given by grinding it carefully with sharp sand of a uniform character. The asperities upon the surface of such a stone remove the substance of the crayon in quantity proportionate to the pressure employed by the artist. When finished, such a drawing appears to the eye exactly as the impressions on paper printed from the same stone are intended to look. The printing capability is possessed by a crayon drawing only after it has been etched with a very weak acid and gum water.

Lithographic Crayon or Chalk (Engelmann).

Yellow wax, 32 parts;

Marseilles soap, 24 parts;

Tallow, 4 parts;

Saltpetre, 1 part;

Lampblack, 7 parts.

Melt the wax and tallow first; add the soap gradually, and heat till the mixture catches fire of itself. Remove the vessel from the fire, and let its contents burn for about two minutes for soft, and three minutes for hard, crayons. Extinguish the flame, and add very gradually and carefully the saltpetre dissolved in seven parts of water. Heat is now to be applied with constant agitation, till the mass again takes fire, when it is to be instantly extinguished, and the lampblack added. Mix very thoroughly, and heat till combustion once more takes place, which is to be instantly checked as before. It now remains to test the quality of the crayon as to hardness and the quality of the point which can be given to it. A sample is poured out for this purpose, cooled, cut into strips, and left standing a day. If soft, further burning will harden the product; but it can only be softened by adding an extra soft quality of crayon. When satisfactory, the mass is melted and poured into suitable molds. There are many other recipes for making crayons, involving the use of resins, &c., but the above is the simplest and, without doubt, one of the best. Lemercier's formula is but a rehash of the foregoing, and the same may be said of Koen's, save that he does not set fire to his mixture, but prolongs the time of melting immensely to attain the hardening of the mass.

Graphic Processes.

Concerning the various methods of book illustration that are in practice, there is considerable public interest; and in view of that interest, the following summary is prepared of the principal graphic processes of the United States. They may be divided conveniently into two groups: those which give prints in many colors, and those that are limited to single color results. In the first group is lithography, zinc plate relief printing, and some photographic methods, such as artotypes and Bonnaudtypes. In the second group is included photo-engraving, wood-engraving, steel-engraving, etching, and the phototypic processes variously named albertypes, heliotypes, artotypes and phototypes. All of these processes have their respective merits; all can be used for book illustration, provided that the information is acquired of how to use them, where to use them, and what are their various limitations. Only familiarity with their technical possibilities can determine these questions satisfactorily, and the attempt here will be to give but a general idea of their value for certain kinds of work, judging by results to be attained by each.

In selecting a process or processes for illustrating a book, certain considerations always arise, the number of impressions, probable cost, and the character of the original sketch, drawing, or painting. In inverse ratio to the number of impressions should be the cost per single impression, and any process that does not come within this rule is practically of but little commercial value. In like manner the limitations upon the character of the original increase as facility is required in reproducing. That is to say, if the artist is given greater liberty with reference to colors, tints, tones, and effects, the difficulty of reproduction increases and the consequent cost. These facts are well known to bookmakers, and the chief aim of all improvements in process illustrations is to unite artistic freedom with mechanical cheapness. Cost, therefore, is a very fair scale on which to range the graphic processes.

Beginning with the polychrome group, the most expensive by far is chromo-lithography, an invention of many years, and open to anyone who cares to practise it. Three hundred or more firms are engaged in it in this country alone. As to its usefulness, therefore, there is no question, though artistically very little is accomplished through its means except by a few houses—lithography, like printing, being seriously crippled by competitive prices and the absence of art motive. The cost of chromo-lithography is mainly in the engraving by hand of the original on stone and the preparations for each additional color. The actual printing is not very much more costly than type printing. Lithography is not suitable for low-priced short editions of fine books where art is required, many colors being indispensable to good results. Its commercial usefulness is for editions of a thousand or five thousand where simple effects are sufficient and can be gained by the use of from two to six colors.

When the edition exceeds this number lithography in six colors finds a serious rival in

relief-plate printing. This involves about the same amount of work at first as lithography; for, instead of an engraving being made on stone, it is made on a metal plate, other plates being made from this as a guide. Each color requires a separate plate, but the plates once made the printing can be done at less cost than in lithography. The Kate Greenaway books were printed in this fashion at London, but their copies were lithographed here. The difference was apparent. The London books had a bright, hard, sharp, clean look, but the American book was thick, soft and oily—a difference always perceptible with chromo-typography and chromo lithography. For tint printing, sharp lines and clear effects chromo-typography has no superior among the graphic processes. *St. Nicholas* has printed several frontispieces in this manner, and the Baltimore and Ohio Railroad a number of advertising leaflets. The manner of cutting of the plates for chromo-typography varies, and much will be done in the future to lessen this element of cost. One of the most successful methods is known as the wax process which is admirably adapted to map work, or such work as the Kate Greenaway books. Besides chromo-lithography and chromo-typography there is practically nothing that comes within the polychrome group. Many attempts have been made but none are conspicuously successful. All invoke the aid of photography and at Paris one firm makes some exquisite reproductions in color by a process that it keeps secret. Here one establishment makes "photographs in color," known as Bonnaudtypes, by photographing by means of an ordinary negative upon paper that has been washed with tints of color approximating the natural color of the object. In this process, expense again is the chief obstacle, each print requiring special handling.

Of the monochrome processes there seems to be no limit. Continuously experiments are in progress that seek to overcome specific difficulties, and many fortunes may yet be made by the lucky inventors of superior methods. The oldest of them is wood-engraving, which involves great expense in the making of the original block. This once made, however, any edition can be printed. Therefore fine wood-engraving is adapted only to the long editions of a hundred thousand or more, and where careful printing is found. For bad printing and short editions, wood-engraving has had its day. Following wood-engraving is steel-engraving. This is costly, both in making the plate and in printing. With many it is a favorite method, owing to the sharpness and brightness of the lines, but as it never reproduces an artist's original truthfully, it is not popular with the artists. Etching, on the contrary, is growing in popularity, and has the supreme recommendation of involving little cost on the plate itself, *i. e.*, slight cost compared with the expense of a steel-plate or a wood-cut. The main cost comes in the printing, but as the plate soon is worn down, etching is rarely attempted for editions exceeding five thousand, and seldom for those as large. It is strictly an artistic process of illustration, and has engrossed the

attention of some of the greatest masters. As the next processes in the scale of cost come heliotypes, albertypes, artotypes, phototypes and heliogravures. These are followed in turn by photo-lithography and finally by photo-engraving.

Alum, dissolved in hot water, is excellent to clean brass ornaments.

SCHOOL BOOKS!

I have a large stock of SECOND-HAND SCHOOL BOOKS, sound and serviceable, at 60 per cent. discount. Also School Books, more or less shelf-worn, at SPECIAL BARGAINS. Also, FRESH STOCK as low as other houses in this city. Orders from the trade respectfully solicited.

— IMPORTANT NOTICE. —

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

MARCUS WARD'S BLOCK CALENDARS

The New Designs for 1885 are now Ready and in Travellers' hands.

THE SHAKSPERE CALENDAR. —A leaf to be torn every day from the block-tablet. For each day is provided an appropriate quotation from Shakspeare. The ornamental mount represents a scene from "Henry IV."

EVERY DAY CALENDAR. —Constructed on the same principle as the Shakspeare Calendar, with quotations for each day, from writers of all ages.

"DAY UNTO DAY." —Constructed on the same principle as the Shakspeare Calendar, but with emblematic mount, and a quotation from the Scriptures for each day.

Safety Paper.

This is an improvement on an invention based on the principle of printing the necessary lettering and ground on face of check or other form partly in permanent and partly in alterable pigments (or one of these), and cementing over the whole a sheet of transparent covering-paper. This invention, while affording protection against alteration, was found in practice to offer certain disadvantages, among which may be mentioned, first, the hazy aspect of the printed matter seen through the thin covering-paper; secondly, insufficient penetration of the writing ink into the substance of the check through the covering-paper and its cementing medium; thirdly, induration of the tell-tale pigment-lines or other device by their direct contact with the cement, and consequently decrease in the rapidity and extent of their blurring action in presence of the altering liquid. These and other minor defects inherent to the invention are said to be obviated by means which may be applied to any of the "chemical" papers now in use. It has been proved that such chemically-prepared papers afford in themselves no adequate security against alteration, but when used in combination with this improvement they are said to become absolutely unfalsifiable.

The details of this device operating, for example, on one of the known "chemical-check" are as follows: Along the back of such a check form, and in a position corresponding with the sum-space in front, rule or otherwise deposit a series of lines (or other device) in any indelible pigment having a soluble vehicle—say, for instance, finely-ground carbon or Indian red mixed to the required consistency in an aqueous mucilage. The ruling or other apparatus employed for applying such lines must be capable of depositing on the paper such a quantity of pigment as will insure visible flowing when exposed to the ink-destroying liquids applied to writing on the face of the check. Simple surface printing or ruling would not carry sufficient pigment to produce this effect with certainty. Over the back of the check thus treated, cement a thin sheet of water-proof paper, the adhesive employed for this purpose being so distributed by blocks, rollers, or otherwise to avoid contact with the pigment-lines. In other words, the plain surfaces only will be joined together, leaving uncemented the parts corresponding to the pigment-lines, which, adhering only by their own mucilage, constitute a series of reservoirs or ducts, into which the liquid used for altering the writing on face of the check must necessarily percolate and accumulate in contact with the lines, its escape being barred by the waterproof paper backing. As a precaution against separation of the superposed papers, the compound sheet may be embossed over any required portion of its surface—say, for instance, round its borders or at its corners. Any liquid applied to the face of a check prepared as above for the purpose of removing the writing thereon must first, while destroying this writing, give rise to visible reaction on the chemicals contained in

the paper. To eliminate the traces of this reaction, a prolonged application of appropriate liquids becomes necessary, and before such liquids can possibly produce their specific effect they penetrate into and collect in the above mentioned duct-spaces, from whence, as already stated, their escape is barred by the impervious paper backing. Once there they commence and continue to exercise a solvent action on the pigment-lines, which, being thus broken up, produce a constantly-increasing blur between the superposed sheets, beyond reach of removal by any chemical or other means.

Inks of different nature are commonly employed for printing the ground and lettering of so-called "safety-checks," and it has even been proposed to make bank-note and check forms of two sheets of thin paper cemented together by gutta-percha, india-rubber, and other like materials; but these processes have only an apparent analogy with this method. No surface printing or ruling, whatever may be the number of different inks employed, can have sufficient body to produce a blurring irremovable by careful manipulation. The interposition of an impervious cement over the entire juxtaposed surfaces of two sheets of paper, while providing, as originally contemplated, against the splitting or photographing bank-note or check, would facilitate, instead of obstructing, the removal of writing-ink from the face, and is totally different from this process, of which an essential particularity is to leave free from cement the parts of the juxtaposed surfaces corresponding with an inclosed pigment, so as to provide for the free flowing of the latter in presence of liquids.

Quads Within Quads.

This folio in miniature, of some 160 pages, measures only one inch in width by one and a half inches in length. This cut is a facsimile of the title-page. According to the introduction, "quads are little metal blanks used by the printer for filling up gaps; they are not of much account, although he cannot get along without them—hence the application of the word to printers' jokes." "Quads" is a collection of those printers' jokes which for nearly a dozen years have provoked smiles and laughter from readers of the *Paper and Printing Trades Journal*. It is

M. L. N. folio.]

Quads

For
Authors, Editors
& Devils
edited by
AND: W. TUEB.

1884

LONDON:
Field & Tuer,
Simpkin, Hamilton.

printed in pearl type on hand-made bank-note paper, and is a facsimile in size, paper, type and binding of Peele's "Tale of Troy" in verse, published in 1604. As an amusing typographical curiosity, it will be appreciated both by printers and the public at large.

This little volume, or rather two volumes in one, is a book and a box, or rather two books, and a box, and yet after all not a box at all, but a book, and only one book. The explanation of this paradox is simple. "Quads Within Quads" is a larger edition of "Quads" bulked out at the end with extra leaves of paper fastened together and hollowed out in the centre, and in the little nest so formed reposes a copy of the miniature or midget-folio "Quads." The extra leaves at the end, and those on which the body of the book is printed, have rough edges, and in appearance are not distinguishable. When the volume—which, by the way, is protected with stout vellum binding with silken strings for preventing its tiny relative going astray—is closed, the extra contents would never be suspected.

Gold may buy nearly every thing in this world except that which a man wants most—viz., happiness.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet. ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.---NO. 7.

NEW YORK, AUGUST 14, 1884.

WHOLE NO. 477.

Correspondence.

NEW ORLEANS NEWS.

[CORRESPONDENCE OF THE STATIONER.]

NEW ORLEANS, La., August 8, 1884.

If it were not for the great expectations ahead and the vast trade looked forward to this fall and winter in New Orleans, there is no telling what effect the long-continued drought in trade generally would have, for there is no denying the fact that this has been the most trying summer ever experienced in the Crescent City. Together with the great Carriere Bank failure, with its two millions of liabilities, and assets which, when realized, will bring to the confiding depositors 15 or 25 per cent., there have been many other suspensions, assignments, &c., all coming upon us at a time when we are the least prepared. Confidence is shaken, everybody is afraid of everybody else, and as for obtaining help from the banks, that is a thing of the past, and will continue so until the crops begin to move. It is perhaps, however, the best thing for our financial institutions that this rigid course has been pursued, and the conservative manner in which the banks have acted has kept them with heads above water until this time, and it will have the effect to pull them through one of the most trying ordeals that they have ever experienced. But the failure of many houses to realize on securities, or to get their bills receivable discounted, has caused much annoyance to many good merchants. I know of several dealers here in New Orleans, and some among the stationery trade, who have now locked up in their safes notes and accepted drafts due in 30, 60, and some 90 days, which, in ordinary times, they could readily have discounted at 8 per cent. per annum, and could that accommodation be obtained now, they would have ample funds to pay every dollar they owe without touching their capital or sacrificing their stock, as some have had to do.

Matters will soon brighten up, however, and New Orleans will experience, this fall and winter, the largest and most thoroughly lively trade it ever has experienced, as even now the good effects accruing from the great World's Exposition are being felt; but when that shall

have fully opened and the millions of visitors from all parts of the world are in our midst, then will be seen a truly brisk trade in all lines of industry. This enterprise will not only benefit our great city, but all sections of the sunny South will receive such a boom from it as to put it where it properly belongs, for, indeed, a country abounding in untold resources such as this, should be very much farther advanced. All that we want is enterprise and capital; everything else is here in abundance. Iron, no end to it; coal, worlds of it; cotton, wheat, sugar, &c., enough for the whole earth; so send along a few live Yankees with fat purses and they will find it an easy matter and no risk to soon become millionaires.

In a recent stroll among the stationery and paper houses in the city nothing of special interest could be gleaned. They all report trade as having been dull, but much improved this month. E. C. Palmer & Co., who are the leading and only strictly wholesale and importing stationery and paper house here, have to report a healthier and steadily improving trade. They are making some extensive improvements about their large store houses on Camp street, and when these improvements shall have been completed, their establishment will present a very chaste appearance. This is a live, wide-awake house, and it has the largest trade in its line in the South. It ships goods to every Southern State and into Mexico. Its head salesman, Joseph Reynolds, has a very desirable trade in every large city throughout Texas, Arkansas, Georgia, Alabama, Mississippi, Florida and Tennessee. E. C. Palmer & Co. have their shelves filled with a very complete and well selected stock of fancy and staple stationery, while the lower floors and warehouses fairly groan under the weight of the immense piles of flat and ruled papers, envelopes and printers' supplies.

Julius Meyer, who is an "old timer" in the trade, enjoys the pleasure that a good business brings a man. He is now off on a pleasure trip in Europe, where he has been for two or three months, but is expected home again early next month. He has a fine stock of goods, and is ready for the fall trade, which his head man now in charge says is *en route*.

F. F. Hansell goes North next week to add to his stock a line of holiday goods, which so far this year he has not ventured into very

deeply. Mr. Hansell is a very enterprising young merchant—the youngest in the New Orleans stationery trade, but to take a glance at the mammoth stock from which he wholesales as well as retails, one would imagine him to have a very old and experienced head on his shoulders. He recently married the daughter of one of our most prominent cotton factors, directly after which he took a long trip through the Canadas. The "old reliables," Dunn & Brother and T. Fitzwilliams, more than hold their own and they are both making some wonderful improvements in lithographing, which both firms make a specialty of. The heads of these firms are men of sterling integrity, and it may be said of Mr. Dunn, that as a "trader" he has no equal, for what man can boast of having a job of work removing a large press to the upper floor of his store for six dollars—a job of work upon which the lowest bid put in by men regularly in that business—removing safes, presses, &c.—was seventy dollars. Mr. Dunn employed five negroes, and acting himself as superintendent, had the whole thing done for six dollars, thereby realizing a net saving of sixty-four dollars, a good day's profit.

A. W. Hyatt and J. S. Rivers both seem busy with their large city trade. These gentlemen are among our very best stationers and enjoy the confidence and esteem of all who know them, and their respective firms are steadily growing as the result of liberal patronage showered upon them.

The same may be said of James Buckley, who has, perhaps, the best share of the "commercial" stationery trade here.

W. E. Seebold and J. C. Eyrich, who are the leading miscellaneous booksellers, are preparing for a large trade this season. Each keeps a very extensive stock of reading matter, poetry, fiction, school-books, &c., together with the finest line of choice and handsome stationery for the retail trade.

G. T. Lathrop has gone to Texas prospecting while his stock here is being sold off at cost by the receiver, into whose hands it went some months ago.

The printers and lithographers are all busy, the Southern Lithographing Company especially so, having received a liberal share of the Exposition work, and the execution displayed on all of their jobs is the handsomest ever

brought out by any concern here, and will compare favorably with any work of a similar nature made in this country. The company has made many thousand large lithographs of the Horticultural Hall, which have already been distributed over the world, and it will in a few days have the picture of the main building finished. This is on fine paper and measures three by four feet, and gives a very vivid idea of the building as completed. This main building, by the way, is the largest building in the world, it being about one thousand five hundred feet long by one thousand wide, and covers an area of thirty-five acres, all under one roof, and the exhibit space is over a million and a half square feet. Some idea of the enormity of this structure can be had when I tell you that it is eight times as large as the Capitol at Washington city, and thirteen acres larger than the main building at Philadelphia. So you see we are going to have a "sure 'nough show," and we want all of our Northern friends to come and see us. They will find us mighty glad to see them, and they will all have a good time. Don't forget your buffalo-robies and ulsters, for you may need them.

CRESCENT.

CINCINNATI COLATURES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, August 12, 1884.

This week Cincinnati comes out with a little better showing. A comparison of the returns of the Clearing House exchanges exhibits Cincinnati as one among the few cities that exhibit an increase of exchanges in comparison with the corresponding week last year. Kansas City, Hartford, New Haven, and one or two other cities make up the list. The increase is small, to be sure, but it is an increase after all, and that is something. Another something for those who prefer looking at the bright side of things, is the fact that in those cities that show a decrease of exchanges, the decrease is very slight.

But on every hand in Cincinnati one hears complaints of the times. It certainly must be another one of those seasons, the like of which nobody ever saw before. You know the dull-est season the oldest inhabitant ever saw has a fashion of coming around every few years. It is queer how the dull season that is last to come is always called the dullest. Men talk about it as a jockey does about a horse that he wants to brag up. In fact, they get in a sort of a way proud of the very superlativeness of the dullness, and won't admit that anything of the kind ever approached it.

The wayfaring man who passes through Cincinnati will not fail to take notice that men eat and drink and take their amusements regularly as if there were no particular business troubles to disturb them. But right here is a fact or a phenomenon which does prove that the times are really dull, and that everybody feels their pinch more or less. That fact is attested by the ubiquitous keeper of the corner grocery. It is not the groggery but the human feed-store for which the term "grocery" is used in this instance. "Well, what does the keeper of the corner grocery say?"

Why, he says everybody is buying close, more especially the well-to-do people. The poor buy while their money lasts, and, of course, buy small, but the well-to-do buy close out of a spirit of economy, a disposition to provide for emergencies and to keep up the reserve funds. This grocery-keeper's testimony is the most convincing that we have had that times are really dull. You never know just exactly what weight to give to the howls or to the exultation of a dealer. He is alike liable to howl or to exult, according to the motive that impels him at the moment, whether he is conscious of it or not. You may make up your mind, however, that there is something in it when all of them howl in concert. Set it down in that case that they are suffering from a common agony. In Cincinnati the tune is all one way—it is mournful. Again, it is pretty much all one other way—it is hopeful. Nobody settles down in a heap and gives up. The struggle goes on. If things get no worse, then the change that is sure to come will be for the better. There always has been "a good time coming," and for the good time to be coming is not likely to go out of fashion.

It is not the Harpers who are building that \$100,000 house at the north-east corner of Fourth and Elm streets in this city, but some Cincinnati man, who modestly keeps in the background and lets H. W. Derby occupy the foreground. The Harpers' experiment with a depository here was not satisfactory, or they would not have withdrawn it. H. W. Derby was as good a man as they could have selected to make it a success, and it seems that he did not make it go.

Robert Clarke & Co. have so complete a book shop, and in connection with it so great a printing house, and outside of this they have so extensive a field of trade in such a variety of products, that they do not feel a spell of business stagnation as severely as houses having smaller fields of trade and more limited resources.

The old established houses in Cincinnati weather storm and wait through a calm with better success than do those which have entered the field more recently. There are several dealers and manufacturers of stationery here who belong to this class, and they seem to be working along very well.

By the way, there are very few Cincinnati houses which have their men on the road now. Some of the exceptions to this rule are accused of selling at ruinous prices.

With the exception of a good rain two weeks ago, the weather has been rainless in a strip of country a hundred miles wide, through the middle of which the Ohio River flows. This lack of rain has already set corn back very seriously. The most seasonable weather from now on could not make a good corn crop, though it might prevent a total failure.

Further back from the Ohio River the season has been highly favorable, and crops are immense. If only some of that great February flood, in which so much good rain went to waste could be poured out on the parched fields, it would gladden many a heart.

PRINCE WILLIAM.

BOSTON BEANS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, August 12, 1884. }

Tally another for Boston! We have had an earthquake. True, it was not much of an affair, but then, as earthquakes are so very uncommon in this country, we want all the credit for this little one. Sunday afternoon, a few minutes after two o'clock, the good people of the Hub were somewhat startled by the mysterious phenomenon. For a few seconds things seemed unnatural; inanimate objects seemed to be possessed of the devil, and started to move about on their own account. Just what the matter was very few at the time realized; but, by comparing notes and by investigation, the truth revealed itself—it was an earthquake, a real, live earthquake.

Though trade generally is somewhat quiet, as is expected for this season of the year, indications are very favorable for a good fall business. Even at this early date a good volume of trade is doing in school supplies, and many jobbers whose doors are ornamented with a placard, "This store closes at 5 P. M.," are forced to labor behind the screen for an hour or two later.

The text-book business is, however, somewhat demoralized, taken from the jobber standpoint. Publishers may look at it in a more consoling light. With the many thousands of school children throughout the State, whose wants were heretofore supplied by the local dealer, quite a business was done; but owing to the new law of "free text books and supplies," each school district is buying its own supplies in bulk. This, of course, shuts out the numerous local dealers from participating in any profit on these goods. The leading city jobbers, however, did think that if they could not sell the retail trade, they would sell the school committees. In this they find their mistake, and no little complaint is heard. The text-book publishers are in the field, and, disregarding the claims of jobbers, are soliciting the trade direct from the towns, and are even offering the customary trade discounts—1-6 off. Jobbers, of course, can't compete against such odds, and so they are enjoying very little of the school trade. Some publishers are more considerate than others, and their agents are permitted to take orders at 1-6 off, with a promise of a further rebate to them.

By this plan, no more goods are sold, nor are higher prices obtained than if the trade was left in the hands of jobbers. Nor will it benefit the publishers in general, though it might some in particular. Possibly ere long some of the members of the New York syndicate of book publishers will become dissatisfied with the results, and then the rates will be further cut.

In miscellaneous books, Charles H. Whiting reports a very fair trade for the season.

The demand for Christmas and birthday cards is beginning to open up. H. H. Carter is jobbing them out by the thousands. Some time since Mr. Carter secured a million card

(Continued on page 222.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

This Trade-Mark on every Box.

Trade-Mark on our "DISTAFF" Brand.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 220.)

in one lot. This lot embraced cards of every description, and many of them are from the most celebrated publishers of this country and Europe. These cards are now being offered in job lots to suit, and at ridiculously low figures. They are of good quality and well suited for the general trade. This house is also the New England agent for the double-roll calendar, manufactured by C. A. Hack & Son, of Taunton, Mass. Thousands of this calendar were sold last year, and from the orders now being taken for the '85 calendars, they must certainly have sold readily to consumers. These double-roll calendars are very pretty and neatly gotten up in colors. Each month of the year gives illustrations specially appropriate, many of the pictorial presentations being in a humorous vein.

The demand for King's office pens still holds good; hardly a mail arrives but what brings orders for larger or less quantities. King & Merrill are also doing a fair share of the season's business in general supplies.

What few weeks are still remaining of the summer are being utilized by the trade for a little recreation, and many faces which have grown familiar are being missed from their accustomed places.

A. L. D.

PATENT * GROOVED * CHECKER.

The most practical Checker ever made, easily held by the fingers, and will not slip. Sample set by mail, 15 cents. The Trade supplied.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

George S. Flory, bookseller and stationer, Pawnee City, Neb., has sold out.

Shaw & Blaylock, printers, &c., Galveston, Tex., have dissolved partnership.

James M. Dean, dealer in pictures, frames, &c., has been closed out by the sheriff.

T. H. Dawson, publisher of the *Times*, Orland, Cal., has sold out to V. A. Ryan.

Fields & Gaston, publishers of the *Blade*, Meridian, Tex., have dissolved partnership.

Frederick C. Pfeiffer, stationer, &c., Philadelphia, Pa., has been sold out at assignee's sale.

J. H. Williamson, dealer in wall-paper, toys, &c., Chester, Pa., has been closed out by the sheriff.

Pehrsson & Kaufman, dealers in picture-frames, Rochester, N. Y., have made an assignment.

Bowlsby & Zelfiff (St. Louis Publishing Company) publishers, St. Louis, Mo., have assigned to R. H. Kern.

Harvey & Bickerstaff, paper manufacturers, Wellsburg, W. Va., have dissolved partnership, and have been succeeded by Harvey Brothers.

John Holland, Cincinnati, has a new trade price-list of gold, silver and gold-mounted rubber pen and pencil cases, gold pens, &c., which the trade are invited to send for.

Fred. W. Horn, of Koch, Sons & Co., who left here with his family for Europe a short time ago, seeking to derive some benefit to his health, which had become somewhat impaired, is at Carlsbad, the celebrated German resort. His friends are hopeful that the visit may restore his health.

George A. Raisbeck, the well-known and popular salesman, who has been identified with Phil. Hake's business for a number of years, is still absent on his annual vacation, and at present is resting at Woodsburg, L. I. T. J. Cochran, another of Mr. Hake's corps of salesmen, is also in the country, taking a well-deserved relaxation from business.

Nelson M. Sheffield, advertising agent at No. 13 Park row, made an assignment on Tuesday to Geo. C. Hume, giving preferences for \$12,745, as follows: L. S. Lawrence & Co., \$2,495; North River Bank, \$8,477; Charles St. John, \$950; Standard Cure Company, \$822. He came here from St. Louis about five years ago. Mr. Hume, the assignee, said he could not give any estimate of the assets or liabilities, and the cause was the failure of others to pay their obligations to Mr. Sheffield.

The family Bibles recently issued by the National Publishing Company, Philadelphia, in fine morocco and levant bindings, are said to be works of art, surpassed by none and equaled by few binding establishments in the United States. This company is fast securing a wide reputation in the trade for artistic and beautiful workmanship at low prices.

Keen & De Lang, ink manufacturers, Chicago, have discovered a new process by which the French copying inks can be made at a great reduction from former prices, and at their factory in the suburb of Chicago a large batch is now being put up for fall trade. The stationery trade will, it is said, be surprised to know of the prices for these goods.

The September number of "Cassell's Family Magazine" has a suggestive frontispiece to go with the story "Which shall it be?" This magazine is one of the best of current serials, and this latest number is one of its most interesting issues.

Bogue, Brault & Co., dealers in fancy goods, Montreal, Que., have offered their creditors fifty cents on the dollar, and their stock is advertised for sale by tender.

W. W. Edgar, bookseller and stationer, Pittsburg, Pa., has made an assignment, and his store has been closed by the sheriff.

Phillips Brothers, printers, Baltimore, Md., have dissolved partnership; Wm. H. Phillips continues under the old style.

Mercer & Marner, publishers, Cheyenne, Wyo., have dissolved partnership; A. S. Mercer succeeds.

Locke & Patton, paper dealers, Terre Haute, Ind., have dissolved partnership; W. O. Patton retiring.

J. L. & G. Marsh, publishers, Durango, Col., have dissolved partnership. J. L. Marsh continues.

A. G. Lovell, newsdealer, &c., Hyde Park, Mass., has sold out to D. W. Mason.

Scott & Cook, publishers of the *Democrat*, Texarkana, Tex., have sold out.

F. D. Biggs & Co., dealer in bronze powder, New York, have dissolved partnership.

"Dr." Hogan, publisher of the *Plaindealer*, Reno, Nev., has suspended the publication of that paper.

H. Senior, wood engraver, has removed from 75 Nassau street to 10 Spruce street, this city.

E. F. Sanders & Co., fancy goods dealers, &c., Stockton, Cal., have been succeeded by O. H. Close.

James F. Weston, 32 John street, New York, engraves seals, coats of arms, initial letters, monograms and society devices of all kinds. Mr. Weston is an adept in his art.

Zed S. Hall, New Westminster, B. C., wants publishers' and stationers' lists, catalogues, &c. Having got out to British Columbia, Mr. Hall seems to be determined to make trade lively in that section.

Among other visiting members of the trade in the city this week were S. T. Field, of S. T. Field & Co., Lawrence, Kan.; R. S. Wetmore, Selma, Ala.; Mr. Barron, of Schwartz & Barron, Bethlehem, Pa.

The Powers Paper Company is introducing a new and cheap line of ornamental wood desks, consisting of silver-gray wood, black walnut, walnut burl, rosewood, ash burl and stamped ornamented in various sizes.

C. B. Hewitt & Co. are handling a very popular line of building and roofing papers and claim to keep the largest variety of any concern in the country. These embrace the no-noise felt, westphalia and cottage sheathing, Quaker sheathing, Handy roofing felts, &c.

The schedules in the assignment of Hand & Ellsworth are so far completed that the assignee will very probably file them in the office of the Clerk of the Court of Common Pleas to-morrow or Saturday, and early in the coming week a meeting of the creditors will be held, notices to which effect will more than likely be sent out to-day.

Among the visiting members of the trade in the city during the past week were T. J. Kellum, Topeka, Kan.; Arthur Peter, of A. Peter & Co., Louisville, Ky.; J. J. Saxon, representing W. A. Wilkins, Waynesboro, Ga.; J. W. Crowds, of the J. W. Crowds Drug Company, Dallas, Tex.; Mr. Lloyd, of Lloyd & Adams, Brunswick, Ga.; John F.

CATALOGUE for Fall Season,
Now Ready.

357 VARIETIES. } Finest Line in
the country.

W. H. HASBROUCK,
536 & 538 Pearl St., New York.

Lewis, of J. F. Lewis & Son, Montezuma, Ga.

L. H. Mace & Co.'s new fall catalogue of foreign goods is out and ready for the trade.

J. H. Wills, lithographer, San Francisco, Cal., is advertised to be sold out by the sheriff.

M. Norton, stationer, Scranton, Pa., was in the city this week, and reports trade good in his section.

Chas. E. Brown, representing Estes & Lauriat, publishers, Boston, Mass., was in the city this week.

Searing & Hyde, stationers, Exchange place, New York, have just made such additions to their store as will greatly enlarge their working room for the transaction of business.

The Globe Files Company's new catalogue is in press and will reach the trade in a few days. Buyers of filing devices will do well to await its arrival. C. M. Ward, the New York agent, reports business exceedingly good for this time of the year.

Butler & Miles have been unable to effect a settlement with their creditors upon the basis of seventy cents on the dollar, and the assignee is selling out the stock and closing up the business, and the probability now is that the creditors will not receive fifty cents on the dollar.

Milton Bradley & Co., Springfield, Mass., have just issued their 1884-85 catalogue of games, toys, industrial amusements and novelties. It has a handsomely chromo-lithographed cover, and contains a number of col-

ored illustrations, besides engravings of the different toys and novelties presented. The trade should send for it.

"The Fallacies in 'Progress and Poverty,' in Henry Dunning Macleod's 'Economics,' and in 'Social Problems,' with the Ethics of Protection and Free Trade, and the Industrial Problem considered *a priori*," by William Hanson, Fowler & Wells Company, publishers, 753 Broadway, is a bold attack on leading points and arguments made by Henry George in his well-known "Progress and Poverty" and "Social Problems." Mr. Hanson is as radical as the land reformer himself in his views of the fundamental changes necessary to social progress, and has a warm sympathy for the purposes of Mr. George, but his sharp logic brings into clear light the errors that mar the reasoning of the books above named, and shows how inconsistent and impracticable are the methods of reform advised therein. For instance, he analyzes Mr. George's theory of interest and "Law of Rent," and also his remedy for landlordism, and points out their unsoundness and injustice in a concise fashion that everybody can understand. The same vigorous handling is marked in his consideration of the work of Henry Dunning Macleod, "Economics."

He that wrestles with us strengthens our nerves and sharpens our skill. Our antagonist is really our helper.

The fruit of liberal education is not learning, but the capacity and desire to learn; not knowledge, but power.

What is a Trade Journal?

We were lately shown the advertisement of a new publication, which it was stated would be a *Trade Journal*. It is not necessary to say to what particular trade this "journal" was to attach itself—the points we are about to refer to would arise whatever trade was concerned. This new venture was to be "*given away*" entirely; it was to have a "guaranteed circulation" of 6,000 copies, and, as it was alleged that certain other papers relating to the same subject had a smaller circulation, the projector of the new paper maintained that his would be the superior advertising medium, in the arithmetical proportion of the numbers.

Now, we must say there is a *fallacy* in this. What is a journal, an organ, or whatever it may be called? It is a publication having regular and intermittent readers who are subscribers or occasional purchasers. The editor addresses these people. They form his constituency. He or his paper holds its own by the suffrages of the readers. If they were not interested in it they would not buy it. It may be said: But there are many papers supported by their advertisers. Exactly so; but *why* do people advertise in them? Simply because they have readers. So it all comes to the same thing.

A paper that is simply "given away"—thrown at people—pitched down by the postman on the desks of, it does not matter how many people—is not a journal at all. Unless there is a constituency—a body of people who voluntarily read, and an editor responsi-

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

ble for providing them with reading matter—there are none of the *elements of journalism*.

Political parties have sometimes tried to further a cause by starting a "paper" to be given away. The expedient has always been a failure. It has been invariably found that people are not influenced by what is thus presented to them.

If no one accepts a particular journal as to some extent their "guide," or their "philosopher," or their "friend," then the journal has no existence—it is virtually defunct. This is a fact that should never be lost sight of. It is *not the number of papers printed*, it is the number read; as in a battle it is not the number of shots fired, but the number that find their mark, that are to be taken into account.

The prospectus to which we referred goes on to say that it will have a circulation of 6,000, implying that such a circulation will be twice as valuable to advertisers as that of a paper that has only 3,000 circulation, or six times as valuable as one having only 1,000. Herein is contained *another fallacy*. The number printed does not coincide with the numbers read. Of the millions of handbills distributed yearly in the streets of our large towns, how many are read? And of those that are read, how many are acted upon? So in regard to a periodical—number is *no criterion* of the advantages offered to advertisers.

This paper is to be maintained entirely, then, by its advertisements. This suggests another view of the case. It is simply a collection of advertisements; not a journal. It is a combination of prospectuses printed together to form a pamphlet—but is no journal in any sense of the word. On this principle, any six firms who issue each one thousand circulars, might combine and issue a "journal," consisting of the six combined prospectuses. Or, a larger number of people might *do the same*. The principle is alike; but there is no trade "journalism" involved. A pamphlet of this kind would not necessarily be of *value*, nor be *respected*, nor have *influence*—except through the force of the names included. The advertisers give the position to the "journal;" not the journal giving effect to the advertisers. This is altogether an inversion of the natural order of things.

It is a good motto, "Never give advice unless you are asked." A paper of this kind

stands in this position: it comes forward uninvited and says, "You should do this, or avoid that; buy this, leave alone that; this is good (something advertised); that is bad (something not advertised)." The natural reply is: "No one asked your opinion; I am accustomed to read my own paper. I don't want your irresponsible, unasked for, and avowedly interested advice. Boy! waste-paper basket."

Hence we caution advertisers not to spend money on insertions in a paper got up simply to circulate advertisements. These advertisements may be chiefly of their own rivals, whom they are thus helping. The principle of "circulation" is a false principle; what ought to be looked for are *position* and *influence*. If it were otherwise, any number of firms might, on the co-operative system, bring into existence "papers." Six might combine and flood the trade with printed matter; but it would not be journalism. Sensible men would see through it, that the thing was merely a composite circular. If this *co-operative arrangement* were carried on in a straightforward manner, it would have advantages even besides that of really being what it professes to be. The half-dozen firms might club together and save the profits of the "middleman" or go-between—the publisher of this so-called journal. It would be a perfectly legitimate method of advertising; but it would *not be journalism*.

What is the benefit or probable benefit to advertisers of such a combined circular? This may be shown best by an illustration. There are at present various sheets issued devoted to theatrical programmes. Several houses of entertainment combine and the result is a "paper." This is all right in its way, but if any one were in doubt as to the merits of a play, or wanted advice as to where he should spend his evening, would he consult this sheet? Certainly not; he would go to his newspaper, his *Times* or *Telegraph*, where he would get a criticism, and one written by a responsible person. In the other case he would look for merely a *puff* in the interest of the firm inserting the advertisement.

If a man will act on this principle in a matter of such small moment as choosing a stall or a box at a house of entertainment, will he not very much more adopt the principle in regard to buying goods or machinery? Where, then,

is the *value* of the "medium?" Will the intending purchaser not, after all, have recourse to the journal in which he has confidence, and which has the confidence more or less of the trade generally, as shown by its subscription list and the number of its regular readers? Any recommendation in such an advertising sheet is *robbed of all its value* because editorial responsibility, arising from the non-existence of a *clientele*, is entirely deficient.

These remarks apply to all trades equally. At the present day it is especially important to keep in view the proper and legitimate functions of journalism. It is essential to be able to distinguish between a class organ and an advertising pamphlet. The one represents a profession having certain definite interests. The other is simply a *speculation*, may be, of an *advertising agent*. And to compare a thing given away to people who do not want it and will not read it, to a journal having its regular circle of constituents, is absurd. More than that, we believe, and all experience goes to show, that advertising in such hybrid media, neither circulars nor journals, is a *delusion and a snare*.—*British and Col. Printer and Stationer.*

That state of life is the most happy where superfluities are not required, and necessities are not wanting.

Better be alone than in bad company.	

A Mighty Weapon.

The following, by J. A. Libby, Castleton, Vt., was awarded the first prize in the competition for epigrams on the Esterbrook pen :

Martin Luther, it is said,
An *inkstand* flung at Satan's head.
It were better far, I think,
Instead of this, to fling the ink,
Taking Esterbrook's *steel pen*
To drive the Devil to his den.

The opinion is now being advanced by competent scientific writers, based alike on mechanical and physical considerations, that too much erosive power has been attributed by certain geological authorities to glaciers, and that it is doubtful, in fact, if the work of actual excavation has been accomplished by them at all. According to this new theory, the differential movement of glaziers is attributable to the following causes: First, crackling and relegation, as explained by Tyndall and Helmholtz; second, generation of heat within the glazier, as set forth by Helmholtz; and, third, the penetration of the glazier by luminous solar energy, the absorption of this by opaque bodies, such as stones, earth, organic germs, &c., contained in the ice, and the transformation of it in this way into heat. Thus, contrary to all the commonly accepted ideas on this subject, is attributed to these causes the greater differential motion of these glaciers by day than by night, and in summer than in winter. An interesting discussion is likely to be opened up in scientific circles by this novel reasoning.

The astronomers at the Greenwich Observatory have been making calculations as to the pace of the star Arcturus in his progress toward the earth. They find, as the result of twenty-one observations, that this beautiful scintillating star is moving toward this planet at the rate of fifty miles and seventy-eight one hundredths per second. This amounts to about 3,000 miles a minute, 180,000 miles an hour or 4,320,000 miles a day. But even if this hot rate of speed should be continued, Arcturus is not likely to shatter our little globe for the next 93,000 years, although his brightness is likely to grow in the sight of remote posterity. A scientist, writing on this subject, says that an 81-ton gun will drive forth its projectile with a maximum velocity of 1,400 feet per second, and that Arcturus is approaching us at a speed two hundred times greater. It thus moves over a distance equal to that between the earth and the sun in twenty-one days. But as the earth's distance from this lively star at the last measurement was estimated at 1,622,000 times greater than that between it and the sun, this generation and untold generations to follow may pursue the even tenor of their ways undisturbed.

SOLE AGENTS IN AMERICA FOR THE SALE OF

"J. A. P." FANCY STRIPED WRAPPING PAPER,

A Novelty which sells largely to the Dry Goods, Notions, Millinery and Druggists Trade, also to Paper Bag and Envelope Makers. Importers and sole agents for the celebrated ALL LINEN "PERFECTION" GLAZED COPYING PAPERS.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, AUGUST 14, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

American Stationer Association,

126 and 128 DUANE STREETS, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

It seems that some trouble has arisen between the Post-Office Department and its contractors for envelopes, it being alleged that the Government is being defrauded by having light-weight goods foisted upon it. Our readers all know our position as to short weights, counts, &c., and if it shall be found that any systematic attempt has been made to "beat" the Government, we shall be glad if the offenders are brought to book. If competition for public contracts is to be predicated on the idea that fraud is an essential feature of success, then it is time that the government should establish its own factory, buy its paper scale weight and turn out its own goods. We do not believe that there is any necessity for this extreme if public officials do their duty rightly, and therefore it may properly be asked why the Post-Office Department does not at frequent intervals test the goods with which it is supplied and compel strict adherence to contracts. If this duty should be exactly performed, perhaps we should be called on to note fewer instances of low bids and cuts in prices.

A TEXAN correspondent sends THE STATIONER a copy of a Galveston paper which gives an account of the rains all over that section, and says that they insure good crops. To this our correspondent adds: "The country is safe!" We are much indebted to our friend for the pains he has taken to assure us of such cheering news. This assurance is enlarged by reports from other parts of the country, and with this prospect before us, it will be hard to conceive of any substantial reason why industry and commerce should not flourish and be kept actively employed in ministering to the requirements of consumers. What those requirements are or may be time alone can tell; but it does seem to us that there must be a fuller demand if prosperity generally is dependent upon the fruitfulness of the soil. It has been disputed whether the country is embarrassed from overproduction or underconsumption. Either weighs upon trade, but we think that if the truth could be known, there is more excess of production. Doubtless there are many who have observed the wise precaution of watching and waiting, a rule justified by the course of speculative markets and defaulting financiers, and this caution has become widely impressed. But it will be seen that if, generally speaking, people buy close and on the line of their necessities, they must continue to live and their demands, particularly with a growing population, must increase. Waste and extravagance are not, perhaps, so characteristic of the people of this country as once they were, and we doubt if any one

with a proper sense of what the country needs most—stability and confidence—would wish to have it otherwise. The limits of economy—for economy has its beginning and ending—are probably very nearly reached, and people must come into the markets to buy. We do not and cannot blame them if they buy prudently and with caution.

Roundabouts.

BY THE TRADE LOUNGER.

"Shake!" How d'ye! Well, I should say so!

On Sunday last as the "Lounger" was occupying himself with setting a fly-trap, he was suddenly aroused with a sense of being "all shook up," and on getting his mind fully awake to the fact, found that there was a 'quake on hand. Everybody has heard of it, and the newspapers have talked it all up, but as the "Lounger" wants to have his say about it, he just "gets in his work" here.

I have been bothered with an inquiry as to who *makes*—now don't tell me who controls or sells it—"Eureka" tissue manilla. Can anybody slip in a word to the editor of this paper and let me know? I shall be glad to say Eureka when I am properly notified.

Politics haven't reached the exciting stage yet. There has been a great deal of preparation made for this campaign, in the way of outfits, banners, flags, portraits, &c. The money does not seem to flow very freely in this direction just now, and it may be that enterprise will not reap its reward. It will be too bad, for we can't expect these things to lay in stock for another campaign. *Tempora mutantur*, and so do candidates, policies, and so forth.

A very nice thing in the way of a sealing arrangement for sample envelopes is in the market. It consists of two small pieces of manilla paper shaped like an hour-glass. One piece has its entire back gummed and is attached to the envelope just under the flap, a small brass strip being retained in place under it. The other bit of paper is gummed to attach to the flap of the envelope and when so affixed and brought down in contact with the other piece the bit of brass is clasped over it, thus retaining the envelope closed. The advantage of it is that the device can be attached quickly to any envelope which can be easily opened for inspection.

The annual meeting of the jobbers of paper-hangings took place this week at the Gilsey House and among the samples displayed there were many new and very elegant designs. This annual meeting is looked forward to as quite an event among the wall-paper men. The wall-paper combination is one of the best trade unions that I know of.

A well-known representative of a Wil-

liam-street house has had an opportunity for making a practical test of the way the Hoboken fire department is managed, or more properly speaking, mismanaged. He has been actually running with the machine; in fact, he was at the head of the machine. He is not a fireman; in fact, never ran with the machine before, but this was entirely by accident. A few days ago, intending to take a drive on the road, he started off to have his team hooked up, and on his way the fire-bells sounded, and seeing several boys making an effort to haul an engine to a supposed fire, he took hold, and as a matter of course the engine was "shaken up lively." After running up and down several side streets they had a collision with another fire engine, and whether there was any fire or not, our friend of album fame, was unable to learn, but as soon as the row began with the collision, he thought discretion the better part of valor and "skipped."

* * *

Trade is still slow; but everybody is looking for more activity very soon. Buyers are late in the market, and are coming in by squads. There doesn't seem to be any discouragement, for everybody believes that *le bon temps viendra*.

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinions of correspondents attaches to this paper.]

A Caution.

NEW YORK, August 6, 1884.

To the Editor of *The Stationer*:

We find in your issue of July 24, a recipe for making a "Home-Made Hektograph," in which, while the author professes to give the ingredients in proper proportions for making a copying pad, he fails to advise his readers that the making or using such an article is an infringement of our patent, and consequently, a violation of law. This tends to the belief that the article may be made and used with impunity, and thus leads to the invasion of our rights; and the reader may be led into the trouble and cost of a lawsuit.

Copying-Pad.

In the common method of copying letters by what may be called the "wet process," cloths and blotting-pads of more or less absorbent or water-retaining material are used, with sheets of water-proof material to protect all but the page to receive the copy. More or less difficulty has been experienced in the search for a copying-pad that will be of the desired rigidity in large as well as small sheets, and at the same time as cheap and convenient in use as the common material so long used, with good absorbent qualities and durability. An improvement, which is said to meet these requirements, consists in a copying-pad made with a central layer of stiff paper or equivalent material of a good degree of tensile strength, as well as stiffness, intimately connected with covering-layers of textile or knitted fabric by means of rubber or other cement.

In making this pad, the cloth is first covered on one side with prepared rubber in a thin layer, by passing the cloth and rubber between the heated rolls of the press in the ordinary manner now common for such uses, and by another step the paper central sheet is passed through the rolls between two sheets of the rubber-coated cloth, with the rubber side in contact with the paper, to which it is caused to adhere by the heat and pressure of the rolls. This means of making the pads is preferably employed as being the one giving most uniform results, and the most economical, the pads being cut from the sheets in any desired sizes for use. Other methods and means may

obviously be employed to produce the same result, the main feature being the product.

In order to give added strength to the pad, it may be made with the cloth covering sheets overlapping the central stiffening sheet and united along the edge of the pad, and this form has some advantages in preventing abrasion of the edges.

The central stiffening sheet in the pad preserves the sheet-like form with but little added weight over cloths alone, and the covering, when of stockinet, furnishes a water-retaining material much softer than the common cloth, and one that from its peculiar structure holds a greater amount of moisture and retains it while making a greater number of copies.

Market Review.

OFFICE OF THE AMERICAN STATIONER, }
WEDNESDAY, August 13, 1884. }

THE MONEY MARKET.—Loanable funds continue in abundant supply and are available at comparatively low rates of interest, the banks asking 4@5 per cent. on call loans, and prime commercial paper has sold at 5@5½ per cent. discount. The stock market has been rather irregular and feverish during the past three days, the Wall Street Bank affair causing a temporary flurry and decline, and as compared with a week ago prices generally are lower and the market closed dull. Government bonds are again lower. Railroad bonds quiet and steady. Foreign exchange has ruled quiet and steady. There has been a limited supply of commercial bills.

THE PAPER MARKET.—The paper market continues to show the inactivity of summer dullness; but a somewhat hopeful feeling respecting the development of a good, healthy fall trade appears to be slowly but steadily gaining ground. Buyers, notwithstanding the abnormal low level of prices, refuse to stock up beyond necessary requirements, and still insist that the hand-to-mouth policy is the only safeguard they have, and adherence to it appears to be most marked among those nearest to the consumer. No doubt, financial circumspection is an incentive to caution in calculating the quantity of supplies to be handled, so far as the wholesale dealer and jobber are concerned; but the small dealer buys lightly, simply because he finds the actual exhaustive outlet by which the goods pass directly from his hands requires no larger quantity. We hear of a manufacturer who has just renewed a contract for another year with a New York daily paper at the same figures as for the previous twelve months. Notwithstanding the fact that quite a number of the straw wrapping mills are closed down, and that straw is scarce and high in price, the demand is so light that dealers are unable to hold supplies at their recent quoted prices. Considerable quantities have been placed on the market this week at a decline of 10 per cent., and a still greater decline is looked for next week.

THE STATIONERY MARKET.—Pretty much the same features that have characterized the stationery market for several weeks past still rule with very few exceptions. Country buyers, notably from the South and Southwest, have been a little more numerous than during the previous week, but purchases have been made with some degree of caution, notwithstanding buyers have seldom, in any season, had such inducements offered them in the way of prices. This is due most likely to the indisposition of buyers to stock up beyond what they consider will be the necessary requirements of their customers, and to the general contraction of credits and the growing system of transacting business on a strictly cash basis. Prices in the main continue firm, and the trade generally are somewhat sanguine of a good, active fall business. The trade in steel pens is scarcely up to the average for the season of the year; dealers in gold pens and inks are doing a fair amount of business, probably a little better than a year ago at this time; trade in blank-books is moderately brisk, and bids fair to remain so for the remainder of this month; there is a marked inactivity in the envelope trade, as outlined to some extent last week. Other lines of staple goods are without any interesting feature.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:

FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

JENNE'S PATENT INTEREST INDICATOR.

JENNE'S PATENT INTEREST INDICATOR.

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,

New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,

Mr. Mathematical Instruments,

18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.

Sold by all first-class Stationers. Send for circulars.

WHOLESALE MANUFACTURERS OF

SHOE DRESSINGS AND INKS.Among our specialties is the **TRIUMPH MUCILAGE,**

WHICH is far SUPERIOR to any in the market, as it adheres quicker, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is always ready to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its never spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price; 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

Producing Molded Articles from Ligneous Fibres.

A new method of producing solid articles from sawdust, wood shavings, wood pulp, dry leaves, straw, hay, and other ligneous substances consists in treating them with chloride of zinc and basic chloride of magnesium, and pressing the mass into molds and drying it. For this purpose the material to be subjected to the treatment is moistened with a solution of chloride of zinc having, by preference, a specific gravity of 1.028, and thereupon it is dried. Subsequently it is uniformly impregnated with a solution of basic chloride of magnesium, preferably of a specific gravity of from 1.725 to 1.793, so much of this solution being employed as that the mass will only become humid, and that no liquor can be squeezed out therefrom by a gentle pressure—for instance, by hand. The mass is then filled into molds and exposed to the action of a hydraulic or other powerful press. While being maintained under pressure it consolidates, with slight spontaneous elevation of temperature, to compact pieces, which, after removal from the molds, are placed for several days in a heated and ventilated chamber or other suitable place to be dried. The time in which the mass solidifies depends, to a certain degree, upon the strength of the solution of chloride of zinc employed; but ordinarily from ten to twelve hours are required. After having become completely dry the product is immersed for some time, and preferably for a like number of hours in a strong solution of chloride of zinc, which may have a specific gravity of 1.205, and is finally dried again.

The molds to be used, which may be plain or ornamented, are with advantage so constructed as that they may be clamped together by screws or otherwise after the pressure has been applied to them, in order that they may be removed from the press while the mass is maintained under pressure, whereas the press remains at disposal for another series of molds. Besides, they should be provided with slits or holes through which any excess of liquor squeezed out by the pressing operation may flow off. In order to allow the produced articles to be easily detached, it is advisable to slightly grease the molds.

By the described process a material is obtained which may be sawed, planed and otherwise worked like hard wood, and which assumes a good polish. Besides, it is not apt to be destroyed by fire: it is impervious to water, indestructible by weak acids and alkaline solutions and resistant to atmospheric influences. It is therefore particularly adapted for architectural ornaments and cabinet-work, and useful for many other purposes.

If desired, suitable colors may be mixed with the raw material previous to or during its treatment with the chemicals, and variegated surfaces may be obtained by a mixture of different materials.

Oil stains can be removed from tiles completely by mixing fuller's earth into a thick paste with water, and spreading it over the tiles, letting it remain 24 hours and then wiping it off. If the mark then has not quite gone, put on another paste.

— IMPORTANT NOTICE. —

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

MARCUS WARD'S BLOCK CALENDARS

The New Designs for 1885 are now Ready and in Travellers' hands.

THE SHAKSPERE CALENDAR. — A leaf to be torn every day from the block-tablet. For each day is provided an appropriate quotation from Shakspeare. The ornamental mount represents a scene from "Henry IV."

EVERY DAY CALENDAR. — Constructed on the same principle as the Shakspeare Calendar, with quotations for each day, from writers of all ages.

"DAY UNTO DAY." — Constructed on the same principle as the Shakspeare Calendar, but with emblematic mount, and a quotation from the Scriptures for each day.

Government Envelope Contracts.

The Springfield *Republican* of the 12th inst. says that some of the New England papers have been very much misled by dispatches concerning the investigation which Postmaster-General Gresham is expected to make this week regarding alleged fraud in the manufacture of official envelopes for the use of the post-office department. It was stated that the department's agent at Hartford, H. T. Sperry, who is commonly but erroneously called an inspector, had involved the government in a loss of \$200,000 by allowing the contractors for the last eight years to use paper considerably below the weight and strength required by the terms of their contracts, and it was also stated that the envelopes now made for the government had been tested and found to be under weight. It does not seem to have been Mr. Sperry's business to test the paper used, and the only intimation he has had of any trouble came through the newspapers. The charge that the government has been defrauded to the amount of \$200,000 is absurd, since such a sum would indicate a far more extensive fraud than it would be possible for the contractors to perpetrate. The fault is all found with the canary envelopes, which are about one-third the entire contract. Thus to cheat the government out of \$200,000 worth of canary envelopes would be equal to saying that for eight years the contractors have never furnished a canary envelope up to the required standard. This statement would disprove itself by the slightest investigation. The fact probably is that a quantity of light-weight canary paper found its way from the Holyoke mills to the factory, and was made up into envelopes and sent to Washington without being noticed by the makers or the government agent.

In May last Springfield parties obtained the contract for furnishing the envelopes required in the various divisions of the Post-Office Department. In this they underbid several envelope makers, including those who had held the contract for about eight years. One of the new contractors then obtained from the Post-Office Department a set of envelopes of the sort called for by his contract, and contracted with a Holyoke mill to furnish paper of precisely the quality of the samples. He began filling orders under his contract July 1, and has made about \$3,500 worth of the stock just complained of. A short time ago one of his competitors for this contract sent to Washington a canary envelope, which he claimed was made under the new contract, and was short weight. The department authorities tested the specimen, and found that it stood but fifteen pounds instead of the twenty-six pounds called for. Further investigation showed that the condemned envelope was one of the old make. Envelopes of the new brand were then tested and found to fail, so that both the old and the new contractors fell under condemnation. It happens, however, that the sample of canary envelopes which was given to the new contractor was one of the light weights which issued by mistake from the old factory, so that he acted in perfect good faith. Instead of requiring all the parties concerned in this disclosure to go to Washington, Gen. Gresham, Third Assistant Postmaster-General Hazen and the chief clerk will investigate the trouble on the spot.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

AUGUSTA'S ACTIONS.

[FROM OUR REGULAR CORRESPONDENT.]

AUGUSTA, Ga., August 11, 1884.

There is hardly any use in trying to give you much news from such a dull city as we have at present. Nothing is doing in any kind of business, with the exception of water-melons (of which our county raises the best in the States), and trade in these is not half so good as usual, because of the scarcity of money to buy them, for the appetites of the people seem to be as good as ever. The banks say that they have no money. I can't see what use they are to any community; for when you want money you can't get it, and when you don't, they will almost force it on you.

This is a very quiet time of the year, and if it was not for the base-ball clubs from various parts of the State giving us three or four games a week, I think we would all die of the blues. It gives us something to talk of.

They are getting up a boat club here also, and have imported a beautiful shell-boat, but they can't quit base-ball long enough to organize well. We have the Savannah River and a seven-mile canal, 150 feet wide, to practise on. I suppose when it gets a little cooler they will pitch into boating. Even the colored people have the base-ball fever; they always try to imitate the whites in frolicking, but not in work. We have had plenty of rain in this neighborhood lately, which makes everything look fresh and nice, and crops are looking remarkably well. Corn is already made, and if the weather keeps as it has been, there will be splendid crops of everything made, and then business ought to be good.

We ought to be very thankful that we have had such a pleasant summer, very few warm nights, and days have been very bearable, not over 89 at 2 p. m. in the shade. One day it did go up to 90. We have very little manufacturing, except in the cotton line, and in that we excel having five large mills making sheetings, shirtings and drills and plaids, and three yarns exclusively. The markets have been so overstocked with goods, that manufacturers can't sell, and so they have been obliged to stop the mills for several days in the week to try and

reduce stock, which would do very well if you could reduce the appetites of the operatives as well, for it is not pleasant for them to be going on half rations. I see that the cotton factories at the North are in the same fix. We have two fine flouring mills that are kept busy night and day to supply orders. We have also a mill for making sweet oil out of cotton-seed, which does a good business half the year, and then the most important thing of the weather are two large ice factories, enough to keep us all cool in the way of drinks, at a reasonable price, by the 100 pounds only fifty cents. It is a great comfort. Northern lake ice can also be had at a trifling higher price.

The canal I spoke of is the great water-power that drives our factories and is one of the best in the United States.

There is one thing in the book business that ought to be rectified, viz., having the wholesale and retail prices of school-books so near the same price. It is very hard on the retailer, as there is so little difference that it does not pay expenses, and they are kept in a constant state of excitement in trying to find something else to do more profitable, the old way of having a standard retail price, and taking off a discount to the trade, was more acceptable.

I called on friend Pendleton to see how things were with him. He replied that trade was rather discouraging, but that he thought it best to look on the bright side and be thankful it was no worse, which is the true way of looking at it. He says that plenty of goods could be sold on credit, but it was too hard to collect.

W. T. Richard, Son & Co. are adding to their already extensive printing-office a complete bindery and other appliances, and competent and experienced workmen. David Shaver has connected himself with the house as solicitor, carrying experience and ability, and a knowledge of the wants of the business community, which together with the enlarged facilities of the firm, and its reputation for first-class work, will insure the most liberal patronage. Harry Hall, the genius of the printing department, will still welcome his friends and give the satisfaction that has characterized his labors in that department.

My friend, Geo. A. Oates, showed me a short time ago a splendid original portrait of

Gen. George Washington, which has been in his family for more than fifty years. The figure is three-quarters length. It was painted by Mr. Polk, who was brother-in-law to the celebrated portrait-painter Rembrandt Peale, of Philadelphia. It was taken about the time of the battle of Princeton, the old college being in the background. It is in a superb state of preservation. It was sent to his friend, C. C. Haffelfinger, Philadelphia, to place in the Centennial Exhibition, but it arrived too late. It is taken in full Continental uniform.

MILL BANK.

BOSTON BITS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS, }
250 Devonshire St., Boston, August 19, 1884 }

The summer season was a little late in opening up, but it is out in full bloom now. Excursions to cool retreats are now in order and they are being most extensively patronized. Summer-hotel keepers are beginning to smile a little, but the expression of "mine host" hardly comes from a cheerful heart. The season is too far gone to expect much in the way of cash receipts, though a few weeks of this scorching hot weather will certainly make the losses all the lighter.

Monday was the hottest day of the season, the thermometer reaching 94° in the shade. In such sultry weather even thermometers prefer the shade.

Very little business is doing in the stationery line just at present. Those who are forced to labor go at it in shirt-sleeves, while the fortunate ones—and they are the fortunate ones who have nothing to do—go recreating.

During the fall Boston will be enlivened by two industrial exhibitions. One will open on the 3d of September, under the auspices of the New England Manufacturers and Mechanics' Institute, and the other under the management of the Massachusetts Charitable Mechanics' Association, will open its doors on September 10. Both will close about the 1st of November. One of these corporations, the New England Institute, holds exhibitions every year, the coming one being its fourth annual exhibition. The Mechanics' Association holds exhibitions only once in three years, and preparations are

now being made for its fifteenth triennial exhibition.

Both of these fair associations have become very popular with the manufacturers and traders of New England, while the daily attendance at past exhibitions has been very large. At the exhibition of the Massachusetts Charitable Mechanics' Associations, all exhibits possessing recognized merit are awarded medals or diplomas, while the New England Institute make no awards, letting all exhibits appeal directly to the judgment of the people.

For giving a wide-spread publicity to new inventions or novelties, these exhibitions are very valuable, and being appreciated as such by parties who desire to get their goods before public notice, no difficulty is experienced by the managers in filling their spacious buildings with worthy displays.

The officials of either exhibition report that application for space to exhibit are unusually numerous, and they continue to arrive daily. Many exhibitors will display their products at both exhibitions, in order to reap the greatest possible good. Others having a preference for one or the other, act accordingly and display the products of their industry where they think most advantageous.

Besides being a Presidential year, this may well be called an exhibition year, the whole series of exhibitions closing with the gigantic "World's Exposition" at New Orleans.

Many of the New England manufacturers are preparing to exhibit at the "World's Fair," but as that great exhibition does not open until December, and as the Boston Fair will close by November 1, leaving thirty days for the transportation of goods to the Southern city, they will open the exhibition campaign by making creditable displays at the Boston Exhibition.

Manufacturers of stationers' specialties should remember that the four millions of people in New England are big consumers of such goods, and that no better facilities are offered for introducing them to the people than these two Boston exhibitions.

In years past these advantages have been recognized, and such exhibits have been quite numerous. Though the space is even now about all taken, meritorious exhibits might be accommodated in either exhibition if early application is made.

Jenne's patent interest indicator, a very valuable device for computing interest or discount, and a novelty in its way, will be among the late inventions displayed at the exhibition this fall. Mr. Jenne, the inventor and president of the company, has for some weeks past been traveling in the West pushing his interest indicator. His frequent orders is an evidence that the Western trade find the indicator a salable article. Negotiations are now pending with a San Francisco stationer who desires to control the sale of the device for the entire trade of the Pacific coast. When the interest indicator becomes better known, it will undoubtedly have a big sale, and the company are preparing for a little activity this fall.

Whittemore Brothers & Co. report that the summer trade for their mucilage has been very good, while orders for fall de-

livery are being numerous booked. For hot weather this mucilage is claimed to be very superior, as it will not mold or sour. Notwithstanding the high price of gum-arabic, Whittemore's mucilage is quoted at old rates. No advance in price, nor is the quality lowered.

N. H. Furness, of New York, representing the "Climax" blotting, is passing a few days in Boston. He favored the Printers and Stationers' Exchange with a visit, and left samples of the "Climax" as a souvenir of his call. He reports the demand for the "Climax" blotting papers as constantly increasing.

A. L. D.

PHILADELPHIA POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA, Pa., August 19, 1884.

There is one advantage connected with the fact that the manufacturers and jobbers in stationery are obliged to carry larger stocks than usual—viz., that they obtain somewhat better prices for the stocks they do sell than if retailers were buying largely and carrying their usual supply of stocks. As usual in times like this, buyers are hard to move, and manufacturers are loth to restrict their production of goods; but there is no other remedy at hand than in making less, and, as a rule, this is the policy pursued. The very best inducements have been offered to deplete wholesale stocks, but retailers prefer to carry light stocks, and trust to the facilities afforded by the telegraph and express companies to meet their requirements on short notice.

The condition of the stationery trade in general is remarkably quiet. The chief feature at present is the purchase of school supplies, the demand for which is quite active.

The fancy part of the stationery business—art goods, bric-a-brac, &c.—is also reported dull. But this is not unusual at this season. Some of the manufacturers are busily engaged on winter goods. Our importers are anticipating a heavy fall trade. Quite a number of them have been abroad in person to make selections. One of the heaviest importers, recently returned, stated that it was more than ever necessary to send abroad careful buyers, in order to make the best selections of goods, to offset the improvement in stationery manufacture now going on in this country. The display of foreign stationery will probably this year surpass anything here before shown. The demand for imported goods is larger than ever before. Some of the advance supplies are already arriving. The hand-to-mouth policy of doing business, though limiting the volume of immediate transactions, is after all the most satisfactory, because buyers find themselves with less old stock, and are hence obliged to make fewer sacrifices, and their profits in the long run are better.

One bad habit has crept into the trade, viz., that of selling goods in March and April, and dating bills October 1, with three or four months' credit. This is virtually selling goods on a year's time. It is an old evil, and one which is apparently growing worse. Even this inducement fails to draw well-established

firms into placing heavy orders. It is having another effect, that will in time be disadvantageous, viz., in developing a competition from petty tradesmen who have not the capital to go into business, or the ability to manage to pay bills out of the sales of goods. Any man can buy goods on time, and get rich, if his creditors will not bother him for settlements. It is a fact well known that there is a considerable percentage of small business people doing business in this way. It makes it more difficult for stable business men to hold their trade, when small upstarts of this class can obtain goods on long time. The temptation is to sell them at concessions which legitimate dealers cannot afford.

Writing paper is in abundant supply, but the production seems to be going ahead. The envelope trade is quiet, and within a few weeks there has been quite a material shading on prices, on account of the competition of New England mills, which have thrown large quantities on this market, at ruinously low figures.

Some very low-priced government contracts have been recently made. Our local manufacturers have been looking into the matter, because some of these contracts, if the specifications were lived up to, were taken below the cost of production.

The house of William Mann, the largest manufacturer of copying books in the city, has recently increased its facilities, and is running full time, pressed with orders.

Manufacturers generally complain that profits have been much reduced of late, but none of them seem to be able to make any suggestion that will lead to a correction. Some stationers seem to be willing to take orders at any price, and it would not be a difficult matter to prove that work was often taken below raw cost; how long this is to last it would be hard to say, but it is certain that some one is losing money on a good deal of the work that is being done. It may be said that there is no occasion for this, and that commercial integrity should be of such a standard as to prevent such losses; yet the fact remains, that some contracts have been placed here that cannot allow the takers to come out whole.

The possibility of a reduction of wages has been quietly discussed among stationers here, and they see no escape for it, unless prices or the amount of business show some early improvement. It is easy to moralize over the practice of cutting rates for work, and doing work at raw cost, but there seems to be no available remedy. A combination is not easily effected in this industry because of the great variety of work, and the special conditions surrounding each order and contract; but it would be decidedly to the interest of the trade, if the ethics of trade could be improved, and the standard of business morally a little higher.

PENN.

TORONTO TOPICS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, August 16, 1884.

After as much serious reflection as I am capable of under existing circumstances, I am forced to the conclusion that I am not in a bit

(Continued on page 250.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

test of COLOR, CLIMATE,
INK or WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

This Trade-Mark on every Box.

Trade Mark on our "DISTAFF" Brand.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 248.)

better case than when I wrote you last. If there is any difference, I am afraid my note will have to be recorded on the negative side. And the only reason I can assign at the present moment is that it is *biling* hot. My nervous and muscular system—in fact, I think both bone and tissue may be included—is something like an unstrung fiddle. There is not tension enough in any part of me to get up a fairly good squeak, and I think the business portion of the community are much in the same condition. In a business point of view, we are not disposed to find much fault with this, and are disposed to dig out for a few weeks if possible; and if not, to make the best of it and lay around in the proximity of home. I must say, however, that the information we are receiving from day to day from all parts of the country with respect to the crops are most satisfactory. Indeed, it is already known that we have an abundant harvest, and that is acknowledged to mean a good season's trade.

The Barber & Ellis Company, out of its large heartedness, sent me a request to attend its annual picnic to the employees of its establishment, held at Youngstown, N. Y., yesterday (Friday). I attended, and a good many other non-employees attended, numbering in all somewhere near three hundred. In order to enjoy this outing, it was necessary to make a very early start, and breakfast, I am afraid, in most cases. I can speak positively as to mine at 6.15 A. M. It was scattered around the pantry, and had to be taken *sans ceremonie*. We steamed out of the harbor at seven o'clock, and after a delightful run of three hours across the lake, disembarked at the above-mentioned town, and wended our way through the dust and heat to the grove about half a mile distant. It was reached without any worse casualty than a few wilted collars, and so on, not to be too particular. Our venerable friend, Mr. Ellis, who by right filled the honorable position of paterfamilias, with his usual foresight, had made ample provision both for our comfort and amusement. On reaching our prospective point heated and athirst, actually panting, as we are told in a very old and good Book, the harts panted for the cooling water-brooks. It was so nice to come up to a barrel of ice-cold lemonade—not our lemonade made of tartaric acid and essence of lemon—but the juice of the real fruit, which any sceptic, if there was one, could see by the squeezed lemons in close proximity to the barrel. And, by the way, about that citizen of ours, *vide* Savage. I'm afraid your soda-water and lemonade must be bad stuff. I'd defy anybody to see double on the cooling fluid provided by our venerable friend. The fact is, I think, a few sticks thrown in would have improved it very much indeed. However, this is a matter of taste, and kindly excuse this digression, and quench your thirst. Of course, I cannot go into a description of the abundant and luxurious repast furnished, and which was served on impromptu tables, nor of the games and other amusements, nor the prizes in connection with the games. The boys and girls entered into the spirit of it, and had to all appearance

a most enjoyable day. And I am sure the firm cannot but feel gratified that it is in their power to give their employees such an outing once a year; and though it costs a considerable sum of money, yet I am equally sure that it is a good investment. I do not believe that employers, as a rule, are a very selfish or hard lot to get on with, when they are dealt honestly with, and when employers, as in this case, are not only willing to contribute to their pleasure but take part with them in it. I think the result in nine cases out of ten will be that they will be well served.

Being somewhat aged myself, I did not enter into any of the after-dinner sports, but quietly strolled away to discover the whereabouts of Youngstown, and I was about as successful, I think, as most discoverers have been in finding the North Pole. I did come across a couple of taverns, with usual attendants, two or three stores, in which a multifarious class of articles were congregated, in one of which was the post-office. In my progress I had to walk very gingerly over dilapidated sidewalks. The question forced itself on my mind, that if I should happen to go through and break any of my limbs, the prospect for an action of damages on the corporation of Youngstown would be a hard lookout, and so I didn't do it. There is one thing this town can boast of, and that is burdocks. They are all along the sidewalks, in the door-yards, exuberant in vacant lots—in fact, so far as I could see, the burdock was the favorite *vegetable* of this town, and later on, when the burrs have matured and are ready to hitch on to anything that comes along, it must afford the citizens of that place great amusement in hauling them off their clothes.

The spirit of discovery was in me, and so I proceeded across the river, and though it was intensely hot, I set out to find the town of Niagara on one side. I went on and on until I was nearly melted, and had to give it up. I didn't find it. But I did find the Queen's Royal Hotel, which is one of the finest summer resorts of this kind I know of, and is largely patronized by your people. I could not continue my explorations farther. I was about used up, and so sought the coolest place I could find, and awaited the steamer by which we were to return. The trip back in the cool of the evening was delightful. The lake was like a sheet of glass, and all the way the gay folk enjoyed themselves and us with songs, &c.

I have very little to add about our business men, and, if I had, my time is more than up. About all I can say is, that the holidays are not due yet. Both Grand & Joy have been up to Muscoka, and were very successful in their piscatorial amusements. W. I. Gage is in Winnipeg. Where the rest are is more than I know. Will let you know later. C. H.

CINCINNATI CIRCLINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, August 19, 1884.

The great drought continues. It set in on July 3d, since which date only one rain has fallen, and that an insufficient one. The territory affected is a strip about five hundred

miles long and one hundred miles wide, bisected lengthwise by the Ohio River and in the middle of which Cincinnati is situated. Corn in this region is already so nearly ruined that it would be out of the question for a good season from now on to help it. Ground crops, such as potatoes, turnips, and the like, are much injured. The tobacco in this great tobacco-growing region is seriously set back. Pastures are dried up and fruits are stunted. Fortunately, the season before the drought set in was extremely favorable to the growth of the crops. All the small grains were finely developed and were harvested early and saved in fine condition.

Business looks a little more cheerful than it has been looking. Transactions are more numerous, and in spite of the dullness of the midsummer months trade has really improved, though after all it is still dull enough. Nothing is expected of it till fall—perhaps not till after the election. However, the little improvement that has been felt already is encouraging.

The *Week*, an illustrated weekly, came into being, lived a short life, and died within the last twelvemonth. Now an enterprise is on foot to start another illustrated weekly.

Those in the enterprise are full of courage and earnestness, just as the movers in the weekly that appeared and perished were when it first came out. The newspaper field in Cincinnati seems to be fully occupied. At all events, those who have tried to get a place in it within the last three years have failed to do so. In one case, that of the *News-Journal*, sold under the sheriff's hammer, and in another case, that of the short-lived *Sun*, it seemed impossible to gain a foothold. The *Sun* succeeded the *News-Journal*, and fell heir to its Associated Press franchise. When the *Sun* ceased to make its daily appearance, an effort was made to sell its Associated Press franchise, but without success. Now that franchise is still on the market, without a bidder. It cost the *News-Journal* \$50,000 to purchase this franchise.

July and August are proverbial dull times for stationers, but the general testimony is that times are duller this year during these months than ever before. But there is the consolation that the dullness is not of that sort which is clear out of sight of the hope of a change for the better. Prices for work are well sustained, and the hope is general that an improvement is very near at hand.

There are but few traveling men here at present. Few of the manufacturers and dealers here have their men "on the road" at present.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

AT LAST A GOOD PERFORATOR,

PRICE, \$135.

(PATENTED DECEMBER 11, 1883.)

Which we are now prepared to offer to the trade. This Perforator will outwear any other Foot Perforator yet offered. There is no taking out of needles, as the different sections can be raised up and locked to admit for stub of checks, &c.; each needle is put in separate and fastened firm. In case of accident the needle can be replaced for a few cents. There is no trouble with releasing the paper on our machine. It is stronger, more durable and the best made Foot Power Perforator ever offered. This machine is built to do good work, it makes a round hole, and, considering its construction, it is the cheapest perforator yet offered. Will perforate 28 inches long.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

METAL PAPER BAND AND CLIP.

Herewith is given an illustration of Clough's Metal Band (a substitute for rubber bands), as it appears when containing papers and memoranda. This device is a clip as well, and will clasp and hold one or a hundred letters or papers. It is so compact that half a dozen bands can be inclosed in any ordinary sized envelope. For the filing away of bills, letters, bank vouchers, or any documents, it is invaluable. On one side of the mounted band there is an erasable silicate surface, on which memoranda may be written with lead pencil. The cut illustrates the open frame band, full size. This device will be found handy for desk use, as it will keep papers from flying about.

READY BLOTTER.

The cut presented shows a little but ingenious device for keeping the blotter always handy and never lost. It consists of a small roller, with two or three thicknesses of blotting-paper encircling it. This is mounted on a wire which holds the roller in position and permits it to revolve. The wire has a ring through which the finger is run, and a guard at the end which helps to control the blotter. The penman can put the arrangement on his finger, and when he wishes to use the blotter a turn of the hand rolls it over the ink. When the blotter is not wanted it is kept out of the way by being turned up. Its operation is very simple, and the cut gives a good idea of it.

NEW PATENTS.

- No. 301,621. Twine-Holder.—Reuben Melvin, Cincinnati, Ohio.
No. 301,630. Manufacture of Slate-Frames.—Charles C. Shepherd, Passaic, N. J.
No. 301,639. Paper or Letter Box.—Harry Stocks, Lowell, Mass.
No. 301,672. Duplex Bronzing and Embossing Process.—John Carson, Brooklyn, N. Y.

As an improvement in the art of bronzing and embossing, printing the design on the paper in a size by means of a surface type or die, then embossing and bronzing a portion of the

design by means of an embossing die in which the bronze or dry color is held by a size of less adhesiveness than the size on the paper, and completing the process by applying bronze or dry color to the remainder of the design in the flat.

No. 301,703.—Printing-Machine.—George P. Fenner, New London, Conn.

No. 301,706. Process of Preparing Canvas for Photographing.—Thomas D. Fitzsimmons, Philadelphia, Pa., assignor of one-half to Robert W. Witham, same place.

The process of photographing upon canvas

it to accommodate itself to the vertical adjustment of the cylinder.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

George J. Hanley, stationer, Salida, Col., has assigned.

F. W. Heaster, news dealer, Girard, Ill., has been damaged by fire.

Charles H. Traquair, dealer in wall-papers, Terre Haute, Ind., has assigned.

Thomas Traganza, publisher of the *Free Press*, Elk Grove, Cal., has sold out.

Baldwin, Adsit & Co., printers, Grand Rapids, Mich., have dissolved partnership.

Douglass, Henderson & Co., dealers in wall-paper, Ann Arbor, Mich., have dissolved partnership.

Frederick Vaughan, proprietor of the Union News Company, San Francisco, Cal., has been attached.

Bowling & Zelliff, proprietors of the St. Louis Publishing Company, St. Louis, Mo., have resumed business.

Paret & Whittington, stationers, Washington, D. C., have dissolved partnership. J. L. Whittington succeeds to the business.

Doyle & Crenshaw, publishers of the *Weekly Mirror*, San Luis Obispo, San Francisco, Cal., have been succeeded by the *Mirror* Print Company.

W. S. Duckworth & Co., booksellers and stationers, Nashville, Tenn., have admitted Thomas H. Hard and W. B. Gillespie to partnership. The style of the firm remains the same.

M. M. Hill & Co., printers and bookbinders, Augusta, Ga., have closed business. M. M. Hill has taken charge of the mechanical department of the *Chronicle and Constitutionalist's* printing-office, and David Shaver, who was the company, has associated himself with W. F. Richards, Son & Co.

The printing, publishing and bookselling business heretofore conducted by John B. Piet & Co., at 174 West Baltimore street, Baltimore, Md., will be continued by the Baltimore Publishing Company, under the management of John B. Piet, senior member of the late firm of John B. Piet & Co.

V. D. Perry, toy dealer, &c., Hartford, Conn., is dead.

C. N. Rankin, bookseller, &c., East Portland, Ohio, has been burned out.

Segar & Burch, publishers, Eaton Rapids, Mich., have dissolved partnership. M. Segar continues the business.

F. A. Fielding & Co., publishers *Salem Observer*, Salem, Mass., have been succeeded by George W. Pease & Co.

C. A. Wenborne, publisher, Buffalo, N. Y., has incorporated under the style of the American Industry Press, Limited.

Duchow Brothers, publishers of the *Independent*, Sonora, Cal., have dissolved. J. C. Duchow continues the business.

The goods and chattels of A. E. Robinson, dealer in wall-papers, &c., Winnipeg, Man., are advertised to be sold by the sheriff.

Walker & Griswold, publishers of the *Delta*, Visalia, Cal., have dissolved partnership. J. O. Blakeley succeeds to the business.

The German News Company, bookseller and publisher of the *Deutsche Warte*, Chicago, Ill., has been closed by the sheriff on confessed judgment for \$976.

J. H. Bufford has just returned from a trip to Cape Ann, to which place he will return in a few days in order to escape this insufferable midsummer weather.

Brewster & Lang, booksellers and stationers, Seattle, W. T., have dissolved partnership. M. Lang retires from the firm and C. R. Brewster continues the business.

Mr. Liebenroth, of Liebenroth, Von Auw & Co., is making a friendly visit to the trade in the West. He will return next week. He writes that trade in the West promises a good opening for the fall and winter season.

The assignee of Butler & Miles will sell at auction on Friday, August 29, the remainder of the stock of paper and other assets contained in the store at 23 Beekman street, and close up the estate soon thereafter.

James F. Smith, dealer in rags, cotton and rubber waste, &c., at No. 36 Peck slip, made an assignment on Saturday to James H. Leeds, preferring Emma Smith for \$4,935.62; his brother, John M. Smith, \$776.38; William C. Shaw, \$796.80, and William S. Archer, \$433.80. About eight years ago he succeeded his brother, who had failed. The firm owes little or nothing to the trade here, the jute mills being the principal creditors.

M. B. Gearon, publisher, Omaha, Mo., has sold out.

A. C. Burlingame, stationer, Sutton, Neb., has sold out.

James F. Smith, paper-stock dealer, New York city, has assigned.

Whitehead & Hagerman, publishers of the *Democrat*, Reno, Nev., have suspended publication.

E. B. Dennison, publisher of the *Independent*, Albuquerque, N. M., has discontinued that paper.

H. Ellen, bookseller and stationer, North East, Pa., has been burned out. Loss \$4,500; insured for \$2,500.

Ahrhart & Cole, newsdealers, &c., Buffalo, N. Y., have dissolved partnership. The firm has been succeeded by Cole & Jordan.

Bradford Brothers, printers, &c., Sherbrooke, Quebec, have dissolved partnership. G. H. Bradford continues the business.

Maurice T. Jones, has withdrawn from the *Tribune News Company*, Evansville, Ind., and the business is continued under the same style.

The schedules of Hand & Ellsworth, paper manufacturers, Peekskill, N. Y., and paper dealers at 51 Beekman street, New York, which were filed in the Court of Common Pleas on Monday, show liabilities of \$281,255.02, nominal assets, \$383,884.47, and actual assets, \$132,581.68. Among the creditors are Tileston & Hollingsworth, Boston, Mass. Seven promissory notes for merchandise bought aggregating \$14,829.56; to same an open account for merchandise, \$1,555.94; Morrison, Bare & Cass, Pittsburg, Pa., note for merchandise, \$806.66; Weymouth Paper Mills, New York city, notes for merchandise, \$1,692.26; Chemical Paper Company, Holyoke, Mass., notes for \$4,046.53; H. McInnes, Bridgeport, Pa., note for merchandise, \$914.26; to same on open account \$221.04; Excelsior Paper Company, Holyoke, Mass., notes for merchandise, \$8,481.47; to same on open account, \$203.37; David Duncan & Son, New York city, note for merchandise, \$725.40; Dickinson & Clark, Holyoke, Mass., note for merchandise, \$1,454.44; to same on open account, \$479.20; Franklin Wyman, Westminster, Mass., note for merchandise, \$1,804.82; C. F. Linde, New York city, acceptance for merchandise, \$183; Charles Harley, New York city, open account for merchandise, \$955.34; John H. Lyon & Co., open ac-

Alden, agent, \$177,735.07, the actual value of same

\$54,661; the mill, real estate and privileges in Putnam County, N. Y., is inventoried at \$37,306, the actual value of which is \$11,200; coal in yard at Peekskill, \$3,653.65, actual value of same \$3,247.15. Among the bills receivable due the firm are by American Book Exchange for \$904.40, no actual value to same; Queen Publishing Company, \$4,291.69, no actual value to same; Frank Tousey, \$3,077.75, actual value of same, \$1,538.87; Scientific Publishing Company, \$1,893.48, actual value of same, \$1,420.27; R. A. Sallfield, \$2,985.39, actual value \$1,791.22; John B. Alden, \$3,000, actual value \$100. Nominal value of stock and fixtures in store, New York city, \$37,912.10, actual value of same, \$25,741.20. Nominal value of stock contained in mill at Peekskill, N. Y., \$5,066.29; actual value of same, \$3,786.19. A meeting of the creditors will be held to-day at 2:30 P. M., at No. 20 Nassau street, room 72, when the foregoing statement will be presented and a proposition of a settlement submitted.

Keuffel & Esser have added to their establishment a new showroom for the display of drawing materials, engineering supplies, &c. It fronts on Fulton street, and forms a much-needed adjunct to this well-known house. The goods shown are arranged with the utmost good taste, and the display generally reflects credit both on employers and employed. The firm carries everything in the line of drawing materials and exclusively controls most of its goods.

Among the new trade journals recently started is the *Books and Notions*, a monthly devoted to the book and fancy-goods trade, published at Toronto, Ont. The first number is very creditable to the publishers.

The Globe Files Company's trade catalogue for September 1 is out. This is one of the things that stationers should keep handy and not file away. They "need it every hour."

The Schmidt Label and Lithographing Company, San Francisco, Cal., has been burned out. Estimated loss \$175,000; insured for \$135,000.

C. S. Marshall, stationer, &c., Fresno, Cal., has consolidated with Strine & Oden, fancy-goods dealers, of the same place.

G. T. Craven, of G. T. Craven & Co., booksellers, &c., Cincinnati, Ohio, is dead.

F. V. Strauss, printer, Cleveland, Ohio, has sold out to Hiles & Coggshall.

Erwin McElroy, printer, Quakertown, Pa., has been sold out by the sheriff.

The *Daily Democrat* newspaper, Deming, N. M., has suspended publication.

A. A. Earl, publisher of the *Landmark*, Hartford, Conn., has been sued for libel.

The White Printing Company, job printer, Cleveland, Ohio, has assigned to F. C. Millon.

M. A. Ring & Sons, wholesale paper-stock dealers, Boston, Mass., offer their creditors twenty cents on the dollar.

The Acme Stationery and Paper Company is exceedingly busy filling orders for school supplies. Those intending to order from this company should do so without delay to insure prompt delivery, particularly when the goods wanted are the "Favorite" blotting tablets.

J. H. Bufford's Sons have brought out a line of campaign cards for advertising purposes. They contain portraits of the presidential candidates, and are painted in three colors and also come plain. The firm has also a great variety of new designs in folding cards, printed in gilt and a number of pretty tints—blues, browns, pinks and greens. They are printed on translucent paper and come both plain and embossed.

A bill has been introduced into Congress authorizing the lighting of the rivers by electricity. This scheme has many advantages. It will assist largely in reducing the surplus revenues, and it will also be a splendid thing for the fish, who will be able to stay up all night and read the newspapers, instead of retiring at sundown.—*Oil City Derrick.*

The greatest of faults is to be conscious of none.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. It CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market St., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, - 10 Cents.

NEW YORK, THURSDAY, AUGUST 21, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12S.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE enterprise of holding an exhibition of exclusively American goods in London some time in 1886 seems to be favorably received in England, and should it be prosecuted to a successful conclusion, it will doubtless be the means of attracting renewed attention to the products of American industry.

GREAT complaint still exists in business circles about the evil of dating ahead. From what we learn we conceive that the stationery trade is less afflicted with this vicious system of buying and selling than other lines of trade, but it ought not to prevail at all. If buyers are prudent, they will refuse to take goods so freely offered. They should suspect a screw loose somewhere if offers are made to date bills ahead, and they should reject the bait. On the other hand the seller should question the advisability of giving credit to a man who asks for an undue extension of time to meet his obligations. Dating ahead means weakness somewhere.

WE call the attention of the trade, and especially the members of the Stationers' Board of Trade, to the letter of Geo. L. Pease, president of that corporation, in reference to the test case about to be brought before the Supreme Court of the United States by Sabin Robbins, of the firm of Ross, Robbins & Co., Cincinnati. The question involved in this litigation is the legality of the license tax on traveling salesmen in the various States and cities, where it is now exacted. A favorable decision for Mr. Robbins will be of benefit to *every firm sending out salesmen*, and therefore, all should contribute as recommended by Mr. Pease. Contributions from any source will be accepted and the stationery trade can promulgate the fact to merchants in other lines of trade with whom they are acquainted. This matter concerns all who send out salesmen.

MEXICO imported from the United States during the fiscal year, 1883, only \$180,538 worth of paper and stationery. Nearly all of the paper used in Mexico is imported from Germany, except cigarette and coarse wrapping papers, made in Guadalajara. Paper is so dear in Mexico that American paper makers have been urged to start paper mills at various points, especially on the Pacific coast. At Manzanillo, Colima, water-power can be had at small expense; rags, cotton waste and the fibre of the "maguey" cactus abound and are all cheap. The Colima Government promises to assist with State aid, &c., Americans willing to establish a mill at the point named, relieving the establishment from all state and

county taxation for ten years. In the meantime there is plenty of room for competition with German paper, on which the freight from such a distance, especially all the way around Cape Horn, weighs heavily, while we can ship by rail, or by steamer or sailing vessel from San Francisco. American type and printing-ink enter Mexico duty free under the reciprocity treaty, so that not a pound thereof should be consumed in Mexico which does not come from here. It is really high time that people in these lines of trade among us should look into this matter and see if something permanently profitable cannot be got on foot.

Roundabouts.

BY THE TRADE LOUNGER.

An old adage is: "Patient waiting makes no loss." We have been holding off for summer weather and we have got it. How can anyone get around comfortably under the circumstances? Now is the time to envy the polar bear, or to go under bare poles. Lounging is too much of an exertion even.

I understand that the question of the right of local authorities to tax drummers is to be severely tested. The trade are urged to co-operate in bringing the test case to the highest tribunal of the country, and as every little helps, donations to help pay for expense of litigation are asked for. Turn in and help.

Word comes to me that a muscalonge, four feet long and weighing twenty-five pounds, was caught at the Thousand Islands Park, on the St. Lawrence River, by J. F. Murch, of the J. O. Smith Company, on Wednesday of last week. Big fish, big fisherman!

A Lowell paper says: "In a Chinese newspaper the columns begin at the bottom instead of at the top. It is pleasant to note the bland smile of a celestial publisher when he signs a contract to put a patent medicine ad. at top of column." This is a hint to men looking for position for their "ads."

The introduction of cheap imported scrap-books has, perhaps, been more extensive this season than in any previous year. Some of these books have a showy appearance, and to the casual observer they seem to be A No. 1, so that if one does not know exactly what he is buying, he is apt to imagine that he is really getting something cheap, when, in fact, he is buying what would be dear at almost any cost. Of course, dealers are not apt to be deceived. The consumer is the sufferer. Many of the so-called cheap imported scrap albums are crudely made, inartistic, and far less durable than the domestic article.

A well-known William street stationer asked a country customer out a short time ago to take a "lift," meaning a "health lift." They started down toward Wall street, but after walking two or three blocks, the coun-

try customer proposed going into the first exhilarating shop that they came across, not thinking it worth while to go so far for a "lift." Mutual explanations followed; both had a "lift," only one of which, however, was taken with a motion of the little finger; other "lifts" were had in the athletic establishment on Wall street.

The *Wall Street News* says that the small boy sometimes catches on by instinct. In Pearl street, the other day, as two of them stood looking into a window, one of them observed, "Oregon Improvement and Navigation Company. Is that sunthin' new?" "Naw, that's old." "What improvement is it after?" "I dunno." "Where does she navigate to?" "Can't tell." "Say, Bill," remarked the little one, after turning the name over in his mind a little longer, "I've got it! It's an improvement in the way of navigating stockholders out of their cash!"

The small boy may have the correct idea, but it is very evident that people are not putting their money in floating securities. They are not disposed to embark in stock speculations, much less to try and swim the uncertain sea, as once they did.

There is nothing exciting about trade, As intimated at the outset, it is too warm to try and do much—even too warm to lift. Let us "take a rest!"

Taxing Drummers.

A TEST CASE TO BE MADE.

As will be seen from the subjoined communication, it is intended to make a test case for the purpose of deciding the debated question of the right of State or municipal authorities to compel commercial travelers to pay license fees.

THE STATIONERS' BOARD OF TRADE,
Nos. 97 and 99 Nassau street,
Rooms 9, 10 and 11, P. O. Box 2615.
NEW YORK, August 19, 1884.

To the Members of the Stationers' Board of Trade:

GENTLEMEN—The object for which our corporation was formed, as stated in our constitution, "is for the purpose of fostering trade and commerce, to protect it from unjust or unlawful exactions, to reform abuses in trade," &c.

To carry out the spirit of this article of our constitution, and to settle this much-discussed and perplexing question as to the right of any State or municipality to extort a license tax from salesmen, let us subscribe and pay a small sum each to assist in carrying to the Supreme Court of the United States a test case which has been started in Tennessee by Messrs. Ross, Robbins & Co., of Cincinnati, Ohio, and which has been prosecuted at great expense in Tennessee State courts adversely to Mr. Robbins. A decision can no doubt be obtained this fall or winter from the United States Supreme Court, which will settle for all time the rights of our salesmen to sell goods without the expense of a license in almost every State and city.

Very respectfully,

GEO. L. PEASE, President.

The defendant in the above-mentioned case, Sabin Robbins, of Cincinnati, has appointed A. S. McDade, salesman for Boorum & Pease, to solicit and receive subscriptions for this purpose, and all contributions forwarded to him at 28 Reade street will be acknowledged in the columns of THE STATIONER.

Answers to Correspondents.

O. R. asks: 1. Who manufactures diaries for 1885? 2. Who makes calendars for the trade? 3. Who manufactures school-bags? 4. Who manufactures Coughlin's elastic blotter? 5. Manufacturers of stationers' tin goods? 6. Address of Clough, Lindale & Co., manufacturers of bill-holders.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, August 20, 1884. }

THE MONEY MARKET.—Although a better demand for money is developing in the country districts, yet currency has been moving westward from here comparatively slow. The loan market was more active and somewhat firmer. Call loans on stock collateral are $1\frac{1}{2}$ @3 per cent., with two per cent. the ruling rate. For commercial paper there has been a rather better inquiry, and rates on other than prime are reduced, both single and double names. Operators for a rise still appear to have full control of the stock market and ability to mark up prices at will. The market closed strong at an advance. Government bonds were higher for the 4's and lower for the $4\frac{1}{2}$'s. Railroad bonds were more active and strong, in sympathy with the stock market. The market for sterling was fairly active and steady, there being no increase in the supply of spot commercial bills and no security bills made.

THE PAPER MARKET.—The production of the mills is still kept up to quite a full point, drought not being a hindrance, as in former seasons, and the demand is sufficient to keep the mills fairly well employed on orders without very much overstocking the market. It is true that the condition of the paper trade at the present time presents few very encouraging features; yet, contrasted with many other industries, the depression is not so great, and the condition of things is scarcely so unsatisfactory. Manufacturers have had to make sacrifices rather than to close down their mills entirely, and paper has been marketed at abnormally low figures, yet there is very little which is not sold at some profit, however small, and this is more than can be said of some other manufactures. Considering the fact that there are very few large buyers seeking supplies, prices are holding their own very well; and while it is said that some buyers have an idea that prices may undergo a further shrinkage, the tendency is rather the other way in the opinion of a greater number than those who look for a decline.

THE STATIONERY MARKET.—There is a fair degree of activity in trade, considering the backwardness shown in all branches of business for some months past. The movement in staple goods is opening up well, and although it is rather slow there are signs of improvement. In blank-books dealers report an encouraging amount of orders, and in scrap and autograph albums there is a brisk trade, particularly in the line intended, more especially for school purposes. There is a large number of cheap goods of this character in the market, but they cannot compare in quality to American productions, and even in price are not equal to the domestic article of the same quality. The movement in campaign goods continues active, and among the new goods offered in this line are campaign advertising cards. They are gotten up in excellent taste and no doubt will be readily taken hold of by consumers. The school-book trade is just now starting up in consequence of the near opening of the schools. The agreement made between several leading publishers a few months ago will no doubt do much to advance the interests of the trade and break up many irregular practices, which have heretofore tended to embitter the good feeling between the various publishers.

Obituary.

DANIEL D. WHEDON.

The body of Daniel D. Whedon, brother of Charles A. Whedon, one of the firm of Wilkinson Brothers & Co., paper dealers and manufacturers, 72 and 74 Duane street, New York city, and son of the Rev. D. D. Whedon, of Sag Harbor, for many years the editor of the *Methodist Quarterly Review*, who mysteriously disappeared from his home in West Jersey street, Elizabeth, N. J., on Saturday morning last, was found on Tuesday night under a tree on Linden avenue, a few feet from Bayway, in that city, by the family coachman. A pistol-shot through the mouth and a four-barreled revolver with one chamber empty, lying by his side, told the tale. Mr. Whedon, with his wife and one child, a girl of five years, has been living in a large house in a pleasant part of West Jersey street, Elizabeth. For a year he has been out of business and in poor health. On Saturday morning he got up earlier than usual and sat upon the veranda. At breakfast his wife told him that she was going to the city to make some purchases and asked him if he was going. He usually went to his brother's office in the morning after his mail. He replied that his brother had asked him to go for a drive that evening, and that he thought he would not go to the city until late in the afternoon, and might stay with his brother all night. When Mrs. Whedon left he bade her good-bye. He was sitting in his dressing-gown and slippers on the veranda. The servant says she saw him looking at Mrs. Whedon till Mrs. Whedon disappeared down the street, and then he went into the house and to his room. The servant did not see him after that. Nobody appears to have seen him leave the house.

On Sunday night he had not returned, and Mrs. Whedon grew anxious. She found that a pistol which had for a long time lain in a bureau drawer in the house was gone. She informed Mr. Whedon in this city, and a general inquiry was made with the above result. He was salesman for his brother's firm for a number of years, and subsequently went in the paper-box business with his brother, A. S. Whedon, in Hudson street. Recently he had made arrangements to go into business in a Western town, but his ill-health and enforced idleness preyed on his mind and he of late has shown signs of mental aberration. Charles Whedon, of Wilkinson Brothers & Co., his brother, says: "He had plenty of money to live on, and if he had not his family are abundantly able to help him. We have looked over his letters, but find nothing significant in them. He has always been a quiet, home man, with no bad habits. We can only attribute his departure to a fit of temporary insanity, produced in some way by his ill-health. Last Wednesday he went to Ocean Grove with his family. Just after bathing, he complained of a severe pain in the back of his head." Mr. Whedon was thirty-seven years old, and his fellow clerks and employees speak very highly of him. When the body was found decomposition had set in and the dead man's features were scarcely recognizable. It is believed that he shot himself within half an hour

after Mrs. Whedon parted with him. Nearly \$100 in money was found upon him. His family relations have always been pleasant, and his wife is almost prostrated with shock.

The Rev. Dr. Whedon lies at the point of death at Sag Harbor, where another son lives. There is a fourth son in Florida.

Worcester Wisps.

[CORRESPONDENCE OF THE STATIONER.]

WORCESTER, Mass., August 20, 1884.

Stationers in this town are looking for a good fall trade, and report a fair amount of business for the season.

D. A. Davis, of Putnam, Davis & Co., has passed through a very severe sickness, but is now reported convalescent.

C. H. Bannister, the late ition to the same firm, returned on Tuesday after a short respite from business, bringing with him an armful of pond-lilies for the sick.

Sanford & Co. report a favorable condition of trade throughout the summer months, and predict a busy fall trade in staples. The system and general appearance of their store would be a "sample" for some of the "Knickerbockers" to imitate. Mr. Sanford finds a young lady a desirable acquisition to a book store.

C. B. Eaton & Co. are in the midst of preparation for a boom this fall in their specialties of papers, exhibiting samples suitable for the primmest "school marm" and the most piquant coquette. Mr. Eaton is one of a host of booksellers in this State who think that the free book law is not only a notable injustice to the trade, but that it will soon illustrate its impracticability, and finally show up as a "political grab." He has a well selected stock.

Edward Whitney, wholesale stationer, reports trade as being medium. With his new quarters he feels as if he had room to entertain and show a full line of specialties. W.

Among the out-of-town tradesmen in town during the past week were: Mr. Lewis, of the St. Louis Stationery and Book Company, St. Louis, Mo.; Mr. Reynolds, of Swinton & Reynolds, East Saginaw, Mich.; R. S. Wetmore, Selma, Ala.; Mr. Edmunds, of Edmunds & Co., Hagerstown, Md.; A. H. Smythe, Columbus, Ohio; Mr. Osborne, Burlington, Ia.; L. N. Brunsirving, New Orleans, La.; Charles Herzog, Memphis, Tenn.; A. H. Hawkes, Austin, Tex.; Clarke & Courts, Galveston, Tex.; Mr. Leybold, of New Orleans, La.; Mr. Kellum, Topeka, Kan.; D. S. Wright, of Clark & Co., Vicksburg, Miss.; Charles Stewart, of the Charles Stewart Paper Company, Cincinnati, Ohio; E. A. Phinney, Stillwater, Minn.

As ceremony is the invention of wise men to keep fools at a distance, so good breeding is an expedient to make fools and wise men equals.

Every man needs a true inward manhood. All the elements that are in us are insignificant except as they stand related to that.

Wood Binding for Books.

A wood binding for books is intended specially for the cover-binding for large and heavy blank-books which are to be preserved for a long period of time; but it is not confined thereto, as it may be found useful to apply the invention in cover-binding other descriptions of books.

The binding comprises a wood back, wood side cover-pieces, a leather or other flexible hinge, made and applied to a blank or other book, as follows: The blank-book side cover-boards may be made of solid strips of wood, grooved and tongued and more or less wide, as may be found necessary to secure strong, durable and straight side cover-boards. These strips are firmly united and glued together; but previously thereto those which form the back-edges of the cover-boards are rabbeted so as to form broad recesses on the under side of the cover-boards at the back edges. At these recessed portions strips about one-third the thickness of the cover-boards, and having rabbets cut upon them, are employed so as to partly fill the recesses and form grooves in the back edges of the side cover-boards. The grooves thus formed provide room and serve as receptacles for the strip of fly-leaf with bands and straps of the book proper, and for the strip of leather which forms the hinge-joint of the cover of the book. The rabbets on the back edges of the cover-boards may be deep enough to permit of the rabbets on the strips being dispensed with, in which case the strips would be alike on both surfaces, and the deep rabbets may be as wide as desired.

The back of the cover is made or turned out of a solid piece of wood, of required size, by giving it a concavo-convex form, and shaping it on its convex surface with segmental ornamental protection and wearing-hubs, separated by less extended convex portions of the back, upon which latter portions highly-finished paper or other material with the usual words and numbers for blank books is pasted. On the concave side of the wood back the piece of leather which forms the hinge along the whole length of the back is securely fastened. This piece of leather has its ends turned in and secured to the back, and covered by the metal cap-like tips, and it is wide enough to have its edges extend considerably beyond the side edges of the back, and thereby hang over the edges to form the hinge of the cover. The back may be strengthened or stiffened for large books by a piece of pasteboard molded to the form of the concave of the back, and glued on the bent concave surface of the piece of leather forming the hinge. The side cover-pieces and the back, constructed as described, may be provided with cap-like tips of metal, which are applied on the upper and lower ends of the back.

To employ the cover described for binding a blank or other book, it is only necessary to make the book proper ready to receive the cover, and to do this the leaves of the book are trimmed and rounded, and upon the back edges of the leaves bands and straps are applied in the usual manner. The straps lap over on each side cover-piece of a book about

two inches, and are glued down on the outside fly-leaf strip, which is cut off about even with the straps. The straps and fly-leaf strips of the book proper thus prepared would, under the old style of binding be glued under the unpasted portion of the top layer of the three-ply pasteboard side cover-piece and after the side cover-boards are on the book the spring back made of pasteboard would be fastened to the book with two strips of paper across the back and glued down to the side cover-boards, this being done simply to keep the back in place. Next, the raised hubs made of leather or straw-board, would be glued on the back in their proper places, and the leather covering for the foundation work comprising the back and side cover-boards would be supplied with paste and drawn over the sides and edges of the foundation, and the edges of the leather turned in; and, finally, the book would be pressed and then finished on its sides and back with gold and blank rolling; but with this wood cover no leather with which to cover the foundation-work is necessary, and the back is put on first. This is done by applying glue to the extensions of the leather forming the hinge-joint and fastening these extensions to and on top of the straps, bands and strip of the fly-leaf. Next the wood side cover-boards are put on, the strips of wood, to partly fill out the recesses and to form the grooves, being laid in their places on the boards and held there by gluing strips of paper to the boards and strips of wood. The strips of paper form temporary hinges, and they are removed after the boards are fastened. The wooden strips are now raised and glue applied to them and to the recessed portions of the side cover-boards, and just before again lowering the wood strips, the fly-leaf strips, with bands and straps, and the extension edges of the leather forming the hinge, are placed in the recesses. The wood strips are then lowered, and by pressure the whole are brought together and firmly fastened by the glue when it becomes set. The metal tips may now be applied, and by their extending some distance over the out and in side of the back, and being riveted, they help to strengthen the back, while they prevent any possibility of the leather hinge or leather and filling separating from the wood back.

This wood cover is said to make a very cheap yet elegant and durable ready-made book-cover, comprising, in the main, three portions—viz.: one back and two side cover-boards—provided with fastening-strips, and along with these parts may be provided the leather piece forming a hinge, and the metal cap-like tips and the ready-made cover may be of the very finest wood finish, either of inlaid, mosaic, or plain construction, and it may have ornamentations in form of projecting hubs turned on its back, in its manufacture.

The cover will also be very durable, and, as the wearing-hubs on its back are not covered with leather, the finish of the book will not soon become impaired, and if it does it can be redressed and varnished at slight expense.

Instead of gluing the wood strips in position upon the hinge-piece bands and straps and the side cover-boards, screws, clamps, or other fastenings might be adopted; and instead of

having the board back strengthened or filled with pasteboard, rabbets may be formed in the concave surface of the back at the edges, and a concavo-convex metal lining may be provided having hooking-flanges on its ends.

To such flanges leather pieces forming hinges may be fastened, and the whole—back, lining, and leathers—united by any suitable fastening. When the metal lining is in position, its hooks will occupy the rabbets.

After a visit to some of the Alaska glaciers, Thomas Meehan states that beneath the Muir glacier, said to be four hundred miles long, flows a rapid torrent, which he estimates to be one hundred feet wide and four feet in average depth, and which runs summer and winter without interruption. At its termination the glacier hangs over the sea, and gives off icebergs. Mr. Meehan remarks that the

great ice sheets have their lakes, rapids, waterfalls, hills and valleys; that the waterways change their courses at times through the melting, and that melting progresses freely in the sun's rays, but not in the shade.

Trade Items.

P. Messick's paper storehouse, at Chatham, Columbia County, N. Y., was burned on Friday. The loss on paper and building is \$10,000; partially insured.

The National Publishing Company, Philadelphia, has issued some very handsome bible designs and side dies during the spring, and is prepared to promptly fill all orders received.

Ives, Blakeslee & Co., 297 Broadway, New York, have just issued a new illustrated catalogue and price-list of toys and mechanical novelties. This firm gives special attention to export orders.

George H. Davis, managing clerk of J. H. Bufford's Sons, left town this week to take a much needed vacation. Mr. Davis recently had the misfortune to lose his son, a bright little fellow, two and a half years old. The sympathy of the trade is extended to him.

E. P. Donnell & Co., Chicago, have begun a suit against Fred. Phillipi, of St. Louis, for an infringement of their patent on foot-power perforating machines. They give notice that they will hold all persons using such infringing machines responsible for damages. They invite the attention of the trade to the perforating machine which is advertised in another column of THE STATIONER.

Mr. Hayes, of the firm of Baker & Hayes, Philadelphia, came back this week from a Western trip, during which he was introducing his campaign cards. The demand for these cards is increasing every day. Mr. Hayes has received from his friends among the artists of Philadelphia a splendid album richly bound, on which are to be found all of the drawings and paintings offered to him two months ago when he left the firm of Sinclair & Co.

Joseph R. Folsom, until lately a member of the firm of G. P. Putnam's Sons, will hereafter be associated with the publishers of the *American Agriculturist*, in advancing the interests of that journal, and more especially in enlarging the number, and pushing the sales of its already large list of publications. Mr. Folsom is a graduate of the Sheffield Scientific School of Yale College, and is said to be by travel, study, and business experience peculiarly fitted for this field of labor.

Among the many novelties which C. F. Rumpp, Philadelphia, has produced for the coming holiday season, tourist's writing and traveling dressing-cases are worthy of particular note. In these, Mr. Rumpp displays an extraordinary varied line of cases most practically arranged and fitted with superior articles. One case which will attract considerable attention is the patent English "compact pocket dressing-case," of which Mr. Rumpp has the sole control. This contains a razor-strop, a patent compact razor, a tube of shaving cream, a comb and mirror, all this in a case measuring only $4\frac{1}{4} \times 1\frac{1}{2} = 1\frac{1}{4}$. For tourists this case is unexcelled, as every article contained in the case is equal in quality and usefulness to those of any case in the market. Mr. Rumpp has all of his men on the road now and expects to be kept quite busy during the coming season.

Henry Levy & Son are adding novelties every week to their stock of fall goods. The latest things shown are bouquets of artificial flowers in imitation china vases. These come in sets and separately. They are very attractive as well as reasonable in price. There are also a large assortment of ormolu gilt goods, such as pin and watch trays, odor stands, card-receivers, puff-boxes; also a variety of articles, including inkstands, paper-knives, calendars, &c., made from a species of wood which closely imitates ivory. The designs of these goods are really novel and pretty, and the whole line is composed of the newest things attainable both in this country and Europe.

The Tower Manufacturing Company has one of the largest and most complete lines of school bags in the market. It manufactures a special line of canvas and oil-cloth bags and constantly keeps on hand a great variety of hemp bags, plain, and with red and blue stripes, waterproof bags, enamel oil-cloth bags, open work bags, also seamless bags and German and Scotch hemp goods. The company is now offering the trade a line of imported scrap albums, ranging in price from \$1 to \$7 per dozen; also a line of imported inks in fancy bottles.

Selchow & Richter are showing the trade some novelties in iron toy-banks. They are called, respectively, the "Humpty Dumpty," "Punch and Judy," "Baby Mine," "Shamrock," "Rooster," and "Combination Safe" banks. The firm is also introducing a new toy consisting of a wagon which, when in motion, causes two negro clowns to swing themselves over a trapeze bar.

In the suit of Robert Hoe & Co. against Knapp and others, involving the validity of patents for a newspaper folding machine, it has been held by Judge Blodget, of Chicago, Ill., that the defendants were infringers, and they were given time to fill a \$10,000 bond to pay damages. In the event this bond is not filed an injunction will be issued.

C. M. Ward left this week on a flying business trip to Worcester, Springfield and other points in Massachusetts. He will thoroughly show up the goods of the Cincinnati Paper Novelty Company and Globe Files Company and will undoubtedly bring back a budget of orders.

Marcus Ward & Co., Limited, have issued a new "Forget-Me-Not" birthday book. It is bound in blue cloth with gilt decorations and fancy end-papers, and contains a registry for birthdays and anniversaries, together with selections from the standard poets.

The September number of the "Magazine of Art" (Cassell & Co., Limited), justifies its publication. The usual amplitude of illustration is to be found in this number. "The Inns of Chancery," "Old Church Plate," and other interesting illustrated articles are to be found in this issue.

The Clasp Envelope Company, 34 West Broadway, has a new price-list of its sample mailing envelopes. These convenient articles can be had at reduced prices.

J. B. Lippincott & Co.'s September classified catalogue of publications and importations is ready for the trade. It is very full and comprehensive.

Vanderbilt Brothers, 2 Lisenard street, are sole agents for the "ready blotter," illustrated in another column. They also manufacture and carry stock of desk pincushions, pin cups, pen cleaners, &c.

Evans, Plummer & Co., 57 Beekman street, have lately issued price-lists of Christmas souvenirs and novelties, New Year calling, mailing and reception cards, &c. The excellent quality of the goods handled by this house is well known, and dealers should send for the price-lists.

Whiting's "Standard" writing papers are the *sine qua non* of fashionable correspondence. They are made from clean, pure stock and are attractively put up in neat boxes with envelopes to match. The line comprises two tints—"ancient cream" and "ancient azure"—and two surfaces—"mill rolled" and "double glazed." Those who haven't got these papers in stock should try them.

The Carson & Brown Company, Dalton, Mass., has got out a handsome sample book of its elegant linen ledger papers, bearing the "Old Berkshire Mills" water-mark. The book has a handsomely engraved cover, illustrating the "Old Berkshire Mills," and remarkable flowing artesian well, which the company recently completed. The trade should send for this sample-book at once.

Phil. Hake anticipates a brisk demand for his star beveled-edge visiting cards, judging from the numerous orders he has received since their introduction. They are an entirely new thing, and as such will be appreciated by the trade everywhere. The demand for Mr. Hake's line of Christmas cards and novelties has grown so rapidly within the past week or two that he has been obliged to call in his traveling salesmen, George A. Raisbeck, George W. Knott and Charles H. Wright to attend to orders, and hence his salesroom just now presents a scene of unusual activity.

The Silicate Book Slate Company has improved its pocket-book slate by the attachment of a new combination lock, by which means memoranda, letters, &c., which the article may contain, are almost as secure from prying eyes as if they were locked in the drawer of a desk, for the reason that no one can open the book except the person carrying the combination. This is an improvement which will completely do away with the annoyance which meddlesome wives and children are apt to give when exercising an improper degree of inquisitiveness as to the contents of papa's pockets. The locks can also be attached to pocket-books. They are the invention of a member of the company, which has, perhaps, the greatest variety of book-slates now in the market.

Advice is like snow—the softer it falls, the longer it dwells upon, and the deeper it sinks into the mind.

Duplex Bronzing and Embossing Process.

This invention relates to the art of bronze embossing; and it consists of a new method of producing such work whereby perfect effects are obtained in a simple manner and at a low cost. This is done by making use of two qualities of size and applying the bronze or dry color to the paper, &c., at the time and during the process of embossing; and in combination with the process of embossing and bronzing at one operation, bronzing on the flat surface of the paper, &c. The size for the flat bronzing is laid by the surface type or die which lays the size for the embossed portion of the die.

The first part of the process consists in printing on the part of the paper, &c., to be embossed an ordinary oil or varnish size by means of a surface-type or relief-die corresponding in form to the contour of the embossing-die.

The second part consists in applying to the embossing-die a water-size having little adhesiveness in comparison with that of the oil or varnish size, then applying the bronze or dry color to the dye, and wiping off the surplus water-size and bronze or dry color from the flat surface thereof, leaving the bronze or dry color in the intaglio, and completing the process by embossing the part of the paper, &c., on which the oil or varnish size is printed before the same becomes dry. The oil or varnish size takes out of the embossing-die all the bronze or dry color at the time the surface of the sized paper comes in contact with the intaglio surface of the die, by reason of the oil or varnish size on the paper having more adhesiveness than the water-size on the die. By this means, the whole of the embossed surface of the paper, &c., is covered with the bronze or dry color, and all danger of breaks or cracks in the bronzed surface is avoided, which imperfections often occur in this class of work done by the ordinary process, in which the bronze is applied first to the paper and the embossing afterward performed. This old process limits the amount of relief which can be given to the paper, whereas by this process any amount of relief the paper, &c., will stand may be given to it without any fear of imperfections in the bronzed or colored surface. Besides, the bronze or dry color has a much better effect applied to the paper as it is embossed than when it is applied thereto before the embossing process; and should any of the size on the paper extend beyond the outline of the embossing-die none of the bronze or dry color adheres to this part of the size, and a size the color of the tint of the paper is used, so that any imperfections of register are not seen.

In combining flat bronzing or coloring with the embossed bronzing or coloring process, the size for the flat bronzing or coloring is printed on the paper by the surface type or die, and the bronze or dry color applied in the ordinary way to the flat-sized surfaces after the raised portions of the design are bronzed and embossed, as before described. Two or more colors may thus be used in one

design, and, if desired, colors may be printed on the paper, &c., before the oil or varnish size is applied thereto, to form parts of the general design, so as to produce varied and pleasing effects, it being understood that such color or colors printed or parts to be bronzed in the flat are not acted on by the embossing-die.

A great advantage of the process is the speed at which this class of work in its most perfect form may be executed, as the printing of the oil or varnish size on the paper, &c., is done on an ordinary printing-press, and the bronze-embossing process performed while this part of the process progresses, before the oil or varnish size sets on the paper, so that the various operations of the complete process are performed simultaneously, enabling a job to be run off with great facility.

In some cases water alone is used in the die, as all that is necessary is to cause the bronze or dry color to adhere to the die sufficiently long to enable the embossing process to be performed. Any suitable sizes may be used on the paper and die, the only necessary conditions being that the size applied to the paper shall be more adhesive than that applied to the die, so that the paper-size shall take all the bronze or dry color from the die-size.

Many men have just enough faith to make them miserable, but not enough to make them hopeful.

Metrical Contractions.

The following list of contractions, which have been adopted by the International Metrical Congress at Paris, and recommended for general use, may be found serviceable for reference: (1.) Length—Kilometre, *km*; metre, *m*; decimetre, *dm*; centimetre, *cm*; millimetre, *mm*. (2.) Surface—Square kilometre, *km²*; square metre, *m²*; square decimetre, *dm²*; square centimetre, *cm²*; square millimetre, *mm²*; hectare, *ha*; are, *a*. (3.) Cubic measure—Cubic kilometre, *km³*; cubic metre, *m³*; cubic decimetre, *dm³*; cubic centimetre, *cm³*; cubic millimetre, *mm³*. (4.) Hollow measure—Hectolitre, *hl*; litre, *l*; decilitre, *dl*; centilitre, *cl*. (5.) Weight—Ton (1000 kilograms), *t*; metric hundredweight (100 kilograms), *q*; kilogram, *kg*; decagram, *dkg*; gram, *g*; decigram, *dg*; centigram, *cg*; milligram, *mg*. Italics are used for these contractions, but no period (.) is used after them, and they succeed the figures to which they refer. Fortunately, no "sorts" besides the "*m²*" and the "*m³*" are requisite. Roman might do as well as italic characters, however, and subserve typographical neatness. It is satisfactory to note that the absurd freak of placing decimal fractions with their points after the designations instead of immediately after the integers is deservedly discountenanced. Writers on scientific subjects are sometimes far too prone to affectations in manuscript, which hardly promote accuracy or intelligibility, but are a positive imposition on the time, patience, and temper of editors and printers.—*Boston Transcript*.

Australian Malachite.

Hitherto the principal supply of this beautiful marble, which is largely used in Europe for mantelpieces, pedestals, and similar decorative purposes, has been obtained from Russia, but it is equally rich and abundant in New South Wales, where its color ranges from pale emerald to deep green, the various layers often possessing different shades of color, and forming a most beautiful and valuable stone for ornamental and inlaying purposes. Crystals are occasionally met with, and sometimes of large size; those from the Cobar Mines are particularly beautiful. The silky lustre is often very remarkable, the capillary crystals being sometimes several inches long, and compacted together into fibrous bundles. It is found in most of the upper workings of New South Wales copper mines, as in the Bathurst district with chlorite, vitreous, yellow, and other copper ores; at Cambalong earthy and fibrous malachite is associated with barytes or heavy spar, and with yellow and peacock ore; at Cobar, county Robinson, with steatite; Mitchell's Creek, Wellington, county Wellington, mixed with other surface ores, and often containing large quantities of gold and silver.—*Journal Soc. Arts*.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, Ohio, August 26, 1884.

It is only by experience that we really learn things, and that experience must be often repeated to make strong impressions. The people of this locality have in this manner just now learned the value of rain, and their utter helplessness when it is withheld. Three days ago the earth was parched, vegetation was checked, in many cases dying; no end of troubles and inconveniences, not to say positive losses, were looming up before the people. Farmers found their cattle starving on pastures where they should have been fattening; streams, wells and cisterns were drying up; corn, tobacco, potatoes, tomatoes, melons, every growing thing gasped for life. The common, every-day phenomenon of rain it was found was a mighty useful and necessary thing, and when it came there was general rejoicing. There have been two droughts throughout this region this summer, each of about three weeks duration. The result does not affect wheat, oats nor hay, but it does seriously affect corn, potatoes, tobacco and all late vegetables. The effect must be felt in the general channels of trade and hence it must touch the stationers. Therefore has this reference been made to the subject.

With this preface, it is a natural sequence to say "business is dull." Why should it not be? This is the Presidential year, and many buyers refrain from making investments, because they imagine there will be tight times if the other man is elected. There is very generally a tendency to caution in all lines of business. The drought, as already noted, must make many farmers look more than once into their cash-box before taking out money to buy anything beyond necessities.

There is, besides, a local reason for dullness here in many lines of business. It is the approaching Industrial Exposition, which begins on September 3 and continues a month. During its continuance all of the railroads leading into Cincinnati give reduced rates of fare. This has been the rule so long that it is well understood, and everybody contemplating a

visit to Cincinnati postpones it until cheap rates can be had. Such a state of affairs affects July and August unfavorably, but it tends to make September a rushing month.

With all of these forces at work it is not strange that Cincinnati dealers should say that business is dull. But they are not alarmed; they look for an early resumption; some of them are taking advantage of the prices to buy largely of staple goods, feeling sure that they cannot decline further; others observe a rule of business discretion, to keep full stocks, especially in dull times, so as to catch what trade offers.

Among the marks of life in the trade is the fact that W. B. Carpenter & Co. are preparing a catalogue of goods in their line, and they request electrotypes from those having them, for use in the publication.

This firm has also recently added to its manufacturing department several of Blackhall's inventions, including a lapper for ruling, a double-combination striker, a perforator and a new marking device. The Ohio Publishing Company and Webb & Sons have also put in some of these machines.

The traveling men who have recently visited this city are: S. A. Lipman, of Boorum & Pease, New York; J. Aikenhead, for John Gibson, New York; G. B. Walker, of H. L. Judd & Co., New York; R. McFeeters, New York; Alfred A. Goldschmidt, New York; Franklin Allen, with Ideal Pen Company, New York; A. Janitz, with Peters Brothers, New York; James I. Watkins, New York; M. Greenwood, with A. & J. Wallach, New York; E. Gage, with Holway, Wright & Rech, New York.

PRINCE WILLIAM.

WASHINGTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WASHINGTON, D. C., August 26, 1884.

As the political pot begins to boil the scum rises to the surface, and at present the people of Washington, in common with the folks in other parts of the country, are busy trying to pick out something good for their favorite candidate from the great mass of vile stuff that is just now floating around under the noses of indignant Democrats and disgusted Republicans. The condition of things in the political world has not as yet disturbed the

business or trade of the capital, and as far as can be seen, events in this part of the commercial world are commonplace and uninteresting. Nothing has occurred worth a chronicle since the fraudulent envelope contracts of New England were exposed. Postmaster-General Gresham issued an order last Thursday, the 21st inst., annulling the contracts of P. P. Kellogg, of Springfield, Mass. This action, on the part of the Postmaster-General came about in this way: Many complaints have been coming in to the officials of the Post-office Department that the envelopes furnished by P. P. Kellogg and the National Papeterie Company, of Springfield, Mass., were not up to the contract grade. In order to get at the truth of these statements, the Postmaster-General had a test of the paper made and found that the goods delivered were not what they should be in strength and quality. Having established the fact that there was something crooked, he, in company with his third assistant, General Hazen, made a trip to the cities of Hartford and New Haven, where the envelopes and paper were manufactured. The result of this trip is best explained in the statement just made in reference to the cutting off of Mr. Kellogg from the department's pay-roll. Kellogg had the contract for supplying official envelopes, register packages, tags and dead-letter envelopes. The contract was awarded him at the beginning of the current fiscal year, for which he was to receive from the groaning vaults of Uncle Sam the sum of \$80,000. The Post-office officials say that the envelopes did not come up to the grade contracted for; hence, the order. Other proposals will be soon forthcoming, and it is hoped that the next man who gets a whack will not try to do the grand thing right at the start, but go it easy and get rich slowly but surely. Some Frenchman said that "experience to some people was like the stern lights to a ship, it only illuminated the track over which they passed," and this truism I present to the successor of the late contractors.

While I am on Post-office subjects I will state for the benefit of some ambitious firm or individual that there is a chance for a good map maker to exchange his wares for some of the government's money, provided he can make as good post-route maps and as cheaply as Julius Bien, of New York. This gentleman

had the contract last year, and was this year the only bidder.

The great holiday month is near its end and now the school-boy and the school-girl are beginning to get their traps in readiness for the winter's work in the schoolroom. The Washington school-houses have all been overhauled and put in order, and teachers as well as superintendent and members of the board are getting ready for the work so close at hand. The schools open on Monday, the 15th of September, and as there are usually about one thousand new scholars every year, it will necessarily entail a good deal of work for the first two or three days to distribute and arrange this young army of wickedness. There are five hundred and fifty-five school teachers employed in the public schools of Washington, thirty-three employed in the Normal and High schools, and five hundred and fifty-two in the Elementary schools. The rapid growth of the public schools here may be easily noted when it is remembered that twelve years ago there were only one hundred and thirty-eight teachers in the employment of the district government. These facts are, of course, interesting to the stationery trade, and the bookseller well may rejoice when he is shown the improvement and progress in the educational matters of any locality. The text-books will remain the same, with the exception of the copy-books and the Fourth and Fifth Readers. This beginning of the scholastic year adds a little more life to the dull trade in the stationer's line, and in a few days the spry clerk who has all the summer been sitting in the back part of the store on the sharp edge of the step-ladder reading *Puck* and other such trash, will have to get up and dust around lively in hunting the "jog-fries, histries," &c., demanded by the imperious citizen in his short-clothes.

There is a little snarl here over the district printing contract. Gibson Brothers claim that they have not been fairly treated by the District Commissioners, in view of the fact that, while they were the lowest bidders for twenty out of twenty-four items, and a tie on the two principal items with another firm, the contract for the two items on which they were tied was awarded to the other firm. As these two items were the heaviest and most important of the printing for the year, having more extras than all the other items combined, the Gibson Brothers felt aggrieved, and intimated to the Commissioners that, as their good name had been impugned in not awarding them the whole contract, they would like to know why they had been discriminated against. Gibson Brothers say they never received any reply from the mighty rulers of the district, and that the first thing on the subject which they saw was a notice in the Baltimore *Sun* that the contract had been awarded to the firm of Judd & Detweiler. The Gibson folks claim that they have been treated in a very unfair manner, and do not hesitate to say that they are convinced the contract was awarded to Judd & Detweiler for obvious reasons, which newspapers would decline to publish. These contracts embrace the printing for the various departments of the district government—health, police schools &c.

The summer just drawing to a close has been one of the most agreeable in temperature for the past thirteen years, according to record at the signal office in this city. The present month has been unusually pleasant, and there has been no very hot day or night since the earthquake shook up the country. Whether this phenomenal weather for such a month as August is due to sun-spots, earthquakes, or meteors flying around loose, it is for scientists to determine, the common people being satisfied to take the weather just as it comes without asking for any explanations. Yesterday afternoon, while a cool wind made walking something less than a burden, your correspondent went forth in search of an item or two of interest to the trade. At Easton & Rupp's, on the Avenue, the junior member of this firm was found basking himself in the vicinity of big piles of paper and blank-books, and he relieved his mind by telling the inquirer after truth that things were very dull, and that there was very little doing in the paper trade; but as the people who had fled to the wilds of the mosquito would be soon coming back, he hoped for a stirring up. Mr. Davis, representing the firm of M. A. Reay & Co., was ably assisting Mr. Rupp in the basking business on the occasion of my call, and he also informed me that in his travels he had found it very quiet, and that he proposed to "shake off" the attractions of Washington on the morrow.

At Robert Beall's, at the other end of the famous thoroughfare, there was found the same sabbath quiet and easy, contented feeling. Just at this time there seems to be a slight demand for books on political economy and such kindred subjects, and as Mr. Beall has a fine assortment of all such works, he is daily doing what he can to set the people straight on the tariff question. I inquired if the folks hereabouts were buying many lives of the candidates (being attracted by a gorgeous-looking copy of the life of John A. Logan), and I was told that it was foolishness for book-makers to send such reading matter to Washington, there being no demand for them. This is true, because the citizens of Washington are too well acquainted with most of the public men to need any glowing information about the same doctored for campaign purposes.

Stepping into the large and airy quarters of Ballantyne's, on Seventh street, the clerks were seen skipping here and there busy in arranging for the school-book trade, which is about to commence. Mr. Ballantyne has the contract for this year and will in a few days be quite busy in attending to this very exacting and almost profitless business. The same news was here obtained in regard to the status of trade which has been found at other places.

On my return up town I stopped for a moment in Brentano's, Chapman's and Whitaker's. At the former place there was very little doing, but there was present a very distinguished customer in the person of Gen. Joseph E. Johnson, late of the Confederacy. The old gentleman is very gray and his military eye has grown a little dim, but with these slight exceptions he is the same erect, dignified soldier who once led the armies of the rebellion.

Among those who have been so fortunate as

to get within the beautiful precincts of this city during the past week or two may be mentioned Remsen Darling, with Evans, Plummer & Co.; A. J. Schad, of the well-known house of Daniel Slote & Co., and J. C. Blair, of Huntington, Pa. BEN.

BOSTON PARAGRAPHS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, August 26, 1884.

There is possibly no section of this glorious country that can produce such a grand variety of weather as New England. Not content with the regular four yearly seasons of spring, summer, autumn and winter, we must have all of the sudden changes crowded upon us within a week.

In my last report I noted the fact, that the thermometer marked 96°, and in view of the scorching hot weather, the good people of the "Hub" were gathering up their summer dusts and betaking themselves to seaside and mountain resorts. Well, they are all coming back again for their overcoats, as the thermometer got down to 28°. That is a pretty big drop for a week and especially for a week in August.

A heavy white frost is reported from many districts in this section, which has done no small amount of damage to the crops of vegetables and buckwheat.

The poor farmer is having a sad time this year. No summer boarders and now the crops ruined. First, an earthquake shakes everything by the roots and then Jack Frost rolls over the stalks. Truly, does the country need a change? Ben Butler has said it, and Ben offers himself to the country as the healing "balm of Gilead."

The several town school committees throughout the State, acting under authority of the "Free text-book" law, are actively engaged in purchasing supplies for the scholastic term, which opens about the first week in September. Though in some respects the law is a good one, complaints are numerous, not only from retail dealers and jobbers but also from committee men, who are daily besieged by persistent drummers.

The profits of the hundreds of petty dealers throughout the State are cut short, while the jobbers are forced to compete with manufacturers and publishers, which results in a slaughtering of rates. And all the while the committee man groans under the weight of samples he is forced to secrete about his clothing.

Pencils of every make show their protruding ends from vest pockets; pens by the quart fill the secret recesses of his pantaloons; the corner of his coat is weighted down with innumerable samples of ink, and his arms are loaded with various publications. At his leisure he must examine into the merits of these supplies, compare price-lists and place orders where goods can be bought the cheapest. And all the while the eye of the local taxpayer is upon him.

Verily, the way of the school-committee man is hard. He serves without pay and for

(Continued on page 232.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

This Trade-Mark on every Box.

Trade-Mark on our "DISTAFF" Brand.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 280.)

the honor and glory of his country. Let us not begrudge him his free samples of stationery—enough for a year's supply. Is not the laborer worthy of his hire? Butler has said it.

Outside of the furnishing of school supplies very little trade in the stationery line is doing. Jobbers are stocking up, but country buyers are not yet ordering. Next month some little movement is expected.

Carroll W. Clark, one of our leading jobbers of schoolroom furnishings, has, notwithstanding the severe competition in his line, enjoyed a very large share of school patronage. His artificial stone slating, for covering blackboards, is being quite generally introduced into the schoolrooms of the State.

King & Merrill are supplying the schools with some lines of goods. Large orders were secured for King's "Harvard" pencils and "Nonpareil" pens.

The Heath Letter-File and Index Company has removed from High street to 395 Washington street, a more convenient location. This new office places the company in the midst of the stationery trade, and gives greater facilities for the quick filling of orders.

The Thorp Manufacturing Company reports that its new line of autograph albums and scrap-books is being very well received by the trade, and that orders are being numerous booked. This house is making arrangements for a big fall trade. As illustrative of the demand for the "Longfellow" and "Hour" autograph albums, it is cited that several Western jobbers who placed their orders some time ago for such quantities as were thought to be sufficient for their local trade, have since then duplicated their orders. In one case the *third* order has been booked from the same house, and from another a *fifth* order has been received. This shows that the trade generally are buying largely of these autograph albums, and that jobbers have no trouble in closing out stocks.

When the holiday trade opens and the retailers display these beautiful and artistic albums upon their counters, they will realize the value of these albums as salable novelties.

A. H. Abbott, of Chicago, and H. D. Cutler, of Kansas City, spent a few days of last week in the city in the interest of trade. They favored the Stationers and Printers' Exchange with a visit, where they registered.

A. L. D.

LAKESIDE LOCALS.

[FROM OUR REGULAR CORRESPONDENT.]

CHICAGO, August 25, 1884.

The political campaign was very auspiciously opened here in the form of a public reception tendered General Logan last Saturday night, on the occasion of his return home to Chicago after a tour through New York and Michigan.

A marked feature of the demonstration was the torchlight procession, fully two miles long. It was a solid phalanx which moved, when it did move, like a flowing river, whose source was lost in the distance, and whose current poured into a sea sparkling with stars, comets and constellations of red, white and blue.

Such was the grand effect of the pyrotechnic display which led the almost endless column.

The demonstration was not entirely political, but largely social. The sidewalks were crowded with men and women, and the private residences were like so many club-houses, gay with lanterns and crowded with guests of both sexes.

What a magnificent advertisement!

That brings to mind the prince of advertisers, P. T. Barnum, who, as everyone in Chicago knows, will pay us his usual visit next week, and who, thanks to his great reputation, built up by his judicious advertising which he is not only continuing but increasing to gigantic proportions, will depart with a great deal of Chicago's hard-earned wealth. Barnum was, no doubt, when very young, made familiar with the old nursery rhyme:

There was a man in our town,
Who thought him wondrous wise;
He swore by all the fabled gods
He'd never advertise.
His goods were advertised at last,
And thereby hangs a tale,
The ad. was set in nonpareil,
And headed "Sheriff's Sale."

Chicagoans have been experiencing a short hot spell this month, which seems to knock all the animation and life out of business; but a visit around the leading houses will reveal to view active preparations for a busy season to come—in fact, they all expect it.

John Norris, who succeeded Culver, Page, Hoyne & Co. nearly a year ago, seems to be generally satisfied with business. "Rather dull," he said, "but no duller than usual at this time of year—that is, judging by the reports of my employees, for, you know, I haven't been through a full season yet."

The Skeen & Stuart Stationery Company is doing a fair summer business; the manufacturing business, done mostly on orders, has been moderately large, although, as a representative of the house remarked, "not bringing in much money."

H. H. Hoffman, the blank-book manufacturer, complains of the dullness of the season, but he consoles himself with the fact that he is able to keep his full force of factory hands running. Mr. Hoffman prophesies big things for the fall and winter.

Edward Lovejoy, the veteran stationer, was visited this week in his cozy quarters on State street. Mr. Lovejoy has given up the main branch of the stationery business, and attends merely to fancy cards, picture-frames, &c. He is supplying a regular patronage, and is doing a very good business without relying on transient trade.

Of all contented merchants, W. H. Redington, secretary of the Sanford Manufacturing Company, seems the most so. He reports business in inks and mucilage as far exceeding his expectations this summer. It might be well to note that the Sanford Manufacturing Company advertises regularly in THE STATIONER. The company has a novelty in the shape of a mucilage bottle, a description of which, with cuts, will appear in the columns of THE STATIONER.

The well-known firm of Pierce & Snyder has been succeeded by Gerald Pierce & Co., who, in addition to their literary and dramatic

emporium, will add a stationery department, which promises to do a thriving business.

From the latest statistics gathered by the employees in the office of the tenement and factory inspectors, it appears that there are at the present day 32,000 firms doing business in Chicago in about 600 distinct lines. Among these, 125 firms are booksellers and stationers, 230 are job printers and 260 issue newspapers and publications.

"Times are improving," it is generally acceded on all sides. The Chicago Tribune remarks: "Of a few things that make for an improvement in trade we are now sure. Prices have generally approached very closely to the cost of production, and in some instances they have passed it. The supply of goods per head of population has greatly fallen off—to such an extent in some cases that it is not easy for buyers to obtain assortments. A stronger and more healthful sentiment in regard to monopolies and corporate abuses has grown up."

None of the facts here outlined imply an immediate revival of trade, but they do mark progress, and they afford the promise that when the revival does come it will be healthy.

Noz.

Postal Savings-Banks in Canada.

Notwithstanding the strong opposition with which the extension of the Canadian government postal savings-banks system has met with from ordinary banking institutions, its rapid development throughout the country conclusively proves its popularity and the inability of those opposed to it to prevent its becoming a prominent institution of the country. There are at present 343 of these banks in operation in Ontario and Quebec, the system not yet having been extended to the outlying provinces. This shows an increase of 13 during the past year. The number of new accounts opened during the fiscal year ending June 30, last, was 26,562, and the number of accounts standing open on that date, 66,682. The amount of money deposited during the year was \$6,444,439. The following statement shows the total amount, inclusive of interest, remaining to the credit of depositors since the postal savings-bank system was first introduced in 1868 down to June 30, 1884, also the average amount standing to the credit of each depositor during the years mentioned:

Year.	Amount.	Average.
1869.....	\$856,814.26	\$118.80
1870.....	1,588,848.83	130.41
1871.....	2,497,259.05	145.59
1872.....	3,096,500.01	147.04
1873.....	3,207,051.67	136.32
1874.....	3,204,965.46	128.36
1875.....	2,926,090.48	120.44
1876.....	2,740,952.59	112.27
1877.....	2,630,937.47	109.60
1878.....	2,754,484.03	107.87
1879.....	3,105,190.80	113.14
1880.....	3,945,660.11	125.80
1881.....	6,208,226.77	156.75
1882.....	9,473,661.53	184.08
1883.....	11,976,237.37	196.13
1884.....	13,245,552.64	198.63

It will be observed that the average was higher in 1883-84 than in any previous year. These institutions were not established for the purpose of receiving deposits of large amounts, but to afford a safe deposit for the surplus earnings of those of slender means who might wish to put by a small sum from time to time if such facilities were offered them. The result has proved satisfactory, as the table shows.

GEORGE B. HURD & CO., MANUFACTURERS OF AND DEALERS IN FINE STATIONERY,

79 BEEKMAN STREET, NEW YORK.

We carry a complete line of Z. Crane, Jr., & Bro.'s Unrivalled Papers, in both SUPERFINE and EXTRA-SUPERFINE Qualities. GRECIAN, ANTIQUE DISTAFF, PAROCHMENT VELLUM, Etc. SANFORD'S Pneumatic Mucilage

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure, at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

DAVIDSON RUBBER COMPANY, Boston, Mass.

NEW CHEAP INKSTAND.

The Sanford Manufacturing Company, Chicago, has just brought out an improvement on ink bottles, which has a metal top on a cheap stand, making a convenient inkstand, with a movable metal cover. The cut shows the style of the bottle, on the mouth of which is spun a metal ring, to which is attached the cover, which turns to the right or left, making a perfect inkstand of the bottle. It will be noticed that the neck of the bottle is made flaring, so that, when filled ready for shipment, it can be corked, the cover shutting over the stopper. When ready for use, the consumer draws the cork, which is thrown away, and the top opening and closing tightly over the mouth of the bottle, keeps out the dust. Those using ink in the original bottle know how troublesome it is to keep the cork; it is always a source of annoyance in staining whatever it is laid on when the bottle is opened. The improvement of the Sanford Company does away with all of this. The inkstand can be furnished to the trade, filled with ink, and holding about four ounces, which can be retailed at a handsome profit to the dealer. The cover is put on stands, containing "Superior" black ink, "Gloss Black," also "Cardinal" red ink. A circular, giving full description, with sizes and prices, will be mailed on application.

THE NEW TOY FOR THE SCHOOL-ROOM AND PARLOR.

A new system has been devised for teaching geography by means of peculiarly constructed maps in connection with small wooden blocks, upon the sides of which are printed the names and concise descriptions of capitals, cities, States, Territories, countries, &c. These blocks are constructed separately from the maps, but are made of suitable form and size to fit into holes or cavities in the faces of the maps, which holes are always made, in case of territorial divisions, within their limits, and in case of cities, &c., adjacent to marks which indicate the location of the place whose name and description are printed on the sides of the block.

When in use the map is spread upon a table, and the blocks are inserted one by one in the holes where they properly belong. The operation of properly placing them forms a puzzle highly interesting and at the same time very instructive. A comparatively few repetitions of the effort suffices to render a child familiar with the names, location and characteristics of all the places represented by the blocks.

The apparatus is made in series or sets of three parts each, each part consisting of a map and its appropriate blocks. Part No. 1 of the first series consists of map No. 1 and ninety-

seven blocks, each block relating to one city. The map is an outline one of the United States, with the names of the States and Territories, principal mountains, lakes, rivers, oceans, gulfs and bays printed upon its face. The location of capitals and important commercial centres is indicated by appropriate circular marks, adjacent to which are the holes for the reception of the blocks which bear the name and description of the places. Map No. 2 of series No. 1 is wholly an outline map, having no names of any kind printed upon its surface. Names and descriptions of all States, Territories, principal cities and towns, rivers, lakes, bays, gulfs, oceans, mountains, caves, national parks, oil, coal, gold and silver mining districts, &c., are printed upon the little wooden blocks, which number over two

NEW CHEAP INKSTAND.

hundred and fifty. Map No. 3 of the first series has the same number of holes for blocks, but has all names printed on the map, while the blocks carry descriptive matter only, thus making it necessary to place the blocks with no guide to their proper places except the relation the descriptive matter bears to some name upon the map. Maps and appropriate blocks for each country in the world, and globes for the whole world, are issued on the same plan. The apparatus is constructed in special forms and size for use in kindergartens, in schools, and in the home circle.

Placing the little wooden blocks in their proper places in the maps forms a very interesting puzzle for a child working by itself. Two or more children may simultaneously work at it with the same map and blocks, and then they find themselves engaged in an interesting game wherein each is stimulated to excel the other in the number of blocks properly placed. When all blocks are in, and those placed by each are counted, the one having the larger number of correct locations is declared the winner of the game.

The puzzle or game plan may be pursued with equal advantage in school room and in the family circle.

The Lartigue balance railway, the locomotive for which is an electro-dynamic apparatus, supplied with electricity from a fixed generator, is a simple elevated single rail, from both sides of which the carriages are suspended. A few men can build several hundred yards a day.

NEW PATENTS.

- No. 302,002. Ruling Machine.—Edward Knapp, St. Louis, Mo., assignor of two-thirds to George D. Barnard, same place.
- No. 302,039. Toy Savings-Bank.—Charles G. Shepard and Peter Adams, Jr., Buffalo, N. Y., said Adams assignor to Walter J. Shepard, same place.
- No. 302,053. Device for Fastening Papers, &c.—Daniel Edward Sweet, Chicago, Ill.
- A device for fastening papers, &c., consisting of a base having depending fastenings or prongs upon one side, and hooks upon the opposite side, adapted to receive and hold a cord or band or strap.
- No. 302,071. Hand-Bag.—Robert Weintraud, Offenbach-on-the-Main, Germany.
- No. 302,092. Automatic Tack and Staple Hammer.—John S. Pokenkotter, Cincinnati, Ohio.
- No. 302,104. Means for Mounting Photographic Caris.—Barnett M. Clinedinst, Baltimore, Md., assignor to Thomas H. McCollin, Philadelphia, Pa.
- No. 302,154. Apparatus for Pointing Pencils.—Thomas Moore, Islington, County of Middlesex, England. Patented in England January 30, 1884, No. 2,420.
- No. 302,178. Type-Writing Machine.—Franz X. Wagner, New York, N. Y., assignor, by direct and mesne assignments, to William F. Miller, same place, and Louis C. Fuller and Edward P. Hamilton, both of Orange, N. J.
- No. 302,185. Perforating Machine.—Augustus G. Burton, Chicago, Ill.
- No. 302,194. Educational Device.—Hugh V. Dunn, Scott's Depot, W. Va.
- No. 302,196. Parlor Game Apparatus and Cue therefor.—Thos. H. Eulass, Mason City, Ill.

Cardinal Ink for Draughtsmen.

The solution of carmine lake in caustic aqua ammonia is attended with this disadvantage, that, in consequence of the alkaline properties of ammonia, the cochineal pigment will in time form a basic compound, which, in contact with a steel pen, no longer produces the intense red, but rather a blackish color. To avoid this evil, the *Polytech. Notizblatt* recommends to prepare the ink as follows: Triturate 10 grains of pure carmine with 150 grains of acetate of ammonia solution and an equal quantity of distilled water, in a porcelain mortar, and allow the whole to stand for some time. In this way a portion of the alumina which is combined with the carmine dye is taken up by the acetic acid of the ammonia salt and separates as precipitate, while the pure pigment of the cochineal remains dissolved in the half-saturated ammonia. It is now filtered, and a few drops of pure white sugar syrup added to thicken it. In this way an excellent red drawing ink is obtained, which holds its color a long time. A solution of gum-arabic cannot be employed to thicken this ink, as it still contains some acetic acid, which would coagulate the bassorine, one of the natural constituents of gum-arabic.

From late observations it appears that the comet discovered by Mr. Barnard, at Nashville, is approaching the sun. It will pass its perihelion on August 17, at about one hundred and thirty million miles from the sun. Its distance from the earth is 57,000,000 miles. Its inclination is very small, and its motion direct, peculiarities which suggest a periodical comet. Its brightness increases slightly, but it will not become visible to the naked eye.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

John H. Flett, dealer in picture-frames, Galveston, Tex., has sold out.

The Fort Worth Publishing Company, Fort Worth, Tex., has been attached.

George W. Burnham, publisher of *Journal*, Milan, Mich., has sold out to O. E. Hawkins.

Judkins & Co., manufacturers of picture frames, Chicago, Ill., have been damaged by fire.

R. H. Smith, publisher of the *Newtown Bee*, Newtown, Conn., has been attached for \$5,000.

The *Express* Printing and Publishing Company, Los Angeles, Cal., has sold out to H. Z. Osborne.

Ticer & Cook, stationers, Los Vegas, N. M., have dissolved partnership. O. S. Ticer continues the business.

E. S. Warrock & Co., printers, Wilmington, N. C., have dissolved partnership. The business is continued by E. S. Warrock.

Faber & Pope, dealers in bicycles, Providence, R. I., have dissolved partnership. Faber & Perkins continue the business.

The *Trade Journal* Printing and Publishing Company (Albert Rubincam, proprietor), Philadelphia, Pa., has been closed by the sheriff.

The firm of John P. Morton & Co., booksellers, stationers, &c., Louisville, Ky., has been dissolved on account of the death of John B. Bangs. The surviving partners continue the business under the old style.

A fire occurred at 7 o'clock, Saturday evening, on the third floor of No. 19 Wooster street, New York, occupied by M. Rosenbaum, manufacturer of leather bags. Damage to building and stock, \$1,700.

A fire broke out, August 19, at Brockville, Ont., in the second floor of a stone building in Perth, near Main street, occupied by C. P. Lennon, and used for keeping and sorting rags. Several other buildings were burned, causing a total loss of about \$25,000.

S. S. Stafford has occupied the whole of the large six-story building in Pearl street, in order to have adequate office and factory room. The building has a frontage of 27 feet and a depth of 92 feet. Mr. Stafford's office has been removed to the ground floor and is very nicely fitted up. Notwithstanding the extreme dullness of the season, Mr. Stafford's business has increased fully twenty-five per cent., but he claims that if the season had been good (!) he would have done on a hundred per cent. more business.

Late on Monday afternoon a fire occurred on the top floor of the three-story brick building, No. 55 East Thirteenth street, New York. It originated by an electric light setting fire to some chemicals in the printing office of John Bengal. The total damage foots up \$3,700. John Bengal, printer, loses \$2,000; fully insured. John Church & Co., music publishers, who occupy the first floor, lose \$200; also insured.

The schedule of assets of Orange Judd, formerly in the publishing business, and who left New York with liabilities of \$144,000, realized a few days ago, at public auction, \$543. A claim of \$13,000 against C. M. Crandall sold for \$5, and 100 shares of the Sackett Plow Company sold for \$10. The remaining assets brought corresponding figures.

A heavy fire occurred at Greenville, Tex., recently, and the following-named tradesmen were burned out: Hardgraves & Co., photographers, insured; E. W. Harris & Co., publishers, insured.

Eaton, Small & Co. and A. W. Sewall & Co., booksellers, Gunnison, Col., have consolidated under the style of Eaton, Small & Co.

Skidmore & Co., manufacturers of paper boxes, &c., Derby, Conn., have dissolved partnership. W. S. Fenwick and Thomas Martin continue the paper-box manufacturing business.

F. Vaughan, proprietor of the Union News Company, San Francisco, Cal., is about to go into insolvency, application having been made to that effect.

J. E. Curren, publisher of the *Headlight*, Deming, N. M., has discontinued the daily publication of that paper and resumed the weekly.

T. O. Abbott, publisher of the *Democratic State Journal*, Dayton, W. T., has sold out to T. E. Edmiston.

Mrs. W. R. Crauna, publisher of the *Contra Costa News*, Martinez, Cal., has sold out.

Bogue & Peterson, booksellers, stationers, &c., Stockton, Cal., are closing out their business.

Kingsley, Dresskell & Co. succeed the firm of F. S. Dresskell & Co., paper dealers, at 377 Bond street, Cleveland, Ohio, assuming the liabilities and settling all the accounts of their predecessors. The new firm will be composed of H. F. Kingsley, F. S. Dresskell and Geo. H. Kingsley, equal copartners. H. F. Kingsley and F. S. Dresskell will manage the business and devote their entire time thereto. They are both young, unmarried men, and were for a number of years connected with the Cleveland Paper Company, and being well known in their locality will undoubtedly make the already established business a success.

The schedules in the assignment of George E. Koues and Frank B. Koues, composing the firm of Koues Brothers, lately engaged in the fancy goods and stationery business at No. 110 Broadway and No. 3 Cortlandt street, to Charles C. Bull, which were filed in the Court of Common Pleas, show: Liabilities, \$49,052.14; nominal assets, \$18,174.14; and actual assets, \$10,673.89. The amount of the preferences which were not stated at the time the assignment was made is \$22,283.98, and are in excess of the actual assets by \$11,610.09. Among the creditors are: Hecht Brothers, for mdse., \$273.21; M. Plummer & Co., \$398.88, for mdse.; Samuel Raynor & Co., \$75.71, for mdse.; Henry Lindenmeyr, for mdse., \$278.97; J. Q. Preble & Co., for mdse., \$453.24; Moore & Warren, for mdse., \$302.75; Henry Bainbridge & Co., for do., \$537.24; Daniel Slote & Co., for do., \$237.04; Melvin Hard's Sons, for do., \$206.03; Powers Paper Company, for do., \$585.35; L. Prang & Co., notes for mdse., \$150; Palmer Art Company, for mdse., \$53.70; S. C. Ridley, for mdse., \$115.45; Marcus Ward, for mdse., \$54.95; R. Foster, for mdse., \$421.06; Schmolze Brothers & Hildebrand, for mdse., \$369.04; C. F. A. Hinrichs, for mdse., \$351.30; Bailey, Banks & Biddle, for mdse., \$101.06; Martin B. Brown, for mdse., \$312.50; Obpacher Brothers, \$45, for mdse.; Kiggins, Tooker & Co., for mdse., \$100.22; L. Strauss & Son, for mdse., \$136; Bradley, Hubbard & Co., for mdse., \$338.12; Amasa Lyon, do., \$293.49; W. H. Hasbrouck, do., \$35.88; J. G. Shaw Blank Book Company, do., \$64.47; John Foley do., \$553.38; John Morganthaler, do., \$134.22; Franklin Bank Note Company, do., \$360; John G. Klieb, do., \$173.86; Travers Brothers, do., \$374.68; Francis & Loutrel, do., \$24.81;

Brown & Yager, booksellers, &c., Franklin, Ind., have dissolved partnership. McCoy & Yager continue the business.

Robert Gibson, manufacturer of skates, Birmingham, Conn., has been succeeded by Sise, Gibson & Co., of New York city.

J. R. Willard & Co., publishers, Erie, Pa., have dissolved partnership. The firm has been succeeded by the *Dispatch* Publishing Company.

The Frank Coker News Company, Talladega, Ala., and the Anniston News Company, of which Frank Coker is manager, at Anniston, same State, seem to be doing an active trade. Local papers report that these companies are extending their business to foreign countries, filling orders from the West Indies, Mexico and other points.

A new monthly paper, for the discussion of legal matters, has been started in New York city. It is called the *Mercantile Law Journal*. William J. Nicholson is the editor. The *Journal* will especially advocate the interests of wholesale dealers and manufacturers, such as the necessary simplification and improvement of the processes and methods of common commercial litigation, &c. It will also show up glaring cases of legal imposition detrimental to general or special business interests. It aims in every respect to be a law journal, published in the interest of inter-State trading.

George E. Arnold, of Wilkinson Brothers & Co., came near losing his life last Friday from the cutting of an artery while having a tooth extracted by a dentist at Birmingham, Conn. He had been suffering with a severe toothache and decided to have the aching tooth extracted, which was not effected until three attempts had been made. Hemorrhage set in, and from the loss of blood he became very weak. Becoming alarmed, his family doctor was called in, and with the assistance of two other physicians, and after two hours' time, the hemorrhage was checked. One of the doctors expressed the opinion that in a half-hour longer, had the flow of blood not been stopped, the chances for Mr. Arnold's recovery would have been very slight. The artery that was severed was pronounced by the physician to be in a very unusual place, being found running along under the tooth farthest back in the mouth, rendering it very difficult to operate upon. Mr. Arnold will probably be able to be around next week to attend to business.

Quite a large representation of straw board manufacturers, chiefly from Ohio and Illinois, met at Put-in-Bay, Ohio, late last week to discuss the depressed condition of their trade, and although considerable discussion was indulged in, no action was agreed upon. On the return trip boat a committee was appointed to issue a call for another meeting to be held at some future date.

Melior, Lingemann & Co., desk manufacturers, New York city, have dissolved partnership; Frederick Ostendorf retires from the

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

firm and the business is continued under the same style.

J. V. Smith, printer, Bedford, Ind., has sold out.

John Commons, publisher, Winchester, Ind., has sold out to W. P. Needham.

J. E. Cummings, stationers, &c., Marlboro, Mass., has been damaged by fire.

Charles D. Hazzard, wall-paper dealer, Minneapolis, Minn., has assigned.

The Union Catholic Publishing Company, Chicago, Ill., has sold out to J. J. Henneberry and M. O'Brien.

W. S. Bryan, proprietor of the Historical Publishing Company, St. Louis, Mo., has sold out to J. W. Buel.

Charles Weidt, publisher of the *Journal*, Pomeroy, Ohio, has been burned out. Loss, \$8,000; insured for \$2,000.

N. C. Galpin & Son, newsdealers, Boonesboro, Ia., have been burned out. Loss reported to be \$2,700; insured for \$600.

The Kansas City Paper Company, Kansas City, Mo., has sold out its entire stock, lease, &c., to H. C. Bradley, who continues the wholesale paper business at 420 West Fifth street, in that city.

W. H. Parsons & Co., paper dealers, New York, have opened a branch of their business at 148 Lasalle street, Chicago, and will be represented there by C. M. Davis, formerly in the employ of the J. W. Butler Paper Company.

In an action brought in the Superior Court by Henry Berolzheimer and another against William Strauss and others as executors, for the dissolution of the Eagle Pencil Company, Sigismund Kaufman has been appointed by Judge Freedman receiver of the copartnership property during the pendency of the action.

Mr. Corbett, of Barlow & Co., Boston, has been selected by the creditors as assignee of Mr. Norton, paper-stock dealer, Boston, Mass., who failed a short time ago. It is thought that after certain legal proceedings are taken, Mr. Norton will more than likely offer 50 cents on the dollar. The feeling against Norton among some of the creditors is very bitter, and they intend to push him to the full extent of the law. Three of his sons have put in claims of \$1,000 each for services.

In the notice of the death of Daniel D. Whedon, Jr., last week, it was incorrectly stated that he was at one time engaged in the paper-box business with his brother in Hudson street. He was formerly with Wilkinson Brothers & Co. and Hand & Ellsworth, and subsequently was a manufacturer of mineral pulp at Easton, Pa. It is now ascertained that the immediate cause of his suicide was congestion of the brain brought on from bathing while overheated at Ocean Grove two or three days prior to his death. The Rev. Dr. Whedon, his father, is still lying in a very precarious condition at his home at Sag Harbor, and his death is expected.

The Pettibone Manufacturing Company, Cincinnati, Ohio, has published a manual of drill called "The National Torchman." It is a complete system of drill tactics for political clubs, parades, &c., prepared by an officer of the U. S. army.

Frederick Waldorf & Son's paper mill, Monroe, Mich., was burned on August 19. Fire caught in a saw mill near by, and extended to the paper mill, which was destroyed with its contents, including stock and four carloads of paper. Loss, \$2,000; insurance, \$3,500.

The Astoria Printing and Publishing Company, Astoria, Ore., has been disincorporated and the plant has been sold to Robert Wilgren.

Executions have been issued against D. B. Wilson, stationer, Tyrone, Pa., to recover judgments amounting to \$506.

The estate of T. Bauer, dealer in artificial flowers, Philadelphia, Pa., has been sold out by the sheriff.

Thomas Yellowless, bookseller, &c., Bowmanville, Ont., has sold out to Whittaker & Kenner.

C. W. Crozier, proprietor of the *Elbert County Record*, Elbert, Col., has removed to Hugo.

Robert Beatty, of the firm of Beatty & Stevenson, bookbinders, New York city, is dead.

Joseph N. Gerow, manufacturer of pencil cases, Brooklyn, N. Y., has been damaged by fire.

J. D. Sawyer (Agt.), stationer, Galveston, Tex., is reported about to sell out.

George L. McHewson, dealer in wall-paper, Denver, Col., has made an assignment to Charles B. McWilliams.

Jas. D. Gill, Springfield, Mass., has published a lithographed sheet containing the portraits of the candidates of the Republican and Democratic parties for President and Vice-President. The likenesses are good, and voters who make up the uncertain quantity in politics will find this combination useful in studying the phrenological characteristics of the opponents.

Fowler & Wells Company has in press for immediate publication, a work which is a new departure in book-making, being a text-book of physiology and hygiene, in the form of an allegory, under the title of "The Man Wonderful in the House Beautiful," by Chilion B. Allen, M. D., and Mary A. Allen, M. D.; and it is the purpose of the writers to put forth the principles of physiology in a manner to be easily understood, and at the same time entertaining to the reader. Emily Faithful, during her recent visit in this country, arranged with the Fowler & Wells Company for the publication of her new work recording her impressions of our people, institutions, &c. This is now in press, and will be published simultaneously here and in London, under the title of "Three Visits to America." The same company has also in press a Catechism of Phrenology, stating the principles of the science in the form of questions and answers.

Those men who destroy a healthful constitution of body by intemperance and irregular life do as manifestly kill themselves as those who hang or poison or drown themselves.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. It CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,

THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, 10 Cents.

NEW YORK, THURSDAY, AUGUST 28, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE inquiry into the envelope contracts instituted by the Postmaster-General, has resulted in the abrogation of the contract for official envelopes, and new proposals are to be invited. This action is presumably correctly founded on the failure of the contractors to supply the goods in qualities required. It is therefore just; and should this policy be carried out, as it should be, in all cases where by negligence or intention the Government is defrauded, the public would appreciate the change. Under the new contract, bidders will be allowed to put in envelopes of a larger size than those called for. What effect this permission will have in increasing the number of bidders remains to be seen. Now that the contract is to be relet, it should be understood that bids are not to be predicated on the chance of beating the Government by furnishing inferior stock. If this rule prevails there will be less public complaint and probably less talk of exceptionally low prices.

A DECISION by Judge Wallace in the United States Circuit Court has an important bearing on the subject of international copyright, and, if sustained, would seem to do away with any necessity for the ratification of a copyright treaty. Our readers will find this decision in full in another column. It will therein be found that Judge Wallace lays down broadly the proposition that the English publisher "had the exclusive right to put his own work as his own upon the markets of the world," and he therefore concedes the injunction demanded by the American assignee of the English publishers and orders an accounting. We cannot suppose that this point will be surrendered on Judge Wallace's judgment. In this instance the parties copying the English publication will be obliged to desist until they can get a reversal of his decision, but until final determination in the Supreme Court other publishers will continue to reprint foreign publications, and in case of dispute it cannot be fairly claimed that Judge Wallace has put the question into the position of *res adjudicata*.

EVERYBODY likes appreciation, and it is not therefore strange that a newspaper which devotes itself to the presentation of facts and subjects in the interest of so extended a trade as that of stationery should find gratification in an expression which shows that it is carrying out its purposes. One of our Western advertisers sends us the following bit of encouragement. He says, in speaking of THE STATIONER: "We believe it to be the best medium for advertising any stationery specialty." He is right, and not

only this, but it is the one paper by which the trade can be reached thoroughly and impartially in all directions and for all legitimate purposes. We are not apt to vaunt ourselves, and our readers know full well that it is not our custom, but we feel that we are sometimes privileged to let the world know what our advertisers think. But there is another feature which ought to have the consideration of those who respond to advertisements in this paper, and that is, to notify the advertiser that his advertisement has been seen in THE STATIONER. We ask this not only for ourselves, but for the good of the reader and the advertiser as well. If people will reason this out they will see its force.

Roundabouts.

BY THE TRADE LOUNGER.

There are anomalies in trade, and not the least of all of the anomalies is the manufacturer who—finding that his capacity to fill orders compels him to enlarge his factory after he has sold more goods by twenty or thirty per cent. than heretofore—speaks of the dullness of business. I have heard of such a man. Why, he must want to conquer the world. Well, he has goods to do it with.

There was an exhibition of Bengal lights up-town the other day—a sort of new and revised pyrotechnics. Bengal, the printer, was burned out.

Well, P. M. G. Gresham has wiped out one contract. Perhaps he will not get his envelopes so cheap next time. If fair prices are paid, fair goods can be expected.

Some late decisions of the Treasury Department are of interest to many readers of THE STATIONER. Here they are.

Framed show cards, of which the value of the wooden frames is double the value of the printed cards, are dutiable as "manufactures of wood or of which wood is the chief component part," under T. I. new, 233.

Certain paper, which could be used as printing paper, but was not commercially known as such, and which was of the same character as the photographic paper specified in department's decision (S. 5,302), except that it was not albuminized, is dutiable under the provision for "all other paper not specially enumerated or provided for." T. I. new, 392.

Wood pulp manufactured from poplar wood and imported in the form of sheets, is not the "paper stock" specified in the free list, but is similar in all respects to the wood pulp mentioned in decision of January 14, 1880, and is dutiable at the rate of 10 per cent. ad valorem, under the provision in the tariff for "pulp dried for paper makers' use."—T. I. new, 393.

Not long ago I was puzzled to know what the kazoo was. Now I can exclaim "Eureka!" The *Detroit Free Press* says: "A kazoo is an instrument invented to give pleasure and satisfaction to the small boy. It is a cross between a bagpipe and an accordion, with several new and pleasing features of its own. It can make more noise and even less music than a brass band. It can imitate the warbling of a cat or the screech of a mocking-bird. The inventor should be hung, drawn, quartered and burned, but it is more than likely that he is kept out of the way in some insane asylum. When you hear a noise like the combined sounds of a fish-horn and a runaway, do not imagine it is the end of the world. It is only the small boy amusing himself peaceably with his kazoo."

* * * *

I don't want any kazoo in mine.

* * * *

S. S. Stafford is way above his fellow tradesmen nowadays. He is spending the summer on Mizen Top Mountain, Dutchess County.

* * * *

"I never saw buyers so cranky in my life," said a leading manufacturer in plush goods, a few days ago. "Here is a fellow who grumbles because I sent him a plush box trimmed partially with leather. The article is worth \$4 and I only charged him \$2. Dull trade is a prolific cause of cranks. If times were better, such an article at the price would be grabbed after, and even this very dealer would cry for more."

* * * *

Some dealers are now making quite a drive on plush goods, such as fancy work-boxes, papeteries, &c. Boxes of this kind, which last season sold for \$14, are now offered for \$10. More than half this reduction comes out of the profits of the manufacturer, for while the material is a little cheaper, labor costs no less.

* * * *

Most of the dealers in plush novelties have brought out their goods this season with especial reference to their elegance, using the finest material and sparing no pains in order to excel their former efforts. This is all very well, but one important consideration they, or a majority of them at least, have overlooked, and that is low prices. These are necessary in these times to sell any class of goods. There are a few firms which have the sagacity to appreciate this fact, and they cannot fail to profit by it.

* * * *

Stereoscopic views are sold now for almost nothing. In fact, I don't believe that they could be cheaper. They are sold on the street at the rate of three cents a piece, while wholesale dealers sell them as low as one cent a piece—first-class views at that.

* * * *

Some very fine novelties are now made of colored tissue papers. There has been quite a run on fancy lamp shades made of this material for the past two or three seasons, and last season a lamp shade having the form of a sunflower was introduced. It took exceed-

ingly well, owing to its novelty, and the manufacturer is about to bring out this season several more novelties in paper goods.

* * * *

Notwithstanding the cheapness of the material, these novelties are pretty high-priced, ranging from fifty cents to two dollars apiece. "We can only manage to sell about 1,000 of each variety," said a manufacturer recently, "as they can only be sold in the large cities, where people are willing to pay for really fine goods." "Can they be sold any cheaper?" "No; you see it is the labor expended on them that makes them come high. They are all made by hand, and some pieces take a girl half a day to finish."

* * * *

A Staten Island man is the inventor of a very ingenious toy which consists of a top, of a circular, convex shape. A handle for spinning the toy is provided; it consists of two parallel guide bars and a spring for projecting the top; when the trigger is released the top is made to revolve rapidly by having its pinions pass over two ratchet bars and the force of the spring throws it ten or twenty feet. When held in the left hand the top will describe a curve in a contrary direction. When the trigger is held upward the top will run to a distance of about twenty feet, stand still an instant and return.

* * * *

The book men are complaining very much over the recent decision of the postal authorities whereby books bearing the private pencil-marks of firms are charged postage the same as first-class matter.

Answers to Correspondents.

O. R. wants names of manufacturers of tassels for ball programmes.

Ans.—T. M. Simpson, Philadelphia, Pa.; J. Rishown & Co., 108 Wooster street, New York; Hensel, Calliday & Co., Philadelphia, Pa.; Paul Mende, 48 Lispenard street, New York.

J. C. W. & Co. wants to know who makes cloth-lined paper.

Ans.—We assume that you mean paper such as is used for envelopes. The Bay State Paper Company, Springfield, Mass., does it, and we believe that envelope manufacturers generally prepare the paper for their own use.

O. & H. ask for the manufacturer of the "Charter Oak" brand of w. c. paper.

Ans.—Hartford Manilla Company, Hartford, Conn.

A Perfecting Paper Feeder.

Joseph Kneeland, Holyoke, Mass., has recently completed his perfecting paper-feeder. The machine takes paper direct from the loft in its rough state, or paper direct from the calender, trimmed or untrimmed. Whether it is jogged or otherwise it can be fed by this machine from any part of the table without altering any of the movements for the different sizes and is so accurate that a thousand reams will pass through without so much as a quire being injured. Only one sheet is taken at a time and at any required speed. All

other machines for the purpose cannot guarantee to take up but one sheet at a time. Besides these important advantages secured the machine will feed a "striker," which no other machine has been able to do. The vital point about it is the device for separating the sheets, before the picker-up comes in contact with the sheet. The machine is applicable to the calender and ruler of a paper mill and also to a printing press.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, August 27, 1884. }

THE MONEY MARKET.—The money market has ruled quiet, but a trifle firmer, call loans having commanded a higher rate of interest than last week, although time loans are still available at 5@6 per cent. The banks ask 4½@5½ per cent. on call loans, while the rate at the Stock Exchange for the same accommodation are 1½@2½ per cent. Commercial paper quiet but firm at 5@6 per cent. discount for first-class double names. The stock market has ruled dull and irregular, with but little disposition to operate on either side of the market and an absence of definite features. The fluctuations have been narrowed and generally toward a lower range of values. The market left off unsettled. Railroad bonds have ruled quiet and irregular. Governments are higher. Foreign exchange has ruled firm at an advance upon the rates current last week, in consequence of the scarcity of commercial bills and some demand from remitters. The posted rates for sterling yesterday were 4.84@4.86.

THE PAPER MARKET.—Although business generally is more or less under the influence of mid-summer lethargy, the situation on the whole exhibits a small increase of activity, with a maintenance of the former tone. All of the favorable conditions of a satisfactory fall trade heretofore enumerated are still applicable, and the hopeful anticipations entertained here in this respect seem to be participated in by merchants and business men at the principal business centres throughout the country. In the paper trade the tendencies as regards prices are all in the direction of greater firmness in the market if not an actual advance in prices. Many mills are shut down—some for the lack of profitable employment, others for repairs, and many of the straw wrapping and wood pulp mills are closed down under an agreement to curtail production, while at Holyoke there has been an enforced shut down for one entire day this week, and the mills have been only running twelve hours during several other days with the prospect of a continued reduction to twelve hours a day for nearly two weeks to come, before the repairs to the dam are completed. The stoppage at Holyoke will keep out of the market probably 75 or 80 tons of paper each day, the aggregate making a considerable quantity for two weeks.

THE STATIONERY MARKET.—The general report of dealers is that trade in most lines is exceedingly quiet, yet some are doing more than an average amount of business, but they are those who work hard for trade and exercise a liberal degree of enterprise in bringing their goods to the attention of buyers. They maintain that the exertion put forth to secure this trade would in a good season increase their business fully 50 per cent.; hence, to catch trade nowadays, dealers must be wide-awake, active and advertising. Judging from the large lines of plush goods, which most of the leading manufacturers have brought out this season, an active demand for these goods is anticipated, but such expectations have not been realized as yet, although there seems to be a fair demand for staple goods of this character, which are offered at a low price. One dealer reports orders for 3,000 comb cases and 1,000 work-boxes, and maintains that these orders are not exceptionally large, compared with others that he receives. Manufacturers of blank-books are busy making up orders for fall delivery, but are not over sanguine of re-orders. Several new lines of these goods have been brought out, and if merit has anything to do with the sale of an article, they must have a good demand among consumers. The ink trade is quite active, while envelopes are doing fairly.

ATCHISON ETCHINGS.

[CORRESPONDENCE OF THE STATIONER.]

ATCHISON, Kan., August 23, 1884.

"I'm a stranger and a long ways from home," but, can assure you, among kind friends, who extend the well-known hearty Western hospitality in all of its glory.

I left Pittsburg on July 24, and came West via the famous Pittsburg, Ft. Wayne and Chicago Railroad, and the Chicago, Rock Island and Pacific Railroad. The western part of Pennsylvania, all of Ohio and eastern Indiana were suffering very severely with the drought, and the corn crop looked short and thin. Illinois, Iowa and Kansas have one of their most prosperous years. The corn in Iowa never looked better, and the yield will certainly be immense. This State has improved greatly in every way during the past few years. I have been here several times before, but never witnessed so much advancement nor such fine crops. I have been over a good portion of the State visiting friends and seeing the country. The wheat crop was very large, as was also the oats. Large amounts of broom corn and castor beans are produced here this year, and they bring large revenues, but the king of all is the corn. It is estimated, and carefully too, that the State will have at least 300,000,000 bushels of corn to export. Kansas surely is one of the best States in the Union, and I know no better State for farmers to settle in. In fact, it is good for any business.

Politics are becoming warm, but I will not discuss them only so far as to say, St. John will not poll the 30,000 votes he claims. About 4,000 or 5,000 will be given, but no more. The State is strongly Republican as far as the national ticket is concerned, but close as to the gubernatorial vote—made so by the prohibition question.

Atchison is situated in the extreme portion of the State, on the Missouri River, and some fifty miles north of Kansas City. The business portion of the city is level and well fitted for business, while the residences are beautifully situated on the higher ground surrounding. Drainage is good, and the place is considered most healthy; some twenty thousand denizens call it their home, and are possessed of a high opinion of their city, and are sanguine of a continued advancement and prosperity. It is the county seat of Atchison County, has ten railroads, four large flouring mills, three large elevators, a canning factory and several other successful industries.

There are three really fine stationery and book stores situated on the principal street—Commercial street—and they appear to command a good trade, the pioneer establishment being that of Levin & Downs. Jacob Levin and J. R. Downs do a large business, and, because of their large acquaintance among the young people of the city, have the cream of the fancy-goods trade. They also have a wall-paper department in addition to the book and general stationery departments. Their store-room is 22x80 feet and is stocked with elegant goods.

W. L. and John Johnson, doing business as

Johnson & Brother, have a beautiful store. Their room is 22 x 150 feet and choice goods fill every part. They do a jobbing and retail trade, but the jobbing is not very extensive, being confined mostly to this one State.

The third stationery and book establishment in the city is that of N. W. Arthur. He has a nice room 22 x 60 feet and a fair share of the city's trade, and keeps a very nice line of books.

I regret very much to learn of my townsman, W. W. Edgar's, failure. I presume that the closing of the Penn Bank was the first cause.

A few days ago, in this city, I met J. Hove-don, who was representing R. Worthington, the publisher of your city. Frank C. Welsh, another pleasant young gentleman, was also here. He represents John E. Potter & Co., of Philadelphia. G. W. H.

A Copyright Decision.

Suit was brought in the United States Circuit Court for the Southern District of New York, by Dana Estes and others to enjoin John B. Williams and others, from reprinting the "Chatterbox" series of books for children.

Judge Wheeler has granted the relief sought and an accounting has been ordered, as will be seen from the appended decision:

James Johnston, of London, England, appears to have published a regular series of juvenile books, of uniform appearance and in a style of peculiar attractiveness, and called them the "Chatterbox," until they became widely known and quite popular in that country and this. He assigned the exclusive right to use and protect that name in this country to the orators for ten years from January 1, 1880.

The defendants have, since that time, commenced the publication of a series of books and called them by that name, and made them so similar in appearance and style to those of Johnston as to lead purchasers to think they are the same. As a matter of fact, it is found that they intended to make the books appear to be the same, and to avail themselves of the popularity which the books had attained by the labor and skill bestowed upon them by and at the expense of Johnston. There being no copyright to prevent, the defendants claim the right to so print and publish the series of books in this country, and that if they have not the right, the orators have no right to prevent them.

There is no question but that the defendants have the right to reprint the compositions and illustrations contained in these books, including the titles of the several pieces and pictures (*Jollie v. Jaques*, 1 *Blatch*, 618).

That does not settle the question as to the right claimed here. There is work in these publications, aside from the ideas and conceptions. Johnston was not the writer of the articles, nor the designer of the pictures, composing the books, but he brought them out in this form.

The name indicates this work. The defendants, by putting this name to their work, in bringing out the same style of book, indicate that their work is his. This renders his work less remunerative, and, while continued, is a continuous injury, which it is the peculiar province of a Court of Equity to prevent. These principles are discussed, settled, and applied in *McLean v. Fleming*, 96 U. S., 245.

It has been argued that there have been various publications from earlier times by the same name, so that no new right to the use of the name could be acquired.

This would be true, doubtless, as to all such publications as those to which the name was applied, but not as to those essentially different. The fact of these other publications bears only upon the question of fact, as to whether Johnston's work had come to be known by this name, and the defendants, by using this name, represent that their work is the same.

The conclusion stated, as to the fact, has been reached

after consideration of what is shown as to their other publications.

Johnston had the exclusive right to put his own work as his own upon the market of the world. No one else had the right to represent that other work was his. Not the right to prevent the copying of his and putting the work upon the markets, but the right to be free from untrue representations that this other work was his when put upon the markets. This gives him nothing but the fair enjoyment of the past reputation of his own work, which fully belongs to him. It deprives others of nothing that belongs to them.

The question then arises whether Johnston could transfer his right, or any part of it, to the orators, so that the defendants in what they have done, and are about to do, trespass upon the orators' rights, and not upon Johnston's. He could not do all this himself, he must act by and through others. No reason is apparent why he could not give them the exclusive right to put his work on the market as his, as he had that right. This seems to be what he undertook to do. They had that right, and the profits of its enjoyment would belong to them. The defendants would deprive them and not Johnston of the profits. The injury would be to them and not to him, and they are in this view entitled to the remedy.

It is objected that they also trespassed upon Johnston's rights before they acquired them. This may be true; and if so, they may be liable for the damages.

Such a trespass would not prevent them from acquiring a lawful right in a lawful manner. Had not trespasses been so frequent and long continued that the work had come to be known to be the work of others, or had lost identification as the work of Johnston, the course of the defendants might not amount to any representation that their work was his; but the evidence does not show this.

As the case is now understood, the orators appear to be entitled to relief. Let there be a decree for an injunction and an account.

F. H. Loss, Jr., has a great many novelties in gold and silver wire goods, such as mounted tile-stands, picture-casels, cup and saucer easels, plate-casels, banner-stands, stereoscopic view baskets, &c. These goods are neat and very pretty, as well as cheap.

Wilson Brothers' Toy Company has secured the services of the genial Charles D. Kidder, who latterly was in the employ of Lyman & Curtiss. Mr. Kidder laid the foundation of his knowledge of the toy trade with the Wilson Brothers, and is now "home again," making it pleasant for all concerned. He is very popular with the trade, and it is hoped that all success will attend him in his new position.

The American Institute Fair.

The managers of the American Institute of New York have already commenced arrangements for their fifty-third annual exhibition, which will be opened on September 24 at the Institute building, Third avenue and Sixty-fourth street.

It is believed that the coming exhibition will be more than usually attractive, instructive and interesting. Manufacturers, designers, inventors and others desirous of placing their products before the public at the coming fair, should without delay send on their applications for space to Charles Wager Hull, the General Superintendent, at the office of the Institute, 22 Cooper Union, New York.

In this connection it will perhaps be interesting to many to know the conditions under which the awards are made. They are as follows: The Medal of Honor (gold) is awarded only for an article or process which shall show a marked improvement on those previously in use, and be considered of the highest importance in science or the arts. It is awarded on the recommendation of three judges, approved by a majority of the Board of Managers, and confirmed by a majority of the Board of Trustees.

The Special Medal (silver) is awarded only for an article of great importance and extraordinary merit. This medal may be offered for a certain number of exhibits in each year, a list of which shall be prepared by the Board of Managers.

The Medal of Taste (silver) is awarded for any article or process which is considered of unusual excellence in the first four groups of the department of Fine Arts and Education.

The Medal of Superiority (bronze) is awarded for an article or process of great value. The Medal of Excellence (bronze) for articles or processes of importance, and the Medal of Merit (bronze) for articles or process of acknowledged merit.

In addition to these, diplomas are granted to employees who by their skill add to the attractiveness of the exhibition; and awards are made for the best skill and workmanship by apprentices. Awards are also made to exhibitors of perishable products in money or other valuable consideration.

Trade Items.

The September issue of "Our Little Ones" is a very pleasing number, full of attraction and interest. It will be welcomed by the children.

Stevens & Co. was the style of a reputable firm of produce dealers doing business in New York up to within a year, but has gone out of trade. The firm of Stevens & Co., 27 Stone street, New York, should not be confounded with the first-named firm.

In the production of his extensive line of Christmas and New Year cards John Gibson has adhered to the principle of "quick sales and small profits." His cards, while made up in the best possible manner, are certainly offered at bottom figures. Indeed, it is thought doubtful if there is any other house in the city which is offering goods as low as Mr. Gibson. An examination of Mr. Gibson's line will convince buyers.

The Toledo (Ia.) Chronicle of the 21st inst. remarks: "R. L. Thomas, of New York city, visited over Sunday with W. H. Harrison, Jr.

Mr. Thomas represents John Gibson, of New York, one of the leading publishers of Christmas, New Year, Easter and birthday cards and novelties, and is one of the most genial and best-looking traveling men on the road."

Lawrence & Baxter have a line of artificial flowers especially intended for the manufacture of fancy goods. They come in the forms of neat sprays, and would make up nicely with valentines, mouchoir cases, &c.

The National Blank-Book Company reports that it is busy in manufacturing new lines of goods for the fall trade. It is bringing out a new series of composition writing-books for the use of schools; also students' note-books and several new lines of fancy memorandum-books.

Alles & Conant are bringing out a very unique line of cuff, collar and necktie boxes finished with plush; also a very attractive line of odor cases. The business of the firm has increased so largely during the past season that it finds itself in need of more factory room.

P. Lawrence is expected here from Europe in a week or ten days. The object of his visit is to buy stationery and other novelties for introduction in the European market. Manufacturers would do well to watch the arrival of Mr. Lawrence, as he will be ready to negotiate with them for any novelties they may have to offer.

James D. Whitmore & Co. report business in their various departments as being quite satisfactory, and their orders for present and future delivery to be quite up to the standard. They have added largely to their line of lithographed-design papeteries, and are having a very large sale in these goods. They have also now on exhibition a very elegant line of plush and fancy holiday boxes, comprising all new designs, and the line is said to be the finest and most elaborate shown.

One of the handsomest sample books that has ever been offered to the trade has been recently gotten up by Harry Wiltshire, steel and copper-plate engraver, card printer and embosser, &c. It is intended, of course, for those who take orders for fine card printing, monogram engraving, &c. The book is called "The Elite Card Album." It has a blue cloth cover, with the title printed in gilt. It shows samples of every variety of wedding, invitation, reception and announcement cards, fifty different styles and sizes of visiting cards, a great variety of the latest styles of monograms, crests, and address dies, and about one hundred different styles of initials of the newest designs. There are some fifty different styles of wedding invitations alone. The book contains everything a dealer who fills orders for fancy society printing of every description needs, and it is sent on application gratis. With it comes a *passpartout*, which contains all of the latest styles of crests, monograms and address dies; also one for visiting cards. These are for the show-case. Altogether, it is an acquisition that every dealer will be glad to get, and there will, doubtless, be numerous applications for it.

Improved Method of Producing Electrotyping Molds.

Certain improvements have lately been patented relating to the molds employed in producing "electros" for printing, the object being to produce such molds in a shorter space of time and at a lower cost than heretofore has been practicable. The inventors, William Lowe and Dominic Cavagna, both of Greengate, Salford, in carrying out this invention place upon the surface of the warmed wax or composition customarily used for such molds, and contained in the ordinary molding-box, a fold or layer of flexible tough paper, of linen or cotton cloth, of thin American oil-cloth, or of other similar suitable material. For fine work, such as engravings, American oil-cloth or other highly glazed or smooth material is used, with the smooth side next to the wax or molding composition. In addition to the layer of paper or cloth in contact with the wax it is generally, but not invariably, necessary to employ one or more additional layers of a softer material, such as chamois leather or thin fine felt. Having laid the folds of the material upon the warmed wax or composition, the form containing the type to be molded is laid with its face in contact with the leather or other material; the whole is then subjected to pressure in the usual manner, rather less pressure being required than is usually given when molding by the ordinary processes. The folds of cloth or leather being now removed from the surface of the wax or molding composition, a more or less indistinct outline of the desired mold will be discovered having the hollows or "whites" well raised. The form of type or other surface is now brought into direct contact with the partially-formed mold in a corresponding position to that occupied by it in the first part of the process, the wax having sufficiently cooled in the meantime, and both are again subjected to pressure. The molding box is then withdrawn from the press, and the form of type or other object removed from its face, when, after trimming and blackleading, it will be ready for use, no "building-up" or "raising" being required, and the preliminary partial filling up of the hollow spaces or "whites" in the surface of the type being altogether obviated.—*Printing Times and Lithographer.*

JAMES A. WHITNEY, COUNSELOR-AT-LAW.

*Special attention given to Patent and Trade-
Mark Causes.*

140 NASSAU ST., NEW YORK CITY, U.S.A.

JAMES A. WHITNEY,

*Solicitor of United States and Foreign Patents
and Trade-Marks,*

No. 140 Nassau St., New York City.

American, Canadian, British and Continental Patents obtained for Inventors on favorable terms, and in the shortest possible time. Caveats filed, Reissues and Design Patents secured. Trade-marks and Labels protected by registry at the U. S. Patent Office and in Canada and Europe. Rejected Cases investigated and reported upon. Interferences conducted. Opinions on Questions of Infringement, the Validity of Patents, &c., &c.

PERSONAL attention throughout is given to each and every case—a matter of no inconsiderable importance to those who wish STRONG CLAIMS and specifications CAREFULLY DRAWN. Business may be transacted either in person or by mail, and in every detail is kept inviolably SECRET and CONFIDENTIAL.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

F

WATER-MARK:

E

L

L

L

L

S

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.

NEW LIST AND DISCOUNTS OCTOBER 1, 1883

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. December 13, 1883.

Ceramic Colors.

The color and tints which a color-producing substance gives in glass fluxes are practically dependent upon various circumstances: (1) Upon the composition of the glass flux itself; (2) upon various special component parts of the glass flux; (3) upon the temperature; (4) upon the color of the body.

As to the first point, a distinction may be made of glass fluxes containing alkali in relatively large proportion, silicate glass fluxes in which alkali silicates preponderate over oxide of lead silicates, or where the latter are absent; (2) glass fluxes containing lead or oxide of lead, with an excess of those substances as compared with alkalis, or the latter being absent; (3) glass fluxes containing alumina, in which, besides other glass-forming substances, silicates of alumina exist in such quantity as to alter the effect of the alkali or lead; (4) boracic acid glass fluxes into which a considerable proportion of boracic acid or borax acid has entered. It is remarkable that lime, as a component part of a glaze, appears to be neutral against the effect of chromogenes—that is to say, it is not affected by alkali and lead, though it is said to be partially influenced by baryta.

Among the special component parts of glass fluxes capable of affecting chromogenes are oxide of tin, oxide of antimony, phosphate of lime, oxide of zinc, and also alumina, which does not attain silicate formation, or at least a high degree of silicic acid combination. The three first-named substances specially affect the glass fluxes by giving them an opaqueness which bleaches most colors.

The influence exercised by the temperature may be readily observed if a copper-azure glaze be placed in a muffle-furnace (at perhaps 1,600° to 1,800° Fahr.), and another time in a stoneware glazing furnace. In the former it acquires a beautiful azure-blue, and in the latter a poor shade of green. Chromic acid gives yellow in majolica glass fluxes, but in a stoneware glaze fire it produces green. The effects in the latter case are attributed to the change in the constitution of the glaze, brought about by the dissolving of the substance of the body.

As to the color of the body, this has, of course, an effect in the instance of transparent glass fluxes, a mixed color being thus produced by the co-operation of the glaze color.—*Thon-industrie Zeitung.*

The Spanish Cortes has paid £36,000 for the library of the late Duke of Osuna, which is £10,000 less than the price originally fixed by the dowager duchess. There are 32,567 volumes of printed books, 2,770 volumes of manuscripts, many of which are unique, and nearly one thousand volumes of prints.

What is duty? It is what we exact to others.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XVI.---NO. 10. NEW YORK, SEPTEMBER 4, 1884. WHOLE NO. 480.

Correspondence.

CINCINNATI ECHOES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, Ohio, September 1, 1884.

THE STATIONER, with its clean, handsome pages and its tireless industry in presenting just what readers want to see, is more than ever welcome when the rush of business has a temporary check, as now. It is punctually here, no matter what else may be lagging; and in that one quality it is a wholesome disciplinarian. Everybody knows the value of the maintenance of discipline, whether in the school-room, in the factory, the business house or on a lonely Arctic exile. So when proprietors and clerks find the days following each other with monotonous dullness, inducing a feeling that everything is going into a state of stagnation, what a relief to feel the animating, though silent and unobtrusive influence of the welcome STATIONER. There is plenty of time to read all of its correspondence, editorials and miscellany; and the advertisements are not without a large share of the attention of all classes of readers. I venture to say, that few publications find more readers for their advertisements than THE STATIONER. The reason is obvious—they relate largely to those adjuncts of civilization which go into every house and business place. Moreover, the handsome type, paper, engraving and press-work, present the advertisements in a really artistic form. If one had no interest in the subject matter, he would find himself attracted by the method in which it is treated.

"Now is the time to subscribe," says the suspicious reader, as he gets down so far, meaning to convey the idea that what has been said in praise of THE STATIONER should be thus labeled to show that it was a publisher's puff. Not so, suspicious reader; you are in a small minority; the large overwhelming majority of THE STATIONER readers know that what I have said is the truth. They have felt its truth, and I have only echoed the general voice in what has been said.

The business situation here now is one of quiet hopefulness; it is a little better than that; it has a dash of confidence mingled with the hope. The exposition begins on Septem-

ber 3, and that means an impetus to many classes of trade. The stationer's business is among the foremost to feel the effect of a business revival. But the exposition is by no means the only ground of hope. There have been on an average bounteous crops. The corn failure in this region, bad as it is, is not bad enough to outweigh the greater yield in other places. Even now the price is going down, although a very short crop will be the rule hereabouts. Then it will be but little more than eight weeks until the election will be over, and all of the feverishness its pendency has caused will be removed.

The local trade is by no means dormant. Orders for current wants begin to come in more freely as our seashore and mountain absentees begin to return and to give more vigorous turns to the sluggish wheels of business.

There are no changes to note and very little local news to chronicle. Pounsford & Co. are soon to occupy their new quarters giving them two stores in one, fronting on both Main and Fourth streets. It will be a handsome place.

Traveling salesmen are not abundant just now, but from the mail indications a wave of increasing pressure is approaching. Let them come and bring their valued products is the edict of

PRINCE WILLIAM.

CHICAGO CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

CHICAGO, August 30, 1884.

As the first of September draws near the feeling among stationers and manufacturers becomes correspondingly cheerful.

Great preparations have been and are being made for the fall. Novelties and specialties are being introduced in rapid succession. New inventions and improvements are daily making their appearance, and the fall boom is about ready for a start.

One of the best and most useful novelties introduced this season is that prepared by the Tablet and Ticket Company, of Chicago. This novelty consists of gummed labels cut in exact shape of letters and figures; their color is bright-red, with black shading, and they can be readily and firmly affixed to any smooth surface. With these letters anyone can make their own show-cards, window signs and display cards, and label boxes, shelves, drawers,

&c.—in fact, they can be made useful in a great many different ways. They are put up in fonts of 250 assorted letters, and their general usefulness, combined with the low prices, will guarantee success for them.

Brown, Pettibone & Kelly have enlarged their store and capacity fully one-third. Their business during the summer season has been entirely satisfactory.

Brown & Besley, manufacturers of Brown's perfect letter file indexes and transfer or filing cases, have produced a new thing in the way of letter files which is destined to meet with a large patronage, as it is a decided improvement on the old style in point of capacity for holding a great number of letters and ease in handling and transferring them. A full description of the file will appear in the columns of THE STATIONER. Mr. Brown reports a good, steady demand for his "Everyday Files," and business generally good throughout the season.

Gustav Hinstorff, stationer, blank-book manufacturer and importer of books, &c., has added to his establishment a department of lithographic supplies and drawing materials. The department is in charge of F. D. Hake, formerly of the Chicago Lithographing and Engraving Company, a gentleman thoroughly conversant with the business in all its branches. The house has also, this summer taken the general agency for the inks of the American Lithographing Ink Company, of Milwaukee. The principal claim as to the superiority of the ink is that it is of a very deep, pure black and ground very short—not by adding grease or any other foreign substance, but in pure lithographic varnish of the company's own make.

Mr. Cable, the Chicago agent of Porter, Coates & Co., reports fair trade in all lines of school-books.

The patent hinge-joint blank-book factory of J. J. Hanlon is running in its full capacity.

H. McAllaster & Co., dealers in fancy cards, shapes, novelties, &c., promise to introduce several interesting novelties this fall.

J. H. Bufford's Sons are showing a line of beautiful plush and satin novelties. Most of them are elaborately decorated in hand-painting. The patterns and styles are all new.

Edward Cook has retired from the firm of Jansen, McClurg & Co., wholesale booksellers

and stationers. The style of the firm is unchanged.

The engraving business is developing very rapidly in Chicago. This class of work has hitherto been done very largely in Eastern cities. A number of photo-engraving establishments have been started in Chicago during the year.

Brown, Pettibone & Kelly have brought suit to enjoin Culver, Page, Hoyne & Co., and John Morris, their successor, from supplying goods, either directly or indirectly, to any county, county officer or agent, for the use of the counties in the State. They allege that on June 1, 1883, Culver, Page, Hoyne & Co. sold to them all of their Illinois county blanks and records, Goodrich & Pettibone tax computers, the tables thereof and patents thereto, copies of Illinois county records and all matters and things directly appertaining to them, and agreed for the period of eight years to absolutely refrain from supplying goods, directly or indirectly, to any county officer or agent for the use of any county in the State of Illinois other than Cook County, that they would not print, manufacture or keep these goods for sale, that they would turn over all orders received by mail for these goods to the complainants, and that the agreement should be equally binding upon the successors or assigns of Culver, Page, Hoyne & Co. It is now understood that Mr. Morris, as the purchaser of the business of the firm of Culver, Page, Hoyne & Co., is about to enter this field, and the purpose is to stop him, if possible. Noz.

BOSTON LEAVES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, Sept. 2, 1884.

September opens with a cool and bracing atmosphere; plenty of ozone in the air; just the kind of weather for work; and from what can be gathered from the trade generally the promise of a good fall trade bids fair of realization.

Manufacturers during the past few months have been actively engaged in canvassing the trade for fall goods, and, although considerable caution is observed on the part of buyers, the indications for a good live business for the coming season are encouraging.

No little talk is frequently heard of overproduction, especially in paper, and though in some lines of paper this may be the case, yet I am led to believe that the market is not overstocked with "writings."

If the present daily product of writing paper had been placed upon the market ten years ago, the overproduction theory would have been verified by accumulated stocks at the mills and in jobbers' hands. That the production has largely increased is admitted, but the population of the country has increased also, and the reduction of letter postage has wonderfully increased the consumption of writing paper. Of the better grades of paper jobbers are not carrying large stocks, and the retailers have for months been buying only in moderate quantities. Possibly the manufac-

turers are holding back their product in the hope of cornering the market.

Such, however, is not the case, for I have just spent a few days in Holyoke, and from a personal inspection of the mills I find that the supplies of writings are very light. In fact, the stocks at the mills are only sufficient to meet the demands of daily trade.

So close to the production is the demand that the Holyoke manufacturers held a meeting on Saturday last to discuss the action of the Water-Power Company, because, through defects in the dam, power has been cut off and the mills have been allowed to run only half time. This does not look as though the mills were piling up paper for a venture.

The daily product of paper at Holyoke is over 175 tons. Of this product 60 tons are book papers, and a large proportion is writing-paper. For the past week this product has been curtailed about one-half, and until the Water-Power Company succeeds in closing the break in the dam the product of paper will be still further lessened.

The Whiting mills, the daily product of which is 20 tons of fine writing-paper, feel the frequent enforced "shut-downs" quite seriously, as the demand for "Whiting's Standard" paper and envelopes is so largely increasing as to necessitate running full time. And then this company has just introduced a new line of rich wedding stationery, the demand for which will not permit of too much lost time. The Whiting Paper Company has for years made a large portion of the stamped envelope paper for the Government envelopes, and half-time is a serious consideration.

I would remark, by way of parenthesis, that while Postmaster-General Gresham was examining into the Kellogg matter, he looked into the Whiting Mill for the purpose of seeing if the envelope paper made by this company for the stamped envelopes was up to the test. This he found to be all right, and expressed himself fully satisfied with its quality.

Dropping into the office of the American Pad Company I found T. N. Holley, the manager, who kindly took me through the factory, as he wanted to verify his statement about "a booming business." Everybody was putting in full time, some piling the paper, sheets upon sheets; some cutting it into proper sizes, others binding the sheets into regular pads, and others boxing the pads for shipment. Really, to see the quantities of paper cut up and made into pads by the American Pad Company is pretty good evidence of its growing trade. For its fine-grade pads the company uses only animal-sized and loft-dried paper. They are ruled or unruled as wanted. Manilla pads are also made. Since the 1st of August the company has been unusually busy filling orders—another evidence of good business this fall.

At Springfield I found manufacturers quite cheerful. Some lines of goods have been largely placed, and orders are now being filled.

In school furniture and supplies, George Elsey has filled some large orders. For the schools at Fall River he sold one order of twenty-five hundred desks. Such an order is

about as large as is commonly sold at one time, and it shows how extensive are the facilities of this house for manufacturing, and gives an idea of the stock carried. There were a number of competitors in the field, all looking for this Fall River order, but owing to the fact that some four thousand school desks now in use in that school district were made by George Elsey, and that they have given satisfaction, not needing a dollar's worth of repairs for the last three years, the committee decided that it was economy to buy more of the same kind. So Mr. Elsey was aided in the contract by the merits of his school desks. If school committees in other States would examine these desks closely and have them tried in their schools, they would find it a profitable investment.

Speaking of school supplies calls to mind that New Bedford spends \$4,000 and Lynn over \$10,000 for school supplies this year, under the "free text-book" law. Other towns are yet to hear from. A. L. D.

Waterproof Varnish for Paper.

In many cases waterproof varnishes are useful, and among their uses may be mentioned their application to laboratory labels, and their use for the fixing of drawings.

There are many such varnishes, but according to our own experience, says the *Photographic News*, one of the best is a thin solution of gutta-percha in benzole, and such a varnish may be made by dissolving one or two parts of fine gutta-percha foil in a hundred parts of benzole. The heat of a water-bath serves to make the gutta-percha dissolve tolerably quick, but if it is necessary to have the preparation at once, the gutta-percha may be dissolved in a little chloroform, and this is then mixed with the required bulk of benzole. Paper which has been coated with this varnish can be easily written, drawn or painted upon; and it must be remembered that the gutta-percha varnish does not make the paper transparent or spotted. It is known that gutta-percha slowly oxidizes in the air, and becomes converted into a brittle resin; but this oxidation product is itself a waterproofing agent. Alcoholic solutions of resin tend to make papers more or less transparent, but the following varnish, prepared with acetone, is not subject to this drawback. One part of damar is dissolved in six parts of acetone, the materials being allowed to digest together for some weeks; the clear liquid is now decanted off, and mixed with its own volume of plain collodine. Another method of making a waterproof varnish for paper consists in digesting 30 parts of white shellac with 300 parts of ether, and then agitating the solution with 15 parts of finely-powdered white lead; on filtering the solution, it will be found that the white lead has been very effectual in clarifying the solution. The above resinous varnish gives more lustre than the gutta-percha varnish, but the latter gives far more flexibility, a considerable advantage in many cases. Not only silver prints, but also collotypes, and often photo-mechanical impressions, may often be advantageously treated with one of the above varnishes; and it must not be forgotten that anything which protects a silver print against damp serves to diminish the tendency to fading.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

SANFORD'S Pneumatic Mucilage.

(PATENT APPLIED FOR.)

The Most Practical Stand Ever
Invented.

The mucilage is confined in an airtight reservoir kept by atmospheric pressure, at the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

BEST QUALITY IN THE MARKET.

For Sale by Stationers and Jewelers in all principal cities. Trade List furnished on application.

Pay Promptly.

A point often overlooked by the retail dealer is the importance of the prompt payment of accounts. A merchant ought never to wait for a statement, but should always have his remittance in the hands of the manufacturer the day it falls due. We are well aware that such a course might prove fatal to the unsuspecting manufacturer, to whom undoubtedly the shock would prove a bolt from a clear sky, but it would not take long for him to become accustomed to the new order of affairs, and really enjoy it. But why should the retailer adopt this course? First, because promptness begets confidence, and will build up a man's credit and good name faster than anything he can do. Second, the cash discount thereby obtained will, in the course of a year's business, amount to a good round sum. Third, because the manufacturer thus handsomely treated will be ever ready to accord such a customer every possible favor in his power; will acquaint him with the newest styles, the best selling goods; will see to it that no mistakes occur in the way of quality, &c.; in short, will look upon the prompt customer as a personal friend, and will do all that can be done to further his best interests. But how is a man to know the date of maturity of all these many and diverse bills? Keep a special diary for that purpose. When a bill is checked off record the date of maturity and see to it that a check is sent, not within a week or two, but in time to have it arrive at its destination the day it falls due. By this method you will find that in a short time your credit will be absolutely unquestioned, and you will soon find that your business is prospering beyond all your expectations.—*Exchange.*

GLUE, PASTE OR MUCILAGE.—Lehner publishes the following formula for making a liquid paste or glue from starch and acid: Place 5 lbs. of potato-starch in 6 lbs. of water, and add $\frac{1}{4}$ lb. of pure nitric acid. Keep it in a warm place, stirring frequently for forty-eight hours. Then boil the mixture until it forms a thick and translucent substance. Dilute with water, if necessary, and filter through a thick cloth. At the same time another paste is made from sugar and gum-arabic. Dissolve 5 lbs. gum-arabic and 1 lb. sugar in 5 lbs. of water, and add 1 oz. of nitric acid and heat to boiling. Then mix the above with the starch-paste. The resultant paste is liquid, does not mold, and dries on paper with a gloss. It is useful for labels, wrappers, and fine book-binders' use. Dry pocket-glue is made from 12 parts of glue and 5 parts of sugar. The glue is boiled until entirely dissolved in the hot glue, and the mass evaporated until it hardens on cooling. The hard substance dissolves rapidly in lukewarm water, and is an excellent glue for use on paper.

An article taking up about three-quarters of a column in one of our exchanges is headed, "How to reach young men." The former way was to reach them with one foot, but fathers of families, who cannot afford to take undue personal risks, have adopted the method of reaching young men by means of a competent bulldog.—*Lowell Citizen.*

— IMPORTANT NOTICE. —

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Wm. Saunders, electrotyper, Oakland, Cal., has sold out.

S. Heath, stationer, Spokane Falls, W. T., has been burned out.

D. G. Denton, publisher, Brookville, Kan., has sold out to H. C. Lawrence.

Brown & Franklin, paper-hangers, Philadelphia, Pa., have dissolved partnership.

The *News* Company, publisher of the *Emporia News*, Emporia, Kan., has sold out.

Murphy & Fahey, booksellers and stationers, Pittsburg, Pa., have dissolved partnership.

W. B. Tate, bookseller and stationer, Lexington, Mo., has sold out to Charles W. Loomis.

K. J. Booth, dealer in picture-frames, San Francisco, Cal., is advertised to be sold out by the sheriff.

August Gast & Co., lithographers and printers, St. Louis, Mo., have dissolved partnership, W. E. Stephens withdrawing from the firm.

B. T. Searing, dealer in card-board, &c., New York city, has formed a limited partnership with special capital of \$5,000, to run until September 1, 1889.

The schedules of Nelson M. Sheffield, advertising agent, of No. 13 Park row, show liabilities, \$34,827; nominal assets, \$25,048; actual assets, \$4,999.

Brand & Brother, booksellers and stationers, Nevada City, Cal., have dissolved partnership, G. E. Brand retiring. R. C. McCutchen has gone into partnership with the other member of the firm, and the business will be continued under the style of Brand & McCutchen.

D. P. Bloomer, a traveling salesman for Weideman & Co., of New York city, was found in his bed at the Nicollet House, Minneapolis, on the morning of the 26th inst., fatally injured, having been assaulted during the night by unknown parties with a railroad coupling pin. Robbery was intended by the murderers.

Cassell & Co. announce for immediate publication: "Life and Labor in the Far, Far West;" Notes of a Tour in the Western States, British Columbia, Manitoba, and the Northwest Territory. By W. Henry Barneby, with specially prepared map in pocket, showing the author's route. "Simon Peter; his Life, Times and Friends." By Edwin Hodder, author of "Ephraim and Helah," "A Story of the Exodus," &c., &c. "Working Men Co-operators; What They Have Done and What They are Doing." An Account of the Artisans' Co-operative Movement in Great Britain, with Information How to Promote it. By Arthur H. Dyke Ackland, M.A., Student and Steward of Christ Church, and Senior Bursar of Balliol College, Oxford; Member of the Central Co-operative Board; and Benjamin Jones, Honorary Secretary of the Southern Section of the Central Co-operative Board. "Photography for Amateurs." A Non-Technical Manual and Practical Guide for the use of the many Amateur Workers who, since the introduction of gelatine dry plates have taken up the art as a pleasant occupation for their leisure hours. By T. C. Hepworth, Lecturer to the late Royal Polytechnic Institution. With illustrations. "Principles of Perspective." "As Applied to Model Drawing and Sketching from Nature, with 23 Plates and other Illustrations. By George Trowbridge, Head Master of Government School of Art, Belfast.

W. H. Woodcock, publishers of the *Gazette and Reporter*, New York city, has sold that journal to Allen Brothers, 40 Vesey street. Mr. Woodcock made the *Gazette* one of the best journals devoted to the printing and lithographic trades in the country, and he has been encouraged by liberal patronage. Mr. De Follet, who has so ably conducted the paper in the past, has withdrawn from its editorial management.

The stylographic pen manufactured by C. L. Downes & Co. is very simple in construction, and rarely fails to work perfectly. It will write 15,000 words without refilling. It is low-priced, and is altogether one of the most satisfactory of the many forms of stylograph in the market.

A. S. Winchester, printer, Oakland, Cal., has applied for relief in insolvency. Liabilities, \$2,290; nominal assets, \$2,732; mortgaged for \$700.

A receiver has been appointed for the *Chronicle* Publishing Company, Seattle, W. T. A suit has been brought against the company.

Julius Israel, newsdealer, &c., Ocala, Fla., has been burned out.

J. M. Ormsby, bookseller and stationer, Chico, Cal., has sold out.

George L. McQuown, dealer in wall-paper, Denver, Col., has made an assignment.

Harry Brook, publisher of the *Prospector* Quijotoa, Ariz., has removed to Tucson.

Dill & Bell, publishers of the *Cosmos*, Council Grove, Kan., have sold out to Waller & Dunn.

Goss & Hearn, bookbinders, Boston, Mass., have dissolved partnership. James A. Hearn continues.

Filley & Johnston, publishers of the *Citizen Republican*, Kingman, Kan., have sold out to Stout & Foley.

The Albuquerque Publishing Company, Albuquerque, N. M., has been leased to W. S. Burke and W. M. Allison.

Rosser, McClure & Co., printers and wholesale stationers, Lafayette, Ind., have dissolved partnership. John Rosser succeeds to the business.

The liabilities of the estate of T. Bauer, dealer in artificial flowers, Philadelphia, Pa., are \$7,000. An offer has been made to the creditors of fifty cents, in notes at one and two years.

Geo. H. Sanborn & Sons, 69 Beekman street, New York, have just issued a new catalogue of their well-known paper-cutting machinery. They have also a list of second-hand machinery in good order, including different kinds of cutters, embossing presses, bookbinders' cabinets, &c.

At the forthcoming exhibition of the Massachusetts Charitable Mechanics' Association, opening September 10, there will be an exceptionally interesting collection of the originals of Prang's publications. This collection will contain pictures by Thomas Moran, Murphy, Miss Bridges, F. S. Church, J. W. Champney, Jean Robie and many others, with their reproductions. Another collection will show the development of chromo-lithography in this country, and will consist of a comparative exhibit of works issued by Prang & Co., from the very first colored plate published up to date, and will comprise a complete set of prize cards. Studies from artists by Mrs. E. T. Fisher, Murphy and others will be shown; and not the least interesting exhibit will be that of a picture in every stage of reproduction by lithography. The satin prints, from

original works by leading artists, will include a copy of F. S. Church's "Lion in Love."

Schmidt & Trowe, lithographers, Baltimore, Md., have dissolved partnership.

S. D. Johnson, job printer, Wallingford, Conn., has sold out to J. P. Doolittle.

Mentzel & Warner, paper dealers, Baltimore, Md., have dissolved partnership.

The Elkhart *Journal* Company, publisher, Elkhart, Ind., has been succeeded by Guy C. Johnson.

Shepherd Brothers & Co., stationers, &c., San Antonio, Tex., have sold out to R. W. Moore & Co.

E. W. Sandford, publisher, Le Sueur, Minn., is to be sold out under chattel mortgages amounting to \$1,300 and \$800.

J. S. Ogilvie & Co., New York, have published a little book entitled, "Seven Hundred Album Verses," containing 128 pages of choice selections of prose and poetry, suitable for writing in autograph albums.

The loss by the fire at Fargo, Dak., August 27, in the *Argus* lithograph and bindery departments is about \$10,000, besides \$3,000 in the bindery of Nugent, Young & Brown. The latter have \$2,000 insurance; the *Argus* was also insured.

A fire broke out in the paper-stock warehouse of H. Dodson, 135 South Delaware avenue, Philadelphia, on Monday. The building was damaged to the extent of \$500, and the owner estimates his loss on contents at \$5,000. The property is insured for \$2,500.

James R. Osgood & Co., Boston, have published, in a neat and convenient form, the address of Robert P. Porter to the Arkwright Club, of New England, on "Protection and Free Trade To-day." Mr. Porter graphically presents exactly what voters in both political parties want to know, the facts showing how free trade and protection works at home and abroad, in the field and the workshop. He shows how agriculture, commerce and manufacturing in the United States, Great Britain, Germany and Holland have been affected by these two economic policies. Mr. Porter's work will be appreciated by business men, farmers and artisans, who have no time to read a volume on the subject, but who want a clear exposition of the condition of labor here and in European countries.

Hamilton Brothers & Co., paper dealers, of Milwaukee, Wis., have had a receiver appointed. They claim ample assets, but require time to convert them. Gen. C. S. Hamilton, formerly United States Marshal, was the capitalist of the firm, which succeeded the C. H. Hamilton Paper Company in 1881.

The business of Luther B. Lyman, stationer and blank-book manufacturer, No. 2 Union street, corner Elm street, Boston, will hereafter be conducted under the firm name of Lyman & Howard, Lucius Howard, formerly of the carpet firm of H. A. Hartley & Co., being the new member of the house.

George C. Perkins & Co., stationers, &c., Richmond, Mich., have sold out to H. E. Harrison.

E. Matz & Co., paper-stock dealers, Omaha, Neb., have dissolved partnership.

Odell & Bayers, publishers of the *Statesman*, Salem, Ore., have dissolved partnership. Odell retires, and Bayers, Soubert & Hendricks continue the business.

Holmes, Booth & Haydens, 25 Park place, New York, have issued a "gilt-edged" catalogue of McGill's patent fasteners and other appliances. The work is well printed, and ought to be in the hands of the stationery trade generally.

Harry Wiltshire is prepared to do fine engraving of every description for the trade. He makes a specialty of card plates, door, pew and number plates, monograms, wedding monograms, crests and coat of arms, address dies, letter engraving on jewelry, silverware, albums, &c., also stamping and embossing (plain or in colors or gold or silver), such as initials, boxes, business envelopes and labels. He also furnishes seal presses, wax seals for firms, societies, banks, &c. He searches family crests and arms, and furnishes designs for approval. He also makes rosettes and badges of all kinds to order, the latest styles of ball programmes, orders of dancing, menus, &c., and executes all kinds of letter-press printing promptly and at low rates. Mr. Wiltshire has recently brought out an extensive line of New Year calling cards. They come with assorted bronze and steel-plate designs, and are new and very pretty. The cards are of twenty-five different shapes and sizes, with plain and gilt beveled edges, also with fringed

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

edges. Mr. Wiltshire's work is so excellent in character and his terms so reasonable, that the trade will do well to patronize him.

Hamburger & Co. have purchased the stock, fixtures, &c., of the late firm of I. H. Hamburger, and are prepared to continue the same business with increased and improved facilities.

The John Morris Company is the name of a new concern just organized at Chicago, with a paid-in capital of \$300,000, to carry on the stationery business as the successor of John Morris, who bought out the business and stock of Culver, Page, Hoyne & Co., who failed for several hundred thousand dollars about a year ago.

Atterburg Brothers, paper-stock dealers, whose warehouse at 253 and 255 Front street was burned out some weeks ago, have returned to their old location after putting their building through a thorough course of repair. A very handsome suite of offices has been fitted up on the second floor, which, together with the most approved baling presses and elevators, and accommodations for the packing of every variety of stock used in a paper mill, gives them facilities second to no house in the trade.

A largely attended meeting of the paper-stock importing trade of New York was held on Tuesday at 12 o'clock, at the office of the *Paper Trade Journal*, to take action in regard to the order of Assistant Secretary of the Treasury Coon, prohibiting the importation of rags into any port of the United States from and after September 1. C. C. Woolworth was made chairman. After some remarks made by W. H. Parsons and J. Fred. Ackerman of the difficulties they had met with at the hands of the Custom House officials, a committee of three was appointed, consisting of C. C. Woolworth, W. H. Parsons and Edward Goodwin, jr., with full power to act for the importers present, and to endeavor to secure such a modification of this order and to define the terms of the order, as will be a reasonable protection to the trade. The committee visited Washington in conjunction with a committee from Boston, and secured a modification of the order permitting all rags now in port and those en route to the country at the date of the order to be entered.

Among the visiting members of the trade in the city during the past week were G. & R. Wills, of G. & R. Wills & Co., Adelaide, South Australia; a representative of Weil & Woodleaf, of San Francisco; A. D. Aldridge, of A. D. Aldridge & Co., Dallas, Tex.; Mr. Nicholson, of Nicholson, Sandford & Co., Athens, Ga.; J. L. Wyatt, of Marion, Ala.; Mr. Etheridge, of Smith, Huddleston & Etheridge, Jackson, Ga.

F. H. Loss, Jr., has just placed in his show rooms a line of fancy articles made entirely of English-tinted tissue paper, ornamented with rose buds; these are panels, fans, toilet-set mats, thermometers, and shades for the library lamp adapted for "paper wedding" and holiday presents.

Augustine Smith and George Jones, of the *Times*, arrived home on Sunday by the steamer Gallia, after a visit of two months in Europe. Mr. Smith has had a very enjoyable visit, but Mr. Jones was sick much of the time while away, and has not entirely recovered.

The committee of creditors of Hand & Ellsworth appointed to investigate the affairs of that firm is very nearly ready to make a report, and it is likely that a meeting of the creditors will be called next week.

Frank Wood, one of the most trusted and well known lieutenants of the Esterbrooke Steel Pen Company, has just returned home from the West, and reports a satisfactory condition of trade.

H. Ames, bookseller, &c., Ashland, Ohio, has been burned out. Loss estimated at \$1,500; said to be fully insured.

The Post Office Department tested 500 reams of wrapping paper last week and found the paper deficient in strength. The contractors, Woolworth & Graham, were notified, and they responded by taking back the paper and shipping another lot, which was, on testing, found to be of better quality than that required by the standard fixed by the Department.

A process for rendering textiles watertight and incombustible has been invented by M. Dumas. The fabric is first passed through a solution containing 7.8 per cent. of gelatine heated to 40°. After remaining in the solution a few minutes, the fabric is pressed between rollers to remove the surplus liquid, and after-

ward allowed to dry partially in the open air. It is then permitted to steep for a short time in a cold 3.4 solution of alum, and is then taken out, exposed to the air for an hour, washed in cold water and finally dried. It is claimed that goods thus treated are quite permeable to air, and lose neither their elasticity nor softness.

It is reported that MM. Pressac et Cie., of Paris, have introduced a salt which, placed in water, is partly dissolved without increase of temperature, and produces a liquid capable of generating with the aid of zinc and carbon an electric current. It is also said that this cell gives rise to no fumes or smell. The salt is partly melted in two parts of water, and the liquid can be used at once.

The present summer promises to be an important one for science in America. The annual meeting of the British Association for the Advancement of Science takes place this year at Montreal, from August 27 to September 2, and is to be closely followed by the American association's meeting at Philadelphia, September 4 to 11. An international electrical exhibition will be in progress in Philadelphia in September, with probably an electrical congress. A greater number of foreign savans will undoubtedly visit this country than were ever before present at one time.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. It CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WEIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours, THOMAS TENNENT,
Mfr. Mathematical Instruments,
18 Market St., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies, - 10 Cents.

NEW YORK, THURSDAY, SEPTEMBER 4, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12S.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE International Postal Congress, which was to have convened at Lisbon, Portugal, on October 1, has been deferred until February. This conference is one of importance, particularly to merchants. Among the subjects which are to come under its consideration are the reduction of mail transit charges, the compulsory prepayment of all postage on letters, and the extension of the exchange of postal money-orders to all countries now in the Universal Postal Union. A proposition for the admission of certain classes of merchandise into international mails will also be discussed, as will likewise the question of permitting mail packages to be sent C. O. D., as express packages are now sent. It is said that arrangements are in contemplation for the distribution of foreign mails for the United States on board ship as domestic mails are now separated on railway postal cars. Other matters of special interest will be treated of by the congress.

AN unexpected order from the Treasury Department, prohibiting the entry of all kinds of rags from foreign ports, promised early this week to create much inconvenience and discomfort—not to say loss—for the importers of paper-stock, and as incident thereto a deficiency in the supply of material for the finer grades of papers. Several cargoes now on the way would under this order have been debarred from admission into any of our ports, and this, notwithstanding the fact that they were shipped at points where the cholera did not prevail. The order, however, has been modified to the extent that rags shipped prior to September 1 may be entered, provided that there is satisfactory evidence of their non-infectious character. This modification was secured by the action of a committee appointed by the importers to visit Washington and represent the facts. The President of the Paper Manufacturers' Association was at the head of this committee and as the representative of that body had an influence which shows what power and importance the Association possesses in shaping action of immediate interest to the trade. This suggests the desirability as well as effectiveness of trade organization.

THE United States import from Uruguay some \$2,600,000 worth of goods more than they export thereto, while Great Britain has a balance of trade in her favor with the same country of over \$2,000,000. This difference in favor of the English is largely due to the fact that the latter have a weekly line of steamers to the River Plate, and merchants can avail themselves of rapid transit in receiving supplies. The same also appears in the

trade with France, Germany, Spain and Italy, which have steamship lines reaching the River Plate weekly. With a line of steamships direct from New York to the River Plate, making trips weekly, our trade with Uruguay and the Argentine Republic would be largely augmented, and to successfully compete for the trade of that part of South America with the governments whose steamship lines afford so much better and quicker transit for their productions, we should encourage the formation of steamship lines which will secure us equal facilities of transportation. We believe in encouraging such enterprises; and if Congress is to be sought to aid in sustaining them, we should try to secure the selection of representatives who will work for the development of our foreign trade and who will not be averse to employing all of the powers of the Government in its extension.

Roundabouts.

BY THE TRADE LOUNGER.

Are the finer grades of writing-paper going to be scarce? This is the question which is now to be considered. Inasmuch as the failure of the water at Holyoke, because of the leak in the dam, has compelled the paper makers to reduce production, there will be less paper in the market. Then, too, the restriction on the importation of rags may have the further effect of advancing prices.

* * * *

Considerations like the foregoing should be kept in view by the trade. It is not necessary, however, to get up any excitement over them, nor is there any reason why a "boom" should be started. Keep your heads level, and act with judgment.

* * * *

The dealers in foreign rags are exercised over the order of the Treasury Department prohibitory of the entry of rags now on the way from Europe. Telegraphic advices from Washington say that a modification of this order has been secured, so that the strain is not as great as at first expected, and a sudden change in the attitude of the paper market is likely to be averted.

* * * *

Speaking of the Treasury Department brings up some tariff rulings made by it during the past week. One of these is to the effect that "Japanese leather paper made directly from the pulp is dutiable at 25 per cent. ad valorem." Another decides that "round China plaques with paintings thereon, are dutiable at 60 per cent. ad valorem."

* * * *

Here's a bit for the editor. A San Francisco paper gets off the following: "How glorious it is to be engaged in a purely intellectual occupation," murmured a Boston maiden, gazing rapturously into the admiring eyes of a country editor; "your own mental

faculties for tools and the whole universe for a workshop. Now, tell me, she added, "what do you find the most difficult thing connected with your noble profession?" "Paying the hands," said the editor.

* * * *

Imitation cameos in glass are now made, and are used to decorate various fancy articles. One firm has been experimenting on a process for doing the work at a minimum cost, so that it could make very cheap and popular ornaments. The process has been patented in this country and Europe.

* * * *

A Connecticut man is said to be the originator of a novel idea for preventing collisions on railroads in the case of two trains approaching each other on the same track. The plan of this ingenious person is very simple. He proposes to place on the front of every locomotive going in one direction a long inclined plane, upon which are two rails. These come close to the track at the forward end of the plane, and at the hinder end are connected with other rails that run along the tops of the cars and down to the main track again on another inclined plane in the rear. When a train meets another with this attachment, the former simply goes over the latter. Think of the sensation of riding over the top of a passing train, or having a train pass over one in which you may be a passenger!

* * * *

Conversing with a friend, the other day, about THE STATIONER, the suggestion came up that with so many publications devoted to different lines of trade, and emanating from the same house, it was matter for surprise that so thoroughly good a paper could be produced. There is nothing surprising in this. There is no paper in its line so influential or well got up as THE STATIONER, and that great care in its production is taken is quite evident. But it must be considered, too, that it has advantages which no other paper (outside of those connected with the Lockwood Press) possesses. It derives the benefit of the labors of a large force of correspondents at home and abroad—nearly one hundred, I believe—connected with the different journals under the same management, whose services no one paper could afford to employ. By means of these, together with an extended exchange list and the large staff made possible by this combination of interests THE STATIONER has a force and power which no paper outside of the large daily papers can pay for.

* * * *

The Post-Office Department continues to test the paper which it receives. A lot rejected the other day was made more than good by the contractors, who substituted a better grade of paper than that called for. Is there to be any profit in Government contracts?

* * * *

Paper-weights are being made from red and black ores—compounds of iron, zinc and manganese—found at Franklin, N. J. These ores are cut and are said to take a beautiful polish, and can be utilized for ornaments of different kinds.

Answers to Correspondents.

S. C. W. inquires: 1. For manufacturer of the Sayer "D" school slate; 2. Who handles it in New York City; 3. What make of slate is considered best for jobbers.

Ans.—1. We don't know; 2. John D. Emack Slate & Novelty Company claims to be the only one; 3. Noiseless slates, because the trade is not so cut up and there is a better chance for a fair profit.

D. Brothers ask for address of Harry Wiltshire, mentioned in STATIONER of August 28.

Ans.—No. 78 Nassau street, New York.

F. M. S. asks for address of parties handling Hebrew New Year cards.

Ans.—Hamburger & Co., 332 Broadway, New York, J. Kohler, 120 Chatham street, New York.

J. H. F. wants the address of the manufacturer of the "ready blotter," illustrated in THE STATIONER, August 21.

Ans.—John F. Adams, Irvington, N. Y., is the patentee.

H. K. wants names of prominent dealers in artists' materials, particularly those dealing in "shell and brocatelle."

Ans.—Janentzky & Weber, 1125 Chestnut street, Philadelphia; A. H. Abbott & Co., 50 Madison street, Chicago; F. W. Devoe & Co., Fulton street, New York. We don't know what you mean by "brocatelle." There is an article called "brocade," otherwise known as "flitters," a coarse bronzing article in flakes, and colored gold, silver, scarlet, blue, green, &c. This and shell are staple articles with the dealers in artists' materials.

Replying to the inquiry in the last issue of THE STATIONER about the "Charter Oak" brand of W. C. paper, the Plimpton Manufacturing Company, Hartford, Conn., says that it makes that paper.

A wash of one part nitric acid in ten parts water will impart a stain resembling mahogany to pine wood that does not contain much resin. When the wood is thoroughly dry, shellac varnish will impart a fine polish to the surface. A glaze of carmine or lake will produce a rosewood finish. A turpentine extract of alkanet root produces a beautiful stain which admits of French polishing. Asphaltum thinned with turpentine makes an excellent mahogany color on new wood.

Market Review.

OFFICE OF THE AMERICAN STATIONER, 1
WEDNESDAY, September 3, 1884.

THE MONEY MARKET.—Call loans at the Stock Exchange have been available at $1\frac{1}{2}\%$ per cent., and time loans quoted $4\frac{1}{2}\%$ per cent. First-class commercial paper has been readily salable at 5% to $5\frac{1}{2}\%$ per cent. discount, and good single-named paper at 6% to 7% per cent. The stock market has again passed through a dull and unsettled period, with prices generally lower and speculation rather languid. Railroad bonds quiet and generally easier. Governments a shade lower. Sterling exchange is a trifle easier than at the close of last week, posted rates being $4.84\frac{1}{2}$ to 4.86 , but actual business has been done at the following quotations. Continental exchange dull but firm.

THE PAPER MARKET.—The principal features of the situation are about the same as for a long time past. Buyers are reluctant to stock up much in advance of need, and although there is a manifest subsidence of the distrust which existed some weeks ago, there is considerable caution as to credits, and business men are not disposed to operate with their accustomed freedom. The greater proportion of stocks in the hands of dealers are believed to be under fair control, with holders not over anxious, and many quite unwilling, to make any move that may be construed into anxiety to realize. They calculate that the consumptive demand, even if it does not gain much force, will continue steady and keep the daily and weekly exhaust of supplies up to, at least, the present level, and while with jobbers and large dealers stocks are reasonably full, they are in a position to be carried without any great distress to the holders. If we except bogus manillas, strawboards and wrappings, prices are fairly well sustained; but in these three grades values are weak and quotations are to some extent nominal. The straw-board manufacturers, who met at Put-in-Bay last week, failed to agree on any remedy to relieve the depression; but they are to have another meeting.

THE STATIONERY MARKET.—Dealers report this week a general improvement in almost all lines of goods. There have been a greater number of out-of-town tradesmen in the city than for some time past, and the orders taken have been larger as well as more numerous, showing that better confidence prevails in trade, if it is not also an indication of a direct increase in the business done by retailers. The indications are that there will be a gradual improvement from this time forth, as there seems to be a general wakening up not only in the stationery trade, but other trades. One reliable indication of this encouraging condition of business is the large increase of advertisements in both trade and news journals. Merchants, as a general rule, do not spend much money in advertising when business is sluggish. Owing to the limited production of various lines of goods, there is reason to believe, moreover, that prices will be steady and fair.

TWELFTH YEAR OF PUBLICATION.

THE PRINTING TIMES AND LITHOGRAPHER,

An Illustrated Technical and Fine-Art Journal of
*Typography, Lithography, Paper-Making,
 and the Auxiliary Trades.*

THE NEW SERIES COMMENCED JANUARY, 1875.

THE PRINTING TIMES AND LITHOGRAPHER is a high-class journal, devoted to the Printing and Graphic Arts, in all their various forms. It derives its information from, and circulates in, all parts of the world. No pains are spared to insure the accuracy of its intelligence and to render it in every respect worthy of the support of Letterpress Printers and Lithographers, as well as Artists, Antiquaries, and Literary Men generally.

Published on the 15th of each month, 4to, in wrapper, price 6d. Annual subscription (payable in advance), 8s., post free to the United States. Rates of Subscriptions for foreign countries on application. Post-office orders to be made payable at the West Central District Post Office, High Holborn, of WYMAN & SONS, 74 and 75 Great Queen Street, London, W. C., England.

FIRST AWARD at Chicago Railway Exposition, 1883.

Our Patent Laws as Related to Agriculture, Arts and Industries.

BY JAMES A. WHITNEY, LL.D., COUNSELOR-AT-LAW.

The first cast-steel plow was made and tried at Collinsville in July, 1860. The first lot, costing about fifteen dollars each, and aggregating a cost of \$22,500, was practically a dead loss; they were sent out untempered, and proved too soft for use, and could not be tempered when the defect was discovered, because "a ledge had been cast on the mold-board which would not permit tempering." Smith "gave all his time, energies, and thought to the development of this plow" up to the seventeenth day of April, 1874. The number made and sold by the Collins Company was eighty thousand five hundred and sixty-nine. Smith, up to January 1, 1874, over and above money expended, but without allowing anything for his labor during these years, received about \$55,000. The Collins Company invested not less than two hundred and fifty thousand dollars in the manufacture and introduction of these plows; and the plows could not have been made at a price low enough to come within the reach of the farmer, neither could they have been introduced when made, without this large capital to pave the way. Cast-iron plows are too soft to wear well in sand and grit; they will not scour in soft prairie or bottom lands. Plows made of sheet steel had been tried and been practically abandoned. Sheet-steel plows are of flat plates; they do not have greatest thickness at points of greatest wear; the plates tend to constantly renew their former flat form. The parts cannot be made uniform, cannot be readily duplicated or repaired, and will not admit of high temper and hardness; for tempering and hardening warps and twists or cracks and spoils the sheet. All these defects are obviated in the cast-steel plow. The worth to the farmer in increased durability, aside from scouring, estimated by sworn experts at five dollars per plow, over and above common plows, after making allowance for difference in the prices at which they were sold—80,500 plows, with an increased value of five dollars each—is upward of four hundred thousand dollars gained by the farmers of the West, while the inventor made less than one-seventh of this amount. It is true that the manufacturers made their profits in addition to this, but their capital was necessary to the development and introduction of the invention; and, as we have seen, one of the most useful attributes of the patent law is that it leads individuals to furnish means to practically construct, test, and introduce improvements that without such aid would languish and die. The patent laws bring the genius of the inventor and the resources of the capitalist together, and both, with the aim of enriching themselves, enrich in a far greater degree the public. I have spoken at some length of the steel plow, because it shows how many and serious are the difficulties to be overcome in perfecting what at first sight may appear a simple invention—difficulties so great

that the inventor would have been insane to have attempted to overcome them, had not the patent laws held out the certainty of profit in the event of success. Had there been no patent laws, the idea of a steel plow would have been but a myth. As it was, the inventor was rewarded by a competence for creating an implement destined to add millions of dollars to the wealth of the country.

A System in Scrap-Books.

A great many scrap-books are unsatisfactory because they are too miscellaneous, and lack skill on the part of the compiler. A scrap-book can be made valuable if the compiler will set aside all whims, lay out a definite plan and use good judgment in the selections. For a book in which to paste the cuttings, almost any bound volume will do, especially if its pages show a wide margin and the print can be readily covered by two widths of ordinary newspaper clippings. The margin may be used for notes, including dates and a few explanatory memoranda. The clippings should be kept for a week or so before they are pasted down, because a second judgment may rule them out. It is quite safe to advise collectors that no cutting will do unless it bids fair to be fresh and intelligible a year after it has been honored with a place in the scrap-book. If the pages become too thick for the cover, cut out two or three leaves after every page filled with the clippings.

When there is the slightest possibility that a scrap-book may be used for publishing purposes, or that any of its entries may be cut out for other uses, cover one page only. But on the page used, the clippings should be packed closely together. If possible, each clipping should retain the "rule" which marks the end of a printed paragraph or poem. The column lines need not be retained; in fact, it is best to cut newspapers always along these lines. Ragged edges, of course, should be avoided, and the mucilage with which the clippings are pasted down should be used sparingly, lest it ooze through the paper or exude from under the edges. Flour paste is better than mucilage, and what is known as "photographer's paste" is excellent.

But the most important point about the pleasure and profit of a scrap-book is system. Let the collector decide rigidly whether pictures or printed texts are to be collected. In pictures the collector should confine a really good scrap-book to a definite topic, whether portraits, historical landscapes, or some branch of natural history. A really brilliant book of famous authors may be collected from publishers' catalogues alone. The technological papers contain a rich supply of machinery. In almost every city or county, a volume of local scenery may be collected. Most persons, however, gather from the newspapers and magazines, though the latter are generally preserved in the libraries, and for that reason do not answer the wants of the collector, who saves from oblivion and collects what is found wide apart.

The collector of printed material should take up a narrow subject, say, short poems,

fresh anecdotes, new biography, a political point, a question of trade, an epidemic, a fashion, book notes, concerts, base ball, local government, railroads, inventions, or any limited field of knowledge, as taste may dictate. Nothing should be preserved that does not bid fair to be interesting and intelligible after the lapse of years. Persons who have ever collected postage stamps, or butterflies, or coins, will find the same delight and fascination as well as instruction, but not the same expense, in gathering from the newspapers whatever they can find good and pleasant in the way of anecdotes, local history, political biography or even epigrams. There is hardly a newspaper published but will furnish something, whatever the character of the scrap-book.

Young people, old people, women of fashion, and overtaxed officials or business men cannot give themselves many pleasures as simple, as instructive, and as valuable as the collecting of a scrap-book confined to some special purpose. They will find quickly that they have to practise exclusion, because there are very few topics on which the world does not publish a very-wealth of information and graceful wit. One need not go a mile to find honor, wit, and glory; they are at hand, calmly waiting for a pair of good eyes to see them, and gentle hands to gather them for the improvement of self and the delight of others.—

Literary World.

Aluminium Bronze.

The aluminium bronzes are made by fusion of copper and aluminium in various proportions. The best known alloys of these metals are those having 10 per cent. of aluminium to 90 of copper, and 7½ of aluminium to 92½ of copper. They are made in France, and a factory for their production is said to have been recently established near Birmingham, England (the Crown Aluminium Works).

Aluminium bronze, containing 9 parts of copper to 1 of aluminium, was, according to Professor Thurston, proposed some years ago as a material for small coins, and was experimented on for this purpose by the assayer of the United States Mint. This officer reported it to possess much greater hardness than copper alone, but less malleability and ductility. When rolled into sheets it requires annealing at every third passage through the rolls; when drawn into wire, it must also be frequently an-

nealed. To strike a coin of this bronze requires unusual force. It tarnishes quite readily, but not more so than copper.

Aluminium bronze, containing 7½ per cent. of aluminium, is greenish in color, according to Morin, while other compositions on either side are golden. Even 1 per cent. of aluminium added to copper causes a considerable increase in ductility and fusibility, and enables it to be used satisfactorily in making castings. Two per cent. of aluminium gives a mixture used for castings which are to be worked with a chisel.

The standard aluminium bronze, containing 10 per cent. of aluminium, is brittle after the first fusion, but becomes more ductile, as well as stronger, by repeated refusion. It makes good castings, is easily worked, may be forged at a red heat, and is fairly ductile under the hammer even when cold. It is softened by sudden cooling from a red heat. It takes a fine polish, is one-half stronger than good wrought iron in tension, but has less strength in compression. Its co-efficient of expansion is small at ordinary temperatures. Its liability to crack in large masses makes it difficult to get large castings. It has great elasticity when made into springs; it is found useful for watches, and has the decided advantage over steel of being but little liable to oxidation. The addition of 5 per cent. of silver is advised to pure aluminium to make springs.

The alloy of aluminium, with 4 to 5 per cent. of silver, is used in making the beams of fine balances for chemists. The introduction of a very minute proportion of bismuth makes this metal very brittle. A very minute trace of aluminium in steel is said to improve it. An alloy (bronze) containing 2 or 3 per cent. of aluminium to 98 to 97 per cent. of copper, is said to be useful in making ornamental silver-colored castings which are to be chased or engraved.

The alloys of aluminium and copper, it is said by Thurston, may be made by fusing together the oxides with metallic copper and enough carbon and flux to reduce them. The oxides, it is added, should be in a state of fine division and carbon present in excess. It is gravely to be doubted, in our opinion, if this plan is practicable. The probabilities are, that only a very minute trace of aluminium will be reduced from its oxide by the plan proposed. The direct fusion of the two metals in their proper proportions is the only safe method of procedure.

Obituary.

GEORGE WADLEIGH.

George Wadleigh, a well-known and highly respected citizen of Dover, N. H., and one of the oldest editors and publishers in the State, died Tuesday morning, August 12, aged 76 years, 7 months and 21 days. For nearly forty years Mr. Wadleigh published the Dover *Enquirer*, selling the establishment in 1868 to John R. Varney and J. T. S. Libbey.

HENRY GEORGE BOHN.

Henry George Bohn, author and publisher, who died in London recently, was born January 4, 1796, and, after getting an education, sold books in his father's store. In 1831 he began business on his own account, and ten years later published his "Guinea Catalogue," exhibiting the largest stock ever collected by a bookseller. Mr. Bohn was one of the pioneers in the movement for circulating good but cheap literature. In establishing his historical, scientific, illustrated, classical, ecclesiastical and antiquarian library, amounting to nearly 700 volumes in all, he translated several of Schiller's, Goethe's and Humboldt's works. He also edited the "Bibliotheca Parriana," Addison's works, "A New Edition of Lowndes's Bibliographer's Manual," and assisted in several of the classical translations. Mr. Bohn was well-known as an antiquary, and was a member of many of the learned and scientific societies. He contributed to the Philobiblon Society a life of Shakespeare and an extra size "Dictionary of English Poetical Quotations," volumes which, being privately printed, have sold for large sums at auction. In 1860 Mr. Bohn gained some notoriety as the only literary opponent of the repeal of the duty on paper. His opinion was that it would not benefit the public, while materially reducing the revenue.

SMITH SHELTON.

Smith Sheldon, of the publishing firm of Sheldon & Co., No. 8 Murray street, died of heart disease at the Prospect House, Nyack, on Sunday morning. He was 73 years old. Mr. Sheldon was a native of this State, having been born in Charleston, Montgomery County. His first business venture was in the dry-goods trade at Albany, where he acquired a considerable fortune. In 1854 he removed to this city, and established the publishing house of Sheldon, Lamport & Blakeman, at No. 115 Nassau street. The firm passed through various changes, remaining at the old stand until eight years ago, when, under the title of Sheldon & Co., it removed to Murray street. Mr. Smith Sheldon continued to be nominally the senior partner until his death, but he took little active part in the business of the concern after it became established in Murray street. Mr. Sheldon was a well-known Baptist, a member of the American Bible Society, a Trustee of Vassar College, of Rochester University, and of Madison University. He leaves a widow, two sons and a daughter.

II.

As material for his lamp-black, Chin-ki-souen gives the preference to the oil of *Dryandra cordata* or of hemp-seed over the old-fashioned pine-wood. At Kintcheou, he says, the people prefer the oil of *Gleditschia sinensis*, and at Southcheou that prepared from cabbage-seed or beans. Any sort of oil will do, but that of *Dryandra cordata* is best. It is burned in small earthen jars or lamps, each provided with an earthen cone or chimney, in which the soot collects. The wicks are formed of bundles of yellow rushes, tied ten or twelve together, and cut in suitable lengths. They are boiled in a decoction of Brazil wood until they turn purple, and are then wrapped up in paper packets, and put away in a dry place until required for use. The arrangement of the little earthen lamps is somewhat peculiar. One or more circular vessels, each two feet in diameter and three inches deep, are provided and filled with water. In each are placed seven flat bricks, one in the middle and six round, and on each brick stands an earthen lamp, with its inverted cone or chimney resting a little above it. The circular vessels, with their complements of lamps, are arranged on tables in a light, airy room, from which the access of dust or of draughts (which would disperse the smoke and prevent it setting) is shut off by curtains hung round the walls. The wicks should be thinner in summer than in winter, and care must be taken to remove the snuff as it forms and prevents its falling into the oil. The cones or chimneys are lifted off about twenty times in the day, and the lamp-black removed with a goose-quill, and collected in jars.

One hundred catties of oil will thus yield about eight catties of very pure lamp-black. The best time for making black is the end of autumn and the beginning of winter. In hot weather it has a more tawny hue, but good black can even then be produced by reducing the diameter of the rush wicks, and keeping the evaporating vessels constantly filled up with fresh water. When a sufficient quantity of black has been collected, it is passed through a fine sieve into a china jar, and is then packed in paper boxes, and suspended in a dry, airy place, out of reach of damp, which latter would ruin it.

Next to be considered is the glue. In one part of his discourse, the Chinese writer before mentioned recommends fish-glue, "pure and lustrous as white silk;" in another, he recommends a mixture of fish-glue with ordinary glue from horns and hides, or, better, from clean hides or old drumheads. Anyway, it should be the purest of its kind, and melted by breaking into very small fragments, wrapping them in small parcels in bamboo-leaves, and placing in a baking-pot over a slack fire. Before adding it to the lamp-black, the glue is compounded with some "solution," regarding which the Chinese author is as vague as some writers are wont to be in respect of secrets of their craft. The solution is to assure the preservation of the ink; by its agency the glue retains its strength and the black its color;

the cakes remain as "the horn of a rhinoceros." Unfortunately, he says, of all the solutions in practical use, there are very few which do not present some drawback. A solution of green vitrol and lapis lazuli decomposes and weakens the glue; musk and white of egg render the ink hygrometric; pomegranate-bark mixed with gamboge lightens the color; and ash-bark interferes with the marking property of the ink on paper. The best solutions are those of aconite, which increase the force of the glue; of anchusa, of *Butea frondosa*, of vermilion and of gold-leaf, which latter imparts to the ink the tint known to makers as "storm-cloud." Some makers, it is added, seek to disguise the smell of the lamp-black and glue by the addition of perfumes, but these are apt to decompose during the heating of the ink. Rose-water, however, keeps well, or a little musk and camphor mixed may be used.

The solution, whatever it may be, is to be prepared over night in winter or betimes in the morning in summer, so that it may be used before 8 A. M. It is heated, and the boiling glue poured into it. The mixture is then poured through a silken strainer upon a certain quantity of the lamp-black in a china vessel, and the whole well kneaded into small balls. The proportion of glue solution to lamp-black varies with the season; the common practice of using much black and little glue gives a very black and brilliant ink, which soon deteriorates but sells readily. The balls, after being well kneaded, are placed in a baking-pot, the bottom of which is filled with rushes; the lid is shut down close, and the pot immersed in water, which is allowed to boil for fifteen minutes, and should then be cooled slowly. From the baking-pot the balls are carried to a stone mortar, in which they are pounded, with heavy wooden pestles six feet long into flat cakes. After 600 to 700 blows of the pestle, the cakes become sufficiently plastic and firm, and are then weighed into suitable-sized sticks, which are wrapped in wet cloths, placed for a few seconds in a baking-pot at a temperature of 122° Fahr., then packed away in a covered vessel, which is plunged in a trough of water to await the next stage in the proceedings, which is the hammering.

A workman seizes each stick of ink in turn with a pair of iron pliers, and hammers it briskly on an anvil, in which process it acquires the consistency of ordinary dough. If it be inclined to stick to the hammer, it is wetted with a little of the solution before referred to. After 200 strokes of the hammer, the dull hue of the ink becomes brighter; after 400 strokes, it is brighter still; after 600, it will have attained the brilliancy and plasticity desired. The sticks are then carried away to a smooth wooden table, and each one is kneaded separately with a little camphor and musk into a small ball, which is pressed in a mold of suitable dimensions, formed of jujube-wood, the interiors of the sides carved with the characters it is desired to imprint on the faces of the cakes.

Long, thick cakes are difficult of fabrication, but they are very durable; short, thin sticks are easy of manufacture, but break readily, and the tint of the ink is inferior. The Chinese

author's advice is to keep within the limits of three to four taels or ounces.

When the sticks come out of the molds, the characters are gilded if required; and the cakes are dried by laying them in open boxes in dry, sifted rice-plant ashes. If the cakes weigh over 1½ oz., they should be wrapped separately in paper first. The boxes are emptied daily during the drying, and refilled with one-half of fresh dry rice-ashes intermixed with half of the ashes from the box. When the cakes appear dry enough, they are taken out of the ashes, brushed and wiped with a cloth, and then brushed over with a little grease. If the drying has been carried far enough, the cakes will acquire a shining appearance; if otherwise, the grease will dull the surface. After drying again in some airy place, they are washed by rubbing with an old shoe-sole lightly dipped in water; air-dried once more; and then wrapped separately in paper, and packed away in a dry, airy place.

Here they are opened from time to time when the weather is fine, carefully wiped with a soft cloth, and wrapped up again until they are required for use.

Good ink should improve with keeping; it should give a fine purple-black, and be perfectly free from grittiness. The cakes should always be tried on the palette or ink-stone, not on the nail; they should never be dipped in water, but a few drops of the latter should be placed on the palette, and the cake rubbed thereon with a rectilinear movement. The cakes should always be carefully wiped after use. Such are the Chinese author's directions, indited 400 years ago, and not without practical usefulness to-day.—*Printing Times and Lithographer*.

ALL BOOKBINDERS' REQUISITES.

HUGHES' NEW WALL MAPS

Prepared expressly for School use under the personal supervision of WILLIAM HUGHES, F.R.G.S. (late Professor of Geography in King's College, London), whose name is of itself a passport to the accuracy and merit of any work on Geography. The NAMES are introduced with great judgment, and free from the common fault of overcrowding. The physical features are boldly and distinctly delineated, and the political boundaries are carefully colored. They are adapted to any series of geographies, no keys being required.

Mounted on Strong Cloth, with Rollers, Colored and Varnished. Size uniformly 54 x 68 inches.

World on Mercator's Projection.

World in Hemisphere.

North America.	England and Wales.
South America.	Scotland.
Europe.	Ireland.
Asia.	British Isles.

Type-Setting Machine.

A new type-setting and manufacturing machine is attracting much attention in Washington. Parties have been experimenting a long time on a machine which is designed to make type and set type at the same time. About \$50,000 has been spent so far, and the machine has got just far enough along to suggest a reasonable hope of perfection. Public Printer Rounds expressed his belief in the ultimate success of the machine. Rounds is a practical man, a printer and type-founder, and ought to know what he is talking about. "When it is done," said he, "a girl with sense enough to run a type-writer can set up as much as ten men now can, and make her own type as she goes along, too." The new machine is operated the same as a type-writer, except that a cast is not made of each letter separately, but of each word or line. It is very complicated, and not easily described. A word or line is set—that is, a matrix of type is made in soft copper, and the full line cast at the stroke of the finger. This already works fairly well, the thing most lacking being evenness of the faces as the type line appears. It is the opinion of experts that this wonderful machine will be successfully brought into action.—*Exchange.*

Discreet steps make speedy journeys.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

VOL. XVI.---NO. 11. NEW YORK, SEPTEMBER 11, 1884. WHOLE NO. 481.

Correspondence.

NEW ENGLAND ITEMS.

[CORRESPONDENCE OF THE STATIONER.]

HOLYOKE, MASS., September 10, 1884.

Notwithstanding the manufacturers of Holyoke are very hopeful of the future, they have had a great deal to contend with of late, which would naturally tend to depress their faith in a revival of that condition of trade which makes business men feel happy. I refer to the recent order from the Treasury authorities, restricting the importation of rags and the difficulties which all Holyoke manufacturers have had to meet in their efforts to obtain sufficient water to run their mills. Owing to a leak in the dam of the Water-Power Company, of Holyoke, there was a general shutdown of the mills. This was borne good-naturedly for a time, but the trouble took so long to remedy that the mill-owners grew tired. They were losing money at the pleasure of the Water-Power Company, which, if it had studied their interests, would have kept its water-works in such condition as not to involve so much loss of valuable time in repairing what at first appeared a trifling defect.

Naturally the business men felt aggrieved over this careless regard for their interests, and the result was the calling of a manufacturers' meeting to adopt measures for the protection of the mill-owners. Timothy Merrick, of Wauregan, presided. A set of by-laws was adopted and a committee, consisting of James H. Newton, William Grover Hadley, with E. W. Chapin as its attorney, was appointed to take such action as would best promote the object of the movement. What further will be done remains to be seen, but the water-power question is an all-absorbing topic of discussion in Holyoke.

While on my pleasant sojourn here, I could not help yielding to the temptation of paying a brief visit to the various paper mills. The Valley Paper Company reports business fair. Mr. Esleeck has left town for a few days and gone North for a little relaxation.

The Albion Paper Company is showing more than the usual amount of life and thrift. The genial treasurer, E. C. Taft is one of the best posted business men as well as one of the

most agreeable gentlemen I ever met, and I am not surprised at the increasing prosperity of his company.

The Holyoke Paper Company has just erected a four-story brick building as a paper-stock storage house, and also for office use. It will be ready for occupancy about December 1. The company reports trade fair.

The Winona Paper Company is using steam largely in its mills, and finds it very practicable for paper manufacturing purposes. Great praise is due this company for the pains it has taken to beautify its grounds, which are tastefully laid out in plots of rare plants and flowers.

The Riverside Paper Company's new artesian well has reached a depth of 100 feet or more. The steam drill receives power from a fifteen horse-power steam engine, and the earth and rock are frequently removed from the shaft by means of a force-pump. The mill will cost about \$6,000.

Stepping across the river, I found the Hampshire Paper Company, South Hadley Falls, very busy for the midsummer season. Extensive repairs are being made to the mill of the Carew Manufacturing Company; but of these you have undoubtedly already heard, and hence it would be superfluous for me to go into details.

The Plympton Manufacturing Company, Hartford, Conn., gives a glowing report of trade, and judging from the scene of activity which their factory presents, it knows whereof it speaks.

While at Hartford I had the pleasure of meeting William A. Goodhue, steel engraver, who has charge of the work of engraving Blaine's book, which will be three years in printing. He is a very agreeable gentleman.

F. H. Whittlesey, of Windsor Locks, Conn., reports tissues in demand, and everything looking encouraging for fall orders. C. H. Dexter & Sons, of the same place, report business good, water plenty, and they are very busy.

C. A. Nichols, of C. A. Nichols & Co., Springfield, Mass., has just returned from an extended tour through Europe.

The Springfield Paper Company, Westfield, Mass., is producing three tons of fine writing-paper a day.

Louis H. Orr & Co., of Springfield, Mass.,

are finding that their elegant, new, as well as commodious store is not sufficient to accommodate their business, and if trade continues to increase, another enlargement will be found necessary. Their printing is fast giving them a reputation all over the country, their specialty being fine envelope printing and monogram work. Mr. Orr's late connection with the Morgan Envelope Company has thoroughly schooled him in his art.

During my flying trip through the East I had many conversations with representative business men on the subject of dating ahead, the evils of which have been so frequently and forcibly exposed by THE STATIONER. The envelope houses throughout the East are in the habit of dating bills ahead three months and ten days! Just think of it! This may be all very well for the buyer; but how the manufacturer can long survive under such a condition of things puzzles me. C. M. W.

CHICAGO JOTTINGS.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 East Madison Street,
CHICAGO, September 6, 1884. }

The doors of the Exposition Building were thrown open on Wednesday evening, September 3, for the twelfth annual Inter-State Industrial Exposition, and despite the intensely warm weather, the crowd in attendance was very large—much larger, in fact, than had been anticipated.

Several thousand people visited the Exposition during the evening, and the general verdict was one of pleasure and satisfaction at the wealth, richness and beauty of the exhibits. There were a few drawbacks, always incidental to opening nights. Some of the most beautiful exhibits had not been arranged, the paint was scarcely dry on some of the booths, and in a few places the carpenters were still at work, and yet there was more than could be satisfactorily seen in one visit. The appearance of the vast building is handsome in the extreme, and at every step of the way down the broad aisles the eye finds some new beauty to admire. The music of a piano is constantly heard above the hum and murmur of the voices, while the frequent selections by the band are greatly en-

joyed by the audience. Scarcely an article of use or ornament but finds a representative there. Rare old laces, magnificent jewelry, handsome furniture, costly silks, model furniture, Japanese curios and bric-a-brac of every description abound in unlimited profusion. Ponderous machinery occupies the north end of the hall; displays of elegant carriages, landaus and tally-ho coaches the south end. The walls of the art-rooms are liberally hung with a brilliant display of paintings, while the sculpture is equal to any similar display that the exposition has ever catalogued.

Taken all in all, the Exposition is one that may be visited with pleasure as well as profit. The pleasure-seeker will find much to interest him, while the thoughtful observer will discover new attractions ever moment he spends within the walls. The art exhibit this year is one of the finest and most complete that has ever been seen in Chicago. The collection of the Society of American Artists has been brought from New York almost complete. It numbers seventy-three canvases, the choice of more than two hundred offered to the committee.

The art gallery is, perhaps, the most attractive spot of the Exposition to a majority of the visitors, and it is indeed fortunate that its interests have been cared for with so much painstaking. Sara T. Hallowell, the efficient secretary of the Chicago Art Committee, has been indefatigable in her efforts to make that portion of the Exposition a success and a credit to the city. That she has ably succeeded is evidenced by the interest manifested in the pictures hung in the art department. Among the exhibits which add greatly to the attractive appearance of the Exposition are those of a few of the dealers in advertising cards, shape novelties, &c.

H. McAllister & Co. have a very nice display of Christmas and birthday cards and fancy goods in that line.

The Novelty Card and Advertising Company's exhibit promises to equal in point of attractiveness any booth in the building.

J. H. Bufford's Sons' exhibition is fairly under way and will prove a centre of attraction to the many visitors at the exposition. Further notice of these exhibits will be given as soon as they are in a state of completion.

Nicol & Smith are exhibiting a line of specialties, including pencil pockets, safety watch pockets, diamond bags, pouches, &c., all of which will be noticed at greater length in later issues.

A visit among a few of the stationers brings to light the fact that business is picking up. J. B. Clarke, proprietor of the Novelty Card and Advertising Company, has done a very good business this summer and his trade keeps increasing daily. For candidate pictures, especially, there is a great demand, and it is hard work to keep the supply equal to it. Mr. Clarke notes the strange fact that the sale of Butler's pictures outnumber that of all of the other candidates together, but he does not attach any political significance to the fact. A glance over the establishment of Mr. Clarke reveals a very fine stock of advertising cards, pictures and novelties. There are fourteen

employees in the store all kept busily at work attending the calls of numerous customers.

McAllister & Co. have been doing an immense business in candidates' photographs. They are keeping eight presses running on them, and are unable to supply the demand.

E. P. Donnell & Co., in bringing out new inventions and improvements, have lately introduced the "Chicago" ruling machine. The frame and cylinders are made of brass, which makes this machine always true, and it will not warp in any temperature, as a wooden machine is subject to do. They have also invented a "radiator cylinder," either to heat by gas or steam, to dry the ink instantly without affecting the paper, which enables them to build their machines much shorter and occupies one-half of the space of a wooden machine. There is also an adjustable revolving ink-box which allows the ruler to have the inks as close to the beam as desired. This firm supplied the American Bank Note Company with one of the machines last week. It reports a very good trade, having also supplied five bindery outfits last week.

One of the most useful books that ever came under my notice is Ward's Table of Comparative Weights of Standard Papers. The book is designed for printers, lithographers and stationers. The tables of comparative weights show the relation of a given paper to all others in reams of 480 sheets of such papers considered as the standard, and will be found valuable in cases where a work is to be enlarged or reduced. There are instances where paper is ordered to be made 500 sheets to the ream; the publishers have provided for such an emergency by giving a table which shows the difference in weights of 480 and 500 sheets to the ream. A table of French papers, compared with the American sizes and weights, is also given. The tables of reams are really labor-saving, and have been arranged in the simplest form. The work comprises a telegraphic code which will reduce the enormous outlay for telegrams. In brief, the work is intended for an every-day text-book in the office and paper-stock room, and should be given a place for immediate use. The volume can be obtained of the publishers, John C. Ward & Co., 389 Park avenue, Chicago. Noz.

WILMINGTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., September 9, 1884.

The hot wave of the past week, and which still lingers in our midst, demonstrates that summer weather, at least, has not left us as yet. We have endured like martyrs the daily process of boiling or roasting, until we have been astonished at our powers of endurance. But, if there are no objections, we will have a little more ice with ours.

How swiftly time flies! Only a few short months ago and we were on the threshold of summer. Another change of seasons, and we have entered the autumnal period. Let us hope that with this month there returns a time of marked business activity. The channels of trade have long been clogged, and we have

waited and hoped for its return to normal conditions.

The reception of THE STATIONER last week reminds me of your claim upon this locality. Of course, you wish to know the conditions of trade here. The outlook for the fall trade dissipates any hope of a "boom," yet there is a reasonable expectation for much improvement.

The reopening of public and private schools naturally moved some special lines, and these, in turn, have more or less affected general trade. May the ball continue to roll!

I intimated in my August letter the probability of sharp bidding among our stationers for the public school contract. The firm of C. F. Thomas & Co., for several years past, has furnished the school supplies. During the time stated it has practically had no competition, frequently being the only bidder. This year, it was conceded by the trade, that the plum would again fall to it, but a surprise was in store for the most sanguine. At a meeting of the Board of Education, August 26, the Committee on Supplies reported the new firm of Boughman & Co. as the lowest bidders. As all of the bids were at prices lower than the very low figures of last year, and Boughman & Co.'s about \$300 less than the next highest, it is doubtful if the successful firm will find the contract a profitable undertaking.

To break the monotony of a dull warm afternoon, your correspondent started out a few days ago for a chat with the trade.

At Boughman & Co.'s I found Mr. Boughman with his coat off, hard at work, in his endeavors to bring order out of chaos. Scattered about the floor were huge piles of books, slates and stationery of various kinds, while the packing and unpacking of a multiplicity of goods by the sprightly assistants indicated no dearth of business with this firm. Such unusual activity at this season was understood, when I was reminded that this firm had received the contract for furnishing the public schools with supplies, &c.

Crossing to the other side, I entered the cozy little store of Porter & Co., and was pleasantly greeted by Mr. Porter. In response to my inquiry, he thought the outlook for the fall trade indicated only a fair outcome. Of the past summer's trade, he was confident the amount was equal to preceding seasons. The difficulty in making collections has been very annoying. Selling about the usual amount of staple goods.

At E. S. R. Butler's a few more items were gleaned. The desire of our people to keep posted, in the political events especially, has somewhat increased the sale of the leading partisan and independent papers. *Puck*, *The Judge*, and "sich like" are having large sales among those whose taste impels them to seek this class of literature. Mr. Butler was feeling the improvement in other lines of trade, and was of the opinion that it would be several weeks before anything definite could be expected.

The state of trade at the James & Webb Company's was similar to those already mentioned. The month's business has opened with a little spurt in general goods. Orders for printing are coming in at an encouraging

(Continued on page 348.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of more than One Thousand Dollars made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. Catalogues sent on application.

SANFORD'S Pneumatic Mucilage

(PATENT APPLIED FOR.)

The Most Practical Stand Ever Invented.

The mucilage is confined in an air-tight reservoir kept by atmospheric pressure. At the bottom of a metal tube screwed on to the neck, and passing nearly to the bottom of the stand. The brush is always inserted in about one-half inch of fresh mucilage, just supplying enough to keep it moistened sufficiently for use. The handle and mouth are always clean.

TRADE SUPPLIED BY

SANFORD MFG. CO., CHICAGO

(Continued from page 344.)

rate; only hopeful of a fair fall trade; find collections very difficult; balance-sheets show past season sales to be but little, if any, behind former ones. The Standard Noiseless Slate, lately added to this company's stock, is having a good sale.

While here, stepping to the telephone, a ring and request for No. 72, soon placed me in communication with C. F. Thomas & Co. In answer to my inquiries I learned that their summer sales were fully up to expectation, and compared favorably with the season of '83. They did not expect a large volume of business during August. With others they had found collections bad. There is a prospect for a fair fall trade.

At both branches of Frist & Davis, the same opinions were expressed relative to the past season's trade. Business was improving considerably with them and they are expecting a good fall trade.

Few of the jobbing trade ventured into our midst since my last. The "Gothamites" were as follows: William Tierney, Jr., H. Guggenheimer; Rudolph C. Kastner (maiden trip), from the city of Brotherly Love; Calton L. Landis, of Landis & Co.; Mr. Simmons, of Jonas Langfeld. TRACY.

BOSTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, Sept. 9, 1884.

On Wednesday last (September 3) the fourth annual exhibition of the New England Manufacturers and Mechanics' Institute was formally opened. A visit on that day revealed the fact that after tardy exhibitors get their displays in readiness for inspection, a tour through the spacious building will prove very interesting and instructive. It really does seem strange that such persons as exhibit at industrial exhibitions do not realize the importance of having their displays in full working order on the day of opening. To attend an exhibition during the first week, finding half of the exhibits not even in place, gives visitors an unfavorable impression; and this impression is generally imparted to others. In consequence, the attendance for the first few weeks is very limited, which fact is not encouraging to the managers of such enterprises. Nor is it appreciated by the more enterprising exhibitors, who want to display their goods to the greatest number of visitors.

During a short stay at the exhibition, I noticed several novelties in the stationery and fancy goods line which at some future date I will probably mention.

On Wednesday of the present week (September 10) the doors of the Massachusetts Charitable Mechanics' Association will be opened, and another exhibition will present added attractions to Boston visitors.

I do not know of another city in America where two great industrial exhibitions are held at the same time. But then Boston is peculiar in some things, and her people realize the advantages of these exhibitions.

Both of these exhibitions will remain open

until November 1, and as the weather becomes cooler the daily attendance will grow larger.

The out-of-town trade, when they visit the city to look up novelties for the fall and holiday season, should not fail to visit the exhibitions. Remember there are two, and take 'em both in. Both have special attraction.

Had the weather continued cool and refreshing, as the first of the month gave promise, trade would undoubtedly have been more active. As it is, nobody wants to do anything that has the faintest resemblance to work. It's too hot to work, if work can be avoided. Never do anything on a hot to-day that you can put off until a cool to-morrow seems to be the prevailing sentiment just now.

Trade in school supplies, however, is an exception, and in such lines business has been very brisk and voluminous. Nor is the trade in school supplies yet over with, although the bulk of the business is about closed.

Competition has been very close, and though big business has been done, the profits have been exceedingly small.

In the lead-pencil line complaints from jobbers have been quite numerous, because they were forced to compete with some manufacturers.

In view of the demands of the school trade for lead-pencils, city jobbers stocked up quite extensively, buying large quantities to get the biggest discounts by paying cash for 4 per cent. off. They confidently expected to handle the school trade on this line, but in this the jobbers and dealers reckoned without the consent of the lead-pencil manufacturers, and so got left.

The trade here soon found that school committees were being drummed by a New York pencil maker, and pencils were sold to them in just such small lots as were wanted at trade prices, with the extra 4 per cent. off. The New York concern when corresponded with by city dealers in relation to the matter, charged the New Jersey manufacturers with doing the same thing. The New Jersey concern was written to also, but I have seen a written communication from that firm which emphatically denies that it has sold to school committees or other consumers. The New Jersey manufacturer speaks of the New York concern and its mode of underselling the trade in terms which will not bear reproduction here.

It is certainly a gross injustice to dealers to stock them up with pencils and then have the manufacturers undersell their jobbing trade. Manufacturers who do not protect their jobbers cannot expect to hold such trade very long.

Moulton & Goodwin report that inquiries for the Union cabinets and Perfection toilet paper are very numerous. Sales are daily increasing, and a very large fall trade for these toilet necessities is looked for. Dealers who have a class of trade that is contented with the "best" should address the house for particulars.

A very good sign of the times, and one indicating encouragement for the fall trade, is found in the fact that the toy business is experiencing considerable activity. A heavy movement in toys and other kindred novelties is reported by the Milton Bradley Company,

of Springfield, Mass. This is the oldest house of the kind in the country, and is, without doubt, the largest concern also. Its trade extends to every city and town in America. Every year these manufacturers of toys, games and instructive novelties add to their stock many new specialties which find ready sale all over the country.

For the country holiday trade several very attractive and amusing games are presented. Among them is the "Fisherman's Luck," a game played on the principle of Jack straws, but more interesting and amusing. Those of the trade who went fishing this summer will find a special interest in playing "Fisherman's Luck." "Authors Improved" is another novelty of this season, which embraces peculiar patented features found in no other game of authors. Where the methods of this game are known, "Authors Improved" take the lead on sales. "Marble Roulette" is a game which will certainly delight the little folks. A parlor game, suitable for young and old, is "Æsop," a game of pictures and fables, each of which adorn a tale and point a moral. A "Trip to Washington" is a new reading game, which narrates the wonderful sights beheld by a newly-married couple on their bridal tour. The whole thing is given away and is very amusing.

All of these games are very neatly put up, and the artistic chromo designs printed on each and every box, adds much to their selling qualities.

T. N. Holley, manager of the American Pad Company, of Holyoke, spent a few days in town last week visiting the trade. He was very cheerful and reported trade "very good."

A. L. D.

CINCINNATI "CHIN-CHIN."

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, September 9, 1884.

Trade has been greatly enlivened by the Exposition which is now under full headway. What it is doing for the stationery business or what the stationery business is doing for it will be set forth in THE STATIONER within the present month. The display is very large and very different from those of former expositions. A novelty is the exhibition made by the United States Government of models of machinery from the Patent Office at Washington. This display is very extensive and very interesting. From here it will go to New Orleans to join a much larger display of a kindred nature contributed by the government. In the fine-art department the collection of pictures are scarcely equal in merit to those of several of our former expositions. The department of decorative art, however, was never half so good.

General business seems to be reviving. The movement of wares, and of grain and produce, is more lively, and money is a trifle easier. All mercantile men are more cheerful and hopeful. News from the country is cheerful in respect to the tobacco crop. The great drought which has all but blasted the corn has matured and ripened the tobacco, which is now for the most part cut and placed under shelter to cure.

It is out of danger from frosts. Apples, too, are abundant, and the orchard trees are bending under the weight of them. The grape crop is unusually large and fine. So the situation is not wholly discouraging, although the corn crop for 500 miles along the Ohio River has been so blasted by a dreadful drought that it will not yield more than a third of a crop.

Manufacturers, as a rule, are doing fairly well; better than the merchants and other middle-men. Strikes and lockouts have existed for months in the cigar factories and in the hollow-ware foundries, but, as often happens in such cases, the strikers, after many months' experience, are finding out that they are getting the worst of the bargain. Most of the factories have employed substitutes for the strikers, many of whom would be left out in the cold now, because their places have been filled, even should the union decide to permit them to return to work.

In printing and stationery houses work is fairly brisk—in fact, it is improving, and that is the encouraging feature. It is in the factories where mercantile stationery is turned out that the ups and downs of general trade are felt most sensitively, and are indicated next after the banking house in barometer style. With the pulsations of trade, with its ebb and flow, the business of the manufacturer of mercantile stationery pulsates and ebbs and flows responsively. On the testimony of this test of trade, it is safe to report that the general tone of business in and around Cincinnati is improving. This improvement is inde-

pendent of the local influence of the exposition, and business men are hopeful that it will continue for quite a season.

PRINCE WILLIAM.

RICHMOND NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

RICHMOND, Va., September 9, 1884.

Dullness has characterized the market in this section of the "Sunny South" since communion was last held with the readers of THE STATIONER. The season of the seared and yellow leaf has opened perhaps as flatteringly as could be expected when the powerful influence of the sun's gentle rays are considered. "Old Sol" seems to be putting in some of his best licks just now.

Trade generally in the paper and stationery line has been spasmodic for some weeks and is yet so. All dealers in the wholesale and jobbing lines are filling occasional orders from town and country, but very few merchants have put in an appearance. One is picked up here and there who, perhaps, is returning from some pleasure trip and is made to go in and look at stock, but even in such isolated cases bills are rarely sold, because of the season's backwardness, produced by the antics of the weather cock.

Retailers' trade is advancing with the season, but with no marked feature in any particular class of goods handled.

Collections have not been as good for the past month as was desirable (indeed, it would

be impossible with some for that climax ever to be reached), still they have been much smaller than for many a preceding presidential year. As a student of political economy whose draught of knowledge has not been taken from dingy and musty old periodicals commonly called books, but whose inspiration has been obtained by skimming cream from the surface of events as they have passed in daily panoramic review, your correspondent is inclined to the belief that no matter how the impending contest in the race to the White House ends, Virginia's trade will be less affected by that result than by any since the close of the war. Experience is sometimes an expensive teacher, but when it is once gained what one knows is known as well as anyone knows it. I hope that trade will justify my appearance in your columns oftener in future.

SENTINEL.

Benjamin Rhodes estimates the average power of Niagara Falls as seven million horse-power, on the total fall, including the rapids above, of 230 feet. He places the cost of a plant necessary to utilize this power, transform it into electricity and transmit it anywhere within a radius of five hundred miles, at \$5,000,000,000. The economy of the power is shown by the calculation that its use instead of steam would effect a saving of \$40 per annum in the cost of running each electric light used in the city of Buffalo.

Give what you have. To some one it may be better than you dare to think.

GUMMED LETTERS AND FIGURES.

Ready gummed letters and figures, such as are shown in the illustrations, are intended to be used for making up show-cards, window signs, bulletin boards, display cards, &c. These letters are bright red in color, with black shading, and can be readily and firmly

affixed to any smooth surface; they come in fonts of over 250 letters, put up in neat boxes, and in two sizes. The figures are also pre-

pared in two sizes, put up in assorted boxes containing ten of each figure and ten of each dollar, cent, and decimal mark, making 130 in all; with these, any dealer in goods can make up his own price cards, window tickets, &c., without going to expense of having them painted. These goods are produced by the Tablet and Ticket Company, Chicago, Ill.

NEW PATENTS.

No. 302,226. Process of Engraving.—Philip Barnard, Chicago, Ill.

An engraver's block consisting of plaster-of-paris or like friable material capable of being scratched by a sharp stylus, the body of the block being colored in correspondence to the color or tint of the material upon which the final imprint is made, while the sketch-surface has a pigment coating in color corresponding to that of the ink with which the imprint is made, and in sharp and striking contrast to the color of the surface of the friable block.

No. 302,228. Paper-Folding Machine.—Austin Bascom, Bellefontaine, Ohio, assignor of one-half to J. Q. A. Campbell and Charles D. Campbell, both of same place.

No. 302,230. Toy.—Jackson O. Belknap, Mobile, Ala.

In a toy, the combination, with a plurality of figures, of another or intermediate figure,

the former constructed to be advanced toward the latter; and the latter constructed to be actuated simultaneously with such advancing movement of the former.

No. 302,244. Chromatic-Printing Machine.—William H. Forbes, Boston, Mass.

In a chromographic press, the combination of the following elements: a form-cylinder provided with a lithographic or equivalent printing-surface, and also with one or more relief-surfaces, mechanisms, substantially as described, adjacent to the cylinder for damping and inking the lithographic surface and inking the relief-surface, and an impression-cylinder of relatively small size.

No. 302,247. Ellipsograph.—John Harwood, Oshkosh Wis.

No. 302,250. Paper-Hanger's Holder.—Theodore P. Heinemann, Connersville, Ind.

In a paper-hanger's paper-holder, a bar adapted to support a fan of paper doubled over it, and the two clamping bars arranged parallel to and one upon either side of the supporting-bar.

No. 302,257. Pen.—Ephraim S. Johnson, Jersey City, N. J.

A pen provided with holes in the nib, arranged in lines or groups adapted to modify the elasticity of the nib.

No. 302,304. Book-Holder.—James A. Wintermute, Muscatine, Ia.

No. 302,311. Web-Turning Apparatus for Printing-Machines.—Edwyn Anthony, Jersey City, N. J., assignor to R. Hoe & Co., New York, N. Y.

The combination of a cone-like turner, around which the web is lapped, and a cylinder or bar over which the web is led, whereby the sides of a traveling web, or of sheets in tapes, are reversed.

No. 302,312. Printing Machine.—Edwyn Anthony, Jersey City, N. J., assignor to R. Hoe & Co., New York, N. Y.

In a printing-press, the combination of a form-bearing cylinder with an impression-cylinder, and mechanism for causing the impression-cylinder to oscillate to and from the form-cylinder in such manner as to come into printing contact with certain of the forms and be kept out of printing contact with the remaining form.

No. 302,324. Device for Holding Inkstands.—Abner Cutler, Buffalo, N. Y., assignor to A. Cutler & Son, same place.

A device consisting, substantially, of a frame for holding one or more inkstands, such frame being adapted to revolve upon a vertical axis, and having a protecting pad or cover rigidly secured to the axis upon which the inkstand-holder revolves, such pad or cover having an open space, into which each inkstand can be swung for use or removed from the holder without disturbing the pad or cover, the whole adapted to a desk or table.

No. 302,366. Pencil-Sharpener.—Frank R. Waters, Bloomington, Ill.

A pencil-sharpener consisting of two cone-shaped tubes formed from a single sheet of metal, and having the base and point of each tube at alternate ends, one of the tubes being provided with an adjustable blade and the other having its edge sharpened to form a cutting edge.

No. 302,367. Pop-Gun.—Elijah J. B. Whitaker, New York, N. Y.

A double-acting self-charging pop-gun con-

sisting of an open-ended tube, a plunger working in the tube, a rod actuating the plunger and extending out from one end of the tube, a plug or stopper moving upon the rod and adapted to close the end of the tube and to be driven to its seat by an offset or shoulder on the rod, and a second plug or stopper adapted to close the opposite end of the tube, and which is coupled to the plunger by a cord or rod permitting a limited independent movement of the two.

No. 302,390. School-Slate and Blackboard.—Theodor Finger, Coblenz, Germany, assignor to Samuel Bernheim, New York, N. Y.

A school-slate, blackboard, or writing-tablet consisting of a foundation-plate or backing-board, and a plate or surface of natural slate cemented at all points of its back surface to the backing-plate.

No. 302,394. Bag and Twine Holder.—Edward I. Gillingham, Salt Lick, Pa.

No. 302,458. Sheet-Delivery Apparatus for Printing Presses.—Henry Thomas L. Wilkinson, Brooklyn, N. Y., assignor to Calvert B. Cottrell, Westerly, R. I. Patented in England August 18, 1881, No. 3,600.

The combination, with the impression cylinder and receiving board of a printing press, of a swinging delivery gripper carrier which is carried by a shaft arranged in fixed bearings near the board, and which is also pivoted to bars or rods which are themselves pivoted at fixed points near the shaft.

No. 302,470. Fountain Pen.—Charles H. Court, Jersey City, N. J., assignor of one-half to Walter Winthrop Winton, New York, N. Y.

A fountain pen constructed with a flexible nib immersed in and projecting from the ink orifice, and formed with a prolonged slit extending up into the ink orifice.

No. 302,495. Tag Fastener.—Wm. F. Jenkins, Charleston, Ill.

As an improvement in tag-fasteners, a body formed of round wire terminating at one end in a coil, the end of which is left open to permit the insertion of the tag, a sharp point at the other end of the body, and an extension projecting inwardly at an acute angle to the body, the inner end of the extension being provided with a sharp point.

No. 302,523. Mechanical Toy.—Duane L. Rice, Cambridge, assignor to the Webber Doll Company, Boston, Mass.

DESIGNS.

No. 15,155. Toy Savings Bank.—Charles G. Shepard and Peter Adams, Jr., Buffalo, N. Y., said Adams assignor to Walter J. Shepard, same place. Term patent, 7 years.

TRADE-MARKS.

No. 11,317. Lithographing Ink.—American Lithographing Ink Company, Milwaukee, Wis.

"An eagle, represented either pictorially or by the word 'Eagle.'"

The San Diego (Cal.) *Sun* is responsible for the following: "A man named Montgomery has made application for a patent for a new process for devulcanizing india-rubber. By this wonderful discovery old rubber can be worked over several times—a process which has puzzled the wisest heads in the world for centuries. The discovery, like all great inventions, was purely accidental. A short time ago he desired to make a gas-bag for a Drummond light, and took some old rubber and attempted to devulcanize it. The experiment proved successful."

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

E. E. Gillon, stationer, &c., Vallejo, Cal., has sold out.

S. H. Whitthorne, publisher, Benton, Ark., is advertising to sell out.

W. H. Dempsey, stationer, Washington, D. C., has sold out his business.

E. Williams & Co., publishers of the *Enterprise*, Attleboro, Mass., have been attached.

Wallen & Dunn, publishers of the *Cosmos*, Council Grove, Kan., have dissolved partnership.

G. E. Turner, stationer, Denver, Col., has closed out his stock with the intention of discontinuing business.

Truex & Clark, publishers, Junction City, Kan., have dissolved partnership. Clark & Southwick succeed to the business.

A dissolution has taken place in the firm of Venable & Sprowl, publishers of the *Democrat*, Kingman, Kan., S. R. Sprowl succeeding to the business.

R. J. Pierson, of the firm of Pierson & Gardner, printers, Denver, Col., has sold his interest to F. F. Pierson. The style of the firm is unchanged.

The Kerner Stylographic Pen Company has added recent improvements to its pen, which it now claims is the most perfect pen of this character in the market.

The warehouses of Joseph Benedict & Co., paper-stock dealers, Market street, Pittsburg, Pa., were completely gutted by fire on Tuesday night. The fire originated from a lot of old rags which were ignited by spontaneous combustion. The loss on the building and stock is \$40,000; partly insured.

The National Publishing Company, Philadelphia, publisher of bibles and photograph albums, offers the trade what is claimed to be one of the largest and finest assortment of both classes of goods to be found anywhere. It makes a specialty of durability, strength and beauty of binding. The company's representative, William B. Wilson, is still on the road, and is being well received.

In the United States Circuit Court for the Northern District of Illinois a bill was filed, July 30, by Thomas Kane and Harry C. Goodrich against Louis Reinach & Co. for infringement of the Goodrich reissued letters patent for an improvement in slate-frames. It seems that the infringement complained of consists in selling slates provided with a cord wrapped around the edges of the frame to render them noiseless, which Goodrich claims in his patent.

The Milton Bradley Company, Springfield, Mass., has a new game called marble roulette. The marbles are rolled down the zigzag inclined planes, striking a compound incline at the bottom, from which they may be projected on to the table, with numbered holes, by a slight motion of the hand holding the upright hinged leaf of the board. The game is one of combined skill and chance, and is finished in the most handsome style.

The Globe Files Company, C. M. Ward, agent, 28 Bond street, has got out a new file designed for "memoranda." It is known by that name. The interior divisions of the file are numbered, the reference index on the flap of the case corresponding with the numbered divisions. The file has the expanding feature which is seen in other files in this company's make and the case is of the usual neat form.

Ingham, Mills & Co.'s paper mill at Chillicothe, Ohio, caught fire on September 6, and one of the buildings, with its machinery, was destroyed. The loss is estimated at about \$5,000, which is covered by insurance.

The Union Catholic Publishing Company, of Chicago, has made an assignment to Otto Phillippi. The concern changed hands a few weeks ago, having run down greatly.

The next number of the *North American Review* is to contain an elaborate defense of the tariff system, prepared by leading advocates of protection.

Samuel Reese, printer, Omaha, Neb., has been succeeded by the Reese Printing Company.

C. M. Bright, publisher of the *Times*, Oshkosh, Wis., has sold out to E. W. Viall & Co.

C. H. Noyes, bookseller and stationer, Pembroke, N. H., has sold out to R. A. Jones.

F. Meinhoff, fringe manufacturer, Portland, Ore., has been burned out. Loss, \$2,000.

J. H. Dungan, proprietor of the *Genoa Courier*, Genoa, Nev., has sold out.

Rice & Putnam, printers, Granite Falls, Minn., have been burned out.

H. Ahlrichs, bookseller, Cleveland, Ohio, has failed.

Samuel R. Moore, bookbinder, Philadelphia, Pa., has sold out at auction.

W. S. Lingle, publisher of the *Lafayette Courier*, Lafayette, Ind., is dead.

T. J. Williams, publisher of the *Herald*, Lebanon, Ill., has sold out to Montague & Hogan.

John A. Wood, bookseller and stationer, McKeesport, Pa., is advertised to be sold out by the sheriff.

The Southwest Publishing Company, Cincinnati, Ohio, has been incorporated with an authorized capital of \$10,000.

The New Britain *Herald*, New Britain, Conn., formerly published by C. E. Woodruff, is now published by Woodruff & Brandegans.

J. A. Wayland & Co., publishers of the *Opinion*, South Pueblo, Col., have dissolved partnership; J. A. Wayland continues the publication of the paper.

Dick & Stecher, proprietors of the New York Popular Publishing Company, New York city, have dissolved partnership. A. J. Dick continues the business under the same style.

John Petrie, Jr., reports that his sales of A. B. French's imported inks have been so large during the past season that he has been compelled to use the cable to hurry up the manufacturers in filling his orders.

Charles H. Van Benthuyzen, of the firm of C. Van Benthuyzen & Co., Albany, N. Y., sailed for Europe on Saturday, August 30, by the steamer Alaska. Mr. Van Benthuyzen will spend a sojourn of several weeks in France remote from the cholera region. He goes partly for pleasure and partly for health.

Henry Levy & Son are offering the trade an additional line of novelties in connection with their usual comprehensive and finely selected stock of fancy holiday goods. The novelties alluded to consist of fancy armorial work baskets for the parlor. These baskets are constructed from Hungarian armor, the legs consisting of three swords, which form at the top a receptacle in which the basket, which is made of crimson satin, rests. The lid of the basket is formed of a shield made of polished steel, with interstices filled with plush in the Hungarian colors. The whole is surmounted by a helmet, making it very interesting and picturesque. The firm has a full line of antique armorial goods in the form of

clocks, plaques, baskets, &c.; it has also a line of Bru Jumeau French dolls.

The *New Era*, published at Lake Valley, N. M., is about to sell out.

J. T. Story, publisher of the *Monitor*, Malvern, Ark., has sold out to Oliver Story.

Phelps & Co. have succeeded to the business of Phelps & Plow, lithographers, Chicago, Ill.

F. H. Buffum & Co., publishers of the *Gazette*, Brockton, Mass., have sold out to Bridge-man & Gay.

The Lebanon Publishing Company, printer, &c., Lebanon, Tenn., has sold out to S. S. and G. D. Gause.

The Hamilton Patent Straw Lumber Company, Lawrence, Kan., has been damaged by fire \$300. Insured.

The John Morris Stationery Company, Chicago, Ill., has been incorporated with a capital stock of \$300,000.

Robert H. Howell & Co., stationers, Nashville, Tenn., have been succeeded by the Branden Printing Company.

The liabilities of George L. McQuown, dealer in wall-paper, Denver, Col., are \$15,500; assets about \$4,000.

Lawrence Brothers, dealers in baby carriages, St. Louis, Mo., have been succeeded by the Lawrence Manufacturing Company.

A receiver has been appointed for Hamilton Brothers & Co., wholesale paper dealers, Milwaukee, Wis. They claim ample assets, but must secure time.

D. P. Bloomer, traveling salesman for Weidmann & Co., who was found in his bed, at the Nicollet House, Minneapolis, Minn., it was supposed, fatally injured, is improving slowly. The mystery concerning the attack made upon him is not yet solved. Mrs. Bloomer, his wife, who is with him, accepts the theory that robbery was intended, and says that she has \$15,000 to spend in detecting the assailant. The following despatch was received by Cushman & Plummer, of Minneapolis: "We regret to see by the New York papers that Mr. D. P. Bloomer, who was formerly with us, has been assaulted in your city. He is worthy of any favors you can show him.—SELCHOW & RIGHTER." An application will be made to the Probate Judge for an order to examine Bloomer and determine as to his mental condition, that the worth of certain statements made by him may be established. It is proposed to take Bloomer to New York on Friday, the 12th inst., if he is in good condition.

J. W. Newburgh & Co., wall-paper dealers at Dubuque, Ia., have made an assignment to J. C. Longueville. They had the best trade in their line in the city, having been established since 1875. Just before the assignment they gave a bill of sale for \$3,500.

The American Chemical Fibre Association will hold a special meeting at Young's Hotel, Boston, on September 17.

Schaefer & Koradi, publishers, Philadelphia, have issued a new price-list of their publications, with discounts.

Frank H. Jobes has succeeded John S. Royer as editor and publisher of the *Ansonia Mirror*, Ansonia, Ohio.

C. W. Yates, Wilmington, N. C., and Horace Drew, Jacksonville, Fla., are in town stocking up for fall and combining pleasure with business.

The New York News Company has got out a new map of the city of New York which can be retailed at a low price. It shows the location of the different railway and transportation lines and is a convenient reference map for persons visiting the city.

The Globe Files Company has recently issued a new catalogue of cabinet files. It is very neatly gotten up, and contains descriptions and engravings of its various forms of cabinet files, also prices, suggestions how to order, &c. While of use to the trade, it is intended more especially for those intending to purchase a file for their own use. Business and professional men of all kinds will therefore find the catalogue of special interest. It can be had on application to the company or its New York agent, C. M. Ward, 28 Bond street.

James D. Whitmore & Co. are offering a novelty in fancy writing tablets. It is called the "Monogram" tablet, and has a gilt, beveled edge cover and a blotter attachment, with black lines. The tablet is got up in a very elegant style, and forms a very useful combination. The firm is also offering the trade a combination box and tablet of society writing papers, the box being so constructed that one side falls down and forms a sort of rest for

the hand while writing, the tablet being attached to the upper side of the rest.

A judgment of \$2,184 has been obtained against Andrew E. Smythe, publisher of the *Saturday Evening Post*, Philadelphia, Pa., and execution has been issued.

Hill & Murray, wood-pulp manufacturers, Niagara Falls, N. Y., have dissolved partnership. Rowland F. Hill succeeds, and will settle all accounts of the late firm.

On April 22d last John Cook, of the First National Bank of Chicago, was appointed receiver of the Erwin & Lane Paper Company. The action taken at that time was deemed prudential for the protection of all of the creditors. It was then supposed that under the management of the receiver and having the confidence of all of the parties in interest that the concern would be able to pay in full, but this expectation has not been realized, and at the suggestion of the Chicago creditors two propositions have been submitted to the creditors, the Western parties agreeing to abide by either most acceptable to those in the East. With the view of taking some action in the matter, F. B. Erwin met the Eastern creditors at H. C. Hulbert & Co.'s offices Tuesday afternoon and submitted the propositions. One was for the creditors to take the stock of the company at par for the full amount of their respective claims, the stockholders of the company to have the privilege of redeeming this stock at any time within five years. Another proposition was to compromise their claims at 66 $\frac{2}{3}$ cents on the dollar, payable one-half in cash and the remainder in six and twelve months. This latter proposition was accepted by very nearly all of the creditors, who signed an agreement to this effect. The total liabilities of the concern, including about \$35,000 of mortgage debts which must be paid in full, is about \$80,000.

Edward Butler, Jr., late of Butler & Miles, paper dealers, 23 Beekman street, has started in the paper business at 71 Fourth avenue, opposite Stewart's store. It is understood that Mr. Butler has received the assistance of his brother, Frederick Butler, of Butler & Johnson, and that the business he has just started is for and on account of Frederick Butler, and that he will carry a full line of wrapping

papers suited to the wants of the retail trade, among whom he is said to have an extended acquaintance. The Chinese laundrymen of the East side will, no doubt, find it a convenient stopping-place on their way down town, and it is rumored that he is to have a Chinese salesman, and that his price-marks are to be in Chinese characters.

As there seems to be some misapprehension of the facts in regard to the return of some paper by the Post-Office Department to Woolworth & Graham, these gentlemen state that, "by request of the Post-Office Department to meet an emergency, they sent on some samples of paper which they had in stock and stated that the samples were not equal to their usual deliveries, and that the department could keep such quantity as it needed and to return the remainder to them. The Post-Office Department retained a considerable portion and returned the remainder, according to the distinct understanding before the shipment was made."

Phil. Hake has ready for the inspection of the trade a new line of holiday boxes in some exceedingly pretty and novel styles. A box having the form of an iron safe is finished on the sides and top with "Lincrusta Walton" set in a bordering of crimson plush. It contains two drawers for cards and envelopes and a compartment for note sheets. Another style has a beveled-edged plate-glass top and is finished with "Lincrusta Walton," while another box is covered with calf-skin, tanned with the hair on. It is novel and pretty. Mr. Hake has a line of fancy plush boxes, which he is prepared to offer at remarkably low prices.

The Silicate Book Slate Company has, in addition to its regular factory facilities, opened a factory at 52 Vesey street for the manufacture of its line of goods. It reports a brisk demand for silicate book slates, which are being used in most of the schools in the large cities.

Elliott & Co. have bought out the firm of J. G. Ditman & Co., paper dealers, &c., Philadelphia, and will remove to the old stand of Ditman & Co. some time this month.

Joseph Koehler, 120 Chatham street, New York, has got a base-ball cartoon on a large sheet. It represents the different presidential candidates and politicians of different parties

on the "diamond field" of politics. A liberal discount is offered to jobbers.

Much surprise and not a little alarm has been caused among the friends of Francis F. Taylor, of this city, by the sudden disappearance of that gentleman from his accustomed haunts. Mr. Taylor was a well-known stationer at No. 51 Exchange place, to which place he removed about four months ago from No. 30 Broad street. For twenty years he has been engaged in the stationery business in that neighborhood. Mr. Taylor had for some time been much depressed. The condition of business in general had been regarded by him in a very gloomy manner. His temperament, moreover, was not sanguine. He was accustomed to exaggerate matters of trifling import, until they assumed undue magnitude. His business at the present time is in no less satisfactory a condition than could be expected at a time of general depression. Mr. Taylor owed money, but no amounts which he could not have paid off in time. He had always led a very quiet life, and was extremely temperate in his habits. He was accustomed during the summer to go each evening to Coney Island by the iron steamboats for the sake of the sail, not landing at the island, but returning by the same boat and retiring for the night. He did not make the trip on Friday evening, however, it has been ascertained. Mr. Taylor had about \$50 on his person at the time of his departure.

It has for a long time been known that the color of growing flowers can be altered by simply mixing a little dyestuff with the mold in the flower-pot. No one, however, has hitherto thought of changing the color of

flowers when cut. A distinguished botanist has found that by simply soaking the stems of cut-flowers in a weak dye solution their color can be altered at will without the perfume or richness being destroyed. Singular to say, flowers refuse to absorb certain colors, while they dispose of others in different manners. If placed in a mixed solution they make a complete analysis, and some lilies which had been treated with purple showed distinct red and blue veins, the colors having been divided in the process of absorption.

The first half of our lives we pass in desiring the second, and the second in regretting the first.

The following cut represents one of the three styles of

The most practical device ever invented for computing interest and time. It gives the results accurately and instantly between any two dates, at seven different rates. The device commends itself wherever shown, and no bookkeeper, professional or business man can afford to be without it. Below we give the opinion of two gentlemen, of whose authority on the subject there can be no question:

DEAR SIR: I have examined your "Interest Indicator," and am happy to say that it strikes me as a very useful, as well as ingenious invention, and perfectly adapted to its purpose. IT CANNOT ERR and is too simple in its construction ever to get out of order. Yours truly, ELIZUR WRIGHT,

Consulting Actuary,
New England Life Ins. Building, Boston.

GENTLEMEN: This certifies that I have carefully examined "Jenne's Interest Indicator," and find it perfectly adapted to the work it is designed to perform. It is very simple in construction and consequently not liable to get out of order, and must, necessarily give accurate results. Truly yours,
THOMAS TENNENT,

Mfr. Mathematical Instruments,
18 Market st., San Francisco, Cal.

Prices of this Device are \$1, \$2 and \$10.
Sold by all first-class Stationers. Send for circulars.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies. 10 Cents.

NEW YORK, THURSDAY, SEPTEMBER 11, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum. 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

READERS of THE STATIONER will please note a change in our Philadelphia office. Mr. Vienneot, so long identified with the Lockwood Press, has retired, carrying with him our kindest wishes, and has been succeeded by W. M. Patton, whom we commend to our friends in Philadelphia and its vicinage, whose interests, we can promise, will not be overlooked or neglected. The new address is at 504 Walnut street.

THE abnormal condition of the weather has its effect—not depressing, but rather postponing—on trade. Within a few years past it has been noticeable that our pristine spring temperature has been protracted late into the summer months, and that with the beginning of fall we have had experiences of great heat such as were formerly associated with July and early August. The “dog days” seem to have delayed their coming, and trade has been waiting for their departure. The effect is likely to be shown in a brief but very active fall campaign, with scarcely a respite before the holiday trade begins. During the summer the wealth of the country has been piling up in the form of bountiful crops of good quality. There is no impoverishment on the agricultural account of our national ledger and the distribution thence in all channels of industry, and trade ought to be commensurately great. If business men manage their affairs with judgment, and if prudence shall still maintain her position, there will be no reason why every pursuit, industrial or mercantile, should not keep the vantage-ground of safety while enjoying the revivifying influences of necessarily increasing trade.

THERE are two kinds of savings-banks in Great Britain. The oldest of these are conducted as private banks, but their trustees are obliged to turn over deposits to government officers who invest them in public securities. The latest system for savings adopted in the United Kingdom is that of postal banks, the Government receiving deposits at nearly eight thousand of its post-offices and guaranteeing a fixed interest of 2½ per cent. These postal banks, although established only a few years, have received deposits aggregating over two hundred millions of dollars, of which fifteen millions were added during last year. Now, what are the advantages of this government system of banking? In the first place, there is a guaranty of protection to the depositor in which the faith of the government and the national integrity is pledged. No defalcation can, therefore, imperil the savings of the depositor; the nation itself must become bankrupt before these obligations can be repudiated.

In the second place, there is assurance of the maintenance of domestic peace, for the interests of a large portion of the people, including those in every grade of life, are united in opposition to anarchical influences, communism and all other ideas tending to national weakness. The purpose of such banks would seem to be—as their effect certainly is—one of solidification and unity. We cannot imagine that there is anything which is demoralizing in them. It is true that there are opponents of such a system who argue against the “horde of office-holders” who fatten on the public; but no one can dispute—with the assurance that he will be believed—the fact that the people will be content to pay a still larger army of officials if they know that the public faith is pledged to the protection of hard-earned savings upon which the interest is guaranteed and immutable. Deposits of this kind can be withdrawn should the depositor desire to make other investments or speculate with the means at his control. There is another feature of these postal savings-banks to which we only incidentally refer without discussing its advantage, and that is the authority given to them to sell life insurance. Inasmuch as the subject of postal savings-banks is likely to become one which the people of this country will be called upon to consider in all of its relations to public and private welfare, we ask our readers to give it thought and discussion. We are in favor of adopting this system, believing it to be useful for national unification, public peace and private safety and convenience. Opposition will come from savings-banks, which are run not for the accommodation of the public but for the profit of their managers. Such opposition must be fought. The public good requires its extinction.

Roundabouts.

BY THE TRADE LOUNGER.

The chief subject of discussion in the trade is the extreme warmth of the weather, and the heat prevents even much talk about this. There would be better trade if the days were cooler, but nobody wants to work hard now. There are indications of activity if—

“What do I think about the outlook for business?” repeated an old tradesman a few days ago. “I think that we have got things down to a hard-pan basis. There are not so many people who are doing business with other people’s money and there is less speculating going on. Tradesmen are more conservative and the trade has undergone a weeding out that has resulted in a ‘survival of the fittest.’ With such a condition of things we have good reason to live in hope.”

An exchange, speaking of the great number of patents granted for stationery articles each week, estimates that about one hundred are granted for type-writers and fountain-pens alone, and very truthfully adds: "No man is allowed to have a good thing in this country more than a few days at a time. His idea will be taken up and twisted into all sorts of shapes, and, before he has fairly begun to receive any benefit of his labor and time, someone else has obtained a patent on the same thing."

There is evidently going to be a good demand for ten-pins during the holidays. A New Hampshire firm is at work on one order for 100,000. The same firm has also received an order for 15,000 croquet balls for next season.

Several writers have recently expressed themselves in favor of a new pronoun. One writer suggests the coining of a word composed of parts of "his" and "her," *e. g.*, "hiser" or "hyser." Thus in the sentence, Every man and woman is the architect of his or her own fortune, instead of the words "his or her own fortune," he would say "hiser own fortune."

Another individual suggests the word "twn," and gives the following examples for its use: "If any man or woman breaks this rule, twn shall be fined \$5." "Will the lady or gentleman who owns this pug dog please claim twens property?" "If Mr. or Mrs. Smith calls, I will see twem."

I think that such suggestions are far-fetched. The English language is doing very well as it is now. All such attempts as the foregoing may be relegated to the ecstatic, hypophetic crowd who want to cut all sorts of "high jinks" with our language, and who preach "fonetic" spelling. Let be! We can get along as we are.

Penman's paralysis is said to have found a remedy. It is in the form of a new magnetic pen, the holder of which "by the warmth of the hand evolves a thermo-electric current, which operates upon the blood, nerves and muscles of the hand and muscular system of the fore-arm, and in an almost marvelous manner alleviates and is a preventive of the disease mentioned." Therefore clerks, book-keepers and business men, editors and others, will rejoice to learn that they need no longer fear one of life's most perplexing ills.

I have handled a pen considerably in my lifetime, and have never yet had this peculiar kind of palsy. I imagine that the disease, if such it be, must result from a want of vitality.

The Boston *Transcript* is responsible for the following: "Says an exchange, 'The Boston girl is considered accomplished when she can sneeze without dropping off her eye-glasses.' And that's all these outside barbarians know of the Boston girl. We would

have them to understand that the Boston girl never sneezes. She simply indulges in sternutation." That'll do.

Answers to Correspondents.

E. N. W. R. wants to know who makes blue and red composition for pads.

Ans.—Acme Composition Company, 242 Pearl street, New York, and Brown's Patent Flexible Paper Pad Composition Company, 46 Beekman street, New York.

F. & Co. want address of *Publishers' Weekly*.

Ans.—No. 31 Park row, New York.

O. & H. ask: Who makes papeteries with printed initial and a number—say, T 1742—on bottom of the box?

Ans.—Taylor, Nichols & Co., Springfield, Mass.

S. G. P. wants addresses of manufacturers of needles.

Ans.—Brooklyn Needle Works, 21 Furman street, Brooklyn, N. Y.; American Needle Company, New York; Globe Needle Company, Boston; Robert Crowley, 23 Thomas street, New York; William Mills & Son, 7 Warren street, New York; Robert J. Roberts, 65 West Broadway, New York.

Baskets of Paper.

Almost any shaped baskets and work-cases can be made of plaited paper. White, brown or newspaper may be utilized for this purpose. To make a white basket, cut into narrow strips, three-quarters of an inch wide, thin cartridge paper; double each strip lengthwise into two and plait it. When you have plaited a sufficient quantity, stitch the pieces together into the shape you wish the basket to be, using a small basin, jar, or even another basket to assist in shaping the work. When the basket is stitched into shape, and the handles put on, give it two coats of hot gelatine and water, and when thoroughly dry, varnish. Baskets of newspaper or brown paper must be painted with oil color and afterward varnished.—*American Queen*.

Market Review.

OFFICE OF THE AMERICAN STATIONER, 1
WEDNESDAY, September 10, 1884. }

THE MONEY MARKET.—The financial situation has again been characterized by an easy money market, which means low rates of interest and loanable funds in abundant supply. No new features have been developed since the close of last week, call loans having ruled at 1@2 per cent., and money on time at 4½@5½ per cent., while commercial paper has likewise undergone no change, the best endorsements having been negotiable at 5@5½ per cent. discount. The stock market has presented but few points of interest. The business transacted has been light, prices have fluctuated within narrow limits, and altogether a feeling of apathy and indifference has characterized the dealings. Railroad bonds have ruled quiet and about steady. Governments are a trifle higher. The market for foreign exchange has undergone but little variation since our last issue.

THE PAPER MARKET.—The first month of autumn has opened with better prospects for business than existed a month ago. Although more or less orders have been taken by almost every dealer for paper to be made up for delivery in the fall, yet a good many have delayed doing this until the present, and this has imparted quite an impetus to business; this, together with the fact that there is an enforced shut-down of the Holyoke mills to half-time, and the further fact that there are a great many mills making coarse papers shut down under agreement, tends to equalize the supply coming on the market with the demands for consumption. Stocks of paper are nowhere large and prices are held with a considerable degree of firmness, even straw boards and straw wrappings showing fewer signs of weakness than they did only a short time ago. All of the tendencies are in favor of a better condition of things, both for the manufacturer and the dealer, for the remainder of the year, than they have thus far experienced.

THE STATIONERY MARKET.—Although the extremely warm weather has had a depressing effect on trade of all lines, dealers report much better business than for the same period last year. If the month holds out as it has opened up, there will undoubtedly be a large amount of business done. One of the causes which have a tendency to stimulate trade at this time is a reduction in the price of all manufactured goods from last year's figures. This is owing to the fact that manufacturers are buying the material that they use in the production of their goods more closely and paying cash for the same. They are also economizing in the running of their factories, and are thus able to produce goods cheaper. There is a growing activity in the trade in school stationery just now. There is a good demand, particularly for silent slates and other forms of school stationery which are adapted to the wants of the times. The toy trade does not show any indications of activity. "It is more quiet than it ought to be at this time," remarked a dealer, "but just now our salesmen are going out on their trips, and hence we have no means of judging how trade will be as yet, although we expect to do our usual volume of business." There is no movement in holiday novelties to speak of, but there seems to be a hopeful feeling among dealers that the season will end well.

Artificial Slate.

A composition for the production of artificial slate consists of the following ingredients, combined in the proportions about as stated, viz.: powdered animal-bone, about fifteen parts; white lead, about one part, and linseed-oil. These ingredients are prepared, mixed, and applied in the following manner: Animal-bones, preferably bones from sheep, are burned in an open chamber or vessel to allow the free admission of air, and to obtain the same as white as possible. The thus burned bones are then ground very fine, and sieved. Of this finely-powdered burned bones, fifteen (15) parts are mixed with about one (1) part of white lead, with the addition of sufficient linseed-oil to produce a mass capable of being used as a paint and applied with a brush. The material—such as paper, pasteboard, linen, or any other suitable material to form the body of the artificial slate—is then painted on one or both sides with this composition several times until the desired thickness is obtained on the material, allowing each coating to dry before the next coat of paint is applied. After the desired thickness of paint or composition has thus been applied to the material, the same is allowed to dry thoroughly for several days in a dry, warm room, without the application of artificial heat, and is then polished by means of pumice-stone dipped in linseed-oil to a smoothness capable of being written upon by a lead pencil, and can thus be used similar to a slate, the pencil marks being at any time easily removed by the application of a little moisture. By using more or less white lead, the color of this artificial slate may be varied, and, if desired, any desired coloring matter may be added. This composition is patented.

Apparatus for Multiplying Copies.

This invention relates to apparatus for multiplying copies from a single writing with a well-known kind of ink; and it has for its object to provide means whereby the copies or transfers can be effected with ease and rapidity, while the appearance of the copies will be uniform both in quality and color. Two revolving rollers are used, one provided with a gelatinous covering and the other with a covering of rubber, wood, paper, or other substance that will present a smooth surface, the prepared form in writing being passed between the rollers, so as to leave the negative on the gelatinous roller, and then passing either single sheets or a long continuous sheet of paper between the rollers, a copy of the negative being transferred to the sheets at each complete revolution of the gelatinous roller. This apparatus avoids rumpling or tearing the paper, while the copies will be uniform both in color and in arrangement on the sheets. It can be operated to produce copies in one-twentieth the time as heretofore, and the gelatinous roller can be taken off from the machine when it is required to replenish the covering of the roller, or after each time the apparatus is used, in order to wash the roller.

SHOE DRESSINGS AND INKS.

Among our specialties is the **TRIUMPH MUCILAGE**,

WHICH is far SUPERIOR to any in the market, as it adheres quickly, lays smoother, dries sooner, and sticks with GREATER TENACITY. It has no odor, no waste, never molds or sours in hot weather, so it is *always ready* to use, and is the only Mucilage that sticks with such tenacity that it can also be used for repairing ornaments and all household articles. Dealers can rely on its NEVER spoiling on their hands. We can't compete in price with the cheap trash, but can beat them all in quality.

RETAIL PRICE.

Bell Cones, Glass, Tin Caps, and Brushes (1 doz. in box), per gross, \$7.50; also, our Improved Liquid Glue, the best and strongest adhesive known. Retail price: 2-oz. bottles, tin caps and brushes (one dozen in box), per gross, \$12.

LIBERAL DISCOUNT TO THE TRADE.

Parties interested please send for circular with many strong testimonials of this Mucilage and Liquid Glue. For sale by all first-class Stationers.

Our Patent Laws as Related to Agriculture, Arts and Industries.

By JAMES A. WHITNEY, LL.D., COUNSELOR-AT-LAW.

But a greater than the steel plow was McCormick's reaper; for his reel and divider made grain-harvesting a success. And no man ever showed more thoroughly that his efforts were due to the gain to be secured to himself by patents. In the extension of these patents it was shown by sworn evidence that in those districts of the West where reapers were introduced, the increase in the production of grain was one hundred per cent.; for the labor of those regions could not harvest by the old methods more than one-half of what the soil was capable of yielding. The work of sowing is one-half easier than that of reaping; so that, if all was sown that could be, one-half of the crop would have had to rot on the ground. On an average each machine cut, during each year of its lifetime of ten years, two hundred acres, or a total of two thousand acres. Hence it was that each machine saved to the user, in labor alone, at least five hundred dollars, besides paying its original cost; and in this way, up to 1859, the saving of labor to the public amounted to thirty-six million six hundred thousand dollars. The gain to the public in the increase of the grain crop, due to the invention, to the same date, was one hundred millions of dollars. McCormick's patents were dated 1834, 1845, and 1847; but up to the year 1859 he had devoted twenty-seven years to his improvements. During this time he paid out one million eight hundred and sixty-five thousand two hundred and seventy-eight dollars. His receipts, exclusive of bad debts and costs of collection, were \$2,527,692, leaving him a clear profit of \$662,414. This included both manufacturer's profits and royalties. Was it too much? I think not. This man made half a million for himself from his patents in a quarter of a century. His invention yields ten millions to the country every year, and it will continue to do so as long as seed-time and harvest shall continue to the prairies of the West. But the devices that would cut the upright hollow stalks of grain were unsatisfactory when applied to cutting the more slender and fibrous stems and the yielding leaves of grass; and the sickle-bar, playing through slots in the guard-fingers closed at both ends, clogged so that no successful machine for cutting grass was made before Eliakim R. Furbush, in 1849, patented his guard-finger with the open slot. This enabled the knives to clean themselves, and effectually avoided clogging. This was applied to various machines that needed nothing more to fit them for cutting grass. The inventor was modest enough to estimate the value of this improvement at two dollars for each machine, although no machine that would successfully cut fine grass had ever been used before. Twelve years ago the number of mowing machines sold in one season was twenty-five thousand, or a gain to the farming community from this device of fifty thousand dollars annually. Furbush was unfortunate, and,

while the public was making this, he derived, during the original term of his patent, just twenty-five dollars and ninety cents per annum.

After machines had been made to reap, and other machines had been made to mow, it still remained to provide a machine that would do both. There were numerous attempts to do this before John H. Manny's patent of 1851, but none had succeeded. Before this, two distinct machines were required for the two kinds of work, at a cost of from \$235 to \$270, or an average of \$250 for the two. Manny sold a machine, equally efficient for both kinds of work, for \$135, saving \$115 to the purchaser of each of his machines. There were made and sold under this patent of 1851 sixty thousand machines, saving to the farmers in fourteen years, in this matter of first cost alone, six million nine hundred thousand dollars. But this is not all. Manny made the cutter-bars of his machine so readily adjustable that they could be raised or lowered to cut lodged grain, the lodged grain being picked up by the bar, cut, and saved. The loss from lodging has been frequently estimated at several bushels per acre; but at only half a bushel per acre, at eighty cents to the bushel, a machine cutting ten acres a day, the saving amounts to four dollars a day for every day a machine is used. Assuming each machine to be used only twelve days each year, the saving amounts to forty-eight dollars for each machine per annum. These machines, with usual wear and tear, were found to last eight years—a shorter time than McCormick's, because they mowed as well as reaped. Eight times forty-eight dollars is \$384, and the sixty thousand machines saved in lodged grain alone \$23,040,000. Add to this the saving in first cost of machines, and Manny's inventions saved to the agricultural community in fourteen years within a fraction of thirty millions of dollars. Manny secured no less than thirteen patents, from which he made altogether a trifle more than \$283,000 including his profits as a manufacturer, or less than one per cent. of what the farmers had gained from them during the same time. But Manny's profits, like those of every other inventor, ceased when his patents expired. But the public, with these, as with all other inventions, has their benefits for all time; and the same rule holds good for small inventions. In 1861 Nathan Brand patented a machine for making hoes by rolling instead of forging the plates. This reduced the cost from twelve to nine dollars a dozen; and there are one hundred thousand dozen hoes made and sold annually in the United States. Brand made from it, over and above the expense of his experiments, three thousand six hundred dollars.

I had intended to include in this review the various improvements in horse-rakes, seeding-machines, cultivators, etc., which have added so much to the resources of the agriculturist, and each and all of which prove and illustrate the truth that the patent laws which evoked them have, more than to any other one class of community, been of incalculable benefit to farmers; but the length this subject has already reached forbids. It requires, however, but little reflection to perceive that if farmers should be deprived of all the aids that the patent laws

have induced inventors to provide, their agriculture would be relegated to the old-fashioned scythe and cradle, the bull-plow, the hand-rake, and the hoe wrought from bar-iron in the village blacksmith's shop. And of all classes, farmers can least afford to dispense with the system that has nourished and roused to energy and practical effect the inventive genius of our people. Themselves with fortunes based upon mental not less than physical labor, they cannot deny to the inventor the recognition of the grand old maxim of Holy Writ, that "the laborer is worthy of his hire."

Of the nearly 300,000 patents which have been issued by the Government, as shown by a table prepared by Commissioner Butterworth, 10,204 have been for metal-working machines, 8,238 for stoves and furnaces, 6,505 for railway cars, 6,740 for mills and threshing, 6,606 for harvesters, 6,686 for plows, 5,872 for applications for electricity, 5,060 for boots and shoes, 5,111 for steam-engines, 5,254 for lamps and gas fixtures, 4,993 for laundry, 3,568 for seeders and planters, 3,504 for railways, 2,417 for wearing apparel, 2,429 for dairy utensils, 2,888 for fences, 3,418 for metaling, 2,453 for beds, 3,156 for pumps, 3,719 for water distributors. Corset patterns have been 969 times patented, 754 machines for knitting, 734 nut and bolt locks, 1,219 methods for tanning hides, 884 fire-escapes, 500 artesian wells, 440 bread and cracker machines, 1,580 chairs, 450 vegetable cutters, 567 fire engines, and so on through a long list.

If there be any truer measure of a man than by what he does, it must be by what he gives.

JAMES A. WHITNEY, COUNSELOR-AT-LAW.

Special attention given to Patent and Trade-Mark Causes.

140 NASSAU ST., NEW YORK CITY, U.S.A.

JAMES A. WHITNEY, Solicitor of United States and Foreign Patents and Trade-Marks,

THE HARVARD FOUNTAIN PEN. —The Harvard is a flexible Gold Pen affixed to a fountain or reservoir holder. Having no air tubes, these objections have been finally overcome in the construction of this Pen, and the utmost simplicity and adaptation for the purpose having been the objective points sought for, we take pleasure in offering it as one in which this result has been accomplished to the highest degree possible. Every Pen guaranteed to give satisfaction. Send for Price List.

HARVARD PEN CO., 152 Broadway, New York.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:
FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: **JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.**

A Substitute for Gum-Arabic.

Gum-arabic may be used as a generic name for the various gums produced by the several species of acacias, many of which are particularly designated by their localities, as the Turkey or Arabic gum, the Barbary or Morocco gum, Cape gum, East India gum, gum Senegal, &c. Another variety, which, from its abundance, will probably soon be placed in the market, says the *Galveston News*, is obtained from the *Prosopis dulcis*, a leguminous plant, better known, perhaps, as the mesquite or inezquite of Texas and New Mexico, brought to notice in 1854 by Dr. Shumard, of the United States Army. It is similar in its properties to gum-arabic, exuding spontaneously from the tree and concreting into tears and lumps of variable sizes, semi-transparent, and of lemon white to dark amber shades of color. From an ounce to three pounds has been obtained from a single tree. The branches, however, furnish a purer quality than the trunk. Should the gum be easily obtained in large quantities, it would certainly become an important commercial article. In the Mexican cities, the drug-stores have it on hand, and large quantities of the article have been sent to San Francisco from Mexican ports on the Pacific. At present, however, this country is supplied in great part through England. In its chemical and physical properties it shows a close resemblance to gum arabic and gum senegal. Considering the vast quantities found in Texas, it is curious that no attempt has been made worth mentioning to place the article in the market. A prominent druggist of Galveston asserts that during Confederate times the mesquite gum was in general use in Texas, where it answered the purposes of gum arabic in every way required. The sticking qualities, too, of the Texas article are described as being in no way inferior to any of the other varieties. Here, then, is a home industry that might be worth investigating. Hon. H. J. Labatt, who has recently traveled extensively through the State, exhibited some specimens of gum mesquite in the *News* office, which he gathered himself in Western Texas, in the region watered by the Guadalupe River. He gives a glowing account of its abundance in that section, and thinks it deserves some attention. The better way, perhaps, to bring the article into notice and place it in the market, would be to ask a proper recognition of its merits by some of the pharmaceutical colleges of the country. Gum mesquite is a home production and is certainly worthy of consideration.

Among the tradesmen in town during the past week were C. H. Little & Co., Freeport, Ill.; Foster & Post, Saginaw, Mich.; J. Weil, Paducah, Ky.; Max. Elser, Fort Worth, Tex.; Horace Drew, Jacksonville, Fla.

Bad is a bad servant, but 'tis worse being without him.

Process for Printing or Transferring Designs.

Two Austrians have introduced a new process, by means of which matrices or engravings for prints can be produced in an economical manner. It is proposed to employ peculiar metal positive prints of the designs to be copied, which are to be obtained by producing, at first in low relief work, the design to be copied, on a zinc plate by etching the latter by galvanic action. For this purpose the zinc plate to be etched is covered with a body of color or coating in which the design to be transferred is traced by means of a tracer or graver, and the plate thus prepared is then used as a positive electrode in a galvanic decomposing cell. A second zinc plate, of the same size as the plate to be etched, and serving as the negative electrode, will be placed together with the positive plate, but at a proper distance from it, in the decomposing cell. After the galvanic current has sufficiently operated upon the zinc plate, which is placed in a solution of sulphate of zinc mixed with sulphuric acid, the etched plate is to be taken out of the decomposing cell and washed in a bath of potash or soda lye in order to remove the remainder of the body color. But the fact that all the engravings appear to be of the same depth is prejudicial to the clearness and sharpness of the transfer of the designs from a flexible printing plate or surface, produced by the aid of the etched plate; since, besides the fine raised parts, some parts also of the ground which are not intended for printing may be transferred or reproduced. To obviate this objection it is necessary to clean the zinc plate with a rag, to dry it off, and then to cover entirely all the low etched places with a mass or composition such as is used for printing rollers, and composed chiefly of glue, glycerine and sirup, by which operation the plate becomes perfectly even and plain. This is done for the purpose of preventing the tin from entering into the low etched places during the process of soldering. After this the widely-veined parts must be more or less heightened with tin to the effect that they may appear deepened or recessed in the matrix, and that the blank or unveined places cannot be printed at once when the designs are transferred upon wood. The composition is then removed by putting the plate in warm water, and the parts thereby dissolved are made even with a scraper. From the metal plates thus prepared the printing matrices are obtained in the following manner: The zinc plate is placed on the hollow bottom plate of a powerful press, which plate can be heated by steam and cooled by cold water. The composition, to which the required softness is imparted by adding some solution of hygroscopic salt, such as chloride of calcium, chloride of zinc, or chloride of aluminium, is poured upon the oiled zinc plate, and the upper pressing plate, covered with a piece of linen of the same size as the zinc plate, is pressed down. The lower pressing plate, which must be perfectly plain and even, in order to enable the zinc plate to bed evenly and equally in all parts, is provided

on its four sides with raised borders of the height of between one-sixteenth to one-eighth of an inch, by which the thickness of composition to be pressed upon the linen fabric will be regulated, the pressure of the upper pressing plate causing any surplus quantity to be squeezed out. During the time the upper pressing plate is being pressed down, cold water is caused to flow through the bottom plate, whereby the setting or solidifying of the composition adhering to the linen fabric is much expedited. The linen, together with the composition firmly adhering thereto, and representing in relief the sun parts in the zinc plate, discharges itself from the composition, and a matrix is thus obtained which is to be coated with a caoutchouc varnish, in order to render the matrix more resistible.

The matrix is now ready for producing prints. The prints of relief designs will be made in the following way: The matrix is passed over by inking rollers coated with any desired color, and is then gently pressed against the surface to be decorated, whether of wood, paper or plastered wall surfaces, by means of a brush, and finally carefully removed from the surface. The designs now appear to be transferred on the grounded or prepared surface; and for the purpose of fixing them nothing further is required than to varnish them as is done in hand work.—*British and Col. BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

A SPECIALTY.

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and Diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows: 1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight, Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double-Sized, and will stand any climate or the most acid of fluid inks.

Send for Sample Sheet. ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

Correspondence.

BOSTON ECHOES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
250 Devonshire St., BOSTON, Sept. 16, 1884.

For the past few days the weather has been decidedly "winterish." The sudden change has brought out overcoats in great numbers, and from the many wrinkles observed they are of last year's growth.

In times such as this, with money at 10 per cent., one looks at his pawn ticket very frequently, and then consults the weather reports. To redeem that overcoat, or not, is the perplexing question. And then perchance another week brings weather tempered with a sunny mildness and two weeks' interest on the "loan" is lost. Methinks I'll shiver awhile and wait until the loan matures.

The days are getting shorter and early closing has been discontinued, while the hours of labor are growing longer. In fact, the trade is beginning to experience a little activity and from now on business generally is expected to loom up.

The Thorpe Manufacturing Company struck the key-note of popular fancy when it introduced its unique novelties in the autograph and scrap-book line. No such publications have ever been placed on the market as the "Hour" and the "Longfellow" autograph albums. The numerous poetical quotations, so aptly illustrated by pictorial scenes, show a keen appreciation of the beauties of English verse, and, being presented in these albums, tends to educate the possessor to a greater appreciation of the beautiful. As might be expected of such meritorious publications, these albums are having an unprecedented sale. Wherever shown, orders are easy to take.

Another publication just issued by the Thorpe Manufacturing Company is the "Mental Portrait" album. This is decidedly a novelty in its way, and is prepared with a view of combining amusement and instruction in a popular form. Each page of the book contains some thirty questions, with blank lines under each, whereon is to be written the answer. These answers may be given in sober earnest or they may be treated humorously, according to the taste of the writer. As

can be readily seen, such an album may prove a source of much interest when filled with the self-confessed opinions and tastes of friends and acquaintances, and will prove much more entertaining than any mere albums of autographs or collection of quotations and machine poetry. In the "Mental Portrait" album is given, in record form, an insight into the characteristics, style, propensity and humor of the writers, which may serve in after years as a much more direct and pleasing reminder of the traits and peculiarities of friends than any other remembrances. Having myself consumed no small amount of "midnight oil" in vain endeavor to woo the poetic muse in behalf of some fair lady's autograph album, I heartily indorse the "Mental Portrait" album, and earnestly recommend it to the trade. In the name of philanthropy, let dealers keep it in stock, and receive the blessings of the thousands of persecuted victims whose names are forced into autograph books.

Winkley, Dresser & Co. report that since the first of the month business has been very active, selling goods by day and packing by night. A large share of this trade was in school supplies, the house having unexceptional facilities for handling the several lines of goods needed by the school committees. Trade in blank-books is also reported very fair by this firm, which handles only blank-books of its own manufacture.

Ward & Gay, jobbers and dealers in stationers' supplies, are preparing for the fall trade by stocking up with staple goods and novelties. The month so far has been quite active. In memorandum pads this house is offering the trade some very close bargains. It is somewhat doubtful if writing tablets can be bought anywhere in such quantities and at such low figures as Ward & Gay are prepared to quote. The house secured lately several tons at extremely low figures, and is able to accommodate dealers whose demands call for such goods. In the card department Ward & Gay are displaying some elegant novelties. Their sample room is replete with an endless line of fringed, frosted and plain cards for the holiday season. A rich line of metallized Christmas novelties is also displayed. For these goods Ward & Gay have the exclusive control, they being made expressly for their

trade. Their travelers are now on the road, and report good business. A. L. D.

CHICAGO CHIMES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE AMERICAN STATIONER,
113 East Madison Street,
CHICAGO, September 12, 1884.

There were more seersucker suits in Chicago this week than were ever seen within the memory of the oldest settler. Time was when a man took his life in his hands on appearing in public with those airy garments. But for the last seven days humanity has been too limp and damp to manifest indignant offense at the veriest dude, and these harmless persons have enjoyed unusual immunity. They owe it to the warm weather. The two or three conventions in the city, the exposition, and the fair have unfortunately come just at a time when the weather is unusually hot, and those who attend them go away with the impression that the much-vaunted coolness of the Chicago atmosphere is a myth. It is hard to make them believe that never in its history before has Chicago had seven days of such weather. It could not last very long, however, and yesterday and to-day, as if to atone for the period of suffering imposed upon us, the weather has been a model of coolness and comfort.

Chicago is crowded with strangers brought here by the State Fair and the Industrial Exposition. The hotels have been doing a thriving business, and the fair and exposition are crowded from morning till night.

There must be some subtle fascination to the agricultural mind in fairs, and especially State fairs, or else so many sun-browned sons of the soil would not pace up and down in the hot sun at the driving park as were seen on the grounds this week. The red pop-corn balls, popped a week ago last Saturday, and the spicy peanut were patronized to an enormous extent, and the "aownly two-eaded caow in the world, alaive and well, and in perfect halth a-walkin' around on the inside," caught the dimes of the multitude. It was only the town-bred folks, though, that the fresh-pressed cider man captured. The hardy son of the soil knows that that gummy, sickening beverage is no good until it is older, and he shuns it.

Assistant Secretary Mills says that this is

the most successful meeting yet held. Every department is fully 50 per cent. better than it has ever been heretofore, and more foreign localities are represented than ever before. Nearly every State in the Union has contributed entries, and England, Ireland, Scotland, France, and the Canadas have made large exhibits of stock.

The exposition continues to be a centre of attraction to both visitors and residents, and deserves the patronage bestowed upon it. The material on exhibition is entirely new, and far more interesting and attractive than ever in every department.

Among stationers a general feeling of satisfaction prevails, owing to the bright and promising opening of the fall season. A visit was paid to the Chicago office of Clagug, Schlicht & Field, manufacturers of Shannon files and cases. J. M. Brown, the Western manager, states that since he has established himself here the sales of their files and cases have been doubled and the demand is increasing daily. The house is preparing to introduce a new cabinet especially adapted to the use of lawyers and public officials. Mr. Brown has room for a few live canvassers, and any salesman traveling in that line will find it to his advantage to communicate with him.

The John Morris Co. has been organized here with a capital of \$300,000, all paid in cash. The company purchased of John Morris his stock of goods, machinery, &c. John Morris has been elected president and manager of the company for the ensuing year. The stockholders consist of eleven of our leading citizens. The heads of all the departments are retained, and the business goes on the same as before. No change of any kind has been made, and as has been done heretofore, all goods received will be paid for spot cash.

In regard to the injunction applied for by Brown, Pettibone & Kelly, Mr. Morris states that as he is not the legal successor of Culver, Page, Hoyne & Co., no contract made by that firm could bind him, he having no knowledge of its existence at the time he bought the business. The injunction was to prevent John Morris from supplying goods either directly or indirectly to any county, county officer or agent for the use of the counties in the State of Illinois, outside of Cook County.

De Lang's inks, manufactured by Keen & De Lang, are continuing to meet with a deserved success. The business is reported as exceeding this year that of any season in the past eleven years. These inks have an immense sale in this city and are recommended by the leading business houses here. A large and constantly increasing demand exists for De Lang's French Copying Ink, which writes a dark red and finally becomes a most beautiful and permanent deep purple-black color. This ink will copy through several sheets of copying paper. It resists acid and does not corrode the pen.

Cameron, Amberg & Co. are daily increasing their already large trade and report a very good business.

J. Russel Jones, formerly representing the stationery department of the *American Book-*

seller, and well known to the New York city stationery trade in this connection, but now representing Rand & McNally, of Chicago, starts this week for a business trip throughout the Northwest. Noz.

"LONE STAR" SCINTILLATIONS.

[CORRESPONDENCE OF THE STATIONER.]

AUSTIN, TEX., September 10, 1884.

The prevailing temperature is 95° to 105° in the "Lone Star" State about this time—and, indeed, such a protracted season of hot weather has not been experienced in this country for many years, and this is brought about by the persistent drought which is prevalent throughout this whole State, and more especially in the southwestern portion of it.

This has indeed been a trying season upon the merchants in every line of industry, and there are to be found many very upright and conscientious men located throughout this State, upon whom this trying ordeal has been especially severe, and it has had the effect to put to test the financial abilities of many of those who heretofore have never known what it was to be real hard up. This stringency has been a prominent companion of the stationers and printers, and it can safely be said that such a continued season of depression has not been experienced in Texas in this class of trade for ten years—if, indeed, ever before. In Galveston, the other day, I found all of the stationers "at home" and ready for business, which had up to that time given them a wide berth. Wise business sense, together with good judgment and a regular "Sand Island Mascot" have steered them clear from the dangerous reefs and damaging rocks, and from heavy purchases. But the ill results so often occasioned by the lack of the before-mentioned essentials to success, will not befall the Island City stationers this year.

Wm. Terry & Co., who are the principal retailers and jobbers of stationery and paper in Galveston, are quite "down in the mouth," on account of protracted dullness in their trade. The firm is a very staunch one, and is very conservative in all of its transactions; it enjoys the confidence both of its city and wholesale trade throughout the small towns in Southern Texas. Mr. Terry has been home only a short time from a purchasing trip North, but he has had plenty of time since his return to see the dull condition of things in his line, and to countermand several orders which he had placed for future shipment.

M. Stricklin & Co. are beginning to wake up from a long sleep during the summer, and report trade in lithographing, printing, and stationery as brightening up. This concern, since the death of M. Stricklin, a year or more ago, has continued under the management of his son and his active partner, the firm name remaining unchanged.

Jos. Mason is an "old-timer" in the book and stationery business in Galveston, and he studies well the interests of his customers, keeping always for those who favor him with their patronage a complete line of reading matter and fancy stationery, together with school supplies. He told your correspondent

that, in all his experience, he could not recall a season so utterly devoid of activity as the present one.

J. D. Lawyer has sold his stock of stationery, periodicals, &c., to Victor Phillips, a young man of character and of ability to run the establishment successfully. Mr. Phillips is an old clerk of Jos. Mason's, and has a host of friends who promise him their patronage.

Shaw & Blaylock, the publishers and printers, have dissolved their copartnership in the job printing department of their business, and W. A. Shaw is continuing that industry under the firm of W. A. Shaw & Co.

The Galveston *News* now occupies its new building on the Strand—which is perhaps the handsomest newspaper establishment in the South—it is built of pressed bricks with white marble trimmings.

About the same quite state of affairs which prevails in Galveston rules supreme also in Houston, "The Bayou City."

W. H. Coyle is the giant in the commercial stationery, printing and lithographing trade in that city, and is perhaps the most enterprising man in the trade in Texas. He has a very complete printing and bookbinding establishment, and he enjoys the confidence and esteem of a multitude of friends.

G. W. Baldwin & Co. do the leading book and stationery business, and following close in their wake comes W. J. Hancock, Jr., who, although he has had only a few years' experience in the trade, has made wonderful strides, and for courteous dealings and prompt pay cannot be beaten.

Wilkins & Adey are preparing for a good retail trade this fall, something like that which has heretofore been vouchsafed to them; they are carrying perhaps the finest line of goods in bric-a-brac and gift goods in the city.

It is hardly ever the case that it gets extremely dull at any season in San Antonio, the "Alamo City," for there is a varied list of productions in the vicinity for which San Antonio is the market, and the brisk times brought about by the moving of wool, sheep, cattle, hides, cotton, wheat, &c., are so scattered along as to give the town generally one continued season of uninterrupted activity. But business men there have all had great reason to complain this summer, and a real genuine corpse has been in their midst for many months. It is much brighter there, however, now, and a smile on the face of a stationer is no uncommon sight to witness.

The old veteran, Nick Tengg, rides the lead horse in the tandem team of stationers and booksellers in the "Alamo City," and from an innocent little newsboy, peddling the morning papers at five cents a copy many years ago, he has grown steadily upward until to-day he is the owner of a fine business house on Main street, containing one of the best-selected stocks of stationery and books to be found in this State, and a safer man than "Old Nick" is not to be found anywhere.

G. W. Baldwin & Co. have a branch house here splendidly managed by Mr. Burke, who has been in the business long enough to know its requirements. This store is well located

(Continued on page 380.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

IMPORTANT NOTICE.

DAVIDSON VELVET RUBBER PATENT

FULLY SUSTAINED BY THE U. S. COURTS.

WE wish to call the attention of the trade to their liability in selling erasive rubber that infringes our patent. Since the U. S. Courts' decisions have been made, sustaining our patent, one firm has been obliged to produce their books in court and a decree of *more than One Thousand Dollars* made against them by U. S. Commissioner. The Velvet Rubber is composed of certain materials that render it superior to any eraser in the market, and having a soft velvety finish is always ready for use.

Our Bands, on account of their superiority, are specially called for by the Signal Service, War, Navy and Treasury Departments at Washington, and are also used by the Interior Department and both Houses of Congress. We also make COPYING SHEETS, HARD RUBBER PENHOLDERS and PENCILS. ☞ Catalogues sent on application.

and is fast becoming a popular resort for all who are in quest of the latest and best goods in the book and stationery line.

R. M. Moore & Co. succeed Shepard Bros. & Co., the wholesale paper dealers and printers, and although they are both gentlemen of very limited experience in the business into which they have entered, yet it is fair to predict for them a successful career, as their general knowledge of business is admirable. San Antonio is the only city in the State, perhaps, which is not overdone with stationery establishments, and is very different from its neighbor, Austin, "the capital city," which is flooded with them, and as a consequence, none of them are prospering. A regular damper was put on the trade last fall by the failing of B. J. Kopperl with \$36,000 liabilities, and all his goods were thrown on the market at a season when it was hoped by the legion of stationers that they would have a harvest, and rid themselves of fine stocks brought out here for the holidays; but his failure, coming just two weeks before Christmas, was a crusher for them, and then, a few days later, A. K. Hawkes, in self-defense, threw to the breeze his red flag, and the big bell rang, and up jumped the auctioneer and down came the hammer and away went his goods to the highest bidder. Those who wouldn't fail, or hire an auctioneer, found it a tough matter to kill time during what should have been their most active season. Well, so it goes, and as a result, there are two stocks of stationery for sale here by two worn-out stationers, tired of bucking against such obstacles and competition.

Jos. A. Nagle is the solid man here, and holds his own wonderfully well. He has just been awarded the State contract for two years' supply of stationery to the public offices located here, amounting to about \$8,000—he and the resurrected Mr. Kopperl being the only bidders.

Edwards & Church have dissolved partnership, and Mr. Edwards now carries on the business in the old stand, the firm being now Edwards & Co., and a more genial gentleman it would be hard to find. He has a very good trade, and his establishment is perhaps the most popular resort for those in search of reading matter in the city.

The enterprising young printer, E. W. Swindells, was awarded the contract for State printing, for the ensuing two years, yesterday, his bid being lower than any of his competitors, some three or four, among whom were Clark & Coates, of Galveston, who have been very unfortunate in their persistent endeavors to get a slice of this job of printing. Smallwood & Grey, of Houston, also got "left," but they could not all have it, and indeed Mr. Swindells is well equipped and prepared to do the work.

No rain for five months throughout this whole section, but at this writing it does look as though it is bound to pour, and that soon, although it is now too late to benefit crops, but it will save stock from famishing.

I would like to tell your readers about the

new capitol building now in course of erection here—which is to be one of the largest public buildings in this country—625 feet long by 340 wide, made of native marble, costing six million dollars, with a dome 355 feet high, and a real gold star 5 feet high over the front entrance, but 'nough is 'nough. CRESCENT.

CINCINNATI CIPHERINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, September 16, 1884.

Here is autumn fairly on, and still not the trade that has been hoped for. But the weather most of the time has been torrid. Such weather would make respectable mid-summer temperature in Panama or any other tropical city. It has kept trade back. The drought continues in the Ohio valley; but despite drought and torrid weather, the fall has brought a perceptible improvement in trade. A still more emphatic improvement is confidently expected when cooler weather sets in. The clearing-house exchanges were perceptibly decreased by the hot weather last week in Cincinnati, as they were in every other great city in the United States.

The local retail trade, however, has been good in Cincinnati, but the Exposition must be taken into the account in explaining that phenomenon. Yet outside of the influence of the Exposition there is an improved feeling. Senator Sherman, who was on 'Change late last week, said that with the country teeming full of wealth, with crops more abundant and more bounteous than the country ever before produced, there was likely to come a "push" which everybody would feel, just because the crops were so abundant. Their very abundance made prices low, and would tempt farmers and other holders to stand out for higher prices and keep their commodities shut up meantime in granaries and warehouses. The senator thought the pinch would be temporary, but that while it lasted it would hurt bad enough to be no laughing matter.

Money is very close in Cincinnati, and lenders are extremely cautious. At the same time, safe investments are in demand. All good local stocks are high, and there is a strong demand for desirable real estate. The worst indication of the seriousness of the

times is the great number of workmen that are idle and seeking employment. The carriage factories which have employed as many as seven thousand workmen, have scarcely work for a fifth part of that number now. Then there is a sort of voluntary idleness on the part of about 1,200 cigar-makers, and as many stove-molders, both of which classes are at loggerheads with their employers about prices and shop management, which has resulted in a lockout of nearly nine months duration.

In the stationery trade the situation is a part and parcel of that of general trade. Dullness is the rule. There are occasional temporary exceptions, however.

John Holland finds a steady demand for the great staple product of his factory, his gold pens. He has trade also for a great variety of fancy articles, but the gold pen is his stand-by.

People seem to never grow weary of the Globe files. The product of the Globe File Company's factory is so varied as to furnish something for everybody and it is to be expected that such a concern will prove an apparent exception to the rule by which general trade is depressed at present.

J. R. Mills & Co. are still receiving calls from far and near for their reversible envelopes. These have gone to nearly every quarter of the globe and wherever they have been introduced the demand for them has steadily improved. Once in the field they hold it.

Snyder & Hoole find business less lively in their Chicago house than in their Cincinnati house. The drought, which is local to Cincinnati, explains this difference to some extent.

W. P. Carpenter & Co. are not oppressed with orders, but they have a good, fair share of the trade in their line, and they are not downhearted.

Adolph Knebs, president of the Kuchs Lithographing Company, and one of the founders of that concern, died yesterday at the age of fifty-three.

J. F. Shumate, successor to H. W. Derby, will represent the Harpers' in a book house, at 68 West Fourth street, opposite Robert Clarke & Co.'s establishment.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

GENTLEMEN'S SHAVING PAPER.

This is a novelty—not novel in detail, but in its *tout ensemble*. The cut shows the design of a tablet or pad of paper—about as large again as the engraving—fastened to a heavy and large mount, which is appropriately decorated.

The numerous inquiries that all stationers receive, around the holiday season, for some inexpensive article, suitable for a lady to give to a gentleman—a question so difficult to answer satisfactorily—has in this instance been solved. The quotations have been carefully selected, with a view to their appropriateness. The sale is not limited to a season, but will continue throughout the year. More elaborate mountings are furnished in satin, satin hand-painted and plush, giving a variety. These tablets are also made without backs. James D. Sloan & Co., 122 South Eleventh street, Philadelphia, are the manufacturers.

Production of Colored Wall-Papers.

In the manufacture of colored wall-papers as now practised the white paper is first coated with a uniform tint called the "ground" before any of the figured colors are put on. This is done by machine. The paper cannot be rolled until perfectly dry, and a very high temperature and the employment of a considerable number of persons are necessary for that purpose, and the losses during drying, both accidental and caused by the negligence of employees, are considerable, and as it is necessary to have on hand a great variety of ground tints, this operation requires a large stock of colored papers. When the designs for the colored figures are out of the hands of the designers, they are handed to persons to be placed on wooden blocks or cylinders to be used in the printing. For this purpose each color of the design is drawn, and the outlines of the same are reproduced on as many blocks

or cylinders as there are colors. Each color is printed separately by a long, expensive, and oftentimes inaccurate operation. The blocks or cylinders are then given to engravers to be engraved. The colors used for the printing are generally in the form of paste mixed with glue. The engraving must therefore have enough relief for the purpose of printing to prevent the details of the colors from blending.

A new invention substitutes engraving by the electro-chemical process; but in order to adapt this process to the purpose it has been necessary to invent colors which are sufficiently clear and also sufficiently strong to print with the small relief possessed by plates engraved by the electro chemical process. A composition has, therefore, been prepared which directly prints or stains the surface of the paper the same as used by the old process without using (as in the printing of textile fabrics) any mordant or thickening.

The basis of the dyes consists of anilines, which are dissolved in a concentrated solution of boiling potash. Each color is developed after the solution becomes cold by adding a few drops of acetic acid, after which it is filtered, and the colors are ready for use.

As the white papers used in the manufacture of wall-paper are strongly aluminized, the potash used in making the new colors, when in the presence of the alum, forms a gelatinous aluminum, which affords solidity, purity of tone, and brilliancy to the colors. The colors are printed directly on white paper, without the ground heretofore necessary, and, as they are transparent, one color is printed over another, whereby different colors are obtained by combination. Thus, blue printed on yellow, forms green; red on yellow, orange, &c., and the superposition of these colors in various proportions gives varieties of tints or shades to the different colors. After the printing, the paper is dried immediately with a roll of blotting-paper, in order to remove the excess of dye, and it can then be rolled without the heating and drying hitherto necessary.

The advantages of this invention are, therefore, first, to dispense with the first operation of "grounding;" second, to substitute for hand-engraving the less expensive and more expeditious method of electro-engraving on zinc; and, third, to diminish the labor of printing, inasmuch as the method of combining colors enables the operator to dispense with a large number of blocks or cylinders heretofore necessary.

To render paper soft and flexible, heat it with a solution of acetate of soda, or of potash dissolved in four to ten times its weight of water. For permanent paper, to twenty parts of this solution one part of starch or dextrine is added. If the paper has to be made transparent, a little of a solution containing one part soluble glass in four to eight parts water is added. To render the paper fit for copying without being made wet, to the acetate solution chromic acid or ferro-cyanide of potassium is added.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties," will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

W. T. Shanahan, picture dealer, Portland, Ore., has assigned.

L. O. Gale, bookseller, &c., Mitchell, Dak., has been burned out.

J. C. Barney, bookseller and stationer, Detroit, Mich., has sold out.

The *Recorder* Printing Company, Fayetteville, N. Y., has been burned out.

Devoe & Co., manufacturers of photo apparatus, Springfield, Ohio, have assigned.

Frank Olsmith & Co., dealers in sportsmen's supplies, San Antonio, Tex., have assigned.

The *State Sentinel* Publishing Company, Henderson, Ky., has assigned to W. B. Washburn.

Bull & Francis, publishers, Chehalis, W. T., have dissolved partnership. Bull continues the business.

Martin Van Buren Bennett, publisher of the *Kansas Prohibitionist*, Leavenworth, Kan., has been attached.

Pearson & Swenson, booksellers, &c., Lindsburg, Kan., have dissolved partnership. The firm is now Pearson & Eberhardt.

Dennis F. Dealy, publisher of the *Chronicle-Herald* and the *Sunday Mercury*, Philadelphia, Pa., has sold out to the American Company, Limited.

Oscar Strasburger, of the firm of Oscar Strasburger & Co., importers and commission merchants of toys, fancy goods, china and glassware, of 443 and 445 Broadway, was on Tuesday declared to be insane and incapable of taking care of his property, by a sheriff's jury.

A fire broke out in the lower Cornwell paper mill, at Ypsilanti, Mich., on September 12. The fire caught in a wooden building filled with straw. This was entirely consumed, and the brick apartments against which it was built, in which rags were stored, was burned out. The main building, containing the machinery, was only slightly damaged. The loss is estimated at about \$3,000, which was covered by insurance.

Wilder & Co.'s Paper Mills, at Ashland, N. H., were totally destroyed by fire on Saturday night, involving a loss of \$75,000; partly covered by insurance. The fire started in the lamp-room. The buildings were large structures, and many workmen are thrown out of employment by their destruction. At midnight the Lake Village fire department was sent for, but could do little or nothing toward subduing the flames. This morning the fire again broke out in the ruins, and firemen were again summoned from Lake Village, as it was feared the railroad bridge adjoining the mills would be burned. On the way to the fire the train bearing the fire engines jumped the track, causing considerable delay, but none of the firemen were injured. The mills burned were known as Nos. 1 and 2.

The committee of creditors appointed to investigate the affairs of Hand & Ellsworth has completed its work, and will make a report to the creditors at a meeting to-morrow at two o'clock at the law offices of Bristow, Peet & Opdyke, 20 Nassau street. It has been developed that the firm has not balanced its books since 1877. A proposition for settlement will probably be made on the basis of 50 cents on the dollar, secured, but the time proposed by the firm at the first meeting of the creditors, two years, the committee will recommend to be shortened.

The affairs of the late firm of Butler & Miles, New York, will probably not be entirely settled up before the beginning of next year, as some outstanding accounts due the firm will scarcely be collected before that time. The assignee says that it is doubtful whether the estate can be made to pay more than 40 cents on the dollar, and in a certain contingency the creditors may not realize even that.

The Minneapolis *Daily Tribune*, Minneapolis, Minn., has been purchased by A. J. Blethen, late business manager of the *Kansas City (Mo.) Journal*, and William E. Haskell, son of E. B. Haskell, of the *Boston Herald*.

Seventeen executions were issued against the *Evening News* Publishing Company, of Philadelphia, on Friday, September 12, upon judgments confessed to various parties, for the aggregate amount of \$25,769.

H. W. Derby & Co., booksellers and stationers, Cincinnati, Ohio, have sold out to J. F. Shumate & Co.

E. G. Guenther, bookbinder, Cleveland, Ohio, has sold out to the Franklin Bookbindery.

W. P. Fry, wall-paper dealer, Lancaster, Pa., has been burned out.

Joseph Benedict, paper-stock dealer, Pittsburgh, Pa., has been burned out.

Henry A. Parsons, publisher of the *Advocate*, Ridgway, Pa., has assigned.

S. R. Allen, bookseller and stationer, Ridgeville, Ind., has sold out to M. D. Allen.

C. M. Cott has retired from the firm of C. M. Cott & Co., printers, Columbus, Ohio.

The Burton Fancy Printing House, Los Angeles, Cal., has recently been incorporated.

George H. Fuller, manufacturer of school furniture, San Francisco, Cal., has been burned out.

The American Roll Paper Company, St. Louis, Mo., has been incorporated with a capital stock of \$2,000.

Adams Brothers, publishers of the *Daily Register*, Raton, N. M., have discontinued the publication of that paper.

Schofield & Dodgson, paper-stock commission merchants, &c., Philadelphia, Pa., have been sold out by the sheriff. W. C. Hamilton obtained judgments for \$9,000 against them.

The Rounds' Type and Press Company, Chicago, Ill., called a meeting of its creditors, at which Edward A. Blake and C. A. White were elected trustees for the creditors. The liabilities are reported \$60,000 to \$70,000; actual assets not over \$15,000.

The assignment of the Union Catholic Publishing Company, Chicago, Ill., is said to have been due to the business running down owing to the depression in the book trade. About August 21 the former owners sold out to M. O'Brien and J. E. Heuneberry, it was reported, for \$10,000 cash. Liabilities, \$15,000; assets, \$7,000.

James M. Fitzgerald, paper-stock dealer, 135 and 137 South Fifth avenue, New York city, whose warehouse was destroyed by fire several months ago, has erected a new building on the old site, and has added to his business of paper-makers' supplies a full line of book, news, colored cover, and poster papers; also a complete line of manilla, tissue, wrapping and building papers, and will also carry his usual assortment of binders' and album boards, which he claims is one of the largest stocks to be found in the city. He has the entire control of several mills manufacturing bristol boards, colored cover, book and ma-

nilla papers, which he offers at manufacturers' prices.

Faust & Waters, printers and stationers, Crawfordsville, Ind., have dissolved partnership. Waters continues the business.

J. M. Shaw, printer and publisher *Express*, Elora, Ont., has sold out to his son, W. C. Shaw.

The Lansing Toy Gun Company (not incorporated), Lansing, Mich., has been burned out. Partly insured.

The "Climax" blotting is extending its fame, and is found to be well adapted to the public demand.

Tipton & Moore, stationers, &c., Egan, Dak., have dissolved partnership, J. C. Tipton continues the business.

The publication of the New York *Illustrated Times* has been suspended and in its place there is now issued the *Illustrated Sporting and Dramatic Journal*.

The Heath Letter File and Index Company, Boston, Mass., has dissolved, Elroy N. Heath retiring therefrom. Hilton F. Hosmer continues the business alone under the old style.

J. W. Newburgh & Co., wall-paper dealers, Dubuque, Ia., have assigned to J. C. Longville. They previously gave a bill of sale for \$3,500. They had a good trade.

Thatcher & Summerfield, publishers of the *Evening Herald*, Lawrence, Kan., have dissolved partnership. C. C. Thatcher, one of the firm, is now in business in Hornellsville, N. Y.

Thomas M. Bell, paper dealer, No. 11 Spruce street, New York city, has suspended, and called a meeting of his creditors at his store at 12 M. to-day. Mr. Bell estimates that his liabilities are about \$12,500, and that he has good assets of about an equal amount. He states that the primary cause of his embarrassment is his having to meet an unsettled balance of the liabilities of his old firm, amounting to about \$1,500, which his former partner, Peter Herder, assumed, but failed to pay, and that the general depression in business has borne very hard upon him. He owes but very little to the trade here, but is principally indebted to Philadelphia and Holyoke parties. Mr. Bell was formerly of the firm of Herder & Bell, which was formed July 1, 1879, and continued in existence until May 1, 1882, when a dissolution took place, Mr. Herder liquidating its affairs and assuming all its liabilities.

The Raplee Manufacturing Company, manufacturers of baby carriages and toys, Louisville, Ky., has elected S. W. Raplee, president, in the place of W. J. Duncan, resigned.

James K. Young & Co., manufacturers of children's carriages, New York city, have dissolved partnership. A new firm under the same style continues the business.

A dissolution has taken place in the firm of Bryant & Thacher, dealers in photo goods, &c., Boston, Mass., George S. Bryant having retired from the firm.

William Terry, of the firm of William Terry & Co., booksellers, stationers, &c., Galveston, Tex., is dead.

A. G. Powell & Co., dealers in bicycles, &c., Philadelphia, Pa., have dissolved partnership. A. G. Powell continues the business under the same style.

Weatherstone & Elkins, booksellers and stationers, Fergus Falls, Minn., have dissolved partnership. Weatherstone & Co. succeed to the business.

Among the out-of-town tradesmen in town during the past week were W. L. Stuve, Lincoln, Neb.; C. S. Bragg, of Van Antwerp, Bragg & Co., Cincinnati, Ohio.

The business lately carried on by Meyers Brothers, 62 John street, has been purchased by the New York Stationery and Envelope Company. J. H. Christie, who is well known to the trade, which he has been connected with for a number of years, will represent the company. He has vim and ability, and starts out under the most favorable circumstances. He has an ample stock of first-class staple goods, including a complete line of holiday novelties.

The bids for the official envelope contract for the remainder of the fiscal year have been opened at Washington, and the Morgan and Plimpton envelope companies were found to be the lowest bidders. P. P. Kellogg & Co., from whom the contract was withdrawn, did not bid again, and the successful firms' competitors were the Powers Paper Company, the Holyoke Envelope Company, of Holyoke, and Mrs. Reay, of New York.

The following communication, received by Chief of Police Canfield, of Buffalo, from Coroner Skinner, of Youngstown, leaves scarcely

WILLIAM RUSSELL & SON, 53 Devonshire Street, Boston, Mass.

any room for doubt that Francis F. Taylor, the Exchange place stationer, committed suicide by jumping into the Niagara rapids: "I have just completed the inquest on the body of a person unknown, male, about 5 feet 10 inches in height, hair only on the back of the head; color, brown; mustache, reddish brown or sandy; body nude; cotton drawers and dark pants still attached to the ankles, and shoe nearly new and laced on inside with silk braid. The collar remained about the neck, and retained two gold studs, one of them with the initials 'F. F. T., Oct. 29, '69.' Presuming that this may give some clue to the missing Francis F. Taylor, I forward you this note. The body was buried on the bank of the Niagara River. The skull was extensively fractured, which is common with subjects coming over the falls."

A new and enlarged edition of Edmond Dantes, the sequel to Alexander Dumas' Count of Monte Christo, is soon to be issued by T. B. Peterson & Brothers, Philadelphia. This is a fascinating continuation of Dumas' great romance and will delight all who have read Monte Christo.

The Lockport Paper Mill, at Lockport, Ill., was destroyed by fire on the night of September 8. The foundations, flumes, water-wheel, boilers and rotary bleachers were uninjured. The loss is estimated at about \$45,000, which is fully covered by insurance.

S. A. Maxwell & Co., Chicago, forward their general catalogue of stationery and fancy goods, which comprises a wide range of articles and a large assortment. The catalogue comprises 146 pages, fully illustrated, and is a good "trade companion."

Among the best literary and story papers published in this city is the New York *Family Story Paper*, published by Norman L. Monroe. This periodical publishes both serial and short stories by popular authors.

Lawrence & Baxter have received a new lot of fancy pen-wipers of new and novel designs; also a large importation of "J. H. P." paper in lighter weights than that hitherto introduced.

George Virtue, book publisher at Toronto, has failed, and offers to compromise at 50 cents on the dollar. He owes about \$12,000 and has nominal assets of \$18,000.

The Roache Manufacturing Company is very busy in filling orders for scholars' companions and other specialties.

George W. Hyatt has become the agent for the sale of Burkhardt's hall indicator. This is a novelty which is likely to speedily make itself indispensable to all business and professional men.

Joseph Oppenheimer has taken charge of the New York branch of Langfeld, Turner & Andrews. Members of the trade who may call at the New York office will meet with every courtesy.

THE STATIONER has received an octavo pamphlet published by Fowler & Wells. It contains a series of articles devoted to important health topics, among which is an article on the treatment of catarrh, also rheumatism, malarial diseases, backache, &c.

There seems to be a good demand this season for a fine grade of inkstands for library use, made of fancy woods. Keuffel & Esser are showing an extensive line of these goods of their own manufacture. The body of the stand is made of a variety of woods such as boxwood, cocobolo wood, mahogany, ebonized wood, &c. Each stand has a pen tray and one or more fancy cut-glass bottles, according to the size of the stand. Keuffel & Esser are also showing a combination pencil pointer and paper-weight. It is especially adapted to the use of draughtsmen.

R. Worthington forwards advance sheets of his list of new illustrated juveniles for the coming season. He certainly promises a wide range of entertainment for youthful minds. Worthington's Annual for 1885 will be an entirely new volume, full of interesting stories, papers on natural history, biographical sketches and other instructive and amusing reading embellished with over 300 beautiful engravings and full-page colored plates. It will be richly bound in illuminated covers. "Twilight Tales" is another attraction. A new edition of "Picturesque Tours in America," which will contain many desirable additions, is promised. An entirely new volume is to be found in "Chatterbox, Jr." "Andersen's Fairy Tales" will be handsomely illustrated and a long list of other books will claim attention and secure the favor of buyers.

The *Magazine of Art* (Cassell & Co., Limited) for October contains six full-page engravings in the best style of the wood engravers art. The frontispiece is from a painting by W. Q. Orchardson, recently exhibited at the Grosvenor Gallery. It is called "The Farmer's Daughter," and is in his most attractive manner. The next page plate is a homely scene, "The Rival Grandfathers," from the painting by J. R. Reid. Lionardo's famous head of Christ is reproduced in fac-simile from the original in the Brera, and is of itself worth the price of a year's subscription. There are pictures occasionally published which it is hard for the general public to understand, but the language of this portrait is unmistakable; it appeals to everyone. "His Eminence's Birthday," from the painting by Frappa, is of a very different class. It amuses us, and that is something to be thankful for. Fenerstein's touching picture "Alsatian Pilgrims" and "The Minister's Garden," by Cecil Lawson, complete the list of more important subjects of this number. The reading matter of the number is instructive and entertaining, and profusely illustrated. The *Magazine of Art* has more than earned the name of "the leading art magazine in America."

Henry Levy & Son are showing one of the most complete lines of fancy goods and holiday novelties that will be presented to the trade this season. The collection is worthy of inspection by intending purchasers.
